A WORD ON THE EAST.—The English public must have, from time to time, in theatres and places of general resort, been struck by the appearance of a very princely-looking Oriental among us, Meer Jafure Alee Khan, of Surat. This gentleman, so gorgeous in attire, and so courteous in manner, is the Prince of a province of Western India—the most interesting to us, perhaps, of all our Oriental possessions, being that in which our earliest mercantile settlement was formed. He is now, accompanied by his secretary, Mirza Ally Khan, engaged in bringing before her Majesty's Privy Council certain claims, in the adjustment of which the little daughters of the Prince, who now remain in the Palace of Surat, are exclusively interested. The character of these claims is remarkable, and in their detail illustrate curiously, not alone the peculiarities of Mohamedan life, but our manner of dealing with Oriental princes. We are not sure that wisdom and pure justice always have their share in these affairs; and, while we consider it right to send large forces to the support of our ally, the Sultan of Turkey, it may be worth considering whether it be not good policy to cement, as firmly as may be, our friendship with the Moslem Princes of India, one of whom now claims the hospitality of our land, in the person of Meer Jafure Alee Khan Bahadoor, of Surat.

THE RUSSIAN ARMY ON THE AUSTRIAN FRONTIER.—The Kalisch correspondent of the *Lloyd* writes, that when the concentration of the Guards shall have been completed, there will be no less than 174,000 troops, including 16 000 cavalry, not far from the Austro-Gallician frontiers. They consist of twelve regiments of the first infantry corps, 48,000 men; eight regiments of the second infantry corps, 32 000 men; 48,000 foot guards, and 32,000 grenadiers. The cavalry consists of the first and second light divisions, the cavalry division of the guard, and the seventh light cavalry division belonging to the grenadier division—in a division numbering 4000 men. The reserve brigade in Poland are not included in this estimate.

ON Monday, by the command of Prince Albert, the whole of the privates and non-commissioned officers of the Grenadier Guards under orders for the Crimea were treated to a banquet, consisting of substantial joints, puddings, strong ale, &c., at the Wellington Barracks, St. James's-park. "The Health of the Queen, her Royal Consort, and Family," was drunk with the greatest enthusiasm. The men are all in high spirits at the prospect of a brush with the Russians.

CANDLES FOR EXPORTATION.
PATENT BELMONT SPERM, and Patent Stearine Sperm for tropical climates. Patent Australian Light Patent Distilled Wax and Composite Candles for the Australian and Cape waters, and temperate climates. Price's Patent Export Night Lights. Price's Patent Wax and Composite Candles. PRICE'S PATENT CANDLE COMPANY, Belmont, Vauxhall, London.

PRICE'S PATENT CANDLE COMPANY have recently been compelled to proceed in Chancery against Mr. Hamilton Shakespeare, whom they had detected in habitually selling the Candles of other manufacturers as those of the Company, and their Agents, in many cases, have been severely injured as well as by consumers to the supposed commission of similar frauds in many other places. The responsibilities incurred by persons guilty of such frauds seem not to be generally known. In the cases now in progress for the Company, special circumstances induced the Company to accept as damages the sum of £50 and costs in a canary, the costs of the Company paid by the Defendants, in addition to their own costs, amounting to £250 more. In a similar fraud now in progress, at the Old Bailey, Sir Thomas Wilde, Q.C., before a Committee of the House of Commons on the Wine Duties, 1852, Dunne Sherry, 36s., 30s.; Sherry, and natural Sherry, 36s.; fine old sixty bearing Port, 42s.; St. Julien Claret, 30s.; Moselle (beautiful flavour), 36s., 42s.; Milk Punch, 36s.; Sparkling Champagne (of the celebrated 1846 vintage), 42s.—FOSTER and DOYLE, Mitre-court, Milk-street, Cheapside.—Cash. Carriage free.

ORDERS for the OCTOBER BREWINGS are now being registered.
THE BREWERY, LEEDS.
Home Consumption stamps and Colour f ree.

London ...	169, Upper Thames-street.
Dublin ...	66, Middle Abbey-street.
York ...	Swinegate.
Manchester ...	Blackfriars.

TETLEY'S EAST INDIA PALE ALE.
The Brewers of the OCTOBER BREWINGS are now being registered, and will be supplied according to priority of date.
Parties are recommended to give their orders in due time to prevent the repetition of the disappointments of last season. Every pale pledges shall be used to provide a speedy supply; but the press of orders is already so great as to render it impossible to guarantee the fulfilment of those unregistered, out of the early brewings.
To most judges of this fine beer is well known; to them it may be sufficient to say, the quality will be maintained. Others are respectfully referred for proofs of its excellence for Bottling, Export, or Home Consumption, theoretically, to the standard work, "Chemistry, &c., applied to the Arts and Manufactures," page 877; and the "Analytical Report," &c.; practically, to the Colonial and Foreign Markets, and to the numerous vendors throughout the United Kingdom.
List of authorised Agents and respectable Bottlers and Retailers of TETLEY'S PALE ALE may be obtained on application.
THE BREWERY, LEEDS.

Uffer, 5, Conduit-street, Regent-street; and 67, Paternoster-row.

Full descriptive Lists sent on application. 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, Price Fifty Guineas.—This instrument is a Brilliant Cottage Pianoforte; Three Strings, and the fullest Grand compass of Seven Octaves. It is expressly designed by every possible means to secure the greatest amount of wear, and to stand perfectly in tune in all climates. The workmanship of the best description, the case is round, full, and rich, and the power equal to that of a Grand Pianoforte. The case is of the most elegant construction, in rosewood, the touch elastic, and the tone full and sweet. This instrument in reputation has been taken to insure its standing well in tune. Mr. Chappell especially invites the attention of the public to the properties, and merchants to the Foreign Model, feeling assured that no Pianoforte will be found more suitable for exportation. Mr. Chappell has made at the same price. Every instrument will be warranted, and (if desired) exchanged within twelve months of the purchase.—50, New Bond-street, London.

THE EYE DOUCHE—for Applying Lotions to, or Bathing the Eye—is simple, self-acting, and portable; and has been found of the most essential service in the treatment of Inflammation, Weakness, Specks, &c. ASSOCIATION for the RELIEF of the WIDOWS and ORPHANS of SEAMEN and MARINES, in Cases arising out of the PRESENT WAR
The Committee beg to offer their grateful acknowledgments to those Clergymen and others who have kindly contributed to the Funds of this Association. The Committee are anxious, however, to urge upon the British Public at large the importance of making a more adequate provision for the relief of the Widows and Orphans of any of our gallant seamen and Marines who may lose their lives in the prosecution of the present war; a contingency which has filled them on several instances.
Contributions received at the bank of Messrs. Ransom and Co., 1, Pall-mal East, and at the office of the Association, 1, James-street, Adelphi, London
WM. EDWARD PARRY, Rear-Admiral, Chairman of the London Committee.
A. ALLAN, Hony. Secretary.
CHARLES RAY, Secretary.

LONDON ORPHAN ASYLUM, CLAPTON (Incorporated 1813) for the Maintenance and Education of Respectable Fatherless Children of either sex and from every locality.

C. J. DANIEL, M.A. }

SOLDIERS' WIDOWS.—Appeal for the Home of the Widow of the Soldier Killed in the Russian War.—THE CAMBRIDGE ASYLUM, Kingston-on-Thames. Under the patronage of the QUEEN, His Royal Highness the Prince ALBERT, and the other Members of the Royal Family, was completed last year, the foundation stone having been laid by the Consort of our Queen; and, in February last, twenty widows and private soldiers and commissioned officers were elected. Eighteen additional rooms are now ready, requiring only to be furnished. Thanks to the munificence of his Royal Highness the Duke of Cambridge, who gave the site of the Asylum, and also to the many friends of the sacredness of this noble building. Funds are earnestly entreated for the furniture of the vacant rooms, as well as for the maintenance of the inmates.
The simple but affecting summary of the casualties at the battle of Alma, as detailed in Lord Raglan's Despatch, gives the Duke of Cambridge's commissioned officers, 19; drummers, 3, and rank and file, 300, thus already augmented by the death of so many severely wounded. Such a scope is here opened for the active benevolence of the British public, and especially of those blessed with wealth, and high in the social scale, that we have to lament the loss of one lovely husband, to come forward and help the otherwise utterly helpless
The Duke of Cambridge is personally and acknowledgment from our grant and sole country to the service of the Duke of Cambridge, is proudly alluded to in Lord Raglan's Despatch, to add to the funds of the Cambridge Asylum, when it is borne in mind that the institution was at first established to perpetuate the memory of this illustrious father, and that this is the only Asylum for the soldier's widow?
General Sir HOWARD DOUGLAS, Bart., G.C.B., Chairman of Committee
Colonel the Hon. AUGUSTUS LIDDELL, Deputy Chairman.
Subscriptions gratefully received by the Committee; by Messrs. Coutts and Co., Strand; and by
EDWARD FREDK. LEEKS, Hon. Secretary.
Offices, Palace Chambers, St. James's-street; and
1, Charlotte row, Mansion-house.

The next Election of Widows into the Asylum will take place in February, 1855.
All nominations of new candidates must be sent to the Hon. Sec before the 1st of December next.
It is likewise requested that all future communications be addressed to the Hon. Sec

EDUCATION; in the healthiest part of Kent. Ten YOUNG LADIES may receive a first-class EDUCATION at HILL HOUSE, TOTNES (3 the south of Devon), conducted by Mrs. and Miss COMPTON, assisted by a resident French Governess. Terms are moderate. Full particulars on application to C. H. Cramer, Neale, and Co., 201, Regent-street.

HANWELL COLLEGE and PREPARATORY SCHOOL. A sound, rapid, and economical progress is secured at the Middlesex County Asylum, and Hanwell Company's Military and Civil Services, and peculiar facilities are afforded for the Parisian accent of the French language. Precautions on application. J. A. EMERTON, D.D., Principal.

or upwards of 104,000 per publication, once a week.

Our number, at the present time, has considerably increased over the above average—the sale now being upwards of ONE HUNDRED AND TWENTY THOUSAND WEEKLY; being double the circulation of the *Times*, and far beyond that of all other Newspapers, weekly and daily, published at the price of 5d., or above.

INTERNATIONAL COURTESIES.

VISIT OF THE EMPEROR OF THE FRENCH TO ENGLAND.

It appears to be decided that the Emperor Napoleon III., accompanied by the Empress Eugenie, will, within a few weeks, pay a visit to her Majesty Queen Victoria and his Royal Highness Prince Albert. This act of courtesy—the commencement let us hope of a long series of friendly and intimate relations between the people of the two greatest nations of the earth—is not intended as a merely personal ceremony. It is doubtless meant to be a visit to the British people, as well as to the British Sovereign. As such it will be responded to by all classes of society, and by all parties in the State. An enthusiastic reception will await the Emperor from the moment that he sets foot on our shores until the moment he quits them; and high and low will vie with each other in the expression of their good-will towards the man, by whose sagacity and courage the alliance between France and Great Britain was realised and consolidated. Far different will be his reception from that which greeted the Emperor Nicholas, when, ten years ago, he came to this country, to dazzle the eyes o the beauties of Almack's by his fine person and manly bearing; and to inveigle, if he could, our leading statesmen into the support of his projects for robbing or murdering "the sick man" of Turkey. Nicholas was fêted by the rich and the noble, and distrusted by the multitude; but Napoleon III. will be welcomed with as much joy and respect in the streets, as in the ball-rooms and saloons of the Court and the aristocracy, and will receive the homage, not of a class, but of a whole people. The French will look with admiring eyes at the spectacle which England will offer when his Majesty comes amongst us, and will pay back with usury of good wishes and sincere applause, the cordiality of his reception, in that which they will give to Queen Victoria, when she pays her return visit to the French capital. We are not in the secrets of Courts and Cabinets; but we think we run little or no risk of making either a premature or an unfounded statement, when we assume it as a fact, that the Emperor's visit to London in 1854 will produce a visit from Queen Victoria to Paris in May, 1855. The personal courtesies of Sovereigns are of little worth, when their object is to devise schemes for the enslavement of their own people, or for the subjugation of their neighbours; but when they are the exponents of the sentiments of esteem and regard between mighty nations, they are acts of the highest social importance. The more intimately that Englishmen and Frenchmen become acquainted with each other, the greater will be their mutual respect. Their present happy alliance has been crowned by a common victory, from which many other victories yet more splendid and decisive will, in due time, proceed; but it is fitting that it should be graced and cemented by the festivals of Peace and the interests of Commerce. We rejoice, therefore, that the Emperor is coming amongst us—to see and hear how great a value the British people put upon the alliance of his nation—what sentiments of admiration they feel towards him as an individual—and how happy they will be when their own beloved Sovereign shall go as their Ambassadress to France, to receive a homage due alike to her virtues and her position, and to add another and powerful link to the chain o. friendship which already unites the victors of the Crimea, and the defenders of Europe.

At the present time there is no danger that the character of the French Emperor will be misunderstood in England. His remarkable career has been carefully watched, and recent events have obliterated any unfavourable impression that may have been created by the earlier incidents of his life. His strong faith in his own high destiny and mission, which at one time seemed akin to folly or to fanaticism, has been justified by success. The world accepts him as a man of genius, as well as a man of courage. The ludicrous is no longer associated with his name or his pretensions. The "heir of empire" has vaulted into the possession of his inheritance, and most men admit that he owes the result to his own high qualities even in a greater degree than he owes it to the name which he bears, and the cause which he represents. When he finally broke with the impracticable Assembly that sought his life, he was assailed in this country by a vehemence of abuse, which, in a weaker mind, might well have been a justification for any dislike to England or to Englishmen that might have grown out of it. But he had the manliness to forgive it, and the sagacity to confide in the hope that time would set him right. If at that period he seemed to bear rather too hard upon the French people—if he seemed to restrict within too narrow a circle the liberties for which they had so gallantly struggled for sixty years—the error o. judgment was not on his side, but on that of his critics. Events have shown that he understood the French people, and their wishes and necessities, far better than platform orators or public

THE INHABITANTS LEAVING BALACLAVA, BY ORDER OF LORD RAGLAN.—(SEE NEXT PAGE)

writers in this country. He not only knew Frenchmen, but he understood Englishmen, admired their character, valued their friendship, and deemed the alliance of the two nations to be an object better worth attaining than any victory which his immortal uncle had gained in his brilliant, but disastrous wars. In this spirit he pursued his own course, until his foreign policy elicited the unanimous approval of the best statesmen, both of his own country and of ours. Honest and straightforward—the friend of peace when peace was possible with honour, and a supporter of war when war was the only means left for maintaining the liberties of the world—he held the even tenor of his way, with so much ability, courage, and success, as to make it doubtful whether he or the first Napoleon was the greater genius, but by no means doubtful which of the two was the truer friend of peace and civilisation. His domestic policy was equally successful. The French did not want theoretical and impracticable liberty. They required order and security, the leisure to attend to their business, and the germs of a constitution that might expand with their wants and grow with their intelligence. All this he gave them. If he accomplished the end by a *coup-d'etat* and the sacrifice of life, the French, who were most interested, forgave the deed. They were but too happy to accept the repose for which they thirsted, by an instrumentality which Englishmen might not approve, but which was too much in accordance with French notions of the inevitable—if not of the appropriate—to excite more than momentary consternation or regret. In the short period that has elapsed since that act was consummated, the Emperor has done more than any Sovereign who ever sat upon the French throne to extend the real glory of the French name, and to administer to the substantial happiness and advancement of the people. If Frenchmen are not quite so free as Englishmen, they are, at all events, free from the odious tyranny of rival and bloodthirsty factions. They can sleep in their beds in peace, and can awake in the morning with the certainty that they have not been ruined in the night by street revolutionists, with whom they have no sympathy, and by theorists, who are continually striving to destroy society that they may build it up again on a new model. The Emperor has swept these social pestilences from the capital. The French are so grateful for the boon that they are willing to pay for it, even by the loss of some little portion of that freedom which brought so much mischief in its train. Industry and commerce have found a new development under his fostering care. The cities of France have grown in wealth and increased in beauty and elegance. Paris—the most superb of cities—has been improved in a thousand ways, which former Sovereigns might have dreamed of, but which they never found the means or the opportunity to accomplish. Prosperity at home, and respect for the national name abroad, have been secured for the French people in the short reign of Napoleon III.; and Free-trade between France and England is the next great boon that may be expected at his hands. All these things will be cordially remembered when he trusts himself in the streets of London. We may be sure that a brilliant ovation will await him; and may hope that the result of so suspicious a visit will conduce to the glory and well-being of both nations, and produce a good effect throughout the whole Continent—perhaps, even in that gloomy St. Petersburg, where the Czar sits with his bad conscience, and the curses of Europe to keep him company.

THE GREEK EXODUS FROM BALACLAVA.

A NUMBER of the letters received from the seat of war lately refer to the fact of the Greeks having been ordered to quit Balaclava on pain of being shot. The following description of the Exodus has been forwarded by our Artist, who has also given a graphic Sketch of the departure of the Greeks in search of a new home:—

(From our Special Correspondent at Balaclava.)

"On Tuesday, the 9th, a messenger from Sebastopol was taken by the videttes and brought to the head-quarters of Lord Raglan. Soon afterwards the General himself came down to Balaclava and had the whole male population summoned to meet him. By means of an interpreter he told them that the whole of the male adult population must leave the place within three hours; women and children only might remain behind. Any man found in the town after that period would be shot. This severe measure was adopted, I am told, in consequence of a letter having been found on the messenger, directed to certain parties in Balaclava, with instructions to set fire to the town that very evening, as an attack on the Allies was to be made at the same time by the Russians. What seemed to render this probable, was the fact of the Greeks having been busily engaged all the previous day and that morning in preparations to leave the town, under the plea that they could get nothing to eat, and that they must, therefore remove their families to the mountains.

"The scene represents the entrance of the village near the hospital. On the left may be seen my humble self, on my return from a visit to the advanced posts. One of the first persons I met was an old priest, with whom I had held several conversations previously, and who came forward to complain to me of the harsh measure which had forced him to become a wanderer. It was the fourth time he had been driven from his house. Once he had seen his home pillaged and ruined, in Candia; a second time in the Peloponnesian war; a third, in Scamboul; and now, a fourth time, he was expelled from his house by the English soldiers. His wife and children had run away previously, he knew not where; and he, with a few servants and relatives, could not obtain leave to remain behind.

"A party of Highlanders were sent from the camp to enforce Lord Raglan's order; and, I must say that they performed their difficult task with a most exemplary patience, and with as much attention and sympathy as was consistent with their sense of duty."

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—*Rectories:* The Hon. and Rev. D. L. Astley to Foulsham, Norfolk; Rev. B. G. Browne to St. John's, Gloucester; Rev. E. N. Rolfe to Burnham Sutton v. Overy Vicarage, diocese of Norwich; Rev. W. H. Twyning to Grosmouth, diocese of Llandaff. *Vicarages:* The Rev. W. Rowland to Ilshgward, diocese of St. David's; Rev. T. J. Monson to Kirkby Fleetham, diocese of Ripon; Rev. J. B. Price to Kyle and Kenfig, diocese of Llandaff. *Incumbencies:* The Rev. J. Lowth to St. Mary, Bankses Island; Rev. S. Ram to Christ Church, Stratford Marsh, Essex.

An official communication has been received by the Registrar of Queen's College, Belfast, to the effect that students of the Queen's Colleges, who have taken the degree of A.B. at the Queen's University in Ireland, will be admitted as candidates for orders in the Church of England and Ireland, after an attendance of one year at St. Aidan's College, Birkenhead, which is under the direction of the Archbishop of Canterbury.

TRADE WITH RUSSIA.—In reply to a letter from several merchants of Dundee, requesting information as to the course which will be taken with regard to the importation into the United Kingdom of Russian produce through Prussian ports, Lord Clarendon states that "this important subject is under the consideration of her Majesty's Government; and that no unnecessary delay will take place in coming to a decision upon it."

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

No time is yet definitively fixed for the departure of the Court for Compiègne: the plan for going there is not, however, abandoned, as the persons who had received counter-orders to the invitati ons formerly issued, have had intimation that the invitations are renewed, though for no stated period. A comedy, moreover, by M. Camille Doucet, which has appeared before, but has been since considerably revised and altered by its author, is ordered not to be represented at the Théâtre Français, until it shall have appeared before the Court at Compiègne. After their *séjour* at this palace, it is the intention of their Majesties to go to Fontainebleau. It is said, however, that, should the season be too far advanced before the arrival of the final intelligence from Sebastopol, for which the Emperor waits to proceed to Compiègne, the visit there may not take place, and the receptions will be held at Fontainebleau instead.

The Duc and Duchesse d'Alba have arrived at Paris, with the intention of passing the winter, or the greater part of it, in France. The Duc accompanied the Emperor to shoot in the forest of St. Germain, on Friday.

The condition of General Thomas, who has been conveyed to Paris, to receive surgical treatment, is far from being so satisfactory as most of the journals have announced. The ball, which remains in the stomach, presses on one of the larger nerves, causes acute and constant suffering, and cannot, from its present position, be extracted: it is hoped, however, by the surgeons in attendance, that it may change its place, so as to enable them to remove it.

Our readers may have seen in some of the French journals notices of the system for the training of horses invented by a Frenchwoman, Madame Isabelle, and practised by her with the utmost success in Russia previous to the commencement of the war. So completely has the efficacy of her method been proved before the jury of a military commission, appointed by the French Government to test it, that the Minister of War has ordered the system to be adopted, and has appointed Madame Isabelle to give lessons in her art to all the Government establishments for the training of horses successively.

M. Victor Hugo is about to publish a new volume of poems entitled "Les Contemplations." The appearance of the book, which is wholly of a literary and intimate character, is looked forward to with much interest.

A report has been published in some of the papers, announcing the approaching marriage of M. Charles Hugo, son of the poet, with Mdlle. Grignon, daughter of M. Grignon, actor and *régisseur* of the Théâtre Lyrique. A similarity of names has led to this error; the M. Hugo in question is no relation to the author of "Les Orientales" and "Notre Dame de Paris."

Last week witnessed a slight return of cholera to the metropolis: some very serious, and, we believe, a few fatal cases occurred. The fact has been kept as quiet as possible, and it is to be hoped the extinction of the epidemic will occur before the alarm can spread.

We yesterday obtained the permission (one as yet rarely accorded) of visiting the interior of the new Palais d'Industrie, and found the effect much more imposing than the reports we had heard led us to anticipate. A slight description of the building may not be uninteresting to your readers. In the centre is a transept, supported by iron pillars; this is the whole height of the building, which has a glass roof, shaped like a boat turned upside down. On either side, on the ground floor, are chambers, passages, and staircases, serving for the administration, &c. Above these are extensive galleries, also with glass roofs, somewhat lower than the centre one; they have also, on one side, a row of large windows, looking out on the Champs Elysées; on the other, they look down into the transept. At each end of the edifice a second gallery, running crosswise, completes the extent of the building. The effect of the whole gives at once an idea of space, solidity, and lightness, for which the exterior does not prepare the spectator. We know not what means are to be adopted to ventilate the building; but we cannot but fear that great difficulties will stand in the way, judging by the temperature now produced by the faint beams of a November sun in the yet empty building. This point will, however, we trust, receive due attention.

The engagement which introduces Mdlle. Plessy into the *troupe* of the Théâtre Français, is in the hands of the Minister of State, to receive his sanction. It is said that Mdlle. Rachel was decidedly hostile to this engagement; but, whether the report be false, or the pretended opposition impotent, we cannot affirm. We are told that the Opéra Comique is about shortly to produce a work in three acts, by Auber; and another in one, by Grisar. The Théâtre Lyrique is preparing "Robin des Bois," for Mdme. Deligne-Sauters, whose success in the "Billet de Marguerite" is most unquestionable. M. Dreshch, *chef de chant* of the Grand Opéra, is charged with a mission, abroad and in the provinces, to fill up the ranks which different arrangements have of late somewhat thinned. There is a question of engaging Mdme. Medori, an Italian singer, who has made a considerable sensation at Brussels; but, until the *affaire* Cruvelli is quite terminated, we believe no decided steps will be taken.

FRANCE AND THE UNITED STATES.

The efforts of M. Soulé and his friends to get up a European quarrel, of some kind or other, are not likely to succeed in France. Loud complaints have been made by some of the American residents in Paris on account of the alleged indignity offered to an American Ambassador, by refusing him a passage through France, but the French Government is quite prepared, according to all accounts, to justify its discourtesy to the firebrand diplomatist. Meanwhile, as the following article from the *Constitutionnel* of Wednesday serves to show, a broad line must be drawn between the people of the United States and the faction of which M. Soulé is so worthy a representative:—

There is no nation which seems better calculated than the United States for living in good intelligence with France. The friendly feeling, so natural between the two countries, showed itself from the very commencement of the American Union. It was then commanded by interests, as it is now commanded by interests and traditions; for the direction which the old French Monarchy had given was followed by succeeding Governments; and if there was any cause that could revive these reminiscences in America, it is assuredly that of the Sovereign who now governs France. The first Empire practised towards the United States, with the amplitude of ideas which was peculiar to it, a policy which has always been considered at this side of the Atlantic as one of the essential points of our system of alliance. The principle of appealing to the nation, and of universal voting, which the new dynasty has taken for its starting-point, could only have for consequence to draw closer together the two countries, in spite of the difference of form which exists between the two Governments. If the interests at present at stake in the world be examined closely, everything comes to demonstrate how much that good understanding was indicated in advance. The principles which the Government of the Emperor defends are such as speak to the mind of a free nation, and greatly excite its sympathy. It is for the political independence of Governments, it is for the liberty of conscience, that the present struggle in action at universal dominion, that France has taken up arms; and whilst she is defending, on land, ideas so much in harmony with those which constitute the basis of American civilisation, she has taken care that the principles of maritime liberty, so dear to the great Transatlantic nation, should be from the very outset of hostilities shielded from the vicissitudes to which neutrals were accustomed for a century. These considerations, of the very highest political and moral order, joined to the powerful material interest which unite the two countries, between which such important and extensive commercial transactions are daily going on, should, we repeat it, establish between them a sincere reciprocity of good relations. And, in consequence, it is with a regret mingled with surprise that we have seen a series of facts and incidents taking place which would seem to present another character. With the exception of Russia, the Government of the Emperor keeps up the best relations with all the Governments of the Old and New World. However, in a foreign court, a difference takes place between a diplomatic agent and a representative of France; and that agent, not content with having originated that difference, altogether of a personal nature, seems to do all he can by his demeanour and his language to transform it into a political conflict. Who is that agent? An American Minister. In the New World the privileges of our consular flag, although founded on a recent treaty, are disregarded. Which is the country where our international right has been thus infringed? A State of the American Union. Our navy is everywhere respected. There is, however, a roadstead in which a handful of anarchical refugees have seized on the occasion of the presence of our sailors to organise with impunity a demagogical masquerade; and that roadstead is that of an American town. Facts of this nature, if multiplied, would accord but little with the traditions of friendship and the community of principles and interests which exists between the two nations, and which seem to force themselves on a duty on the two Governments. But it is evidently impossible to see in these incidents anything else than the work of some mischief makers, whose acts are in disaccord with the intentions of the American Cabinet and nation. Whilst deploring them, we feel full confidence that they will remain in the state of purely individual acts, and we know in advance that the Union, always animated towards France with a spirit of sincere cordiality which it will soon be of a century's duration on both sides, declines the responsibility of incidents with which it has remained altogether unconnected.

THE CRISIS IN DENMARK.

The excitement caused by the ill-advised measures of the Danish Government still continues. A grand banquet was given to the Danish Parliament (both the Upper and the Lower House), by the citizens of Copenhagen, on the 24th ult. About 800 persons sat down to dinner, the largest number the hall could possibly hold. The band played the famous battle song, "The Brave Militia-man," as the company entered the room, and kept up national airs at intervals during the rest of the evening. The chair was taken by M. Lind, the great dyer, 6 Captain in the Copenhagen National Guard, and he was supported by a powerful phalanx of the bankers, merchants, and tradesmen of the capital. The meeting was one of the most enthusiastic ever held in Denmark. The toast for "the Parliament of the Danish kingdom" was repeated two or three times, with three times three each time.

In the following singular proclamation, which was issued two days after the dissolution of the Chambers, the King of Denmark endeavours to justify the course he has taken, and to intimidate those of his subjects whom he has any power to harass or injure, should they vote contrary to his wishes:—

We, Frederick VII., make known, &c.:—Inasmuch as we have under this date found ourselves induced to dissolve the Volksthing of the Diet, and under the same date have commanded fresh elections for the members of such Volksthing, our paternal feelings constrain us to direct, on account of these elections, a few serious words to all our dear and trusty subjects in our kingdom of Denmark respecting the present position of the country relative to its internal state.

It is our design to leave no lawful means untried in order to effect, after the manner laid down in the 100th paragraph of the fundamental law, an agreement with the Danish Diet concerning the requisite limitations to the Danish charter, in order that we may at length be enabled to regulate the Constitution in its entire bearing on all parts of our monarchy. Such agreement and consent have not been obtained in the previous session of the Diet; on the contrary, the Diet has manifested at its close the greatest disinclination towards the men upon whom we have under most trying events bestowed our confidence. Although we repeatedly displayed this transformness, and although it pertains to us alone, by virtue of paragraph 19 in the charter, to select your Ministers. Notwithstanding this, the opposition was systematically carried on by the late Volksthing, until at last it was impelled to such a manifestation, that we found ourselves obliged to dissolve it. Nevertheless we have not yet renounced the hope of effecting an agreement as defined above, with the Diet; for we know that the bulk of our people is removed from that political agitation which has been made against our endeavour to regulate the constitution of our Monarchy. We depend on the confidence reposed in us by the vast majority of our subjects, that they believe these our efforts to be soundly and maturely weighed, as necessary and serviceable for the internal and external relations of our Monarchy, to be the result of the peculiar relations existing between its various component parts. We feel convinced that our people at large will consider our decree of July 26, diminishing the popular representation, called to discuss national affairs, to be in nowise founded on any aversion of ours to such participation; for never have we exhibited such a feeling towards our people, but to have been occasioned solely by a state of things that can best pass in review from our position, and which we can alone expect to find rectified in due course of time.

We now address an urgent summons to all our dear and trusty subjects in Denmark, that in the approaching elections to the Volksthing they will guard well against pernicious influences exercised by the most shameful perversion of the liberty of the press and the right of meeting, both of which were granted by ourself. We believe, from the good sense, the loyalty and affection to King and country that have ever distinguished the Danish people from the remotest ages, that we have not addressed ourselves in vain to the whole of our people; but that they will send to our next Volksthing men who will go hand in hand with our Government, and who will vote in favour of the propositions for regulating the most important social affairs of the monarchy, which have now so long been a subject of dispute.

Having observed with displeasure that several of our spiritual and secular officials have not sufficiently performed of late what their duty enjoined, we seriously warn them all—more especially our spiritual officials, with whose sublime calling such lukewarmness must appear irreconcilable—respecting their line of conduct for the future; and we enjoin all whose position so entitles them to support the views of our Government to the utmost of their several abilities. Whereto all, &c.

AMERICA.

The *Canada*, steam-ship, which left New York on the 18th ult., arrived at Liverpool on Tuesday. The State elections were engaging but little attention. In Ohio, Pennsylvania, and Indiana, the Anti-Nebraskaites and Anti-Administration party have been overwhelmingly victorious. South Carolina, Florida, and California hold true to the Democracy; and in Connecticut there is a symptom of vitality in the Whig ranks. Nothing more had been heard of the *Arctic*, beyond the safety of Captain Lage and others. Several of the people saved had arrived at New York from Boston.

The steam-ship *Benjamin Franklin*, and barque *Catharine Augusta*, had arrived at St. Thomas's, where their appearance created much alarm, and the authorities would not allow them to anchor until assured that the barque required repair. The destination of the vessels was still unknown.

The blockading party at Louisville, numbering 15,000 persons, had been disbanded from lack of means.

THE PRINCE'S CARRIAGE.—When Prince Menschikoff's carriage was captured at Alma, a Russian General was riding in it. Seeing a French officer approaching, he fired a pistol at the distance of fifty paces, and killed a Zouave. The French then fired a volley, and the General received a ball which went in at one cheek and out at the other without killing him. I do not know what truth there may be in this story, but I am sure I have seen it asserted in some London correspondence that the carriage was taken by the English. The unfortunate equipage is now publicly exhibiting as a trophy at Constantinople; the very same coach in which Menschikoff rode haughtily about the streets of that capital when he delivered himself to the Turkish Government of the insolent message from his master which provoked the war.

BURNING OF A STEAMER.—(*From a Correspondent.*)—The fine steamer *Colline*, when passing along the wharfs of the town of Amherstburg, at eleven o'clock p.m., on Oct. 8th, was discovered to be on fire; and although nearly opposite the town, when the whole ship, from the signal-mast in the bow to the flag-staff in the stern, burst into a mass of vivid flames. The vessel was rendered almost immediately quite unmanageable by the burning of the wheel, and the signal ropes that communicated with the engine-room. The ill-fated ship then floated for a time within a few yards of the Canada shore. As the burning vessel appeared to be coming on shore, preparations into the deep water at the head of Lake Erie, a few chance (?) strokes of the paddles sent her on ground. Many of the passengers and crew were then saved—some on life-preservers, some by swimming, and others by being picked up by boats; but, we regret to add, that a very considerable number were drowned or met with a still more awful death.

A LARGE ORDER.—It is stated that Government has entered into a contract for the manufacture of about 2000 tons (worth £60,000) of enormous slabs or plates made of the best scrap iron, with which powerful floating batteries are to be covered, so as effectually to render them proof against the heaviest shot the Russians can throw. These plates vary from 8 to 12ft. in length, are from 2½ to 3in. broad, and about ¾in. thick. Each plate will weigh from about a ton and a half to upwards of three tons, and, after being fitted, they are to be bolted to the outside of the floating batteries. From experiments, it appears that iron plates of the scantling here mentioned not only resist the heaviest shot, but break them in pieces when they strike. So urgent are the authorities to have the batteries ready for active operations against Russia in the spring, that the contract has been divided amongst the principal makers of Glasgow, Newcastle, Lowmoor, and other places in the north of England.

THE PATRIOTIC FUND.

THE MEETING IN THE CITY.

On Thursday afternoon, at two o'clock, a public meeting of bankers and merchants of the city of London was held at the Mansion-house, for the purpose of concerting measures for adding to this fund. The Lord Mayor presided; and was supported by Lord John Russell, M.P.; Baron Goldsmid; Mr. M. T. Smith, M.P.; Mr. Thomas Baring, M.P.; Mr. Oliveira, M.P.; Mr. T. Hankey, M.P.; Mr. Gregson, M.P.; Alderman Wire, Alderman Farebrother, Alderman Salomons, Alderman Moon (the Lord Mayor elect), Alderman and Sheriff Muggeridge, Alderman Sir George Carroll, Alderman Finnis, Mr. J. G. Hubbard (the Governor of the Bank), and other gentlemen of distinction in the City.

The Lord Mayor having briefly introduced the business of the day,

Lord John Russell, who was enthusiastically cheered, rose to move the first resolution, which was as follows:—

That this meeting regards, with the highest admiration and gratitude, the gallant conduct of their countrymen who have been engaged in the recent naval and military operations in the east of Europe.

The noble Lord spoke as follow :—

My Lord Mayor and Gentlemen,—I am sure it will not be necessary for me to use many words to persuade you to adopt the resolution that I shall have to propose. We are engaged in a just and necessary war in defence of an ally, for no immediate object of our own, but in order to defend and maintain that ally, and to support the independence of Europe. Upon that point I need not, I shall not, attempt to use any proof. When, as a candidate for this city I had to speak to the electors of London, I addressed myself at some length to that subject. I had afterwards occasion to speak in Parliament upon the same topic, and Parliament and the electors of the United Kingdom had generally and almost unanimously assented to the justice and the necessity of the war. But, gentlemen, even if the war were altogether an error, we should not be the less inclined to support those brave men who, at the call of their country, at the desire of their Queen, had gone forth to the East, to distant climates, to brave every privation, to submit to every disease, to encounter every enemy that might be found. This is not a question depending upon the general policy of the war; it is a question that depends upon the judgment which you are about to pass upon your own countrymen in arms. And upon this topic I think that, whatever may be said with respect to the war—upon which the people are nearly unanimous—upon this subject public opinion will be quite unanimous, that never did Englishmen more distinguish themselves—never did they show greater patience under privation—never did they show greater valour in the field, than they have done in the course of the present war (Cheers). We have seen now, on the heights of Alma, the first encounter with the enemy to whom they were opposed. We know that every obstacle was opposed to their success—we know that all the machinery of war, the dread engines that are employed in martial enterprise, had been collected to stop their progress—that the bravery of the English infantry overcame these obstacles, and that they became victorious at Alma. The above, notwithstanding the many years of peace to which the Lord Mayor had alluded, that the character of our countrymen has not degenerated, and that our soldiers have not become enervated by that long period of tranquillity (Cheers). It shows, likewise, that discipline has not been relaxed, for however brave these men might be, there are no men, however brave, who would have attempted such an enterprise, and have encountered such an enemy, unless bound together by discipline, and who could have had full confidence in one another. There is one change, perhaps, with regard to British soldiers in the time of the former war, but it is a change which can only give us satisfaction. The letters which have been published from officers and private soldiers, during the last few weeks, have shown that our private soldiers can express themselves with an intelligence and a propriety which while it marks their good feeling, at the same time shows how much progress has been made in their education since the former war. And the whole result is that, while this progress has been made under the auspices and with the encouragement of those who have had the administration of the Army, there has been nothing lost of that energy, and that nerve, which distinguished British soldiers in former times (Cheers). Well, gentlemen, I think, therefore, that we have an earnest that, whatever course is to be undertaken—and at this moment the great enterprise is begun—the whole country in any city—that, whatever course is to be undertaken, you may rely upon the valour both of your armies and your fleets in order to accomplish all that human skill and human valour can accomplish (Loud cheers). The Lord Mayor has alluded to the opinions of some persons that the relief of the widows and orphans of those who fall either in battle or by disease during the war should be supplied by means of votes out of the national funds. Now that is a question I am certainly not going to discuss. It has been the opinion of Parliament hitherto that voluntary contributions could not be made on ordinary occasions, without leading to great abuses of such grants. But, be that as it may, what we know is that there are no such funds at present supplied, and it is to the voluntary assistance only to which, and to the charity of the people of this country, that we must look to supply the necessities of those widows and orphans, and to give that last consolation which a man dying on the field of battle, or expiring on the bed of sickness, can have; that, though his arm may be wanting, that his family may yet look to the gratitude of his country for the comfort of their future life (Loud cheers). With these observations I venture to propose to you the resolution which I am sure you will heartily adopt, and I will only say that I have no doubt that the civilians of this country, in the conduct of this war, will show themselves worthy of their brave countrymen in the field.

The noble Lord resumed his seat amid loud applause.

Mr. Thomas Baring, M.P., seconded the resolution, which was unanimously adopted, and the Lord Mayor acknowledged the following amongst many other subscriptions towards the fund:—The Corporation, £2000; the Governor and Company of the Bank of England, £2000; the Goldsmith's Company, £1000; the Grocer's Company, £1000; the Marine Assurance Company, £500; Messrs. A. Gibbon and Company, £500; the London Assurance Company, £500; Messrs. Baring, Brothers, £500; Messrs. Barclay and Perkins, £100; the Fishmongers' Company, £500; Messrs. Smith, Payne and Smith, £500; Messrs. Morrison, Dillon and Company, £250; Messrs. Truman, Hanbury, and Buxton, £200; the Sun Fire Office, £500; Messrs. Glyn and Co., £500; Baron Rothschild, £1000; the Provincial Newspaper Society, the ILLUSTRATED LONDON NEWS, £100; the Shipwrights' Company (working men), £10; the Vintners' Company, £50; Messrs. Roberts and Curtis, £200; Messrs. Hankey and Company, £500; Messrs. Crawford and Colon, £100; Aldermen Salomons, £100; Messrs. Pickford, £50; &c.

Mr. J. G. Hubbard, Governor of the Bank, moved the next resolution:—"That it is meeting cordially responds to the proposition of her most gracious Majesty, that a Patriotic Fund be formed for the relief of the widows and orphans of soldiers, sailors, and marines, killed in action, or dying from other casualties, when employed on service connected with the present war."

Mr. M. T. Smith seconded the resolution, and mentioned that the committee of the Infant Orphan Asylum at Wanstead had determined on recommending to the Governors, at their next meeting, the desirability of placing twenty orphan children of soldiers killed, in their asylum (Cheers).

This resolution, like the first, was unanimously adopted.

Mr. John Dillon moved that the several banks and joint-stock banks in the city of London be requested to receive subscriptions, and that a committee to conduct the business should be appointed, consisting of the following gentlemen:—The Lord Mayor, the Governor and Deputy-Governor of the Bank, the Chairman and Deputy-Chairman of the East India-house, Captain Shepherd, the Masters and Prime Wardens of the Livery Companies, Mr. Masterman, M.P., Mr. Archibald, M.P., and Sir James Duke, M.P., with power to add to their number.

The Lord Mayor Elect seconded the resolution, which was agreed to.

Mr. M. T. Smith, M.P., moved, and Mr. Alderman Wire seconded, a vote of thanks to the Lord Mayor. His Lordship's acknowledgment of the compliment closed the proceedings.

Numerous and influential meetings in aid of the Patriotic Fund have been held during the last few days at Manchester, Oxford, Cambridge, Edinburgh, Bath, Hull, Sunderland, Devonport, Rochester, Warrington, Stockport, and other towns. By all of them resolutions were passed in favour of the proposed object, and committees formed to obtain subscriptions. In some cases a subscription was begun on the spot. At Manchester, for example, £2500 were subscribed before the meeting broke up at Hull, £800; and, at Oxford, upwards of £900. At Honiton the chair was taken by the Mayor, and the meeting is said to have been attended by the principal part of the aristocracy of the town and neighbourhood.

IRON BARRACKS FOR THE FRENCH CAMP.—The iron barracks ordered in London for the four camps at Boulogne, have arrived in France. They are each 52 metres long, and 11 metres wide, and are composed of five or six hundred plates of cast or sheet iron, and of wood. The supports are in iron. The roof is formed of grooved pieces of the same metal, numbered, and jointed together by screws, with wooden window-frames. The interior is lined to each; the cast-iron is galvanized, to protect it from rust. Each barrack will cost about £300. It is said that eight or ten altogether have been ordered for the four camps at Boulogne. Those destined for the camp of Helfaut will be sent to Calais, and conveyed thence by rail to St. Omer. The cost of these barracks is to be defrayed out of the Emperor's civil list.

THE ILLUSTRATED LONDON NEWS

TOWN AND TABLE-TALK ON LITERATURE, ART, &c.

THE statue of the last of the Laureates has been admitted into Westminster Abbey, but not into Poet's Corner. Mr. Wordsworth is farther away from the altar than Ben Jonson himself. [We can understand why Congreve's monument was not placed near Chaucer and Spenser—his famous answer to Voltaire that he wished to be visited as a gentleman, not as a poet, containing a clue to its position in the building; but why Wordsworth's statue should be placed in a sort of Bedlam-cell, at the extreme west end of an Abbey—dedicated as it were to Kings and poets—we are at a loss to determine. Chaucer and Spenser were compelled to be content with commoner monuments than portrait-statues Chaucer has a tomb—Spenser has a tablet. It was long before statues were admitted. Cowley has an arm; Dryden, Prior, and Rowe have busts. Shakspeare was the first poet who was admitted into Westminster Abbey at full length, but this was a century and more after his death. Gay and Goldsmith were obliged to be content with medallions. A kind of alto-relief statue was then erected to the author of "The Seasons;" and within the present century, and nearly a century after his death, Addison was allowed a statue. But Wordsworth's predecessor in the laurel has only a bust, while Wordsworth has a marble statue. There he is in the nobis ofi Abbey, seated thoughtfully by the side of Craggs, to whom Addison, on his death-bed, dedicated the whole of his writings, and whose early loss to the Senate and to letters was bewailed by Pope in a noble epitaph. But Craggs' monument has been a violent removal to its present site, and is nearly as much out of place as its companion statue of Wordsworth by Mr. Thrupp.

Did the Dean and Chapter, it is asked, diminish their fees for the indifferent site alloted to the statue of the great poet of the English lakes, or were the fees paid in full? It is well known that the Dean and Chapter would not have Byron's statue on any terms; and that they equally refuse to have Campbell's statue on any other terms than their own, and those high enough. They surely should charge a lesser sum for a site like that to which Wordsworth has been condemned, than the sum they have been accustomed to ask for places of honour in transepts and in chapels. What does Mr. Thrupp say to the site? This we know, that on Thursday last (a very fine day for an English autumn) we were unable to see the statue with anything like the advantage of light and nearness which we have no doubt, for the artist's sake, it deserves to be seen in, as we are certain it deserves for the sake of the great poet it is meant to commemorate. When on his death-bed, Sir Godfrey Kneller was asked if he would be buried in Westminster Abbey, he replied (not caring for the modern fear of fees—he was a very rich man), "No, no; they do bury fools there!" Sir Godfrey's remark was far from being devoid of truth. Had he lived to our time, and been asked if he would have a monument in the Abbey, his answer would doubtless have been, "No, no! they do make fools of monuments there!" And certainly in his own case and in Wordsworth's, they have made in the Abbey sad fools of their monuments by the absurd sites to which they have transplanted one, and condemned the other from the moment of its arrival.

Lord John Russell has just been delivering a lecture on English historians dead in the flesh. He has been characterising David Hume, and condemning his History of England. We are in want, he tells us, of a good history of England. No doubt of it; but by whom is it to be written? His Lordship laughs most unnecessarily at the great Lord Chatham's recommendation of May's History of the Long Parliament as an example to the study of his nephew. But May's History is a noble specimen of impartiality. He was Secretary to the Long Parliament (filling a more important office than Milton ever held); and yet he writes of his own times like a Judge of the Land, uninfluenced by the scenes he has shared in—weighing everything impartially, like Mansfield, or like Hale, as if (as he was pensioned only for truth, and not for individuals. Lord John Russell should not, therefore, have sought to lessen May's claim to admiration, if for this rare merit only. In a lecture or speech like that delivered at Bristol—his Lordship should have imitated May—we feared at every turn that he was likely to run into a wild admiration of Mr. Macaulay. But we were deceived.

It would have been becoming and in place, in a great statesman like Lord John Russell, to have told his auditors in what way this country could best supply the deficiency he lamented. If we are in want of a History of England (as we most assuredly are), why should we not have it? The supply of everything in this country—to speak for a moment in Manchester language—should be equal to the demand. Why then are we in want of a good history? Simply for this reason—that people with means have not either the skill or the inclination requisite for such a work—and that people with the skill have unfortunately not the means. How few have Gibbon's means—Gibbon's inclination—and, above all, Gibbon's inimitable skill. Yet how much high talent, joined with research and capability of weighing evidence, and an art in giving results, may be seen from day to day and from week to week in what is called the newspaper press of this country. We would not recommend the mere needy author for employment by the State on the History of England, as we would wish to see successful authors of name, who have made particular portions of English history their peculiar study, employed by the State, in writing those portions of history they know the best, at something more than a publisher's price.

We are decorating the walls of our Houses of Parliament with scenes from English history and English poetry. We are crowding our cathedrals and squares with marble and bronze statues of our great men, and yet we have no history of England; and what is almost as bad no Biographia Britannica. It is wisdom in a State not to suffer the arts of war to lessen the arts of peace. A really great Minister has always a prophetic eye of taste; he sees beyond the exigencies of his own administration.

Lord John Russell, in his address to the Literary and Scientific Institution at Bedford, quoted Mr. Macaulay's famous vision of a New Zealander standing on the broken arch of London-bridge, to sketch the ruins of St. Paul's; and asked what necessity there was for making such a prophecy? We are not going to defend Mr. Macaulay, who is quite able to defend himself, and could, doubtless, if so inclined, read the world a new and valuable lecture on the same subject. But the thought has suggested itself to other minds, as well as to that of Mr. Macaulay, as will be seen from the following beautiful lines of Kirke White, which were possibly in the great historian's remembrance when he wrote:—

> Where now is Britain? Where her laurel'd names,
> Her palaces, and empires? Dashed in the dust.
> Some second Vandal hath reduced her pride;
> And, with one big recoil, hath thrown her back
> To primitive barbarity. Again
> Through her depopulated vales the scream
> Of bloody superstition hollow rings;
> And the scared native to the steepest howls
> The yell of deprecation. O'er her marts—
> Her crowded ports—broods silence; and the cry
> Of the low curlew, and the pensive dash
> Of distant billows, breaks alone the void.
> E'en as the savage sits upon the stone
> That marks where stood her capitols, and hears
> The bittern booming in the weeds, he shrinks
> From the dismaying solitude. Her bards
> Sing in a language that hath perished;
> And their wild harps, suspended o'er their graves,
> Sing to the desert wind a dying strain.

We chronicled in our columns of last week a curious discovery that had just been made respecting the poet Cowley. We have now to record one of still greater importance about one whose career is familiar, we suspect, to many who know but little of the great poet. We allude to David Garrick. Of Garrick's early history very little was known till the recent publication of the second edition of Mr. Forster's "*Life of Goldsmith.*" In that delightful biography Mr. Forster has supplied us with a chapter on the early life of Garrick, derived from manuscript materials, placed in his possession by Mr. Colburn, the publisher. But one fact about the great actor has escaped even Mr. Forster. Garrick, it is well known, was the younger son of a captain in the army, who designed him for the bar; he studied with Samuel Johnson, was entered at the Inner Temple, led a wild life, and lost his father and mother before he had completed his twenty-first year. But what thought Captain Peter Garrick, the father, of his wild son, David? No one has told us—and this is our discovery. The father had money to leave. He had been stationed at Gibraltar; and, arriving in England, towards the end of the year 1736, made his will in London on the following New-year's-day, and died within three months. We have said that he had money—his wife was his executrix. To his son Peter, he leaves £500; to his daughters, Magdalen and Jane, £500 each; to his son William, £400; to his son George, £300; to his daughter Merrial, £300; and, to his son David, what?—" Item, to my son David, one shilling." The future actor—whose death was to "eclipse the gaiety of nations, and diminish the public stock of harmless pleasure," was cut off by his father with a shilling. No wonder David was fond, through life, of shillings—when he commenced life at twenty-two with a single shilling. Who does not wish that the father could have foreseen the greatness of his son David?

NOOKS AND CORNERS OF OLD ENGLAND.

THE WATER-GATE OF YORK-HOUSE.

ALMOST the only remaining relic of the pageantry of the Thames in times when it was anything but "the silent highway," is to be seen at the south end of Buckingham-street; although, from the neglected state of this beautiful work of architectural sculpture, it is not unreasonable to expect it will soon become a mere shell, or ruin.

York House, after being tenanted by Sir Nicholas Bacon, whose illustrious son, the great Lord Bacon, was born here, was lent to Villiers, Duke of Buckingham, who, in 1624, obtained the estate by grant from James I. The mansion was then taken down, and a temporary house built for state receptions, and nearly in the middle of a long embattled wall, fronting the Thames, the Duke caused to be erected, in 1626, this rustic Water-gate. The estate was sold in 1672, when the house was taken down, and upon the grounds and gardens were erected several houses named from the last possessor of the property, *George-street* (now York-buildings), *Villiers-street*, *Duke-street*, *Of alley*, *Buckingham-street*.

The Water-gate alone remained: it is of Portland stone: in the front, facing Buckingham-street, are three arches flanked with pilasters, supporting an entablature and four balls; above the keystones of the arches are shields, those at the sides sculptured with anchors, and that in the centre with the arms of Villiers impaling those of the family of Manners. Upon the frieze is the Villiers' motto—FIDEI COTICULA CRUX (The cross is the touchstone of faith). The river front, which is engraved upon the next page, has a large archway, opening upon steps to the water; on each side is an aperture, divided by a small column, and partly closed by balustrades. Four rusticated columns support an entablature, ornamented with scallop-shells, and crowned with an arched pediment, and two couchant lions holding shields, on which are sculptured anchors. In the pediment, within a scroll, are the arms of Villiers; at the sides are festoons. This gate has been ascribed to Inigo Jones; but in the library of the Soane Museum, is "An Old Masonbook of Workes done by Nicholas Stone, sen., Master-mason to King James I. and King Charles," the ninth article in the list is the "Water-gate at Yorke-house he *deteined and built*, and the Scotchland Lion he did facing ye Thames. Mr. Kearne, a Jarman, his brother by marrying his sister, did ye Shee Lion." This statement originated in a correspondence, which recently appeared in the *Builder*, upon the present neglected state of the gate. Nevertheless, the design is in the richest manner of Inigo Jones; and we are not aware of any record proving Nicholas Stone to have been more than a mason; and, in this instance, he may have executed the masonry of the gate. It is approached by an inclosed terrace-walk, planted with lime-trees; and the inhabitants formerly possessed keys to the gates. The stonework of the gate was repaired, the ironwork renewed, and the gate roofed, in 1822, at a cost of £300, defrayed by a rate upon the tenants of the York-buildings estate; and we regret that the present necessary repairs cannot be executed by the same means as hitherto. We understand that these circumstances have been represented to the First Commissioner of Parks, Forests, and Public Buildings; and we trust that so interesting a memorial of old London as the Water-gate of York-house will not be left to decay.

THE LAST RESTING-PLACE OF THE DUKE OF WELLINGTON, IN THE CRYPT OF ST. PAUL'S CATHEDRAL.

OUR readers will still have fresh in their memory the solemn interment of the great warrior, who was, after forty years' peace, conveyed with so much honour and respect to the masterpiece of Wren's works. At the time of the Duke's funeral much difference of opinion existed as to the part of the Crypt in which his remains should be placed. The tomb of Nelson already occupied the portion of the vault immediately below the centre of the dome of the Cathedral. Many considered that to place the Duke on either side of Nelson would, as the merits were equal, not be treating the soldier with sufficient distinction. Some proposed that the Duke of Wellington and Lord Nelson should be placed side by side, in an enlarged tomb—this intention, however, could not have been carried out without disturbing the grave in which Nelson's brother and his family are buried; others urged the great respect shown in this country to vested rights, and said that with all their admiration of the Duke, it would be an act of injustice to disturb the ashes of the admiral (we have a tradition how Shakspeare felt on this particular subject). Not, however, to enter further into his difference of opinion, we will mention that at the time of the funeral the coffin was lowered from the midst of the throng of the great and noble of the land to that flat top of the sarcophagus which covers Nelson (the coronet and cushion of the Viscount having been previously removed); here the highly-enriched coffin of the Duke remained until within the last few weeks, covered by a wooden casing, which hid both the tomb of Nelson and the remains of the Duke. The coffin has now been moved down an inclined plane from the centre of the Cathedral to the position shown in the Engraving, which is in the middle of a square chamber about 40 feet to the east; in this compartment of the Crypt no interment had previously taken place. The resting place of the Duke will thus form a centre round which other soldiers may be most honourably placed.

The tomb, which has been designed by Mr. Penrose, will be executed in black marble and red polished granite. The coffin rests in the centre of the stone, about three feet from the ground. The general effect is very good, the massive forms of the memorial harmonising well with the deep gloom and solid properties of the crypt, which is a place well worthy of a visit. The extent seems wondrous; in parts the darkness is seemingly deepened by the gas-lights, which dimly illuminate up the tombs of the warriors.

The Engraved Plan shows the interments which have taken place in the central part. On the tomb of Nelson there is only inscribed "Horatio Viscount Nelson;" on that of his brother is placed the following inscription which notes the titles he obtained through his distinguished relative:—

> To the Memory of the Right Honourable and Rev. WILLIAM NELSON, D.D., Earl Nelson of the Nile, Viscount Nelson and Earl Nelson of Trafalgar, and Duke of Bronte in Sicily, who died on the 28th February, 1835, in the 78th year of his age; and lies buried here in the same vault with his wife, SARAH, Countess of NELSON; near the remains of his only son, Viscount TRAFALGAR; and of his illustrious brother, HORATIO, Viscount NELSON.

On Lord Collingwood's tomb is—

> CUTHBERT, Lord COLLINGWOOD, died 7th March, 1810.

And on that of the Earl of Northesk, a brief inscription on a brass plate.

In the south aisle of the Crypt, not far from the eastern end—where,

TOMB OF THE LATE DUKE OF WELLINGTON, IN THE CRYPT OF ST. PAUL'S CATHEDRAL.

at certain periods of the day, the sunlight glimmers beautifully—lie the ashes of Sir Christopher Wren, and several of the great English painters. These interesting graves are placed in the following order:—

	Sir Thomas Lawrence.			
Sir Christopher Wren.	Benjamin West.	George Dance.	Henry French.	
Sir Christopher Wren's son, daughter, and other remembers of his family.	Turner, the landscape painter.	Barry.	Sir Joshua Reynolds.	John Opie.

The graves of the painters are covered by flat incised stones. That of old Turner, the greatest landscape-painter this or perhaps any other country ever produced, who left behind him such ample means, still remains uninscribed. Surely the small sum necessary for this purpose could be spared from the fangs of the Court of Chancery! Sir Christopher Wren, his son, &c., lie under plain table tombs, on which are the simple records of the dates of their births and deaths. At the head of the architect's tomb, placed on the wall, is a square marble tablet, with the inscription.

Wren's daughter, who was distinguished both as an architect and musician, has a picturesque monument in this place. It is curious to note the great age which those members of the Wren family, who are here buried, have reached (upwards of ninety years each): a lady, the last of that family, was brought here not long since, died at the age of ninety-three. Here are also collected the fragments of the old church, which remain from the great fire. Mylne the architect Rennie the engineer, and some others of note, lie near.

The long perspective of the Crypt, seen from the painters' graves, has a fine effect; and few, we think, could stand here in this quiet spot in the midst of a great city, and so close to the dust of those who in their lifetime were so distinguished in the arts of peace and war, without experiencing feelings which are difficult to express.

THE WATER-GATE OF YORK HOUSE, BUCKINGHAM-STREET, STRAND.—(SEE PRECEDING PAGE.)

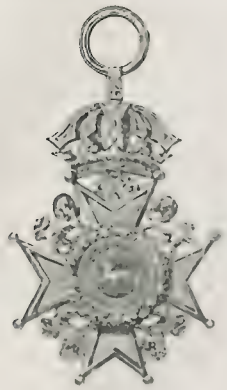
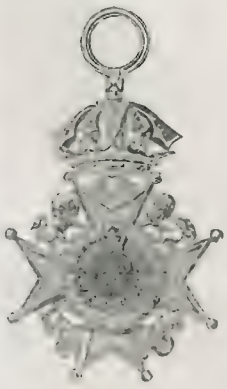
THE FRANKLIN RELICS.



FRANKLIN'S GUELPHIC BADGE.

MEDALLIC PORTRAIT OF SIR J. FRANKLIN, BY DAVID.



FRANKLIN'S GUELPHIC BADGE.

We this week engrave the Relics of the Franklin Expedition, which have just been brought to this country by Dr. Rae, and were described in our Journal of last week. To these we have added an Illustration of kindred interest—a medallic Portrait of the lamented Sir John Franklin, executed in bronze by M. David. His Portrait is flanked with an Engraving (actual size) of the Badge of the Knight's Grand Cross of the Royal Hanoverian Guelphic Order, worn by Franklin.

We should add that the several Relics have been carefully drawn from the originals, by permission of the First Lord of the Admiralty. They have been grouped within a glass case, and will be treasured at the Admiralty office, as memorials of the ill-fated Expedition.

The remaining articles are specified beneath the Illustrations. The

PART OF FLANNEL SHIRT. PIECE OF PLATE. PART OF COMPASS. CERTIFICATE CASE. BUTTONS, LINKED WITH CORD.

COOK'S KNIFE. KNIFE HANDLE. BUTTON. GOLD-LACE BAND.

plete, includes spoons and a fork, marked with the head of a fish looking upward, with a laurel branch on either side—the crest of Sir John Franklin (See the central group of articles). The articles marked with the crest, bird with laurel branch in mouth, and motto, "Spero melora," belonged to Lieutenant James Walter Fairhome, R.N., second son of the late George Fairhome, Esq., of Greenknowe, Berwickshire, who was one of the officers of the ill fated Expedition.

We learn from the *Edinburgh Advertiser* that the assistant-surgeon of the ill-fated *Erebus* referred to in Dr. Rae's communication, was a native of Anstruther, brother of Professor John Goodsir, Edinburgh, and of the late minister of Largo. He was a gentleman of great professional ability, and much distinguished for his scientific attainments. He was the author of numerous papers on natural history, and joint editor with his brother, Professor Goodsir, of the volume of "Anatomical and Pathological Observations," published in 1845—the year before he sailed with Sir John Franklin.

The only paper found attached to these Relics, consisted of two pages of a little book, entitled the "Student's Manual." In the way in which the leaves were folded, the following portion of the work was prominent:—"My first convictions on the subject of religion were confirmed from observing that really religious persons had some solid happiness among them, which I had felt that the vanities of the world could not give. I shall never forget standing by the bed of my sick mother.

"'Are you not afraid to die?'

"'No.'

"'No! Why does the uncertainty of another state give you no concern?'

"'Because God has said to me—' *Fear not: when thou passest through the waters I will be with thee; and through the rivers, they shall not overflow thee.*'"

"The remembrance of this scene has oftentimes since drawn an ardent prayer from me, that I might die the death of the righteous."

It will, doubtless, further interest our readers to be informed that Dr. Rae, by permission of the authorities of the Hon. Hudson's Bay Company, will devote his whole time, as long as requisite, to satisfy the questions, so far as is in his power, and to reply to communications from the relatives and friends of the long-missing party, instead of completing his chart and writing up the report of his expedition for their information.

Two overland expeditions have been decided upon: the one in boats, to go down the Mackenzie River in search of Captain Collinson, about the safety of whom there is now some anxiety; the other, in canoes, down Back's Fish River, to make further inquiry into the fate of Sir John Franklin's people, and to endeavour to obtain some more relics: and, should any of the remains of the dead be found, to place them decently under ground.

Yesterday week it was arranged by the Lords Commissioners of the Admiralty and Captain Shepherd, Deputy-Governor of the Hudson's Bay Company, that the Rae Expedition should be left wholly in the hands of the Hudson's Bay Company; and the same evening the Deputy-Governor had posted letters to Sir George Simpson, territorial Governor, containing full details as to the objects and mode of carrying into effect these Expeditions.

In one of the inscriptions on the Memorial Pillar, engraved last week, the age of William Cutbush is stated at 24 instead of 34, years.

NAVAL AND MILITARY INTELLIGENCE.

REINFORCEMENTS FOR THE ARMY OF THE EAST.

The reinforcements sent out to the army in the East last week, and to be completed in the current week, amount to 4300 men. These are to make up for the casualties of the campaign, and are calculated to bring up our effective contingent of the army to the original number sent out, namely, 26,000 infantry, with the usual accompanying force of cavalry and artillery, commissariat, &c. Indeed, to render the army still more effective large additions have been made to the medical and commissariat departments, and also to the artillery, which—without including the siege guns and the guns landed from the ships—is of more than ordinary efficiency and power. Two regiments of the line, the 57th and 46th, have by this time joined, to make up Sir G. Cathcart's division to its proper strength in the field. Without being too much disposed to a gloomy view of the subject, it is impossible to deny that great casualties must have taken place in an army of little more than 26,000 from war and pestilence, to require to be recruited by 4000 men to fill up the deficiencies caused in the ranks. So it is, however. About 1000 went out in the *Queen of the South*, steamer, from Portsmouth on Thursday week; and a similar number proceeded from Cork, in the new Cunard steamer *Jura*; whilst two other steamers of the largest class are provided to bring the rest of the reinforcements to the amount of 2000 men. These are all provided from the reserves and depôts at home, and will join their respective corps on their arrival at the seat of war. But no new divisions will be formed. No new regiments will be sent out. It is found impossible to complete a necessary number of regiments at home up to the war complement in less than three months from this time; and it is hoped that before spring the whole of the line regiments may be brought up to the increased number voted in the last session—namely, 1400 men for each battalion—1000 to be ready for foreign service, and the depôt to consist of 400.

The regiments lately arrived from Canada, to form a large and lasting addition to our available force, are all in fine health and efficiency; but it is master no more than 800 or 650 men each, and they must be recruited during the winter to 1000 new war complement, when they will be ready in the spring, if required, to supply the place, or to increase the numbers, of our Eastern army. In the meantime the Government is engaged in promoting the efficiency of the army in every possible way.

THE COURT.

The Queen and the Prince Consort have continued to dispense their usual hospitalities during the week just closed. On Saturday last his Serene Highness Prince Nicholas of Nassau, and the Earl of Aberdeen, arrived at the Castle on a visit. Her Majesty visited the Duchess of Kent in the morning, and Prince Albert enjoyed the sport of shooting.

On Sunday, the Queen and the Prince, with the four elder Royal children, and Prince Nicholas of Nassau, the ladies and gentlemen of the Court, and the domestic household, attended Divine Service in the private Chapel of the Castle. The Rev. and Hon. Dean of Windsor officiated. Her Majesty having expressed a wish to hear the band of the Imperial Regiment of Guides, now in London, it arrived at Windsor at one o'clock on Sunday, and played before the Queen and Prince, and the whole of the Royal family, on the East Terrace. M. de la Verdure, Capitaine d'Etat Major, and Baron Vialis, who arrived with the band, had the honour of dining with her Majesty.

On Monday the Queen, with the Prince of Wales and Prince Alfred, walked in the Home-park. His Royal Highness Prince Albert, accompanied by Prince Nicholas of Nassau, went on shooting, attended by Lord de Tabley, Major-General the Hon. Charles Grey, and Colonel F. H. Seymour. Her Royal Highness the Duchess of Kent visited her Majesty during the forenoon. His Serene Highness Prince Nicholas of Nassau, took leave of the Queen, and left the Castle to day. The Earl of Aberdeen also left Windsor, by an early train, for London.

On Tuesday the Belgian Minister, the Austrian Minister, and Countess Colloredo, Lord and Lady John Russell, and the Right Hon. Sidney Herbert, and Mrs. Herbert, arrived on a visit, and had the honour of dining with her Majesty. The Queen and Prince drove out in an open carriage during the afternoon, attended by the Equerries in Waiting.

On Wednesday the Queen and Prince walked in the Home-park. The whole of the visiting company left the Castle to-day.

The Countess of Gainsborough has succeeded the Countess of Desart as Lady in Waiting. Major-General Buckley has succeeded Lord A. Paget as Equerry in Waiting to the Queen, and Captain du Plat has relieved Colonel F. H. Seymour, the Equerry in Waiting to the Prince.

THE MAHARAJAH NURRUNDER SING.—The Sirdar Goolaub-Khan Bahadoor, and Hakeem Abdool Nubbee Khan Bahadoor, Aides-de-Camp to the Maharajah Nurrunder Sing, Mahinder Bahadoor, of Puttialah, in the north-western provinces of India, attended by their interpreter, Allee Moodee Ahamed, paid a visit of ceremony, on Wednesday, accompanied by Mr. C. B. Thompson, of the chairman of the East India Company, at the India-house. The Sirdar and Hakeem arrived by the last steamer from India, attended by a small native retinue, to make preparations for the arrival, on an early visit to the British Court, of their Prince, the Maharajah, who has already arrived at Calcutta, which he is expected to leave for London by the steamer of December.

The Duke of Buccleuch has arrived at Montagus House, Whitehall-gardens, from Dalkeith Palace. The Duchess continues in a delicate state of health; and the youthful Ladies Victoria and Margaret Montagu Scott, have also arrived in town from Walmer Castle.

Lord Brougham arrived last week at Cannes. Lady Mallet is staying, on a visit, with Lady Brougham, in Grafton-street.

CALENDAR FOR THE WEEK.

SUNDAY, Nov. 5.—21st Sunday after Trinity. Gunpowder Plot disc. 1605.
MONDAY, 6.—St. Leonard. Princess Charlotte died, 1817.
TUESDAY, 7.—First *Gazette* published, 1665. Milton died, 1674.
WEDNESDAY, 8. Halley born, 1656. Camden died, 1622
THURSDAY, 9.—Prince of Wales born, 1841. Lord Mayor's Day.
FRIDAY, 10.—George Fox died, 1690. Martin Luther born, 1483.
SATURDAY, 11.—Half-Quarter Day. Battle of Preston, 1715.

Will be ready on the 15th of November,

THE SHILLING ILLUSTRATED LONDON ALMANACK for 1855, containing Twelve splendid Engravings of the Battles of England, by George Hicks, Esq., Twelve Beautiful Engravings of Natural History of the Months, by W. S. Coleman, Esq., and Notes of the Months, by Mrs. Alaric Watts. Astronomical Phenomena by J. R. Hind, Esq., &c. Tide Phenomena Department by J. Glaisher, Esq., F.R.S., of the Royal Observatory, Greenwich.—Office, 198, Strand.

TO CORRESPONDENTS.

VELRNA.—Ogilby was a Scottish poet, of the reign of George III., who wrote (like Blacklock) not in his native dialect, but in English. Boswell was fond of bringing Ogilby's merits before Johnson. (See "Boswell.") The poet-nobleman Montrose was the great Marquis and Cavalier. His poems are not sufficient to form a volume, and have never been collected.

A FOREIGN WRITER ON ART.—The Stanhope collection of pictures bought for Charles I., was bought through Cleaver again, Buckingham. The names of the Duke's agent is, we think, unknown.

DUBITANS and M. C.—The oft-quoted line, "When Greeks join'd Greeks, then was the tug of war," is from Nat Lee's play of "Alexander the Great," act iv., s. 2

AN OLD SUBSCRIBER.—Hansard's "Treatise" is an accredited work on Archery.

G. A., Kennington, should inquire at the office at which he insures.

NEPOS. Nesbit's "Treatise on Arithmetic;" "Treatise on Whist," published by G. Bell Fleet-street.

AN ARCHÆOLOGIST.—We have ascertained from a former tenant of the house No. 1, Old Fish-street, that the vaulting described in our Journal of last week, formerly extended under Lambeth Hill

A CONSTANT SUBSCRIBER, Witney.—We do not interfere in card-playing disputes.

THE BRITISH, FRENCH, AND TURKISH ARMIES IN THE CRIMEA.

PROGRESS OF THE SIEGE OF SEBASTOPOL.

ON SATURDAY NEXT, NOVEMBER 11th, 1854, will be Published

AN EXTRA SHEET
OF

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, NOVEMBER 4, 1854

ALTHOUGH the Russian telegraph told the truth, or a portion of the truth, in announcing to the world that the siege of Sebastopol commenced on the 17th of October—a fact which was not previously known in France or England—we are not bound, on the faith of that one swallow, to indulge in the beautiful vision of a whole summer of Russian truthfulness. Early in the week, that large portion of the public which believes that Sebastopol can be taken by a *coup de main*, and that the Russians are enemies utterly contemptible, were startled out of their delusion by an announcement, *viâ* St. Petersburg, that General Liprandi attacked the British intrenched camp on the 25th, took four, if not five, redoubts and eleven cannon, and drove back the English cavalry, with the loss of 500 horses. It was added that Lord Dunkellin, an English officer (son of the Marquis of Clanricarde) had been taken prisoner. This news has not been confirmed; and may or may not be true. If it be, we see no reason for the alarm which some journals have expressed with regard to it. The war will lose half of its glory if a slight mishap on our side is not to be suffered without discouragement. Englishmen ought to be made of better stuff, and fortunately are so—at least that portion of them who are doing our work and fighting our battles; whatever may be the case with impatient critics at home, who expect victories every day, and make no allowances for time and space and physical obstructions. If a portion of our army have not been defeated, so much the better; if it have, the nation may be assured that our brave soldiers and those of our allies will make the Russians pay a large and permanent price for any small and transitory advantage which the fortune of war may have placed within their reach. On the 25th ult., the day when this *contretemps* is alleged to have befallen us somewhere in the neighbourhood of Eupatoria, the bombardment of Sebastopol was vigorously continued—the number of unburied slain in the doomed city and fortress was so great that they tainted the air; and amongst the Russian victims was Admiral Nachimoff, the Commander of the fleet which perpetrated the massacre of Sinope. Admiral Korniloff, his subordinate in the same expedition, had previously fallen;—so that speedy retribution has overtaken the men who led that treacherous and savage onslaught. The fire of the Allies, according to the showing of Menschikoff himself, in another despatch to his Imperial master, was continued on the 27th of October; so that the action of the 24th, whatever its importance may have been, had brought no cessation of hostilities against Sebastopol. The news of its fall may be daily expected; and, even if the precise confirmation of the victory alleged to have been gained by General Liprandi, should previously arrive, the British people will not the less implicitly believe that their arms will prove irresistible—and that not one or two victories gained by the foe will be sufficient to save either the Russian fortress or fleet. It is possible—and, indeed, probable—that General Liprandi, who left Perekop on the 15th of October, to gain Simpheropol by the steppes, has effected a junction of his corps with that under the command of Prince Menschikoff. It is not likely, however, that any further reinforcements will reach the Russian General; as it is alleged, in French telegraphic despatches from Bucharest, of the 30th ult., that Prince Gortschakoff, alarmed by the movements of Omer Pacha, has stopped the troops that were marching from the Dniester to the Crimea, and will make head against that Commander in the Dobrudja. It may also be expected that Menschikoff and Liprandi will find occupation to the north of Sebastopol, which will prevent them from troubling the besieging army in the south. The French official journals announce that General Bosquet has received orders from General Canrobert to take up a position on the Belbec, and thus to cut off the communications between Menschikoff's army and Sebastopol. In this case we may expect to hear not only of the continuance of the siege, and the fall of Sebastopol, but of a pitched battle on the Belbec.

LORD JOHN RUSSELL and Lord Palmerston are not so wholly absorbed by the war as to forget that they are Ministers for special departments. Lord John is President of the Council, and in that capacity takes cognizance of questions that relate to the education of the people, while Lord Palmerston, as Minister for Home Affairs, has a vast field of operation, including sanitary and social reforms of a thousand different kinds. Both of these Ministers have recently found time and opportunity to address the public on the matters, on which, from their previous studies and pursuits, they may be supposed qualified to enunciate enough sound principles. Lord John Russell has enlightened the public of his native Bedford with his views on the decline and fall of nations. He has also favoured the city of Bristol with some pertinent observations on the advantages to be derived from a study of contemporary history as portrayed in newspapers; and on the striking want, in British literature, of a good and thorough history of the British people. Lord Palmerston, on the other hand, has been addressing the "Romsey District Labourers' Encouragment Association" in words of wisdom, and, what is perhaps still rarer, of sound common sense, on the duties of the poor to themselves and to their offspring, as well as to society. While both Ministers touched on the question of education, they considered it from a different side, and with a different object. Lord John Russell—who, as President of the Council, has nothing to do with adult education—or what is called "self-culture," preferred to expatiate on that branch of his great subject; while Lord Palmerston—who, as Home Minister, has no concern with infant or juvenile schools, unless when the infants or juveniles qualify themselves for the care of the schoolmaster by the commission of felony—chose to instruct his rural audience on that one point, above all others. There is no reason to complain of either Minister for his invasion of the province of the other: for the moral advancement of the people admits of too many ramifications in well-doing to allow of a line being drawn. If Lord John neglects the infant poor, the Home Secretary will have a larger crop of criminals to task his energies; and if Lord Palmerston leaves any effort untried that might tend to the elevation of the great bulk of the labouring classes, he leaves to the President of the Council a more hopeless task in the culture of their swarming children—too often cast, by their neglect or evil training, into the deepest depths of destitution, and consequent criminality.

We have not space to follow these noble Lords through the several topics on which they addressed their audiences, especially as regards the philosophy of the decline and fall of nations, and the regrettable want of a complete History of England—worthy of the art, the arms, the literature, the religion, and the real and true glory of the people; but there were one or two points in each—in relation to the question of education—which are too significant to be passed over. Lord John Russell, in his address to the supporters of the Bristol Athenæum, congratulated them on "the great progress of education," and proved, or attempted to prove, his statement by the "increase of Literary Institutions, Societies, and Athenæums, throughout the country." We wish we could derive as much satisfaction as his Lordship, from the existence of such institutions; but, as far as we know, very few of them are in a flourishing and solvent state, or supported by the classes who have most need of the instruction which they are calculated to convey. Mechanics' Institutes few of which now survive, were never supported by mechanics; and "Athenæums" derive their existence from the youth of the middle classes who have already received some education. These institutions are unlike beyond the means and the taste of the bulk of those who gain their bread by the sweat of their brows, in the field, the mill, the mine, and the workshop. The President of the Council should be able to tell us what has been, or what he expects will be, attempted for the education of the children of the poor. While they are left to the tender mercies of warring and acrid sectarians—too jealously afraid of proselytism to care for education for its own sake, or the sake of the perishing children—it is of little or no use that Athenæums or Institutes should be established. They are good in their way, and should not be discouraged, but it will lead to mischievous error if statesmen shall consider them to be sufficient.

Lord Palmerston took higher ground. "Although," said his Lordship, "it has been the pleasure of our Maker—in a world which is a world of trial and transition, and not the ultimate destiny of mankind—to subject a great portion of the human race to trials and privations, to enable them to qualify themselves for that future state which awaits them, yet Providence has not been niggardly in those qualities which are calculated to secure to man that happiness which awaits those who conduct themselves well here; for all the good qualities of human nature—all the qualities of mind—all the qualities of intellect—all the qualities of heart—everything that tends to dignify human nature, and to enable men to distinguish themselves in the condition in which they have been placed—these qualities have been sown broadcast over the human race, and are as abundantly dispersed among the humblest as they are among the highest classes of mankind." This is sound statesmanship and wise philosophy. His Lordship went on to state—with a looseness of expression, though, possibly, not of meaning, which may expose him to the reproach of heterodoxy—that "all children are born good." We take it that he intended that they were born with a capacity of being made good—

or better than they might otherwise be—if proper care were bestowed upon them in their tenderest years. "Now, therefore, the first thing you would naturally infer from this is (continued his Lordship) that it is the duty of all parents to see that their children are well and properly educated—that they are early instructed, not merely in what is called book-learning—in reading and writing, and things of that kind; but that they are instructed in the precepts of right and wrong, that they are taught the principles of their religion, and their duties towards God and man. Now, the way in which that can be done is by the father and mother building up their course upon that which is the foundation of all goodness in social life—I mean a happy home." All this is admirable; but what of the children who have no happy home, or no home at all?—children that are, unfortunately, to be counted, in our religious and God-fearing country, by thousands and tens of thousands, if not by the million? Nothing is promised for them by either Minister; though Lord Palmerston, as Home Secretary, has abundant reason for knowing how troublesome and how expensive they are when they grow up to be criminals. Let us hope that Lord John Russell has better means of knowing what is done, or about to be done, on this subject, than can be possessed by the public; and that he had good reason for the hopeful picture of the present and future progress of education which he drew to his sympathising audience at the Bristol Athenæum. Adults can take care of themselves in this free country. All the favour they can ask of Ministers and Statesmen is to be let alone, to read their newspapers, as Lord John Russell recommends them to do, and to improve themselves in their own way in such arts and sciences as they may deem useful or ornamental. But the education of the neglected children of the poor is a more pressing matter. Without the aid or authority of the State, they are left to perish. Lord John Russell thinks this aid will not be withheld. "This country," he says, "having resolved in its various branches and in various manners that the people should be educated, that task will be adequately performed; and we shall in a few years, I trust, be able to do it so effectually that the few remaining defects will have been amended, and the remaining deficiencies will have been supplied." We trust his Lordship will prove a true prophet.

LATEST INTELLIGENCE.

THE SIEGE OF SEBASTOPOL.

The following despatches were received yesterday, from Constantinople, via Marseilles:—

BALACLAVA, Oct. 17.

We opened fire this morning with 71 English and 46 French guns, against 128 Russian. At 8.40 a French magazine exploded. At 10.45 the fire was renewed. At 12.45 the French ships engaged the sea forts, with the *Agamemnon*, the *Retribution*, and the *Britannia*. At 1.20 another French magazine blew up. At 1.40 a tremendous explosion took place in Sebastopol. At 2.5 the magazine of the Russian redoubt blew up. The Russians, however, returned to their guns. At 5.30 the ships fired on Fort Constantine at short range. The fire was kept up up until six o'clock, and did great damage to the Russians.

BALACLAVA, Oct. 18.

The Russians have re-mounted their guns, which are much heavier than ours. Our loss yesterday amounted to 96. The *Retribution* and *London* both caught fire, and have been continuously engaged with them.

The redoubt and the round tower keep up a brisk fire. We get our munitions up with difficulty.

The *Moniteur* of yesterday (Friday) morning says that General Canrobert's report of the 23rd states that the attack continued without any remarkable incident, and that all were full of confidence as to the result. According to further accounts received from Sebastopol to the 25th, some English engineers employed in Sebastopol had made their escape, and reported the town filled with dead left unburied, and that provisions were becoming very scarce. The upper works of Fort Constantine had been completely destroyed, and two ships of the line sunk.

THE RUSSIAN ACCOUNT OF THE SIEGE.

The *St. Petersburg Journal* contains two reports from Prince Menschikoff to the Emperor Nicholas, giving details of the operations before Sebastopol on the 17th and 18th. The first report is dated at eight P.M. on the 17th, the first day of the bombardment, the English had only two guns able to return the Russian fire, while the Russians had a few dismounted.

At noon on the same day fourteen vessels of the Allied fleet attacked Sebastopol by sea, directing their fire against Fort Constantine and battery No. 10.

The shortness of the time and the smoke rendered it impossible for Prince Menschikoff to furnish complete details of the loss on either side; but the Russian cause had sustained a severe loss in the death of Admiral Kornilieff, whose leg had been carried off by a round shot, and who died on the spot.

The second report, dated the 18th inst., says that though the Allied fire was astonishing by its power and noise, it had not done so much harm as might have been expected.

The Alexander battery, and battery No. 10, had not suffered much, but the Constantine battery had been greatly injured. On the land side none of the Russian batteries had suffered except No. 3, in which nearly all the pieces (thirty-three in all) had been dismounted.

The Russian loss was estimated at 500 killed and wounded, among the latter Admiral Nachimoff, very slightly.

During the night of the 18th the Russians were busily employed in repairing the damage done to their defences.

On the 18th the English fire was less active than on the day before, and the French had hardly fired at all. Prince Menschikoff attributes this to a diversion made without the walls by General Semiakine, who appeared in the enemy's rear, and thus diverted their attention from Sebastopol.

The vessels which had taken part in the bombardment on the 17th, and which Prince Menschikoff believed to be all French, had gone away in the direction of Cape Chersonese.

The smoke on the 17th, and a thick fog on the 18th, had rendered it impossible for Prince Menschikoff to state the enemies' loss; but he says it would seem that one ship of the line had been seriously damaged, and two steamers set on fire by red-hot shot.

THE LEEDS CIVIC BANQUET.—On Friday week a great banquet took place in Leeds, the special object being to repay the hospitality of the Lord Mayor of London to the Corporation of Leeds, in May last. The company included the Earl of Harewood, the Lord Mayor of London, Sir James Duke, M.P., the Lord Mayor of York, the Mayors of the West Riding boroughs, the Mayor, magistracy, and Corporation of Leeds, and the principal inhabitants of the borough.

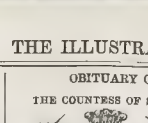
THE Lord Mayor of London was present, on Tuesday evening last, at a complimentary banquet given to the Mayor of Bradford (Yorkshire), by the members of the Corporation of that town. The company also included the Lord Mayor of York and the chief magistrates of the neighbouring towns.

BARRY'S PICTURES AT THE SOCIETY OF ARTS.—On Tuesday evening Mr. Arthur W. Hakewell gave, at the Parochial Library and Museum, Great Yarmouth, an interesting lecture upon Barry's celebrated Paintings in the great room of the Society of Arts in the Adelphi; and in the previous week the lecture was given at the Mermaid Assembly Rooms, Hackney. Upon both occasions the audience was delighted with the lecturer's description of these grand works of art; and they afterwards inspected Barry's fine engravings of the pictures.

MARYLEBONE FREE LIBRARY.—At a joint meeting of the General and Working-mens' Committee, on Wednesday—Sir Benjamin Hall, Bart., M.P., in the chair—it appeared that the number of visitors during the past quarter, ending September 30, had been 5489 males, 179 females—total, 5668; books delivered during the same period, 5665. It was reported that a lending library would be opened on Monday, Nov. 20, 1854; and the chairman added £5 for the subscriptions already received for that department.

OBITUARY OF EMINENT PERSONS.

THE COUNTESS OF STAMFORD AND WARRINGTON.



HER Ladyship died on the 22nd ult., at Brighton, of an attack of fever. Of humble origin, Lady Stamford adorned the elevated position to which her marriage raised her, by her charities, and her benevolent consideration of the poor. Her loss will be severely felt by the aged and necessitous on the extensive estates of her husband.

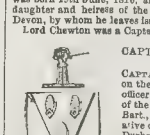
Her marriage to the present Earl of Stamford and Warrington was solemnized at the Old Church, Brighton, on the 23rd December, 1848. There was no issue of it.

WILLIAM FREDERICK, VISCOUNT CHEWTON.

THE death of this gallant officer, from the effects of the wounds he received at the battle of the Alma, adds another distinguished name to the list of those whose loss their country mourns. His Lordship died at Scutari on the 7th ult. Viscount Chewton, eldest son and heir apparent of the present Earl Waldegrave, and great-nephew, maternally, of Samuel Whitbread, the able and eloquent associate of Charles Fox, was born 29th June, 1816, and married 2nd July, 1850, Frances, only daughter and heiress of the late Captain Bastard, R.N., of Sharpham, Devon, by whom he leaves issue.

Lord Chewton was a Captain in the Scots Fusilier Guards.

CAPTAIN HYLTON JOLLIFFE, OF THE COLDSTREAM GUARDS.

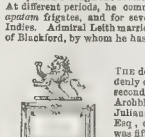


CAPTAIN HYLTON JOLLIFFE, died on the 4th ult., on the heights before Sebastopol. The lamented officer was born 10th July, 1826, the eldest son of the present Sir William George Hylton Jolliffe, Bart., of Merstham, Surrey (heir and representative of the Barons Hylton, of Hylton Castle, in Durham), by Eleanor, his wife, second daughter of the Hon. Berkeley Paget. Captain Jolliffe was thus nephew of the late Marquis of Anglesey. He married, 1st July, 1846, Leila, eldest daughter of the late Sir Thomas J. Tyrwhitt Jones, Bart., and leaves a daughter, Eleanor Agnes.

REAR-ADMIRAL JOHN LEITH.

THE death of this gallant officer took place at Blackford, Aberdeenshire, on the 26th October. Admiral Leith was the second son of the late General Leith Hay, of Rannes; he entered the Navy early in life, and passed through the several ranks of his profession with distinction. At different periods, he commenced the *Isis*, *Rattlesnake*, and *Scringapatam* frigates, and for several years was senior officer in the West Indies. Admiral Leith married the daughter of Alexander Forbes, Esq., of Blackford, by whom he has left two sons and two daughters.

HENRY STUART, ESQ., M.P.



THE death of this gentleman occurred most suddenly on the 25th ult. He was born in 1804, the second son of the Hon. William Stuart, D.D., Archbishop of Armagh, by Sophia-Margaretta-Juliana, his wife, daughter of Thomas Penn, Esq., of Stoke Pogeis. Dr. Stuart, the Primate, was fifth son of John, third Earl of Bute, K.G., the celebrated Prime Ministe.

Mr. Henry Stuart was first returned for Bedford, in the Conservative interest, in 1837, but was unseated on petition. In 1841, he again contes ed the borough, and succeeded, after a severe struggle. At the subsequent general election he was retained as member, and also at the last election.

THE RIGHT HONOURABLE JAMES GRATTAN.

THE death of Mr. Grattan took place at his seat, Timahinch, county Wicklow, on the 24th ult. The right hon. gentleman was eldest son of the celebrated patriot statesman and orator Henry Grattan—and grandson of James Grattan, Recorder of, and M.P. for the city of Dublin—by Mary, his wife, eldest daughter of Lord Chief Justice Marlay. He was born in 1783, and early entered the Army, with which he served at Walcheren and in the Peninsula. He sat in Parliament for a long succession of years as knight of the shire for Wicklow, where he resided at his beautiful seat of Tinnahinch, close to the romantic demesne of Lord Powerscourt. In 1847 he married Lady Laura Maria Tollemache, youngest sister of the present Earl of Dysart, but has left no issue. His brother and heir is Henry Grattan, Esq., at one time M.P. for Dublin, and afterwards for the county of Meath.

MR. GEACH, M.P. FOR COVENTRY.

WE regret to announce the death of Mr. Charles Geach, the colleague of Mr. Ellice, sen., in the representation of the city of Coventry. The hon. member had been during the last ten days in a precarious state. Mr Geach returned from his Scotish shooting, nearly a month since, in usually good health, although, at the latter end of the session, he had been suffering from overwork of body and mind, and from intermittent diarrhœa. Three weeks since it was erroneously reported that he had been suffering from Asiatic cholera. His primary disease was skilfully arrested; but his depressed condition of health subjected him to a dangerous affection of the left leg. The extremity of that member became ulcerated, and incipient mortification caused about a fortnight ago. On Sunday last, after much suffering, borne with the greatest fortitude and resignation, Mr. Geach expired, at half-past four in the afternoon. Mr. Geach began life as a clerk in the Birmingham Branch of the Bank of England, on a salary of £150 per annum. From that situation he was selected as the managing director of the Birmingham and Midland Joint-stock Bank, which he conducted with great ability and credit. Mr. Geach was, a few years since, the co-partner in the patent for the railway safetree—a lucrative monopoly, which, though the patent has expired, has continued a large source of wealth to the two proprietors. Mr Geach was a director of the Crystal Palace Company; of the Manchester, Sheffield, and Lincolnshire, and of the Shrewsbury and Birmingham Railways; and he was a large contractor for working power. He was also the principal and active partner in one of the most extensive manufactures of machinery in Staffordshire. His habits of business and personal industry were uncommon, and his extensive commercial operations were all conducted with singularly regularity and prudence. On the last general election, his return, and that of Mr. Ellice, for Coventry, was unopposed. His death will be deplored by his constituents of every grade of politics, and his seat will not be easily supplied. He was elected by the more Radical section of the electors; but his course in Parliament was independent and temperate, to their general satisfaction.—*Times*.—(A Portrait of Mr. Geach, with a copious Memoir, appeared in the ILLUSTRATED LONDON NEWS, No. 588.)

WILLS AND BEQUESTS.—The will of the Right Honourable Baron Denman, has just been proved, the personalty being sworn under £14,000: it bears date the 8th July, 1852, and bequeaths all to his Lordship's sons, equally amongst them. The will is very short, and in Lord Denman's own handwriting, and—what is very remarkable with most of the wills of eminent lawyers, drawn up by themselves—Lord Denman's will required support by affidavits; in this particular instance, it was so to some technicality in the attestation clause.—Lieut.-Col. the Hon. Robert Edward Boyle, who died at Varna on the 3rd October, has left personalty amounting to £30,000.—Mr Samuel John Lowe, has bequeathed £1000 to the Royal National Institution for Preservation of Lives in Cases of Shipwreck; £300 to the Society for the Protection of Life in Case of Fire; £100 to the Ophthalmic Hospital, and £100 to the Benevolent.

METROPOLITAN NEWS

RESULTS OF METEOROLOGICAL OBSERVATIONS, TAKEN DURING THE WEEK ENDING TUESDAY, NOVEMBER 2

Month and Day.	Corrected Reading of Barometer at 9 A.M.	Thermometer. Highest Reading	Thermometer. Lowest Reading	Mean Temperature of the Day.	Departure of Temperature from Average.	Degree of Humidity.	Direction of Wind.	Rain in Inches.

Note.—The sign — denotes below the average, and the sign + above the average. The numbers in the fourth column are calculated on the supposition that the saturation of the air is represented by 100

The reading of the barometer has varied but little during the week, the lowest reading being 30.09 inches on October 31st, and the highest 30.35 inches on November 1. The mean for the week, at the height of 82 feet above the level of the sea, was 30.198 inches.

The mean daily temperature have varied from 5½° below, to 12° above, their average values. The mean daily temperature of the 30th was 53·5°, and is the highest mean temperature recorded on that day since the year 1822, when it was 56·7°; and that of the 31st is the highest at present recorded on that day, the register extending back to the year 1814; the nearest approaches being 54·6° in 1833, and 54·4° in 1822.

The mean temperature of the week was 5·0°; being 3·2° above the average of the corresponding week during thirty-eight years.

The range of temperature during the week was 27·4°.

The mean daily range of temperature during the week was 23·2°.

The weather (with the exception of the morning of the last day, which was foggy), was fine, and the sky was frequently free from clouds.

For the month of October, the mean reading of the barometer at the level of the sea was 29·880 inches. The highest temperature during the month was 67·2° on the 21st; and the lowest was 29·7° on the 27th; the range of temperature during the month was therefore 42½°. The mean of all the highest temperatures by day was 59·4°, and of all the lowest by night was 41·4°. The mean daily range of temperature during the month was, therefore, 18°. The mean temperature of the month was 50·1°; being 0·2° above the average of the corresponding month during thirty-eight years The mean temperature of evaporation for the month was 47·6°. The mean temperature of the dew point was 44·3°. The mean degree of humidity was 84 (complete saturation being represented by 100). The fall of rain during the month was 2½ inches.

JAMES GLAISHER.

Lewisham, November 3, 1854.

HEALTH OF LONDON.—During the week ending last Saturday, the births of 1447 children were registered in the metropolitan districts—exceeding the average of the nine corresponding weeks of the nine preceding years by 40; of these, 733 were boys, and 714 were girls; exceeding their respective averages by 10 and 30. The number of deaths during the week were 1218: the average of the ten corresponding weeks of the ten preceding years, corrected for increase of population, is 1037; the excess of the week is, therefore, 181—a result which shows that the cholera epidemic in London is, for this season, quickly passing away: and that the total mortality has nearly resumed its former position. The deaths from cholera, which were 168 in the preceding week, have fallen to 98 in this week; and occurred in the various districts as follows:—In the Western, 10; in the Northern, 3; in the Central, 11; in the Eastern, 13; and in the Southern, 20. The deaths from diarrhœa, during the past week were 46, exceeding the average by 15—24 of which being fatal to children under 15 years old. To scarlatina, 93 deaths are referred, the average being 66. To tubercular diseases, 199. To diseases of the heart, 42. To age, 29. To those of the lungs, 206. And to violence, privation, cold, and intemperance, 41 deaths are attributed, exceeding the average number by 18.

ASSISTANT CHAPLAINS FOR THE EAST.—A meeting was held in Willis's Rooms, on Wednesday, in aid of the special fund of the Society for the Propagation of the Gospel, for sending spiritual aid to the sick and wounded soldiers to the seat of war in the East; the Archbishop of Canterbury in the chair. The proceedings having been opened with prayer by the Bishop of London, the chairman addressed the meeting, and was followed by the Bishop of London, Mr. Serjeant Adams, the Chanbrador-General (Mr. Gladstone), Vice-Chancellor Page Wood, and other speakers. A letter from the Secretary-at-War was read, in which he expressed his opinion that "six clergymen should, if possible, be dispatched in the course of the next week or ten days." At the close of the meeting, a number of donations and collections were announced; among others, one from Mr. Hubbard of £25 a year to the chaplaincy fund, so long as the war lasts.

THE BISHOP OF LONDON'S VISITATION.—The Bishop of London held the visitation of his diocese on Thursday morning, at St. Paul's Cathedral. His Lordship arrived at half-past eleven o'clock, and was received by the Dean of St. Paul's, the Archdeacon of London, the Hon. and Rev. H. W. Villiers, the Rev. Thomas Dale, and a large number of the Prebendaries. Full choral service was performed, the prayers being intoned by the Rev. J. Lupton, and the Lessons read by the Rev. Dr. Vivian. No sermon was preached; and immediately after the prayers were finished, his Lordship proceeded to the delivery of his charge, in the course of which he dwelt at length on many of the important topics now agitating the Church.

THE LORD CHANCELLOR'S LEVEE.—Thursday being the first day of Michaelmas Term, the Right Hon. Lord Cranworth held his general levee of the Bar, and entertained the Judges to breakfast at his mansion, in Upper Brook-street. Grosvenor-square, preparatory to the meeting of the Courts of Equity and Common Law, at Westminster. The Judges present were—Mr. Baron Alderson, Mr. Justice Maule, Mr. Justice Coleridge, Mr. Justice Crowder, Mr. Justice Cresswell, Mr. Justice Wightman, the Lord Chief Baron (Sir F. Pollock), the Lord Chief Justice of England (Lord Campbell), the Vice-Chancellor (Sir George Turner), Mr Baron Parke, Mr. Justice Wightman, the Vice-Chancellor of England (Sir K. T. Kindersley), the Master of the Rolls, the Vice-Chancellor Sir James Stuart, the Vice-Chancellor Sir W. P. Wood, the Master of the Rolls, and the Lord Justice Knight Bruce. At the conclusion of the levee, the Lord Chancellor and the Judges proceeded in state from his Lordship's mansion, preceded by Mr. Foster Cowen, the Hon. Constable of Westminster, through Grosvenor-gate, Hyde-park, Birdcage-walk, to Westminster-hall, which, on all such occasions, was crowded with ladies and well-dressed persons to witness the ceremony of the arrival of the Judges to open their respective Courts, the Serjeants-at-Law being in attendance to receive the Judges. On the arrival of the legal cortège, the Lord Chancellor and the Judges repaired to their respective Courts.

PRESENTATION OF THE LORD MAYOR.—On Thursday morning at eleven o'clock, Mr. Alderman Moon, the Lord Mayor elect for the ensuing year, was presented for the approval of her Majesty by the Recorder to the Lord Chancellor, at his mansion in Upper Brook street, Grosvenor-square. At the presentation were Mr. Alderman Sidney and Mr. Alderman Kennedy. Mr. Alderman Rose, Mr. Alderman and Sheriff Muggeridge, Mr. Sheriff Crossley, the City Chamberlain, the City Remembrancer, Mr. Locke, City Feodary, the Under-Sheriffs, &c. The Recorder having introduced the Lord Mayor elect to the Lord Chancellor in the usual form, the Lord Chancellor, on the part of the Queen, congratulated the gentleman of London on their choice of a gentleman so well known on the Continent of Europe, and who had done so much for the advancement of the fine arts, to fill the high and important office of Chief Magistrate of the City.—The Lord Mayor elect and the Recorder, &c., then retired.

VISIT OF THE BAND OF THE FRENCH GUIDES TO THE BANK, TOWER, &c.—On Wednesday morning, about eleven o'clock, most of the members of the Band of the French Regiment of Guides proceeded in omnibuses—specially retained for the service—to visit the Bank, the Royal Exchange, the Tower, and the Docks; in all of which they were welcomed. Their passage along the streets created much sensation, in many instances they were loudly cheered, and their salutations in return evinced a pure reciprocity of feeling.

PRESERVATION OF LIFE FROM SHIPWRECK.—A meeting of the general committee of the Royal National Life-boat (late Shipwreck) Institution was held on Thursday, at its offices, John-street, Adelphi; Mr. T. Bingham Bervian, F.R.S., in the chair. The silver medal of the society, and two guineas, were voted to Mr. Thomas Price, and £13 to his boat's crew of eight men, in admiration of their gallant conduct, in a shore-going life-boat of the Institution and other benevolent individuals, and has thus early been of essential service in the cause of humanity. A grant of £50 was made in aid of a life-boat built at Holyhead; and the six life-boats on the Anglesey coast were reported to be in good order. Some life-boats, and several life-boat carriages, were ordered to be built forthwith. During the last month upwards of fifty wrecks took place on our coast, accompanied with considerable loss of human life. The Shipwrecked Mariner's Society offered, on the invitation of the Life-boat Institution, to transfer its life-boat branch to the institution, which was accepted. Admiral Beechey having been elected a member of the committee, the proceedings closed.

THE SUNKEN SHIPS AT THE MOUTH OF THE HARBOUR OF SEBASTOPOL, SKETCHED BY LIEUT. MONTAGU O'REILLY, H.M.S. RETRIBUTION—(SEE PAGE 438)

THE SIEGE OF SEBASTOPOL.

(From our Special Correspondent.)

(Continued from Supplement, page 450.)

The sailing-vessels which contained them were very much damaged by the recent gale, and upwards of 260 horses were lost. The Royals have lost 150 horses in this way, and the Enniskillings seventy. The French, on the other hand, have till yesterday had no cavalry of any kind in the field, but it seems that four squadrons of Chasseurs d'Afrique have just been landed.

The soldiers are all in high spirits, and eager to get into the stronghold of the Russians. Though they suffered at first from want of many necessaries, and especially from the necessity of sleeping in the open air, their health was not materially altered. There were, however, sundry cases of cholera and fever; and we have to regret the loss of some valuable officers. Captain Jolliffe, of the Guards, died of cholera a few days ago; and a fine young fellow, Lieut. Dawson, of the Enniskillings, expired yesterday, after suffering for several days of remitting fever. I might mention others, but their names escape me.

The Turks, who have not done anything hitherto, are suffering from the insufficiency of their commissariat. Half-starved men are to be seen skulking about our encampments and commissariat tents, and picking up the refuse of biscuits and bones left by our men. On questioning some of them, I learnt that for four days no rations had been served out. This may be an exaggeration, but the supply must be short when soldiers seek for food in the French and English camps, and find it in the offal which our soldiers leave.

Balaclava offers busy scenes daily; and its streets are crowded by commissariat officers, and people rushing about for luxuries, such as ham, wine, ale, and the like. Strings of arabas, laden with every species of ware, from cannon-balls to cheese, encumber the small streets; and the heavy dromedaries which draw them, give to the scene a picturesque variety. The Irish have discovered a similarity between this village and those in their native country; and they call it Bally Klava in consequence. A great part of our staff moved yesterday from thence; and Lord Raglan, whose head-quarters were in one of the houses there, has moved to the front, to be nearer active operations.

Some of our officers have had narrow escapes of being caught by Cossacks; and a young artillery man, named Broughton, found himself pursued the other day by five men, who took him in front and flank, and forced him to jump a stone wall to save himself. A French officer of the Spahis was less lucky: on his way from Kherson to his camp, he encountered a squadron of horse, which he took for English; but who, in reply to his question, fired at him, and then carried him off a prisoner.

P.S.—Lord Raglan, it is said, received, a few days ago, a letter from Prince Menschikoff, requesting him to spare the town, which was full of ladies. He replied that he was in no hurry to attack the town; and he advised the ladies to leave it.

Oct. 8th.

The night of the 7th did not pass quietly. A working-party of the Light Division had been marched to the ravine in front, where they commenced the erection of a breaching-battery, intended to destroy a steamer at the bottom of Youngenais harbour. The working party was attacked by the Russians at about one o'clock in the morning. The Rifles came up to the rescue, and the Russian steamer met them by frequent discharges of shrapnel. The Russians retired almost immediately, and the working-party was not further disturbed that night. The 41st, which forms part of Sir de Lacy Evans' division, had marched out to support the workers, but was withdrawn before coming to action. It was, however, called up half an hour afterwards by an alarm in the rear. It appeared that a small force of Russians had marched into the gorge on the right of our position, and had commenced setting fire to a number of haystacks. They were immediately fired on by our pickets, who killed several men, and drove off the enemy. The picket had two men wounded, but did not otherwise suffer: the Russians succeeded, however, in firing several stacks. To-day, working-parties from the several divisions were busy, under an escort of infantry and guns, taking away what hay remained. The Russians were visible from the spot, encamped on the sides of the hills, but they did nothing to molest the foragers. Their force outside is stated by deserters to be 8000 infantry, 4000 cavalry, and 100 field-guns.

The Russian reconnaissance of yesterday resulted, I am sorry to say, in the loss to us of three men of the 4th Dragoon Guards. They were cut off whilst watering their horses at some distance from their picket. A Cornet, who was with them, succeeded in cutting his way through, after killing a Cossack with his revolver.

The Russians were busy yesterday, during the whole of the day, in front of the great round tower, which appears to be the present object of the British attack. They seemed to be placing mines in front of the works just erected; and they ceased the fire from those works during the whole day. To-day the fire has again been opened, and our outlying pickets are shelled at intervals by heavy guns; the result, however, is no casualty. The enemy were occupied most of the day in shelling the spot where, on the previous night, the Light Division had erected a battery for two guns. Their shells were directed both from the Round Tower batteries, above the town, and from the battery near the Youngenais harbour. Several fell inside the camp of the Light Division, without doing any damage. The heavy guns were ready to-day; and it was expected that to-morrow fire would commence from one of Lancaster's guns. The position of the Russian troops on the hills to the right of the position, favoured a supposition that an attempt would be made next day to annoy our rear. A French Engineer officer (Captain Schmidt) returning from the front, after spending the whole day in sketching outside the pickets, was killed yesterday by a round-shot from the enemy.

Oct. 9th.

Working parties were busy during the whole of last night in finishing the breaching battery in front of the Light Division. It had been determined, at first, to open fire this morning from that battery, with one of Lancaster's heavy guns; but Lord Raglan countermanded the order, fearing lest the fire of the enemy might, by being concentrated on one spot, cause too great damage, and perhaps dismount the gun. Accordingly, the gun having been placed in position, the working party continued their labour, and nearly completed the battery for two more guns. At the same time, working parties were also busy erecting a four-gun breaching battery to the right of the first; and they rapidly advanced it towards completion. The enemy annoyed the men with shells so much that at one o'clock they retired, having worked from seven o'clock. Sir R. England's Division was not idle; and was also busy during the night in breaking ground for the erection of a heavy gun battery on the extreme left of our position.

The steamer moored at the bottom of Sebastopol harbour, proved extremely troublesome during the night. It commenced firing shell and shot at midnight, with such vigour, that the troops of Sir de Lacy Evans' divisions were turned out, as it was feared that a surprise was intended. The fire soon ceased, however, and the troops were not further disturbed. To day the enemy were more than usually busy, shelling our pickets, and the places where they supposed our works to be proceeding. Fortunately, no casualty is to be recorded. One soldier of the 63rd had a narrow escape. He was kneeling at his fire when he heard the whiz of a round shot, he threw himself backward, and this saved his life. The shot passed over his shoulder, carried off his chin-strap, and smashed his rifle, which was by him. Working parties from the several divisions were busy intrenching the position on our right, so that with the French works in our rear, the armies are completely defended by strong lines. The Turks have been moved from their

CAMP OF THE 21ST FUSILIERS, ON THE HEIGHTS OF SEBASTOPOL.

central position between the French and English armies, and cover the crest of the hills in front of Balaclava. The only road which the enemy could use with their artillery, has been blown up, and every precaution has been taken to strengthen the position of the armies. The French in the meanwhile have received numerous reinforcements, and their force now numbers 20,000 men, in addition to those originally landed at Eupatoria.

The French, who have hitherto made no progress in works for attacking the town, declared their intention to commence to-night. The ground on their side being more favourable for approaches, they will advance to the distance of 700 or 800 yards of Sebastopol. Their pieces being generally of a small calibre, this was almost a necessity on their part. The British having strong ground and rock to deal with, will not advance nearer than 1500 yards, but their large guns will do as much, and probably more damage at that distance, than the French at the nearer range.

Oct. 10.

Several guns were placed in a new four-gun battery in front of the First Division, working parties labouring indefatigably all night A seven-gun battery was almost completed on the hill to the right of Sir De Lacy Evans' division. The Russians only discovered its existence to-day, when they commenced shelling with great vigour, but without doing any damage. The fire proceeded not merely from the heavy batteries in front, but from a three-gun battery of ship guns, erected by the Russians at the bottom of Sebastopol Harbour, near the ruins of Inkerman. These guns were invisible to us, being concealed from view by a hill. The first attempts from the battery were rather wild; but patrols of Cossacks on the hills signalled to the gunners, who at last got the range with tolerable accuracy. The number of casualties was slight, notwithstanding the heaviness and constancy of the Russian fire. It was quite laughable to see how our soldiers and sailors bore themselves in the midst of it. Now and then one could see a troop of gabions on two legs dancing along the ground and tumbling about till they reached the safe cover of the parapet. These were sailors, quietly ensconced in gabions, running with them, and showing nothing but their legs to the enemy. Brawny Highlanders rushed about, two and two, carrying bags of earth from a distance; and now and then, when shot and shell fell closer than usual, they lay down on their stomachs, got up laughing after the explosion, and carried on their bags—saluting their mother earth two or three times in the course of one journey. At the same time that these scenes met the eye, others no less interesting, were to be found in the besieged city, where troops of soldiers were to be seen at exercise or busy erecting batteries. Numbers of them were firing at a mark; and it is said by the deserters who reach us, that the male population of the town have all been enrolled, and are drilled daily for the defence of the place. Probably, in anticipation of our fire, large tents have been erected near the principal works, and they are constantly full of men. It appears

SEBASTOPOL, SKETCHED FROM FORT CONSTANTINE.

that food is becoming scarce in the Russian camp. The full ration of two pounds (Russian) of bread given to the Crimean soldier, has, we hear, been reduced to half a pound, and that of the Russian Proper from three pounds to one. The Russian Generals have taken advantage of our inactivity to persuade their soldiers that the Allies have brought no siege guns, and thus it seems have given the town some confidence; but it will soon disappear when the whole English and French batteries open at once, which I hope they will do now in a very short time.

During the day a messenger from Sebastopol was intercepted, and found to be the bearer of orders to the inhabitants of Balaclava to set fire to the town. This messenger was taken in the forenoon; and Lord Raglan rode immediately into Balaclava, to take such measures as were thought prudent. It was considered a suspicious circumstance that, in the morning, before the English had an inkling of the affair, the Greeks of Balaclava were busy packing up their effects before departure Immediate steps were taken to expel all the male inhabitants of this port; and companies of soldiers succeeded in driving them all out by four o'clock in the afternoon. The females followed as fast as they could; and Balaclava is now empty of all but our own people. Had an incendiary fire been kindled in the port—crowded as it is with ammunition and shipping—there is no limit to be set to the amount of disaster that we should have suffered.

Oct. 11.

The night was extremely cold and blowing, and a serious mishap was the consequence. Working parties of the 41st, 55th, and 95th had been sent, in company with some Sappers, to commence a battery to the right of the front of the Light Division. But, after wandering about for a couple of hours, the engineers were unable to discover the lines which they had drawn out, and the battery at that position was not commenced. It appears impossible that this should be anything but neglect of ordinary precautions. Dark nights are the most favourable for advances against an enemy; and lines made by engineers should be so drawn as to be discoverable with ease. The other batteries were advanced considerably towards completion; and three guns—one Lancaster, and two from the *Terrible*—were placed in the battery on our extreme right. The enemy did not cease firing during the whole night, and sleep was somewhat abridged by the noise. Lieut. Rolles, with his company of Rifles, held the trenches, and fortunately suffered no loss, although shells frequently fell in the midst of them.

During the day a most exciting scene was witnessed from the heights. An Austrian transport, in full canvas, with studding sails set, was observed drifting within range of the batteries of Sebastopol. The batteries on the right of the town commenced a roaring fire at her, which was taken up by Fort Constantine, Fort Paul, and Fort Nicholas. The transport appeared to mind the fire very little. Shells burst near her. Shot dropped all round her, astern and in front, but none struck her. She seemed to possess a charm. As she got within range of Fort Constantine, all the guns of that casemate roared out at her, and were only diverted by the sudden appearance of a large steamer, which proved to be the *Firebrand*. The fire was thus divided, and the scene became doubly interesting. The shells of the steamer might be seen skipping into the harbour of Sebastopol, whilst those of the forts fell immensely short. Had the Russians had the pluck to send out a ship the unfortunate transport would have fared extremely ill. As it was she weathered the storm without receiving any damage. It was a cheering sight to see her at last emerge from the smoke to the left of the town, and slowly sail ahead. A short time afterwards she grounded at a point where the fire of the Russian batteries could be concentrated on her. She lay there for an hour and a half, the crew having abandoned her, and it seemed impossible but that the Russians should sink her. Thanks to the bad gunnery of the Russians, out of some 400 or 500 cannon-balls fired only four struck her. Seeing the state of affairs, the *Beagle* went coolly in, protected by the *Firebrand*, and made preparations for towing the Austrian barque out. The instant the attempt was seen, the Russians redoubled their fire; but the *Beagle* went alongside the barque, and managed to get her in tow. While doing so two Russian frigates came out of Sebastopol; yet, though under the fire of guns, and though the little *Beagle* and Austrian barque were not 2000 yards from the walls, they did not dare even to advance that far, for the *Firebrand* was keeping close to the *Beagle*, the *Firebrand* only carrying six guns; the *Beagle*, having landed her's for the siege train, had not one on board. But the enemy's vessels declined even this contest, and contented themselves with firing at a distance. The *Firebrand* was hit in four places—the *Beagle* not touched at all. This incident caused a cessation of fire in the trenches; but when it was over the enemy resumed and kept up the fire till the evening.

Oct. 12.

At midnight, last evening, there was a tremendous alarm in camp. The Russians were heard distinctly beating to arms, and their trumpet-calls vibrated through the air in the midst of a heavy cannonade from all sides. The whole of the Allied forces were under arms; the French beat to quarters; the British turned out, and heavy guns were harnessed by men to be drawn against the enemy. The cause of alarm was this: In the dark a party of seventeen Sappers going out to a new battery commenced on the left slope of the hill opposite the Light Division, lost their way, and fell into a Russian picket. The enemy, seeing our soldiers, dropped their arms, and ran towards the town shouting the alarm. The Sappers, too glad of their reception to grumble at it, rushed back in haste, whilst the Russians, alarmed by the flying, rushed to their arms in expectation of an assault. The guns in their batteries blazed away at random in all directions; and the gunners, mistaking the echo of their own shells for our return fire, shelled away like mad at that echo. It was more than an hour before it occurred to both parties that no harm was meant on either side.

The battery where the Sappers intended to go, and mistook their way, was well brought up during the night. To-day there was nothing new, the enemy continuing to fire now and then into the trenches.

THE SUNKEN SHIPS AT SEBASTOPOL.

THE Engraving on page 486, from a sketch taken by Lieut. Montagu O'Reilly, on the 27th of September, represents the vessels sunk by the Russians for the defence of the harbour of Sebastopol. On the left hand, as will be observed, a narrow passage has been left, sufficient to admit a small steamer. The seven vessels are in the following order, beginning at the left side:—A 50-gun frigate, an 80-gun ship, another ship of 120 guns, two 80-gun ships, an 80-gun old hulk, and a 50-gun frigate. The part of the vessels which remains above the surface of the sea has been daubed over with pitch, and loaded with inflammable matters, for the purpose of being set fire to should the vessels of the Allied fleets attempt to enter.

The 120-gun ship inside the harbour has been heeled over, for the purpose of giving her guns greater elevation, and crossing the fire of the batteries on the hill on the north side.

As the solid mass represented by the fire-ships and two frigates now under water is about 21,000 tons in weight, it will easily be guessed that the only mode of removing the obstruction must be blasting; and we understand that Messrs. Armstrong, of Newcastle, are busily employed executing an order from the Admiralty for the construction of apparatus for that purpose. The machines are twenty-five in number—thirteen larger, and twelve smaller—and each consists of three concentric water-tight cylinders, placed one within another. The innermost cylinder will be filled with fire gunpowder, and the space between it and the next with ordinary blasting-powder, and the outer one left vacant. A galvanic wire inserted in the innermost cylinder will be placed in communication with the battery at the surface. The order was to be completed this week, but prior to their being shipped off to Sebastopol, the effect of one of them was to be tried upon a sunken wreck at Tynemouth. The larger ones will weigh three tons each, and, when charged, four tons.

As the sea is generally calm in the Sebastopol channel, the divers will not find much difficulty in lodging the charges where they can be most effective. After that, so soon as the train is fired by one of the contrivances explained above, the explosion, even supposing it does not demolish at the first blast this peculiar kind of stockade, will at all events make a breach, so as to facilitate further operations.

TELEGRAPHIC DESPATCHES.

Telegraphic despatches from Vienna state "that some engineers have deserted from Sebastopol to the Allies, and represented that the town was pestilential, from the number of dead bodies in the streets. Provisions were very short.

"Reinforcements are said to have joined Menschikoff, and some part of his army appears to have come round to the south, near Balaclava. Skirmishes daily.

"The upper tier of Fort Constantine is completely destroyed.

"Two line-of-battle ships, which were firing shells at the Allies from the south, or inner port, were sunk by one of our batteries.

"The Commander of Sebastopol—the same that commanded at Sinope—killed by a shell."

(From the *Morning Chronicle*.)

VIENNA, Thursday, Nov. 2.

Baron Von der Pfordten has arrived here.

Nothing decisive had taken place at Sebastopol up to the 27th ult. The city and magazine burned on the 17th, 18th, and 19th.

A despatch of Prince Menschikoff, of the 26th October, officially confirms the affair of the 25th.

The Russians attacked the detached English camp, and took four redoubts.

The English lost 600 horses and eleven guns.

The French had a second battery razed.

VIENNA, Thursday, Nov. 2.

The *Trent* brings news from Baluclava to 26th October. She reports that the upper batteries of Fort Constantine were demolished.

The Allies had sunk two Russian line-of-battle ships in the Southern Harbour.

Frequent conflicts occurred between the enemy and the English covering the troops at Inkerman.

CONSTANTINOPLE, Oct. 26.

Advices from the seat of war in Asia state that the Russians occupy Toprach Kale, and threaten Kars.

5,000 French troops from the Pirœus had passed through the Bosphorus for the Crimea.

MALTA, Oct. 30.

The *Valorous* and *Lion* have sailed for the Crimea.

The *Vectis* has left for Constantinople, with important despatches.

The *Euphrates*, which left Constantinople on the 20th, reached Malta on the 29th, damaged. She was the bearer of despatches from Lord Raglan, which have left by the *Hellespont*.

THE RUSSIAN DESPATCHES.

It is now some some sixteen or seventeen days since the bombardment of Sebastopol is understood to have begun, and yet not a single letter from the seat of war has been received by any of the London papers. In the absence of more authentic intelligence the public has been tantalized from day to day, with Russian telegraphic despatches, professing to give a report of the siege operations. Among other wonderful statements, it was announced that General Liprandi had attacked the enemy's camp on the 25th ult., and driven back the English cavalry with great loss. Another Russian account of the affair states—

General Liprandi, with 30,000 Russians, attacked the English right flank on the night of the 24th of October, at Inkerman, on the Tchernaya, and took five redoubts and several guns. The English cavalry suffered severely.

The same alleged exploit has been published in the official *Austrian Moniteur*, in the following form:—

On the 25th, General Liprandi attacked the detached camp of the English, and took the four redoubts which protected their position. The assailants also took seven guns. At the same time such a powerful cavalry attack was made that it probably cost the English half their light cavalry. Lord Cardigan, who commanded, escaped with difficulty.

The *Oesterreichische Correspondenz*, a less official organ of the Austrian Government, contains a despatch from Sebastopol of the 24th, which states that nothing decisive had occurred up to that date, but that the bombardment of four of the forts continued, and was answered by the Russians in Sebastopol. The vessels of the Allies were reported to have sustained much injury in their recent attack upon the forts at the mouth of the harbour, and some stores of powder had exploded. The *Firebrand* is mentioned as having suffered especial damage.

The *Presse* of Vienna publishes, but without date, the statement that "The Russian fire in reply to the bombardment of the Allies is feeble. Two powder magazines in Sebastopol had exploded. The loss on both sides is considerable. The Admirals report that the fall of Sebastopol is expected shortly."

The *Lloyd* of Vienna, of the 28th ult., has the following:—

According to letters from Varna, of the 19th, the Austrian merchant-vessels *Ban Jellachich*, *Tercso*, and *Adelina*, were, on the 17th and 18th, off Sebastopol, and they bring some news relative to the bombardment. The fire of 400 piece of artillery continued uninterruptedly for twelve hours, and was only directed against the batteries placed above the Quarantine port. On the 18th the fire was not renewed on that point, as the most advanced redoubts of the Russians were evacuated on the night of the 17th, and the Russians had withdrawn behind their stonework. The construction of the breaching batteries commenced on the 18th. On the same day, some officers of the marine artillery took up a position with 5000 sailors and marines and a body of rocket men, on the Plateau of Chersonnesus, from whence they would take part in the bombardment of the works of the Quarantine port. From other accounts from Sebastopol, it appears that the 17th was marked not only by the commencement of the bombardment, but also by a combat which is said to have taken place under the walls of Sebastopol, on the heights between the Church of St. Vladimir and the Cemetery. The contest was very sanguinary, and terminated in favour of the Allies. It was in this combat that Admiral Kornilof is said to have fallen.

So far as we are able to gather from the imperfect evidence on the subject, the alleged exploit of General Liprandi is only one of those *Fusdalte Russe* victories, for which so many "Te Deums" have been chanted at St. Petersburg. From despatches received by Government, up to the 25th ult., by the *Trent* steamer, which left the Crimea on that day, we have news of the successful progress of the siege to that date. No particulars are given; but it is stated that "up to the time of the departure of the *Trent*, the siege and bombardment were going on with regularity and success." As regards the attack of General Liprandi, the last accounts from Vienna allege that it was a gross exaggeration of a mere affair of outposts.

THE LATEST RUSSIAN MANIFESTO.

The St. Petersburg *Court Journal*, of the 20th ult., publishes an article worthy of notice, as it contains a sort of programme of Russian policy, and announces, without circumlocution, the objects which Russia seeks to attain by the present war. At first it states that the demands made by the Western Powers, of the Porte, in regard to placing the rights of its subjects upon the same level, go twice as far as was intended to be demanded by Russia, especially through Prince Menschikoff's mission. The Journal cautiously avoids touching upon the fact that Russia's supreme object was to confirm these rights through her own protectorate:—

If (says the *Court Journal*) it was the conviction of the Western Powers that it was essential to carry out their object, they should have said, on the Prince being sent to Constantinople, "You ask too little. You only demand the half in the entire equality." Had this been done, the unhappy conflict might have been avoided, and the "faithless publication of the Blue-book" rendered superfluous. The noble and decided language addressed by the Emperor in regard to Turkey does not reflect upon him the slightest spot as monarch, Christian, or ally, because the existence of the Ottoman realm is an anomaly, a thing deprived of vitality. England was in her heart convinced of the rights and justice of the Emperor, but concealed her own grasping intentions in order to convert them at the proper moment to her own special advantage. Did not England fear the power and unbending character of the Emperor, the world would never have witnessed a union between France and England. England looked about for an ally which, after the object was attained, might be more easily thrown overboard than Russia. Russia's mission is certainly great. She is called upon to set limits to the materialism of England. France holds a secondary position. She is a mere bubbling political whirlpool, not a durable and generally destructive inundation. We must fight England, because she alone, and not France, is the focus and support of all revolutionary principles. It is not Russia, but England, who, imbued to the core with "mercantilism," treads under foot humanity and the rights of men. It is Russia's mission to protect Europe from the torrents of the West. As formerly the storm flowed from east to west, now the reverse is the case. No matter how the causes of the war may be regarded, that between Russia and Turkey is founded on religious grounds. Through the policy of the Western Powers the war has, however, assumed the character of a struggle between Conservatism and Communist revolution. Only one path is open to the Emperor—that of right and honour. He will adhere to his sword not to make conquests, but at the same time it is his mission to restore Russian "preponderance" on the Bosphorus, because that is absolutely requisite for the development (?) of Russia, and the re-establishment of order. It is Russia's holy duty to establish and consolidate the dominion of Christianity on the Bosphorus. Finally, the Emperor, as the strong rock and defender of Europe, has to fulfil the lofty mission of consolidating European Conservatism. To attain this object Russia must carry on an obstinate war, which will break down England's avarice, and unconditionally terminate Turkish misrule.

REINFORCEMENTS FOR THE CRIMEA.

Since the Allied armies landed in the Crimea, no very definite account has been given of the actual numbers of French or English troops which have successively arrived there. Some soon-to-speak of a division having been landed on the north side of Sebastopol, with the view of effecting a diversion there, but no particulars are given as to when or where, or as to what number of troops it included. A few days ago the Vienna military paper, called the *Soldaten Freund*, stated that on the part of the Allies there have been 20,000 troops of the line, 7000 cavalry, and 2000 engineers transported to the Crimea since the landing of the expedition. These include the reserves from Gallipoli. 12,000 men from the Pirœus and Rome will follow, and form the reserve of the expeditionary army. The *Soldaten Freund* adds that the Russian troops which have already passed the isthmus of Perekop may, perhaps, number 35,000 men, inclusive of the Cossacks. These concentrate in the fortified camp at Bagtcheserai, and maintain the communication with the northern forts of Sebastopol. The figures appear to be greatly exaggerated by the *Freund* on both sides, but it is difficult to say, without more precise data on the subject.

It seems unquestionable, however, that the French Government is actively engaged in forwarding additional troops to the East. A letter from Marseilles, written on the 29th ult., states that reinforcements were being collected en masse to the army of the Crimea, with a favourable wind. All the transports laden with Cuirassiers and Engineers, with their horses, which had been detained by contrary winds for some days, had cleared out, and there was not a hired transport remaining in the docks. The *Simoi* mail-steamer took 500 of the 18th Regiment of Infantry to Constantinople. The *City of London* steam transport had sailed for Constantinople that day week, with 500 of the 39th of the line. The mail-steamer *Tilsmagne* sailed the same day; her decks crowded with Chasseurs of Vincennes.

Letters from Toulon, of the 25th ult., speak of the naval preparations there for the embarkation of reinforcements for the army of the East as being on a vast scale. There were three ships of the line, one sailing frigate, and several steamers, ready to receive more than 4000 troops, and convey them to the Crimea.

Letters from Malta announce that since October 11 six steamers with French and English troops, and more than twenty brigs coming from Marseilles, with cavalry, had successively passed the fort of La Valette.

A part of the Egyptian contingent promised to the Sultan by Said Pacha, and commanded by Menekli Pacha, embarked at Alexandria, in three steamers on the 19th.

WHAT THE BALTIC FLEET HAS DONE.

THE *Edinburgh*, screw-steamer, carrying the flag of Rear-Admiral Chads, arrived at Kiel on Wednesday, the 1st inst. We perceive also, from the Hamburg papers, that the English men-of-war, fourteen in number, all screws, namely—two three-deckers, and ten two deakers, with two frigates, had left the Gulf of Finland on the 20th ult., thus rendering the communication free between the different Russian ports in that sea.

As a good deal has been said about the small results which have been accomplished by the Baltic fleets, it is worth while calling attention to the remarks of an intelligent Frenchman on the subject, who passed several months in the Baltic this year; and who, during his stay in the north, visited the principal points to which the combined expedition was directed. He is described by the Paris correspondent of the *Times* as having had abundant opportunities of making himself acquainted with the condition of the Northern States in a political and strategic point of view, and as being competent to give an opinion on what fell under his own observation.

According to the intelligent Frenchman, the capture of the Aland Isles is much more important than has been supposed. Its main object was to effect a diversion in the Baltic, to completely occupy the attention of the Russians, and to allow of the preparations for the expedition to the Crimea; and that chief object has been attained. The Russians were led to believe that the grand attack on the Baltic would take place this year. They maintained there an enormous force, and neglected the Crimea, in which they otherwise would have concentrated all their strength and resources. It was firmly believed at St. Petersburg that Sweaborg and Cronstadt were to be attacked before the close of the campaign, whilst any attempt on Sebastopol was regarded as impossible. It was that conviction which occasioned the counter orders for the dispatch of the troops that Prince Menschikoff had demanded so far back as June

Independently of that consideration, the taking of Bomarsund is important as a military operation. The defence made by the Russians was contemptible, and the Allies, in fact, encountered nothing like a serious resistance; but Russia has put in hand a military and maritime establishment of immense importance for the future. It is admirably situated, and its bay, Lumpar, is one of the finest of Europe. An equivalent for the loss of Bomarsund cannot be found anywhere else. Such as it was, it not only could be defended, but rendered very difficult to be taken if the Russians had defended the passes, and tried to prevent our landing. Of the garrison there we only the battalion of Finn, amounting to 800 men, who really offered no resistance.

The spirit which prevails in Finland has been already referred to. It is well known that the Allies did not count upon Esthonia, Courland, Livonia, or the Grand Duchy of St. Petersburg, any more than upon that province. The ignoble and odious Government of the Emperor Nicholas is not popular with the inhabitants of these countries, who are utterly degraded beyond what any one can conceive: but we may rest assured that the Allies will not find the fanaticism of 1812, because all these races are of German origin, and even at St. Petersburg itself there are very few Russians. Fanaticism is not to be met with; it will only be manifested at Moscow, whither the Emperor will fly after the taking of St. Petersburg, and whither, it is more than probable, we shall not follow him.

FORMATION OF A PERMANENT CAMP.—The Board of Ordnance intend to form a permanent camp at Aldershot, near to the site of the Chobham camp of last year, and also to construct some important artillery defences to Portsmouth and the adjacent coast. The camp at Aldershot will comprise barracks, magazines, and other buildings necessary for the accommodation of 15,000 men. This will include regiments of cavalry, detachments of horse and foot artillery, and infantry. The works are to be proceeded with with all despatch, and it is reported that £10,000 will be spent upon this camp by March next.

THE CRIMEA AND THE 23RD REGIMENT.—Thirty centuries since the Crimea was the hunting-ground of the Cimmerioi, a people who, on the invasion of their country by the Scythians, fought a desperate battle among themselves on the question of resistance or non-resistance; and then, having very probably become *hors de combat*, abandoned the land to the invaders. This circumstance itself seems sufficient to identify the Cimmerioi with the Celts, whose valour was so often and so fatally expended on internal quarrels. This was ever the great error of the Cymry, or Welsh, who thus appear to be one in name and manners with the ancient Cimmerioi. The traditions of the Cymry point to the *Gleiad yr Haf* (Summer Land), or the Crimea, as their original home, and that they emigrated under their leader Hu Gadaru, seeking a land where they could dwell in peace. This evidently alludes to the Gwlad yr Haf having become the scene of war and bloodshed; and their wanderings are stated to have continued until their arrival in the island of Britain. After the revolutions of ages, a mighty expedition has sailed from Britain and landed in the Crimea; and in that expedition some of the descendants of the Cimmerioi have returned to their *mam-aland* (mother-land), where many of them with that "heroic gallantry" which has conquered on numberless fields of fame, have fought and died, and been covered with earth, among the barrows of their "old fathers."—*From Notes and Queries.*

LORD PALMERSTON ON THE WAR.

At the annual dinner of the members and friends of the "Laborers' Encouragement Society," last Tuesday, at Romsey, Lord Palmerston, in replying to the toast of "Her Majesty's Ministers," made the following remarks on the war:—

On this occasion there has been no difference between the Executive Government and the country, except this—that the Government clung to the hope of peace long after the country had made up its mind that war was inevitable (Cheers); but in that respect I think the country was not final fault with the Government, because it was clearly the duty of those who were charged with the fortunes and destinies of a great nation to postpone to the latest period the dreadful alternative of war. The country and the Government have both come to the conviction that it was necessary to draw the sword for the purpose of maintaining principles of the utmost importance to the welfare of mankind—for the purpose of not only supporting the weak against the strong, and protecting the commercial and political interests of an ally, but for supporting the same principles of moderation, not only in Europe, but of the world—two nations most worthy of the esteem of each other—will, as the result of the resolution of the Government and the country to engage in this contest, be for ever bound together in ties of friendship and affection (Tremendous cheering). Anticipating that whatever may be the difficulties and dangers of the conflict—whether it may be long or whether it may be short—the result must be one—that is, that the arms of England and France, reared in combat for the cause of justice and truth, for the cause of liberty and of national independence, not seeking conquests for selfish objects, but for the most noble objects—assuming the heroic character—I cannot but feel confident that the result, come when it may, will be such as will gloriously crown the efforts which the nation has made, and will place the honour of this country—with the characteristic dignity, and well-being of this country—upon a surer and firmer basis even than that on which they have hitherto stood (Great applause); and when the people shall look back upon the sacrifices they have made, they will feel that the result has fully justified the means that were used, and they will feel that they have been rewarded by ample success for all the exertions which the Government has called upon them to make.

ERECTION OF BATTERIES.—The Board of Ordnance have advertised for tenders for the erection of a battery, with magazine, shell, and fuze room, and master gunner's store, at Hurst Castle, one of the defences of the entrance of Portsmouth harbour. This will be an earthen battery, mounting five or six heavy guns. A similar battery is to be erected on the opposite side of the harbour mouth, at Fort Monkton. At Freshwater Gate, outside the Needles, in the Isle of Wight, a powerful battery is to be erected; this will mount fifteen or sixteen guns of the heaviest calibre; whilst the Sussex coast is further to be strengthened by the construction of a strong battery at Shoreham, near Brighton. The new and very heavy battery at Sconce Point, inside the Needles, in the Isle of Wight, is now on the point of completion.

"THE REAL COMFORTS OF ACTIVE SERVICE."—In England I should deem my Crimea bed worthy only a convict, whereas now I value it as fit for a Prince. Let me just describe it and my night-dress, so that the real comforts of active service may be fully understood by those who connect soldiering with messes, *conversaziones*, and ball-rooms. My brother-in-arms is now extended on a water-deck, to keep off the damp, over him is stretched a B. O. blanket, a Spanish horse-cap, and a blue cloak, a wide-awake tied closely about the head forms his night-cap, whiskers and beard of Eastern length warm the lower portion of his face and from his mouth protrudes a wholesome-looking Manilla. "Well," he says, "are you going to turn in, as it is cold—what a bitter wind. I should have thought that some blessed *pâte en famille* would have been a good medicine such a night as this—try the prescription." The hint is taken, the inner man seems fortified, and I begin to settle for the night, my material for inviting sleep having been lately curiously improved. First, a large pea-jacket, tanned (it was taken from the Russians picked up after the battle of Alma), is stretched out on mother earth, upon which is strewed a goodly bundle of hay; then come two pairs of worsted stockings, upon which are placed two blankets, and an old buckram-steer's cloak. All seems now ready for the tenant; but think not that the tenant is prepared for his downy bed like a civilian—not one bit—he is a soldier and a Spartan boy, we at the ex speak hopefully of a dinner at the "Rag and Famish." I need hardly say that our subjects are by no means arranged, nor do they require any large amount of intellect. The *serre-papier le temps*, and when the tongue of either is tired, the significant snore will say, "What say you now to a sleep? I begin to feel rather dozy." A "good night" follows, and we are soon snugly enfolding old Father Somnus, who is sometimes paradoxically called "Nature's soft nurse."—*Letter from the Heights above Sebastopol.*

A STRANGE WILL.—We find the following extraordinary statement in a New York paper:—"Mr. Railing, of New Hampshire, was among the victims of the last railroad accident between Brighton and London. His heirs, after having paid him the customary funeral honours, did what I here do in similar cases—opened the will of the deceased, to ascertain what share each was to have in his posthumous liberalities. As he had never given a penny to either of his relatives during his lifetime, they expected to be the richer now that he was no more. One may imagine the surprise caused by the first line of the will:—'This is my testament, and bequeath all my goods, present and future, moveable or immoveable, in England or on the Continent, to that railroad company on which I have had the happiness to meet with death, that blessed day when I received a paternal grimace.' The testator then gives his reasons for his bequest. The idea had taken firm possession of his mind that he was destined to die a violent death, and to die near London. In view of this he had caused a monument to be erected in the cemetery of Père la Chaise, and when the tongue of either is tired, the significant snore will say, "What say you now to a sleep? I begin to feel rather dozy." A "good night" follows, and we are soon snugly enfolding old Father Somnus, who is sometimes paradoxically called "Nature's soft nurse."—*Letter from the Heights above Sebastopol.*

As he had never given a penny to either of his relatives during his lifetime, they expected to be the richer now that he was no more. One may imagine the surprise caused by the first line of the will:—'This is my testament, and bequeath all my goods, present and future, moveable or immoveable, in England or on the Continent, to that railroad company on which I have had the happiness to meet with death, that blessed day when I received a paternal grimace.' The testator then gives his reasons for his bequest. The idea had taken firm possession of his mind that he was destined to die a violent death, and to die near London. In view of this he had caused a monument to be erected in the cemetery of Père la Chaise, and when travelled, therefore, constantly on the railroads of England, Belgium, and France. There was not a station where he was not known. All the conductors were familiar with his countenance. He had narrowly escaped death several times. Once he was up in a car under water; another time he was in the next car to the one that was shattered; and he described with the greatest enthusiasm these terrible accidents, in which he saw death so near without being able to obtain it. Disappointed in Europe, he went to the United States. He made frequent excursions on the Ohio, the Mississippi, the Ontario, the Niagara, and, notwithstanding all the frequent explosions, he returned with a whole skin. He was destined to be crushed under a car of the mother country. It is said that the relatives will attempt to break the will on the ground of insanity; but it is not probable that the railroad will win the suit in spite of the proverb, that 'the murderer never inherits from his victim.'"

THE VISIT OF LORD CLARENDON TO PARIS, relative to the arrangement of a more equitable system of postage between France and England, has, it is said, succeeded to a certain extent. The postage of a single letter is henceforward, report says, to be 6d. (12 sous) either way, in place of 10d. paid at present in England, and 16 sous in France.

DESTRUCTIVE FIRE AT LIVERPOOL.—On Thursday week a fire broke out in a warehouse in Lancelot's Hey, Liverpool, which rapidly spread to adjoining buildings, and was not extinguished till it had entirely consumed several of them. The warehouse in which the fire originated are six stories high, with vaults and cellars three or four stories in depth. In the cellars were warehoused 600 barrels of spirits of turpentine, 100 barrels of resin, a quantity of rosin, pork, and sometimes brimstone, whilst the upper floors were loaded with cotton—all the various articles belonging to different owners. Four warehouses, with the whole of their valuable contents, were entirely consumed. The fire was partially extinguished till Saturday evening. The damage is estimated at about £250,000, which is covered by insurance.

Two of the Emperor Napoleon's Ministers are ill in Paris at this moment—M. Billault, Minister of the Interior, and M. Bineau, Minister of Finance, who has lost his voice.

At one of the late sittings of the Paris Academy of Sciences, M. Leverrier stated that he had received a communication from Mr. Gould, announcing the discovery of a 41st little planet on 1st September, by Mr. Ferguson, at the national observatory of Washington. The new planet is about equal in brilliancy to Egeria.

Among the certificated nurses who have just left this country, under the charge of Miss Nightingale, to attend upon the sick and wounded in the British hospital at Scutari, is Miss Erskine, eldest daughter of the Bowseer Lady Erskine, of Pwll-y-crochan, North Wales.

CRIMINAL STATISTICS.

THE official Records of Crime, annually published, have just been issued for the year 1853, and we regard them as giving additional testimony to the continual improvement of society. Those for England and Wales are accompanied by returns of the number of commitments for twenty years, which, in that period, increased 20.5 per cent, while the population, in the same period, increased 27 per cent. From this we may conclude that the whole population has become, in the interval, 6.5 per cent less criminal. A closer examination of the figures gives still more favourable results. Between 1834 and 1842 the increase of commitments was from 22,451 to 31,309, or 39.4 per cent; and between 1842 and 1853 the decrease was 13.5 per cent. "Since 1842," says the Report, "the tendency to decrease in commitments has been almost uninterrupted." Since 1842 the prosperity of the country has been continual; we may infer, therefore, that the population increased faster in the latter than in the earlier part of the twenty years, and with a continued increase of people there was this great and continual decrease of commitments. A similar circumstance is true of Scotland. Between 1847 and 1853 the commitments declined from 4365, to 3756, or nearly 19 per cent. The diminution is proportionably greater in Scotland than in England. At the same time the number of commitments in proportion to population, is one-seventh less in Scotland than in England. Though the system of education in Scotland is no longer considered to be perfect, it is undoubtedly much superior to the system, or rather the no-system, which has prevailed in England; and the greater decrease of commitments there latterly, than in England, and the smaller proportion of them to the population, can only encourage us to promote education by all the means in our power.

More details are given of the criminality of England than of Scotland; and, as the former is the more important of the two, and has the reputation of being much the more criminal, we shall confine our further remarks to the improvement which is obvious in England. It is satisfactory to know that the decrease of commitments extends over most of the counties, though in unequal degrees; and that all violent offences, both against person and against property, continue to decline. The offences are divided into six classes; viz.:—First, offences against the person, including the more heinous crimes; second, offences against property, committed with violence; third, offences against property, without violence; fourth, malicious offences against property; fifth, forgery and offences against the currency; sixth, other offences not included in the previous classes. Now, for the first class, the commitments were, in 1853, 2100; which is 42 above the average of the five years 1849-53, but 55 below the average of the five years 1844-8. A large part of the increase, viz. 37, is made up by assaults of various kinds—the least important of this class of offences. For the second class, the commitments in 1853 were 1696; being 268 below the average of 1849-53, and 132 below the average of 1844-8. For the third class—which embraces four-fifths of the whole—the commitments were, in 1853, 21,545; 68 more than the average of 1849-53, and 56 less than the average of 1844-8. But, on examining the particular offences of the class, it appears that, in 1853, as compared to the average of 1849-53, there was a reduction in horse-stealing of 15 on 109; and in sheep-stealing, of 95 on 245; and, as compared to 1844-8, there was a reduction in horse-stealing of 38 in 132; and, in sheep-stealing, of 112 in 262. The other and numerous offences of this class were those petty larcenies and small thefts which are among the most annoying, but not the most flagitious of our domestic vices. For the fourth class there were, in 1853, 219 commitments—46 less than the average of 1849-53, and 3 above the average of 1844-8. The class of malicious offences involves some hateful passions, and their diminution in the latter years is satisfactory. In the fifth class there is the greatest relative increase. The commitments in 1853 were 850—78 above the average of 1849-53, and 330 above the average of 1844-8. In the last class, embracing all that was not included in the others, the commitments were 647—81 above the average of 1849-53, and 266 above the average of 1844-8. It must be remembered throughout these statements, that—according to the law of increase which has prevailed for many years, and which we have good reason to believe, from the increasing number of marriages, has of late been very active—our population, notwithstanding the emigration, was considerably more in 1853 than in 1849, and still more than in 1844. Yet we find as the rule in all offences, and particularly the more heinous offences, a considerable diminution in 1853. The decrease of commitments in the last year was 1.8 per cent as compared to 1852; the increase of the population we cannot put down at less than 1.2 per cent, making a real improvement equivalent to 3 per cent. Looking at the density of the population in different parts of the Empire, and at the rapidity with which it increases—as stated at pages 25 and 24 of our Census—it will be found that in the London division the mean proximity of individuals is 14 yards, and the increase of population in Middlesex 20 per cent in ten years; and in 1853, as compared to 1844, the commitments in Middlesex had decreased 8 per cent. Taking Westmoreland, as an opposite example, the commitments there increased 83 per cent, while the population increased only in ten years, at the rate of 3 per cent. More instances to illustrate the principles could be quoted, but these will suffice to show our readers, in conjunction with the general statement already made, that the increase of population, bringing every man, as it were, under the censorship of every other, has a tendency to diminish, not, as is generally supposed, to increase, crime. When to these facts, we add that the alteration of the laws in relation to assaults and perjuries, and that the increased vigilance of the police throughout the country have tended to increase the number of committals and bring more offenders to justice, we may congratulate the country on a very perceptible diminution in almost every kind of criminality. The great improvement is distinctly traced by the compilers of the Criminal Tables to the year 1842, when the great change was made in our commercial policy, followed by an increase in national prosperity, which has continued to the present time. Whether this, or the greater attention which has of late years been paid to the health, the comfort, and the education of the multitude, be the cause of the improvement, it is plain that we are going in the right direction, and that the continuation of these causes, attention to the welfare of the multitude, and the extension of freedom in our commercial policy, will ensure greater prosperity and greater morality for the whole people.

We should not act justly, however, if we did not mention, though with much regret, that the number of commitments of females has increased; in fact, the decrease in the last year has been wholly of males in the proportion of 4.6 per cent, while the females have increased 3.8 per cent. We do not pretend to account for this anomaly, but it is one which cannot too earnestly engage the attention of those who undertake to provide for the welfare of society.

MUSIC.

M. JULLIEN'S PROMENADE CONCERTS.—There is very little that is new to be said about Jullien or his concerts. He was for a long time the object of unsparing but misplaced ridicule. Our periodical wags found food for constant jokes in his personal appearance and costume; his amplitude of white waistcoat, his superb moustache, and the magnificent air with which he wielded his bâton of command. But they neither perceived the good he was doing even then nor foresaw the greater good he would do thereafter. They did not know that by creating the most numerous and powerful instrumental orchestra in England, he was giving professional occupation to a great many people at the dead season of the year when they stood most in need of it; that his terms were liberal and his engagements fulfilled with scrupulous integrity. Nor did they know, that, by persevering in his course through good and bad report, he would work an absolute revolution in the popular taste of the metropolis. All this is now known even to the jokers themselves, and *Punch* and his brethren joke no longer.

Jullien has resumed his concerts after his two years' absence in the United States. They began at Drury lane last Monday evening. The fitting-up of the theatre, with its promenade, refreshment-room, reading-room, and other accommodations and comforts, is precisely the same as heretofore; the orchestra is of the same strength and quality; there is the same array of eminent solo performers; and the concerts consist of the same descriptions of music—great orchestral works of the most severe and classical school being mingled with the gayest and lightest strains of the light quadrille. On Monday night there was little novelty. Beethoven's fine overture to "Egmont," and Mendelssohn's "Italian Symphony," were performed in the earlier part of the evening, attentively listened to, and warmly applauded. But the "British Army Quadrille" was the thing which raised the prevailing martial excitement of the audience to a heat which did not cool down again for the rest of the evening. The crowd and pressure by this time were enormous; and, when this is the case, there are always noise and confusion. There was nothing but good-humour and politeness manifested, however boisterously these feelings were occasionally expressed. Sometimes the multitude were "uproarious," but there never was a shadow of discord or disturbance. We were in the think of the crowd, and found the scene lively and amusing, even when "the fun was fast and furious." All this exuberance of spirits was the natural consequence of a multitude probably unprecedented being assembled to enjoy a favourite entertainment after a long interval. On the following evening, though the theatre was quite full, yet the music was quietly and attentively listened to.

THE THEATRES, &c.

ST. JAMES'S.—A version of a French play was produced on Monday—'La Poissarde" anglicised as "Honour before Titles." It is one of those pieces which, though complex in plot, have no serious interest, and are constructed according to those mechanical rules of the Parisian stage which enable the playwright to present a picture of manners, minus the life—that inner soul, without which conventional exposés have little meaning, and no moral. *Madeleine Paillevey* (Mrs. Seymour) is brought into contact with aristocratic temptation, and suffers from a *mesalliance*. The deserted wife formally sees her become a widow, and marries a second husband, the humble *Pierre* (Mr. Toole), who proves more than a step-father to her orphan child, *Aurélie*. But the poor girl is doomed to be beloved by *Gaston*, the son of *Count de la Tournerie* (Mr. Stuart)—the last-named person being personified by a valet who had spurited *Gaston* away in childhood, and assumed the character of his parent. Of course the sham *Count* interferes with the happiness of the lovers; and, of course, he is himself exposed in the end. In this exposure, *Jerome* (Mr. H. Rivers), a friend of the Paillevx, is the agent; who, however, encounters considerable difficulties in the execution of his mission, owing to the said sham *Count* knowing him to be *Raymond de la Tournerie*, the real one, in disguise, on account of a duel in which his opponent was supposed to have been unlawfully killed. There impediments are disposed of in the ordinary way. There is one scene, nevertheless, having novelty and ingenuity. The sham *Countess de Vire* (Mrs. Selby) was once a market-woman, and, being recognised by *Madeleine*, the two *poissardes* resort to their native Billingsgate. Their representatives created much amusement by their forcible exponency of this highly comic situation. Mr. Toole, too, as the rascal, despite his disguise, betrays the victim of the villanous hero of the drama, gave evidence of a peculiar power for eccentric delineation, which promises ere long to be very effective. The curtain fell to applause.

ADELPHI.—A new occasional farce, called "Bonâ-fide Travellers," was produced on Monday, directed against the new Beer Bill. It depends entirely on Mr. Keeley's acting the part of *Jemima*, the housemaid of an inn, who passes off on the police a party of friends and her sweetheart as bona-fide Sunday travellers. Two tobacco-pipes, recently smoked, testify against her; but she pretends to have smoked one herself, and *Joe* (Mr. Keeley), the pot boy, the other. *Jemima's* capacity for smoking is practically tested, and her disgust at having to finish the pipe may be conceived. The ludicrously excited great applause, and secured, so far, the success of the new piece.

MR. HOWARD PAUL, the American dramatic writer, several of whose pieces have been popular on the London stage, made his début last week, at the Theatre Royal, Bath, in a musical entertainment entitled "Locked Out." The piece only contains two characters, one personated by Mr. and the other by Mrs. Howard Paul (whom Miss Featherstone). Both débutant and piece met with success.

A MENAGERIE AT WINDSOR-CASTLE.—In consequence of an intimation on Thursday week from her Majesty to Mr. Edmonds the proprietor of Wombwells Menagerie, then exhibiting at Windsor Fair—the whole of the carriages, twelve in number, were removed from the site of the Old-mews, on the following day, and proceeded up the Castle-hill to the quadrangle, followed by an immense crowd. Three hours sufficed to get them placed in perfect order, covered in, a carpeted floor laid over the whole of the interior, and every arrangement completed. Shortly before three o'clock, "the largest elephant in the world," and the young performing elephant, the latter easily caparisoned, were brought from their carriages, and marched in front of the corridor, from one of the windows of which the Queen and Prince Albert appeared to watch the movements of the animals with great interest. At three o'clock, her Majesty and Prince Albert, accompanied by all the Royal children and the ladies and gentlemen in waiting, walked from the private entrance to the opening which led to the collection, and which was distant not more than a few yards. Mr. Edmonds's band pealed forth the National Anthem, after which her Majesty entered the house, when the fine old air when the august party retired, about four o'clock. The large elephant was then harnessed to the carriage conveying the band, and drew it round a portion of the quadrangle for her Majesty, with the Royal family standing in the porch of the Queen's Tower, and evidently enjoying the scene. By this time the entrance to the Quadrangle was thronged by the Eton boys, 600 strong, anxious to obtain admission. Her Majesty had invited the whole of the school to witness the exhibition, with instructions that they should attend as soon after three o'clock as possible, as she hoped, however, that they were compelled to attend the College Chapel until a quarter to four; but, before the castle clock chimed that hour the greater portion of them were in attendance. In the anxiety to obtain a peep at the huge elephant, they scaled the mound of the Round Tower (a spot usually closed against all intruders), and resisted every effort of the police to dislodge them. In a few minutes the gates were opened, and the boys rushed impetuously towards the scene of action. On entering the booth they gave a series of lusty cheers for the Queen and Royal family, and then all was silent, save when the band played some fine passages from Handel or Beethoven. Soon after five o'clock the collegians, after repeating their cheers, departed for Eton. The servants belonging to the Royal establishment then went over the collection.

AN AGED PARTY.—On Sunday last, forty-eight poor women were liberally regaled with a dinner of roast beef and plum-pudding, followed by tea, at the coffee-room of the overseer of the parish of Whitechapel, Mr. Harwood, 9, Cable-street. After the Evening Hymn was sung by the aged guests; each of whom was presented with a small sum of money. They then proceeded to Whitechapel Church, where they are regular attendants. The united ages of the guests amount to 3369 years: one is 82 years old, another 80 years, and several above 80 years; and the mother of Mr. Sherwood, aged 84 years, was in attendance upon the visitors.

WHISKY SOLD AS A MEDICINE.—Last Sabbath afternoon, the Edinburgh police discovered an apothecary selling whisky, slightly medicated, to customers shut out from the public-house by Forbes Mackenzie's Act. The liquid was poured out of a medicine-glass, and the phials or other vessels brought by the purchasers were carefully labelled "Cholera mixture; dose, half a wine-glass full three times a day."

The Duke and Duchess of Alba, the brother and sister-in-law of the French Empress, are now at St. Cloud.

CASTING A MONSTER CYLINDER, AT MESSRS. SCOTT RUSSELL AND CO.'S BUILDING-YARD, MILLWALL.

A MONSTER CYLINDER.

On Friday, the 27th ult., the casting of the last of the four largest cylinders in the world was successfully accomplished at Messrs. J. Scott Russell and Co.'s building yard, Millwall. They are intended for the new iron steam-ship now being built by Messrs. Scott Russell and Co., for the Eastern Steam Navigation Company, which, when completed, will be the largest steamer afloat. The cylinder cast last week is 18 feet long and 6 feet in diameter; 83 tons of metal were poured into the mould, but when bored and finished off, it will weigh about 28 tons, or 62,720lb. The great bell of St Paul's, it may be observed, which is 9 feet in diameter, weighs between 11 000lb and 12,000lb.

The vessel for which they are intended is of proportionably monstrous dimensions. Her length will be 676 feet, her beam 83 feet, and her height 60 feet. A comparison with the *Royal Albert*, which is 272 feet long, 82 feet broad, and 66 feet high, will at once show what a leviathan the new steamer will be. She is built entirely of iron, and is divided into compartments of 60 feet each, perfectly watertight. About 10,000 tons of iron plates will be used in her, and, as each plate weighs about a third of a ton, and is secured by 100 rivets, there will be 30 000 plates and 9 000,000 rivets employed in her construction. At her bottom these plates are an inch thick; in all other parts but three-quarters of an inch Up to the water-mark she is constructed with an inner and outer skin, three feet apart, each of equal firmness and solidity; and between these, at intervals of six feet, ran horizontal webs of iron plate, which materially increase the powers of resistance both of the inner and outer skin. By this mode of construction it is calculated the dangers of a collision at sea, such as occurred lately in the case of the *Arctic*, are very much lessened, for, though the outer skin might be pierced, the inner one remaining intact, as it would, except under most extraordinary circumstances, the safety of the vessel would be in no wise endangered Again, should she be short of ballast, the space between the inner and outer skin can be filled with water, and 2000 tons of ballast in this way at once obtained. When full, it is expected she will draw 30 feet of water, —(the *Duke of Wellington* draws 27 feet,)—when empty, 22 feet. Both screw and paddle propellers are to be used, and the cylinders just described are intended for the paddle engine The screw engines are being made by Messrs. Boulton and Watt. The paddle engines are 1000-horse power, and are fed by 40 furnaces. The screw engines are 1500 horse power, and require 60 furnaces. The paddlewheels are to be 60 feet in diameter

No apportionment has yet been made of the space to be devoted to cargo and passengers respectively, and this will, probably, depend greatly on the requirements of the traffic, to be ascertained only by experience. There are to be three tiers of cabins, and it is calculated that in each compartment of sixty feet space will be found for 100 cabins—and these will be unusually high—eight feet. In this manner this monster steamer can carry about 600 first-class and 2000 second and third-class passengers. A few such troop ships as this would materially lessen the difficulties of landing a large force in an enemy's country. She is to carry 13,000 tons of coal—sufficient for a voyage round the world.

IRON SHIP FITTING AT THE ROYAL DOCKYARD, WOOLWICH.—(SEE NEXT PAGE.)

"THE SPANISH DANCERS," AT THE HAYMARKET THEATRE.

WOOLWICH DOCKYARD.

THE great operations of building and fitting-out large ships of war are, at the present moment, scenes of especial interest; in addition to which, they are full of fine effects for the pencil of the artist. Such is the accompanying Illustration from departments of the Royal Dockyard; this branch being under the able superintendence of Mr Atherton. The operation represented is the preparation of engines of the *Termagant*, 620-horse power.

To form the cranks on the shaft, a quantity of scrap-iron is made into small slabs, of about 1 cwt each. A sufficient number of these slabs is welded together to form three large masses of about one ton each. These are put into the furnace, and when hot are welded under the 50 cwt. Nasmyth's hammer (seen in the Illustration) to form one crank. The other crank is made by adding small slabs of iron, and welding them together. The mass required to form a crank is about 5 6 × 2 8 × 1.10; and when taken from the furnace and placed under the hammer, the heat of it is so intense that only those accustomed to the work could approach it. The shaft and cranks being forged, are finished in the Turning-shop to the exact dimensions. The power transmitted through this shaft is equal to 1300 horses—more than double the nominal horses' power of the engine.

In the accompanying Illustration, a portion of the engine (represented at white heat) is under the great steam hammer; the operations are signalled by the workman on the left; and the heated mass is moved by the combined force of the several workmen on the right. Here also, might, at the same moment of the above operation, be seen the screw-propeller cast for the line-of-battle ship, *Hannibal* of ninety guns. The diameter of the screw is 17.0, pitch 12 6, length 2 1 It is made of brass, and its weight, in a finished state, is about eight tons and a half. The mould, in which the screw was cast, was made in two parts, the bottom part being of bricks, placed so that the heated air can escape at the sides, and finished with a smooth surface of sand to the form of the screw. The top of the mould is a frame of iron lined with sand; and when it is fixed to the bottom, a space is left between the two parts of the mould, the exact form of the screw. The brass is melted in a reverberatory furnace, from which it is carried to the mould in an iron vessel lined with clay. The heated air finds its escape through the sides of the mould into pipes, by which it is conveyed away, to prevent the mould from bursting. The lathe, constructed by Whitworth, is perhaps the largest in the world; it is made for turning the screws of the line-of-battle ships, and the fall-plate is 15 in diameter.

THE SPANISH DANCERS.

MR. BUCKSTONE has re-engaged the "Spanish Dancers," Senora Perea Nena and Senora Nena, with in great part the *corps de ballet* by whom these unrivalled artistes were supported, and they reappeared on the Haymarket stage last Monday, with their usual success. We have little to add to our former description concerning the style of these *coryphées*; but the above Illustration will give a better notion of their manner and merits than could be conveyed by words. We have, at least, in such representations the beauty of form and attitude, if not the grace of motion. The Dancers are caught indeed in a moment of transition: and fixed to the eye; but the suggestion is present, and the fancy conducted onward, until the agility, the rapture, and the indescribable charm are conceived by the imagination. The diligence and dignity belonging to the movements of these Dancers, combine in the triumph they achieve and constitute a blended attraction seldom witnessed.

The pieces now selected for the renewal of our acquaintance with them, are the "Star of Andalusia," and the "Flower of the Port;" in the former of which Senora Nena's pas *mimique* is certainly a very pleasing performance, though cast into the shade, fine as it is, by the superior excellence of Senora Perea. A Toledo Gitana, or Gipsy Dance, is also remarkably effective: indeed, we may venture to assert, literally intoxicating in its *recherché*, its complexity, its rapidity, its shrewdness, and its stimulating coquetry. The originality and nationality of their style must be also reckoned among the advantages possessed by the Spanish dancers. They afford, therefore, instruction as well as amusement; and on these grounds we are ready to bestow on them a hearty re-welcome to the boards of the "Little Theatre."

THE SUNDERLAND CLIPPER BARQUE "FLYING DRAGON."

FROM accounts just received, we are sorry to have to announce the loss by fire of this beautiful clipper barque, on her passage from Ceylon to London, with a general cargo. It appears that she took fire at midnight on the 31st of July last, about 200 miles from the Cape; and ran into Simon's Bay in August, burnt to the water's edge, where she was scuttled.

The *Flying Dragon* was built for the Australian trade, by Mr. John Pyle, of North Sand, Monkwearmouth—the builder of the *Spirit of the Age* and other vessels that have been celebrated for their superior sailing qualities—for Robert Smith, Esq., of Manchester; and made on her passage out one of the fastest voyages on record, having accomplished

THE SUNDERLAND CLIPPER BARQUE, "FLYING DRAGON."

the distance between here and Port Phillip in seventy-three days. She was classed A 1 at Lloyd's for nine years, was 675 tons new measurement, and 770 tons old measurement; her length on keel was 165 feet; length over all, 190 feet; beam, 30½ feet; and 18 feet 1 inch depth of hold. She was built of East India teak, under the inspection of Mr Gaster, of London, and was one of the most perfect and advanced models of beauty in ship-building that ever left this country.

FINE ARTS.

THE NATIONAL GALLERY.

THE National Gallery has re-opened, after a short recess, with several additional pictures, all entitled more or less to critical notice. Lord Colborne's valuable bequests, it is true, were hung before the recess; but they will be new to many who may not have visited the Galleries since the early part of the season. Wilkie's "Parish Beadle," with the unhappy group of mountebanks, monkeys, and musicians, is an admirable example of the humorous pencil of the Scottish Hogarth. The Teniers, and the two Rembrandts—particularly the man's portrait by the latter—are good specimens of the respective artists.

The chief novelty of the season, however, is the exhibition of sixteen specimens of early Italian art—not only pre-Raphaelite, but pre-pre-Raphaelite—works anterior to the days of Angiico, Fiesoli, Masaccio, Taddeo, Gaddi, Cimabue, &c., who, by their study of nature, both in her forms and expression, opened the road of truth to Raphael, and Michael Angelo him elf. These works, which are part of the Minden Collection, purchased upon the authority and judgment of Mr Dyce, are therefore, for the present purpose, more valuable as curiosities than for their intr nsic beauty: as exemplifying the errors and weaknesses of an effete ancient art which preceded the modern revival. It is to be hoped that, amongst the remainder of the collection yet to be produced, there may be some of a better and more useful class, including some of the early Siennese and Florentine schools; in that case the series will tend to completeness, and the chain which connected the darkness and servile mannerism of the middle ages with the intelligence and originality of the Italian Renaissance, will become discernible. We will not, however, enter at greater length on this subject at present; for the specimens which we refer to are, apparently, hung only probationally, and without indication of the names of their reputed painters; and it is not improbable that, before long, the series may be completed by the addition of the desiderata we have pointed out. We have said enough to caution the public against supposing that in the singular and crude looking works, which hang strangely in juxtaposition with some of the most richly-coloured pictures by Guido and Salvator Rosa, they have a fair exemplification of the early Italian Schools.

Besides the sixteen pictures of Saints and other religious subjects from the Minden Collection above referred to, we observe in the Large Room a picture of considerable pretension—once supposed, we believe, to have been by the hand of Massaccio, but clearly not by that great dramatic painter. It is, nevertheless, a tolerably considerable value and interest; illustrative of the gaudy style of Church decoration which once prevailed so universally over Catholic Europe. The subject is one of "Angels Adoring the Infant Christ in his Mother's Arms;" the grouping is stately and artistic, the character grand and imposing, and the colouring, though giving indication of retouching in parts, has much richness and body. The gilding of entire sky, and of the glories round the heads, according to the old practice, tries the colours very much, destroying the harmony and balance of tone; but even with this effect has, probably, been increased by the pains bestowed in burnishing up the former portions of the surface, whilst the latter, partially faded by age, have not been restored equivalently.

NATIONAL SPORTS.

ONE might have thought that November fogs and hoar frost would have warned racing men that it is high time to look up the Grand Stands; but the good old rule has once been broken through, and four more meetings still stand on the list, in the beginning of the second week after Newmarket Houghton. Two of these are fixed for next week; to wit, Liverpool Autumn on Tuesday, and Cowbridge Hunt on Wednesday; and each of them will be followed by a Steeplechase day. The Croxton Welter Cup (18 subs.), the Sefton Handicap (39 subs.), with Defiance 8st. 7lbs. as top weight; and the Tyro Handicap (13 subs.), are the principal items at Liverpool on the first day; and the Aintree Plate (34 subs.), and the Steeplechase (17 subs.), on the second. Beedwood's penalty is the latter gets him about on the same terms with Spring as he was when he beat him this week at Worcester The acceptances for the Cowbridge Open Steeplechase are only seven, and include no horses of any great note; while those for the Glamorganshire Stakes, on the following day, number thirteen. Mortimer, Alp, and the notorious Tower being the top weights. This somewhat "banyan fare" for the week is amply atoned for in the coursing list of fixtures. "Newcastle, Northumberland, and Durham" hold their annual meeting this year on Monday and Tuesday; Kineton, near Warwick, is fixed for the same days; Southern (Cork) and Wimmarleigh, for Tuesday; Cardington Club, for Tuesday, &c.; Thirsk and Auchinleck (Kyle Club Open), for Tuesday and Wednesday; Brampton, Altear Cup, and Hilton, near Stockton, for Thursday and Friday; Spelthorne (Puppy Stakes), for the same days and Saturday; and Baschurch (Shropshire), for Friday. The Great Western Stakes was won by Marqueterie, a daughter of Mosley and Mocking-bird; and Sir James Boswell and Mr. Borrow have not as yet been able to agree about a match, as some eight out of their eighteen Biggar puppies have been put temporarily *hors de combat* since they met. The same remark may apply to Miss Mowbray and British Yeoman in the steeplechase world, who have, we fear, little chance of their respective engagements at Tattersall's next Monday and Thursday. Sportsmen may bear in mind that the Champagne Stakes (1852), the 200 Sovs. and Municipal (1856), and the Doncaster Stakes (1858) for Doncaster Autumn, also close, with several others, on Tuesday. The Cambridge commences her hoar races on Friday; and the Lady Margaret (Coiquitoun) Sculls will be pulled for on the 21st, the day after Cole's and Messenger's great 2200 aside match from Putney to Mortlake. £100 has already been deposited, and the remainder will be received on Wednesday next.

Having thus dealt with the future, we will glance very briefly at the gossip of the past week. Lord Exeter, the whilom owner of Bairam, Augustus, Augusta, Green Mantle, Varna, Galata, and Stockwell, retires for good at last, having sold his fourteen yearlings to "Mr. Howard" (who has now about thirty animals under John Day); and thus that rare good trainer, Harlock, is vacant. William King stays on with Baron Rothschild; and Mr. R. E. Clarke has left Charles Marson. Mr. Blenkiron—who lately gave 600 guineas for the broodmare Palmyra—has purchased Kingston for about 3000 guineas, and intends to locate him near Blackheath. His break-down was a bad rupture of a ligament of the off hind pastern, which has kept him under Mr. Barrow's care, at Newmarket, ever since the Whipping. "Argus" states that Nancy is believed by John Osborne to be as good as she ever was; but to have so completely lost her nerve, that his jockey son is to hunt her with harriers this winter, to try and restore it. Rifleman is said to have been very much amiss when he ran for the Cambridgeshire; and he, in spite of a strong outlay on Grecculus, has taken the lead of him at the Corner. Joe Rogers, the celebrated Newmarket trainer, was buried on Wednesday.

WORCESTER AUTUMN MEETING.—TUESDAY.

Selling Stakes of 5 sovs.—Miniature, 1. Bonester, 2.
Handicap Sweepstakes of 5 sovs.—Banbury, 1. Ino colt, 2.
Worcester Autumn Handicap.—Jack Leeming, 1. Shakspeare, 2.
Sweepstakes of 5 sovs.—Le Juif, 1. Shakspeare, 2.
Autumn Flying Stakes.—Falcon, 1. Octavia, 2.

WEDNESDAY.

Hurdle race Handicap.—Black Bess, 1. Jemmy the Black, 2.
Worcestershire Grand Annual Steeplechase Handicap.—Need wood, 1. Spring, 2
Hunt Steeplechase.—Bastion, 1. The Captain, 2.

EPSOM RACES.—THURSDAY.

Beddington Stakes.—Handy, 1. Lucy Banks filly, 2.
Autumn Handicap.—Mishap 1. Little Harry, 2
Plate £50.—Rescue, 1. Michaelmas Maid, 2.
Selling Stakes.—Rosaline, 1. Dame Partlett, 2.
Bentinck Plate.—Speed the Plough, 1. Noisette, 2.
Paddock Stakes.—Merry Peal, 1. Lascelles, 2.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

In the early part of the week, there was some animation in the Consol Market, and prices were steady, on the advance The improvement in the quotations having brought forward numerous sellers, a slight decline has taken place. We may observe, however, that the present high prices considering the nature of our foreign relations; but the absence of any pressure upon the market leads to the opinion that any material fall is not anticipated.

We have again to report the arrival of large supplies of the precious metals about £400,000 having come to hand from Australia, £120,000 from Mexico, £165,000 from New York, and £80,000 from the Brazils. The quantity of gold now on passage from Australia is little short of £800,0.0. There has been only a moderate demand for gold on Continental account; hence, the stock in the Bank of England has increased to nearly £14,000,000, and a further addition to it is expected

On Monday Consols were active. The Three per Cents Reduced marked 93⅝; the Three per Cent Consols, 94 to 95; and the New Three per Cents, 94⅝ to 95; New Three per Cents, 93⅝; Long Annuities, 4⅝; India Bonds were 10s. and Exchequer bills, 6s. to 9s. prem. Bank Stock was 211½ to 213. Exchequer-bonds sold at par. The business done on Tuesday was very moderate. The Three per Cents Reduced marked 93⅝; the Three per Cent Consols, 94⅝; Consols for Account, 94⅝ to 94½; New Three per Cents, 94⅝; New Two-and-a-Half per Cents, 81½; Long Annuities, 4⅝ 5-16. Bank Stock, 211 to 213. India Bonds, 10s.; Exchequer-bills, 5s. to 8s. prem. As there was a close holiday in the Stock Exchange on the following day, no business was reported. On Thursday the transactions were not large, yet prices were steady. The Three per Cents Reduced were 93⅝; the Three per Cent Consols, 94⅝; the New Three per Cents, 94⅝; and the New Two-and-a-Half per Cents, 82. Long Annuities, 4⅝; India Stock, 211; Bank Stock, 211 to 213½; Exchequer-bonds, 99⅞ 100; Exchequer-bills, 6s. to 9s. prem.

The foreign House has been tolerably firm, but without leading to much business. Brazilian Five per Cents have been 98⅞, Buenos Ayres Six per Cents, 59; Chilian Six per Cents, 105; Danish Five per Cents, [illegible] Mexican Three per Cents, 30; Peruvian Four-and-a-Half per Cents, 74; Portuguese Three per Cents, 52; Russian Five per Cents, [illegible] Spanish Three per Cents, 34; Spanish Five per Cents, [illegible] Turkish Six per Cents, [illegible] Dutch Four per Cents, 94; Ditto Two-and-a-Half per Cents, 61; Belgian Four per Cents, 89; Portuguese Four per Cents, 37.

Joint-stock Bank Shares have been firm, and prices have continued firm: Australasia have marked 89; Chartered Bank of Asia, 3; Commercial of London, 31⅛; English, Scottish, and Australian Chartered, 11; London and Westminster, 40⅝; Oriental, 9½; South Australia, 11; Union of Australia, 70⅛. Most Miscellaneous Securities have commanded very full prices:—Australian Agricultural, 40⅛; Canada Six per Cent Bonds, 110⅛; Crystal Palace, 8; Electric Telegraph, 13; London Docks, 106; Victoria, 14; Peel River Land and Mineral, 4; Peninsula and Oriental Steam, 60; Royal Mail Steam, 69; Scottish Australian Investment, 2; Van Diemen's Land, 12⅜. Indian Shares are very little doing:—Ashton and Oldham, 154; Birmingham, 93½; Coventry, 203; Derby, 80; Grand Junction, 87; Grand Surrey, 46; Leicester, 68; Loughborough, 375; Maze-sfield, 61½; Neath, 15½; Oxford, 116; Peak Forest, 88; Regent's, 16⅝; Rochdale, 60; Stafford and Worcester 428; Stourbridge, 235; Warwick and Birmingham, 278. Waterworks Shares have sold as follows:—Berlin, 8½ ex int.; East London, New, 8 prem.; Grand Junction, 72; Kent, 80; Lambeth, 97; Southwark and Vauxhall, 89½; New River, 85; West Middlesex, 99; Ditto, New, 1s. Gaslight and Coke Company Shares have been dull:—British Provincial, 21; City of London, 105; Equitable, 96; Gas Central, 12; Imperial 87; Phœnix, 27½ ex div.; Ratcliff, 70; Westminster Chartered, 56½; Ditto, New, 46. Insurance Companies' Shares have been very inactive:—Atlas, 18½; Argus Life, 23; County, 126; Crown, 17½; Globe, 127½; Guardian, 35; Imperial Fire, 231 and 236; Ditto Life, 183; Legal and General, 64; Phœnix, 15½; Rock Life, 8; Royal Exchange, 228; Sun Fire, 262; Victoria Life, 5⅞; Bridge Shares have ruled dull; Hungerford, 12; Southwark, 9; Waterloo 8; Ditto, Old Annuities of £8, 2½; Ditto, New Annuities of £7, 2½; Vauxhall, 22.

Mining Shares have been in rather improved request, and the quotations have been steadily supported. Agua Fria have realized 1; Australian, 1⅛; St. John del Rey, 2; Cobre Copper, 47½; Copper Miners of England, 50; Great Nugget Vein, 2; Linares, 8; Mexican and South American, 7½; Santiago de Cuba, 5⅜; South Australian, 1.

The transactions in the Railway Share-market have somewhat improved, and prices have been well supported. The total "calls" for the present month are nearly £300,000. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 21½; Bristol and Exeter, 98; Caledonian, 81⅝; Dublin and Belfast Junction, 42; East Anglian, 10½; Eastern Counties, 11⅛; Eastern Union 8 Stock, 23; East Lancashire, 69⅝; Edinburgh and Glasgow, 85; Edinburgh, Perth, and Dundee, 93½; Great Northern, A Stock, 120; Ditto, Extension, 17; Great Western, A Stock, 79; Ditto, Stour Valley, 69; Lancaster and Carlisle, New Thirds, 18; Lancashire and Yorkshire, 73½; London and Blackwall, 6½; London and Brighton, 103½; London, Chatham, and Dover, 10⅞; London and South-Western, 81½; Manchester, Sheffield, and Lincolnshire 23½; Midland, 69½; Ditto, Birmingham and Derby, 41; Newcastle and Carlisle, 85; Newport, Abergavenny, and Hereford, 9⅝; North Norfolk, 11; North British, 24; North-Eastern, Berwick, 76⅝; Ditto, G. N. E. Purchase, 6½; Ditto, York, 54; North Staffordshire, 15½; Scottish Midland, 61; South-Eastern, 72½; Ditto, New, 18.

LINES LEASED AT FIXED RENTALS.—Hull and Selby, 103; London, Tilbury, and Southend, 11⅜; Midland, Bradford, 94; West Valley, 30⅞

PREFERENCE SHARES.—Caledonian, 97⅛; Chester, Holyhead, and Liverpool, 11; Great Northern, Four-and-a-Half per Cent, 103; Great Western, Four-and-a-Half per Cent, 99½; Ditto, Birmingham Wolverhampton, 4½; London and Brighton, 5½; Midland Consolidated, 4; North-Eastern, Berwick Four per Cents, 102½; Oxford, Worcester, and Wolverhampton, 113; South-Eastern, 2½.

FOREIGN.—East Indian, 22⅞; Great Luxembourg, 6; Great Western of Canada, 16⅝; Hamilton and Toronto, 20; Namur and Liege, 7⅞; Paris and Lyons, 36; West Flanders, 3⅝

Friday Evening.

The business doing in the Consol-market to-day has been very moderate, yet prices have ruled steady. The Three per Cents, for Money, have marked 94⅜; the Three per Cents Reduced, 93⅝; the New Three per Cents, 94⅝; and Consols, for Account, 94⅝. Bank Stock, 211. Long Annuities, 1860, 4 5-16. India Stock, 221. Exchequer-bills, 9s. to 6s. prem. Foreign Bonds and Railway Shares about stationary.

THE MARKETS.

CORN EXCHANGE (Friday).—The arrivals of English wheat up to our market to-day were but moderate; nevertheless the demand was extremely quiet, and very few parcels of it changed hands at Monday's currency; but all other kinds moved off slowly, and in some instances the quotations had a downward tendency. Foreign wheat continued terribly confining. The amount of business doing in all kinds was small, at about Monday's currency. There were scarcely any floating cargoes on sale. Barley—the supply of which was [illegible] moderate—sold slowly on former terms. The malt trade was steady, at full quotations. Good sound oats moved off freely, at the prices we last noted. Fine kinds very little was doing. Beans, peas, and flour were unaltered

ARRIVALS.—English wheat, 2920; barley, 3490; malt, 2310; oats, 7920, flour, 910. Irish: oats, 7270. Foreign: wheat, 670; barley, 30; oats, 3910; flour, 1956 barrels

English.—Wheat, Essex and Kent, red, new, 74s. to 78s.; ditto, ditto, white, 77s. to 81s.; Norfolk and Suffolk, red, 68s. to 74s.; rye, 40s. to 44s.; grinding barley, 29s. to 32s.; distilling ditto, 32s. to 35s.; malting, ditto, 36s. to 38s.; Lincoln and Norfolk malt, 68s. to 70s.; brown ditto, 58s. to 62s., Kingston and Ware, 70s. to 72s.; Chevalier, 74s. to 76s.; Scotch, 68s. to 70s.; Lincolnshire feed oats, 22s. to 24s.; potato ditto, 20s. to 22s.; Youghal and Cork, black, 24s. to 26s.; ditto, white, 25s. to 27s.; Sligo, Limerick, and Clonmel, black, 23s. to 25s.; ditto, white, 24s. to 26s.; beans, 40s. to 42s.; Lincoln and Essex, grey, 40s. to 42s.; ditto, old, 42s. to 44s.; white, 44s. to 46s.; peas, 42s. to 44s.; per quarter. Town-made flour, 45s. to 50s.; Suffolk, 38s. to 40s.; Stockton and Yorkshire, 37s. to 39s. per sack. American, 35s. to 40s. per barrel.

Scotch.—Generally speaking, our market is steady, at last week's currency.

Irish.—Linseed, English, sowing, 64s.; Baltic, crushing, 57s. to 60s.; Mediterranean and Odessa, 56s. to 59s.; Hull and Liverpool, 56s. to 58s.; Calcutta, 60s. to 62s.; per qr. Rapeseed, English, 36s. to 38s.; white ditto, 39s.; white tares, 10s. to 12s. per bushel. Canary, rapeseed, £36 10s. to £34 per last of 10 quarters. Linseed cakes, English, £13 or £14 10s.; ditto, foreign, £9 10s. to £11 per ton. Rapeseed cakes, £6 0s. to £6 10s. per ton. Canary, 1s. to 50s. per quarter.

Bread.—The prices of wheaten bread in the metropolis are from 10d. to 11d.; of household ditto, 8½d. to 9d. per 4 lbs loaf.

Imperial Weekly Average.—Wheat, 60s 7d.; barley, 32s. 1d.; oats, 23s. 8d.; rye, 38s. 6d.; beans, 40s. 4d.; peas, 42s. 8d.

Seven Years' Average.—Wheat, 56s. 9d.; barley, 34s. 4d.; oats, 23s. 6d.; rye, 35s. 2d.; beans, 40s. 6d.; peas, 40s. 10d.

English Averages for the Week Wheat, 144,842; barley, 61,521; oats, 16,055; rye, 473; beans, 4932; peas, 1605.

Flour.—For most kinds we have to report a very inactive demand. In prices, however, scarcely any change has taken place, common sound sorts being quoted at 40s4. per 1b. Up to Saturday last duty was paid on 60,940lbs

Provisions.—In a large business is doing in Irish butter, the prices of which have an [illegible] upward tendency. Foreign, especially, on former terms. English, Friesland, and [illegible] quite as dear as last week. Bacon and other articles are firm.

Tallow.—The transactions in town tallow are but moderate. P.Y.C., on the spot, is selling at 68s. to 69s. 6d. per cwt. Town tallow, 68s. net cash. Rough fat, 3s. 6d. per 8 lb.

Oils.—Linseed oil is steady, at 36s. to 36s. 6d. per cwt. Most other oils are firm. Turpentine is active.—Refined, £3 to £3 1s.; and brown, £2 17s. 6d. to £3 0s. per cwt.

Spirits.—The sale for rum is very active, and prices are again higher. Proof Leewards, 3s. 5d. to 3s. 6d.; East India, 3s. 6d. to 3s. 7d. Brandies, 8s. per gallon.

Hops.—Friday.—The week's imports of foreign hops amount to 13 bales from Bremen, 138 from New York, 242 from Hamburg, 182 from Rotterdam, 185 from Antwerp, 89 from Ghent; 19 from Dunkirk, and 84 from Ostend The business done in Kent hops is but moderate. The following are the prices of new hops:—Mid and East Kent pockets, 41s 16s. to 42s 0s.; [illegible] st, 41s 0s. to £6 10s.; Sussex, £15 0s. to £15 15s.

Friday.—The supply of beasts on sale here to-day was but moderate, yet the demand for all kinds ruled heavy, at a decline in the prices of Monday of 2d. per 8lb. With sheep we were rather scantily supplied. The mutton trade, however, was very inactive, at barely as [illegible]

slowly, yet prices were supported. In pigs very little was doing, on former terms. Milch cows were very dull, at from £14 to £19 each, including their small calf.

Per 8 lbs. to sink the offals. Coarse and inf rior beasts, 3s. 8d. to 3s. 8d.; second quality ditto, 3s. 6d. to 3s. 8d.; prime large oxen, 3s. 10d. to 4s. 0d.; prime Scots, &c., 4s. 0d. to 4s. 0d.; coarse and inferior sheep, 3s. 4d. to 3s. 6d.; second quality ditto, 3s. 8d. to 3s. 10d.; prime coarse-woolled sheep, 4s. 0d. to 4s. 2d.; prime Southdown ditto, 4s. 4d. to 4s. 6d.; large coarse calves, 3s. 4d. to 4s. 0d.; prime small ditto, 4s. 2d to 4s. 8d.; large boars, 3s. 2d. to 3s. 4d.; prime small porkers, 4s. 0d. to 4s. 4d.; suckling calves, 22s. to 28s.; and quarter old store pigs, 18s. to 20s. each.

Newgate and Leadenhall (Friday).—The supply of beef is being large, the trade ruled heavy, as follows:—

Per 8 lbs. by the carcase.—Inferior beef, 3s. 4d. to 3s. 6d.; middling ditto, 3s. 8d. to 4s. 0d.; prime ditto, 3s. 8d. to 4s. 0d.; [illegible] to 4s. 6d.; second quality mutton, 3s. 8d. to 4s. 0d.; prime ditto, 4s. 2d. to 4s. 4d.; large pork, 3s. 4d. to 4s. 0d.; prime small ditto, 4s. 2d. to 4s. 6d.; veal, 3s. 2d. to 4s. 0d.; and small ditto, 4s. 0d. to 4s. 4d.

Chairman, Mr. T. G. Baring, M.P.
Deputy-Chairman, Mr. Sidney Herbert, M.P.

Secretary, Mr. C. Greville Smyth, M.A.

The Commissioners have appointed Messrs. Coutts and Co., Messrs. Drummond, Messrs. Glyn and Co., Messrs. Hoare, Messrs. Barnett, Hoare, and Co., Messrs. Ransom, Bouverie, and Co., Messrs. Smith, Payne, and Smiths, Messrs. Williams, Deacon, and Co., and Messrs. Child and Co., to be Bankers to the Fund.

The Commissioners have appointed Messrs. Farrer, Ouvry, and Co., Lincoln's-inn-fields, to be Solicitors to the Fund.

The Commissioners have appointed Mr. Frederick Martin, 30, Finsbury-square, to be Secretary to the Fund.

The Commissioners have appointed Mr. Charles Robert Sherrard, 30, Finsbury-square, to be Assistant Secretary to the Fund.

The Commissioners have appointed Mr. Thomas Hamilton Hall, 30, Finsbury-square, to be Accountant to the Fund.

The Commissioners have appointed Mr. Thomas Hamilton Hall, 30, Finsbury-square, to be Auditor to the Fund.

The Commissioners have appointed Mr. Thomas Hamilton Hall, 30, Finsbury-square, to be Treasurer to the Fund.

The Commissioners have appointed Mr. Thomas Hamilton Hall, 30, Finsbury-square, to be Solicitor to the Fund.

The Commissioners have appointed Mr. Thomas Hamilton Hall, 30, Finsbury-square, to be Surveyor to the Fund.

The Commissioners have appointed Mr. Thomas Hamilton Hall, 30, Finsbury-square, to be Architect to the Fund.

The Commissioners have appointed Mr. Thomas Hamilton Hall, 30, Finsbury-square, to be Engineer to the Fund.

The Commissioners have appointed Mr. Thomas Hamilton Hall, 30, Finsbury-square, to be Clerk of the Works

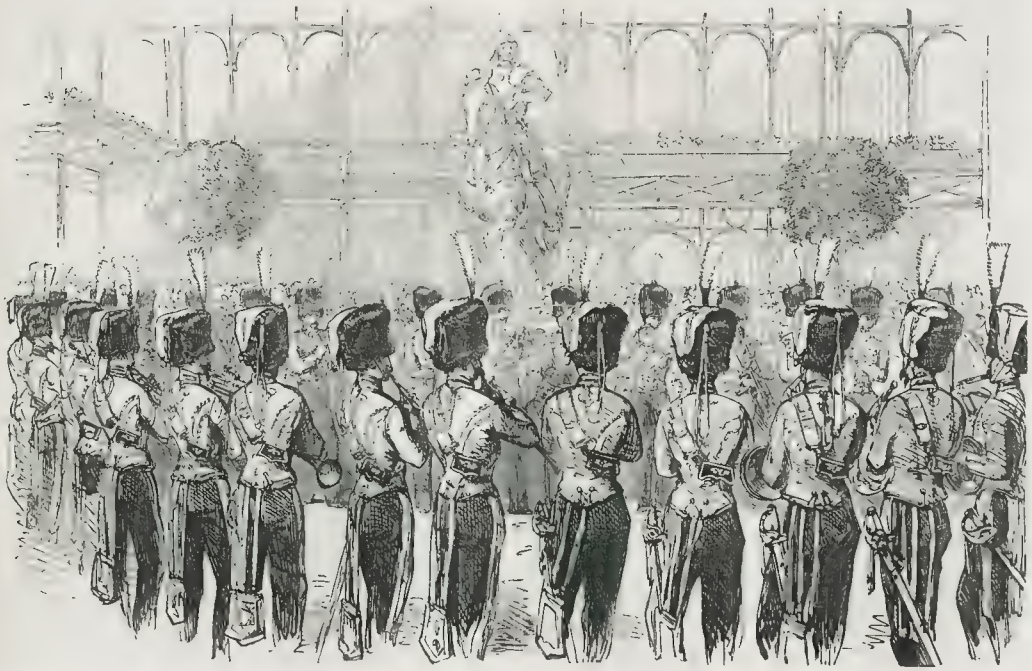
THE CRYSTAL PALACE FETE.

THE Grand Military Fête given at Sydenham, on Saturday last, "in aid of the several funds for the relief of the sick and wounded and widows and orphans of her Majesty's forces engaged in the Russian war," has proved so successful that we believe every one present, although expecting something great, was literally astonished at the splendid event of the day. Long will it be before the quiet neighbourhood of Sydenham, Norwood, and Anerley forgets the multitude that assembled last Saturday. The great mass of the visitors of course went down by the railroad, and in such numbers that the approaches to the Brighton Railway station were completely blocked up by the train of vehicles during great part of the morning. To get across the narrow and slippery defile of London-bridge in a carriage was a matter of extreme difficulty, and not a few who had gone thus far in various conveyances preferred to dismount, and to pass over it on foot in order to avoid the extreme delay to which vehicles were subjected. Although the trains were composed of more than the usual number of carriages, and were dispatched at more frequent intervals than is ordinarily the case, they proved totally inadequate to relieve the platform of the accumulating crowd. As each train drew up, it was the signal for a rush and a scramble: neither priority of arrival, nor the possession of a superior class of tickets, was of any avail; many, too weak or too timid for the contest, saw train after train depart without being able to enter; some even turned away in despair, occasionally not without marks of the struggle either in person or clothes; and throughout the morning the holders of first, second, and third-class tickets were mingled together, without the possibility of securing the kind of carriages for which they had paid.

The doors of the Palace opened at ten o'clock; and the French Guides, who were the "lions" of the day, and who occupied a conspicuous platform raised in the Great Transept, played "God Save the Queen," accompanied by the Palace band. However, the day had not yet begun; and the visitor who had heard nothing of the Fête might have supposed that this was a mere ordinary occasion, had not his attention been arrested by a large trophy erected in the very centre of the building: this was composed of flags, cannon, and other arms, from the Tower stores; and had been designed and executed under the superintendence of Mr. G. Stacey, storekeeper at the Tower. The base consisted of a round platform, with two steps, covered with crimson cloth, on which were placed rows of cannon-balls. Above the base were two brass cannon taken at Bomarsund, and at opposite angles two mortars. The whole structure—which comprised weapons of all kinds, as well as four complete suits of steel armour—was in three compartments, each smaller than the one below; and terminated in a lofty pole, from which were suspended the flags of France, Turkey, and England, crowned with a wreath of laurel.

THE GRAND MILITARY TROPHY, AT THE CRYSTAL PALACE.

The musical performance specially provided for the entertainment of this enormous concourse of people was got up on a very large scale. The music, in accordance with the character of the Fête, was of the military kind. There was an extraordinary gathering of military bands. In the first place, the band of the French Imperial Regiment Les Guides had come from Paris, by order of the Emperor, for the express purpose of giving their assistance on this occasion. There were the bands of the seven Regiments of Guards, of the 18th and 91st Regiments of Foot, of the Royal Artillery, of the Royal Sappers and Miners, of the Royal Marines, of the Hon. Artillery Company, of the Naval and Military Schools at Greenwich and Chelsea; and, lastly, the band of the Crystal Palace Company. A regular programme was formed for the employment of this immense musical host. During the earlier part of the day the various bands were stationed separately in the interior of the building; and afterwards they all assembled on the Terrace, or Esplanade, for the purpose of performing a regular selection in the open air. The arrangement was sufficiently judicious; but the unprecedented influx of people, and the consequent confusion, presented obstacles to its being completely carried out. In the interior the various bands were placed too near each other; and, as no precaution was taken to prevent more than one playing at a time, two or three different tunes were sometimes heard together, producing "unprepared discords" not recognised in any system of harmony. On the Terrace, the confusion was still greater. The space on which the combined bands were to assemble not having been kept clear, the whole ground was covered with a dense mass of people, through which the performers had to struggle the best way they could; and, at length, when the performance began, not half their number had been got together. However, this "music under difficulties" was, on the whole, better than might have been expected. The famous band of the Guides did not belie their reputation. They formed the great object of curiosity and attraction; and, very properly, were placed in the most favourable situation for being seen as well as heard to advantage. The band is differently constructed from our military bands. The treble instruments (as with us) are clarionets, boos, and flutes; but the brass



FETE AT THE CRYSTAL PALACE, ON SATURDAY LAST.—THE GUIDES' BAND.

instruments are chiefly of the kind recently invented by M. Sax, and which, though an immense improvement on the ordinary instruments, in quality of tone, purity of tune, and facility of execution, are not, as yet, sufficiently employed in this country. The strength of the band is forty-six—not fifty-six, as has been stated. Their training, under their able chef, M. Mohr, is perfect; and they play with a precision an attention to the most delicate gradations of sound, a degree of fire and spirit which, though we are not disposed to undervalue our own military music, we have never heard equalled in this country. Their superiority is partly owing to their training, but partly also to the improved construction of their instruments. We hope the emulation created by their presence will lead to an improvement here. The combined performance on the Terrace had considerably grandeur in it; but the instrumental effects were not concerned; but the attempt to sing a vocal chorus was a total failure; the voices were lost in the open air, and so feeble as to be barely audible. This was at once felt to be the case; and the "Old Hundredth," which was to have closed the performance, was not attempted.

One curious effect of the performance on the Terrace is well worth notice. So sensible was the vibration of the glass, that every note played by the band was distinctly reverberated; and it seemed as if the band without was accompanied with harmonious precision by a band within. Some persons, indeed, declared as a matter of fact that the expedient employed on the stage when the prompter represents an echo, had been adopted on this occasion, and that there were real substantial musicians playing on real substantial brass inside the Palace in response to their brethren out of doors.

The most exciting moment of the day was when, shortly before four o'clock, the Guides returned to their station in the interior of the Palace, and again played "God Save the Queen," which was followed by "Partant pour la Syrie." These airs had been played countless times during the earlier part of the fête, but now they derived new importance from the circumstance that they were executed in the presence of the whole condensed multitude. All the galleries were crammed; a long perspective of waving hats and handkerchiefs reached into the farthest distance, and thunders of encore pealed through the vast edifice, to be promptly and vigorously responded to by the willing performers. At that moment the Guides, not as accomplished military musicians, but as Frenchmen, as the representatives of an ally, were objects of actual idolatry to a throng which, for number and distinction combined, was perhaps unparalleled.

After the great demonstration of the visitors *en masse* a gradual departure took place. The subsequent history of the day is a history of still greater difficulties in securing homeward vehicles than those of the journey from London. It is sufficient to say that those who walked to Anerley found themselves in a better position than those who sought the "Crystal Palace train," and that on no occasion during the retreat was a third class man known to avoid a first-class carriage from motives of economics. Indeed, on the arrival of one of the trains at the ticket station near London-bridge, when the ticket-taker, entering a first-class carriage, received every form of ticket save that of the first class, and was told that he ought to consider himself lucky to get anything, he seemed to think the remark perfectly natural, and pocketed his tickets without comment.

TESTIMONIAL TO THE REV. R. WHISTON.

THE valuable testimonials purchased with the surplus fund remaining from the subscriptions raised in this country and in Van Diemen's Land to indemnify the Rev. Robert Whiston for the monies to which he had been put in resisting the prosecution instituted against him by the Dean and Chapter of Rochester, were presented to Mr. Whiston, at his residence, adjoining the Cathedral Grammar School, on Friday afternoon last. The articles consisted of a large Epergne, a massive Salver, a Teakettle, and Inkstand, all of silver, wrought in the best style of workmanship.

The total amount of the subscriptions collected was £2345 5s., of which £162 had been sent from Hobart Town; £655 5s. from Manchester, and other towns in Lancashire; £162 15s. from Derby; £250 obtained in Kent; and the remainder in the metropolis and other parts of the country.

The deputations assembled at Mr. Whiston's residence; and, having been ushered into the library, the several members were introduced to him by Mr. W. Manclark, Mayor of Rochester, one of the local treasurers of the fund which had been raised.

Mr. Thomas Clegg, who headed the deputation from Manchester, said that, having himself laboured during many years for educational purposes, he heartily and sincerely rejoiced when he found that Mr. Whiston had taken up the cause which his name had now become so intimately identified (Hear, hear). When Mr. Whiston commenced his exposure of the corruption of the Chapter of Rochester Cathedral, he (Mr. Clegg) was engaged in a like struggle at Manchester—to restore to educational purposes large funds had been misappropriated and squandered by trustees, instead of being applied to the objects for which they were originally designed. The importance of the struggle in which the rev. gentleman had been engaged all would admit; it had, he was happy to say, been admitted and engaged by the public voice of England, and not by England alone, but by the Antipodes (Cheers). He (Mr. Clegg) hoped he should live to see the day when the Cathedral system would be supplanted by the parochial system—when every Dean and Canon would have a parochial charge to look after, and to preach the Gospel to the poor, and be made useful in his day and generation (Cheers)

Mr. Clegg then presented the English testimonials, consisting of a silver Inkstand, Teakettle, and a splendid silver Epergne. On the top of the Epergne, is a group of figures representing Wisdom, Justice, and Perseverance; and on one of the panels is the following inscription:—

To the Rev. Robert Whiston, M.A., Senior Fellow of Trinity College, Cambridge, and Head Master of the Grammar School, Rochester, who faithfully and admiringly offered, with the highest esteem and regard of the many lovers of justice who have subscribed to it, this Testimonial, arising from the subscription of more than £2000, spontaneously contributed by persons of all classes in the kingdom of Great Britain, to defray the expences incurred by him in vindicating the uncorrupt appropriation of educational bequests, and successfully defending himself during his arduous and protracted struggle against the proceedings instituted by the Dean and Chapter of Rochester, upon the publication of his alleged libel, "Cathedral Trusts, and their Enfilment."

Mr. Mason then also spoke of the great exertions made by Mr. Whiston, whose contest with the Chapter of Rochester he described as an act of heroism equal to any of those recorded in ancient or modern times.

Captain Baker, addressing Mr. Whiston, said, it was his gratifying privilege, in the name of Sir John Pedder and 168 of the principal residents of Hobart Town, to present him with a splendid silver Salver, as a token of their esteem for him, and of the opinion of the good he had effected in the cause of Cathedral reform. The salver bears the following inscription:—

Vivo Reverendo Roberto Whiston Incolæ quidam Tasmaniensis imperium et conscientiam intimum mirati quod jura alumnorum scholarium contra insidias injuriasque cohibuit vere heroum opus. Hoc nostra hac demum ætate vindicavit munusculum hoc studii et benevolentiæ pignus denandum curavere.

Mr. F. Bennoch, on behalf of the London deputation, remarked that the subscribers had not regarded Mr. Whiston, while engaged in the contest which he had carried on, as a private individual merely, but they had looked upon him as a public benefactor.

The Rev. R. Whiston returned to his friends his most sincere and heartfelt thanks. He (he was gentlemen present who had done much through private friendship and who others had travelled some hundreds of miles to show their interest in a great public cause. Some present had been known to him during a space of twenty years, who were friends at the beginning of the business in which he had been engaged, and who at that time gave him their kind sympathy, advice, and co-operation, who had ever been ready at his call; and it was one of the most gratifying circumstances in connection with his proceedings, that all those who were his friends in the first years of his struggle had proved true friends (Cheers). In the struggle which, by the help of his friends and the public feeling which had been evinced throughout England, he had been able to bring to something like a successful issue, he had not offended or displeased any; their interest had not been chilled or cooled. Friends they were then, friends they continued to be, and friends, he felt assured, they would remain until the end (Cheers). The deputations had assembled that day from various parts of England to do honour, through him, to a great cause, which he trusted the people of England would continue to support. It was now more than six years and a half since from that very room he made his first application to the Chapter of Rochester Cathedral—an application which he meant to be, and which he believed was, successful. He hoped he might say, without offence to any one, that at that simple application had been met by the Dean and Chapter of Rochester as it ought to have been, that splendid testimonial now before him, to which peer and peasant had contributed, might have been theirs, and the gentleman who had procured it for himself would have honoured them for commencing a reform of a bad system (Hear, hear). Perhaps it was his good fortune that they did not entertain the application, for in the manner in which they had disregarded it had enabled him to do some good in his generation. As one of the results of the public feeling evinced in this matter, he might refer to the bulky volume which had been published in the form of a report from the Cathedral Commissioners—a volume which told a curious tale in reference to what he had to contend against. It was simply this:—That during the fourteen he was fighting the Dean and Chapter of Rochester, their legal expenses were £4000—a fact which would at once show that he would not have been able to go on with the object he had in view without the hearty support which the public had rendered him. Some remarks had been made by one of the speakers in reference to what was going on in the East. If there was one thing in connection with the matter in which he had been engaged more satisfactory than another it was this:—Henry VIII. provided that there should always be maintained in Rochester Cathedral six old men who had been mutilated

TESTIMONIAL PRESENTED TO THE REV. ROBERT WHISTON

and maimed in the King's wars or service, or otherwise brought to poverty. It was a solemn injunction that they should always be maintained there out of the funds provided for the purpose; and yet it would scarcely be believed that from 1776 to 1850 no such men had ever been appointed. He thought it right that they should be restored He applied to his friends; and now there were receiving the benefits of which he had spoken six old men, two of whom had fought at Waterloo, and the others in most distinguished and glorious engagements. He hoped and trusted that he should see some of those gallant heroes who had recently shown a chivalry and bravery unequalled in the world's history, and who had been maimed and mutilated in a fight scarcely standing in Rochester Cathedral, receiving the bounty which Henry VIII. provided for them (Loud cheers). He hoped to see some of the heroes of the Alma, and, it might be, the conquerors of Sebastopol, among the policemen of the sacred edifice (renewed applause).

Subsequently, a large party, consisting of members of the deputations and of private friends, partook of Mr. Whiston's hospitality at dinner; and the entire school were regaled by him next day.

The Plate was designed and manufactured by Messrs. Smith, Nicholson, and Co., Duke street, Lincoln's-inn-fields.

LOSS OF THE "ARCTIC" STEAMER.—CAPT. LUCE'S NARRATIVE.

BRAVE Captain Luce, whose heroic conduct formed so striking a contrast to that of the crew under his command—who gallantly stood by the sinking ship to the last moment, and not till it had fairly sunk made the slightest attempt to save himself, was miraculously saved, after more than two days' suffering from cold and hunger. In a letter addressed to Mr. E. K. Collins, whose family was on board the *Arctic*, Captain Luce gives an interesting account of the catastrophe, and of his own sufferings. After relating the circumstances under which the collision occurred, he proceeds to de-cribe the conduct of the crew:—

Finding the leak gaining on us very fast, notwithstanding all our powerful means of keeping her free, I resolved to get the boats ready, and as many ladies and children placed in them as possible; but no sooner had the attempt been made than the firemen and others rushed into them in spite of all opposition. Seeing this state of things, I ordered the boats to be veered astern by ropes, to be kept in readiness till order could be assured. What I feared, when in my dismay I saw them cut the rope in the boat, and soon disappear astern in the fog. Another boat was broken down by persons rushing into her while hanging at the davits, and many were precipitated into the sea and drowned. This occurred while I had been engaged in getting the starboard guard-boat ready, and placed the second officer in charge of her, when the same fearful scene as with the first boat was being enacted—men leaping from the top of the rail down twenty feet, crushing and maiming those who were in the boat. I then gave orders to the second officer to let go, and row after the ship, keeping under or near the stern, to be ready to take on board women and children as soon as the fires were out and the engines stopped. My attention was then directed to the other quarter-boat, which I found broken down, but hanging by one tackle. A rush was made for her also, and some dozen or fifteen got in and cut the tackle, and were soon out of sight. In the meantime I found that not a seaman or carpenter was left on board, and we were without any tools to assist in building a raft, as our only hope, and that the only officer left was Mr. Doran, the third officer, who aided me with the assistance of the passengers, who deserve great praise for their coolness and energy in doing all in their power up to the very last moment before the ship sunk from under us. The chief engineer, with a part of his assistants, had taken our small deck boat, and before the ship went down pulled away, with about fifteen persons. We had succeeded in getting the fore and main yard, mainstepsail, and two topgallant yards overboard, and such other small spars and materials as we could collect, when I was fully convinced that the ship must go down in a very short time, and not a moment was to be lost in getting the spars lashed together to form a raft. To do this I ordered the carpenter to get the life-boat, "our only remaining boat," into the water. This being accomplished, I gave Mr. Doran charge of the boat, taking care to keep the oars on board to prevent them from leaving the ship, hoping still to get the most of the women and children in this boat at last. They had made considerable progress in securing the spars together, when an alarm was given that the ship was sinking, and the boat shoved off without oars or anything to help themselves with, and when the ship sunk the boat had got clear, probably the eighth of a mile to leeward. In an instant, about a quarter to five p.m., the ship went down, carrying every soul on board with her.

I succeeded in getting on the surface, after a brief struggling, with my own helpless child in my arms, when I again found myself impelled downwards to a great depth, and before I reached the surface a second time had nearly perished and lost the hold of my child. As I struggled to the surface of the water a most awful and heart-rending scene presented itself to my view; over two hundred men women and children struggling together amidst pieces of wreck of every kind, calling on each other for help, and imploring Almighty God to help them. Such an appalling scene may God preserve me from witnessing again. I was in the act of trying to save my child, when a portion of the paddle-box came rushing up edgewise, just grazing my head, and failing its whole weight upon the head of my darling child. In another moment I beheld him lying lifeless in the water. I succeeded in getting him on the top of the paddle-box, in company with eleven others. One, however, soon left for another piece of the wreck, finding it could not support him. Others remained till they were one by one released by death. We stood in water at a temperature of 45 deg up to our knees, and frequently the sea broke entirely over us. We soon secured to separate from our friends on other parts of the wreck, and passed a dreary night, each one of us expecting every hour would be our last. At last the wished-for morning came, dreary and cold, with a dense fog; not a living soul to be seen but our own party—seven now being left. In the course of the morning we saw some water-casks, and other things, belonging to our ship; but nothing that we could get could afford us any relief. Our raft was steadily settling, as it absorbed more and more water. About noon Mr. S. M. Woodruffe, of New York, was relieved by death. All the others now began to suffer very severely for the want of water, except Mr. George F. Allen and myself. In that respect we were very much favoured, although we had not a drop on the raft. The day continued foggy, except at noon, "as near as we could judge." We had a clear horizon for about half an hour, and nothing could be seen but water and sky.

Night came on thick and dreary, with our minds made up that neither of us would live to see the light of another day, and very soon three more of our suffering party were relieved by death, leaving Mr. Allen, a young German, and myself. Feeling myself getting exhausted, I now sat down for the first time, about eight o'clock in the evening, on a trunk which providentially had been found on the wreck. In this way I slept a little through the night, and became somewhat refreshed. About an hour before daylight (Friday, the 29th), we saw a vessel's light near to us, and exerted ourselves to the utmost of our strength in hailing, until we became quite exhausted. In about a quarter of an hour the light disappeared to the east of us.

Soon after daylight a barque hove in sight, to the N.W. of us, the fog now having lifted a little, steering apparently for us, but in a short time she seemed to have changed her course, and again we were doomed to disappointment. Yet I felt in hopes that some of our fellow-sufferers may have been seen and rescued by them. Shortly after we had given up all hopes of being rescued by the barque, a ship was discovered to the east of us, steering directly for us. We now watched her with the most intense anxiety as she approached us, with the wind varying, causing her to change her course several points. About noon they fortunately discovered a man on the raft near them, and succeeded in saving him by the second mate jumping over the side and making a rope fast round him, by which he was got on board safely. The man proved to be a Frenchman, who was a passenger on board the steamer with which we came into collision. He immediately informed the Captain that others were on piece of the wreck, and by going aloft he saw us and three others. We were the first to which the boat was sent, and safely taken on board about three o'clock p.m. The next was Mr. James Smith, of Mississippi, second-class passenger. The others saved were five of our firemen. The ship proved to be the *Cambria*, of and from Glasgow, bound to Montreal, Capt. John Rintell.

Every attention and kindness was bestowed on the Captain and the others who had been saved along with him. On the 14th inst. Captain Luce writes: "We have safely arrived at Quebec; and I am left without a penny in the world to help myself with."

The New York papers received by the *Canada* mention that Captain Luce reached his home, at Yonkers, on the 16th ult., where he was met by his neighbours and friends with every demonstration of delight; indeed, throughout the entire route from Montreal, he was everywhere hailed by vast crowds, who were flocking to meet him with joyful congratulations and honest hearty sympathy. Sermons had been preached in all the places of worship on the all-absorbing theme, and had been listened to by immense numbers.

THE AUSTRIAN ARMY.—A Vienna Correspondent of the *Augsburg Gazette* has given the following interesting information relative to the Austrian army:—69,830 men, with 144 guns, are posted in the German provinces (in Austria), under the command of General Count Wimpffen. The army under Marshal Radetzky, in the Lombardo-Venetian provinces, and on the right bank of the Po, consists of 1,7,000 men, with 160 guns. The "mobile" army in Galicia, the Bukovina, and the Danubian Principalities, with the reserves in Hungary and Transylvania, is composed of 30 infantry regiments, 10 battalions of Chasseurs, 16 regiments of Hussars, 12 of Light Cavalry, 13 battalions of Border troops, 24 Border battalions, and 25 field and 18 reserve batteries. The total is 226,890 men, with 260 field and 144 reserve guns. The troops are thus distributed: in the Danubian Principalities, 94,000 men (this is much below the mark); in Hungary and Transylvania, 58,000 men; in Galicia and the Bukovina, 80,000; and in the district of Cracow, 69,000 men. The forces under Ban Jellachich and General Mamula consist of 25,000 troops of the line, and 70,000 Borderers, with 72 guns. In the Federal fortresses in Germany are 12,800 men, with 24 guns. According to this calculation, the military force of Austria is composed of 250,300 men, with 660 guns, and is probably below rather than above the mark.

THE CRIMEA COMMISSARIAT.—The merchant shipping is more than ever beset by officers in search of provisions; to day a vessel arrived from Constantinople laden with nitre, and she at once opened her cargo for public sale; but, when I went on board in the evening, all was gone save a little tobacco and a firkin or two of butter—the latter was not sold because it would have cost upwards of 60s. at a time—picture a sauatern, in light marching order, with a keg of butter 60 lbs. weight!—he would be seen to Yarmouth as insane, or tried by a court-martial for cowardice! Tobacco was a blessing of a man flying for his country's honour. By dint of good luck, I fell in with six dozen of beer on board a small steamer, and a cask of wine which had spoilt, and was in vain for four days; but these drinkables, although very acceptable for our small mess, are not what we yearningly desire; we want some fresh meat, in the form of fowls, ducks, pigs, sheep, or oxen, to relieve our suffering frames. Wine and beer, with salt rations day after day, are of little value, while with mutton or beef hash they are truly refreshing. If our friends at home could but see the fore quarter of mutton brought in for our rations this morning, they would declare no Christian could eat it. Our opinion happily differs from that of our affectionate relatives: we greeted the thin, unhappy-looking lamb with ready eyes, and rejoiced that salt pork was to be escaped at to-day's dinner. Obi should God be pleased to carry us home to old England, shall we not enjoy heartily the comforts of a board of life? Our pampered appetites need not mind inviting us to dinner—the simplest home dish will always contrast favourably with our Crimea table. *Letter from the Crimea.*

THE SOUTH SHIELDS PENDULUM EXPERIMENTS BY THE ASTRONOMER ROYAL.

We have already briefly explained the arrangements made for this important series of experiments with the pendulum, in the Harton Coalpit, at South Shields. At the request of several scientific gentlemen, the Astronomer Royal, Professor Airy, gave an explanation of these experiments to the members of the Mechanics' Institution and Working Mens' Institution of South Shields, on Tuesday week, the 24th ult.; but it will be some time before the astronomical observations obtained will have been sufficiently reduced to arrive at the anticipated results.

The experiments at the colliery, which extended over from three to four weeks, having been brought to a close, the instruments had been removed to the lecture-room, and were placed on the opposite ends of the platform in exactly the same relative positions as they had occupied at the pit—one set below, and the other above ground. The apparatus consists of two astronomical clocks with compensation pendulums, two invariable pendulums (Kater's) suspended on strong tripod iron stands immediately in front of the pendulums. An astronomical clock, and an invariable pendulum were placed at each station with barometer and thermometer attached, which were regularly observed, so that the necessary corrections might be made for atmospheric resistance, variations of temperature, &c. There was also at each station a *galvanic signal needle*, and these were connected by means of insulated wires, placing the observers in electric communication. The upper and lower stations at Harton Pit were exactly in a vertical line, and distant nearly a quarter of a mile; and at each station the instruments were carefully enclosed to prevent the vibrations of the pendulum, being affected by currents of air.

James Mather, Esq., occupied the chair at the meeting at Shields; and, with a few well-timed observations, introduced the distinguished lecturer.

The Astronomer Royal commenced by observing that the present lecture was due to the people of South Shields and the county of Durham generally, in return for the very kind assistance which he had received. He also acknowledged his obligation to the Durham Observatory. Mr. Airy next proceeded to state that his grand object was to arrive at the weight of our globe—the earth—it being necessary to know this before we can proceed to determine the weight or mass of the sun, moon, and planets, which is of the utmost importance to practical astronomy. The size and figure of the earth being now pretty accurately

MOUTH OF THE HARTON COAL-PIT, SOUTH SHIELDS.

known, it only remains to determine its mean density, *i.e.*, the average weight of say a cubic foot, and the total weight of the globe is easily calculated.

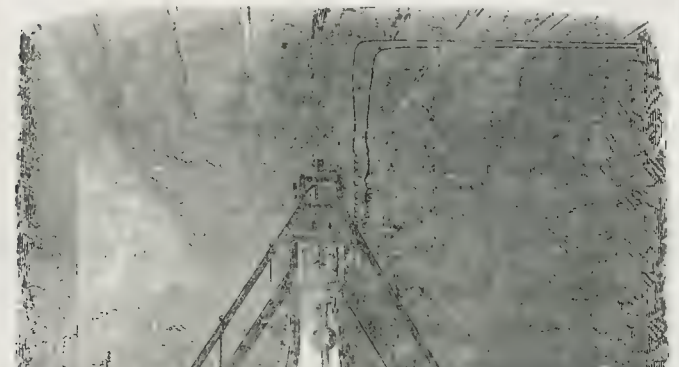
The Astronomer Royal then proceeded to detail the experiments. Harton Pit is 1760 feet deep; its mode of ascent and descent is by "*cage and tub*," which is made in either way, with the smoothness of a railway carriage, in less than two minutes. The extensive nature of this pit may be judged of by the amount of passages which it contains in its workings, in connection with its other shaft, St. Hilda. They are upwards of 100 miles; and there are underground passages more than 3½ miles in a direct line.

A model Zenith-Sector was explained in connection with the late Dr. Maskelyne's experiments and observations at the mountain Schehallien, in Scotland, in 1774. Professor Airy next detailed the various experiments with the Torsion Balance by Cavendish, Reich, and the late Francis Baily.

The results of the above experiments show the mean density of the earth to be five to six times the weight of water. This was the state of the inquiry in 1826, when Professor Airy and Dr. Whewell saw that the problem might be solved in an entirely different manner. A little reflection is sufficient to show that, if the mean density of the earth be from *five* to *six* times that of water, as indicated by previous experiments, the interior of the earth must be considerably heavier than its superstratum, which, so far as we have been able to penetrate, we know to be little less than one half that weight. Now the question arose—How was this to be determined? How were we to ascertain whether the centre of the globe was a mass of matter, probably as dense as gold or platinum? Messrs. Airy and Whewell directly saw that if this was the case it would be most easily settled by observing the number of vibrations made by a pendulum swung at the surface of the earth and at the bottom of the deepest mine. The number of vibrations of the pendulum is a correct measure of the power of gravitation; and, as we penetrate the comparatively light super-strata or crust of the globe, and approach the much denser and heavier mass forming the interior, the attraction of gravitation will be considerably increased, and the effect will be to accelerate the vibration of the pendulum, *i.e.* to make it go quicker. This principle forms the basis of the Harton Pit experiments. Mr. Airy here enumerated the many difficulties to be encountered, and the many precautions to be used in the prosecution to such delicate inquiries. He then proceeded to state that he and Dr. Whewell attempted the experiment at the Dolcoath mines in Cornwall in the year 1828, but were completely defeated. One principal difficulty was the comparison of the clocks at the top and bottom of the mine, which at that time could only be managed by conveying a chronometer, in the most inconvenient manner, down a series of ladders, altogether different from being lowered *direct* to the bottom in the cage at Harton Colliery. In spite of this difficulty they persevered until, from some serious accident, the mine was inundated with water, and they were "drowned out." Mr. Airy here remarked that as it was necessary in those cases to combine philosophy with pertinacity, he had lately resolved to renew the attempt, but with the new element before mentioned—*viz.*, the Electric Signal. This enabled the two observers to know the exact instant at which the clock time was to be noted at both stations, which was done every four hours, night and day, for four or five days, when the invariable pendulums were changed—the pendulum which had been swinging at the upper station was taken down the pit and hung up in front of the clock at the lower station, and that which had been down the previous five days was brought to the station at the surface, and a new series of observations commenced: in this way any difference in the lengths of the pendulums was got rid of. Mr. Airy thought that, with care, the final error of the pendulums would not exceed *one-tenth of a second per day*. The necessary elements, or data, for the calculation of the mean density of the earth by this method, are—first, the difference in the number of the vibrations at the top and bottom of the mine; and, secondly, *the thickness and mean density*, or specific gravity, of the outer shell of the globe which could be pretty easily arrived at. The Astronomer Royal demonstrated, by the assistance of a diagram, the effect which the outer crust would produce on the lower pendulum, which, fortunately, may be said to be *none at all*.

Professor Airy, in conclusion, stated that, before he could say whether the results would show any difference at all, many long calculations and deductions would require to be made. The figures recorded "looked well," and reflected the highest credit on his six assistants, who were the most careful observers he could desire.

Mr. Ingham, M.P., in moving a vote of thanks to the Astronomer Royal, thanked him for having, at his request, issued a ticket to each of the members of the South Shields Mechanics' Institution.



PENDULUM-ROOM AT THE BOTTOM OF THE HARTON COAL-PIT.

To this report of the lectures, abridged from the *Newcastle Chronicle*, we add a few details. The position of the two pendulum rooms, was one at the top of the pit, the other at the bottom, within 100 yards of it, exactly vertical. The instruments in the upper and lower rooms were fac similes of each other; and at certain intervals, to correct any irregularity, these at the top were placed below, and those below, above, changing places. The upper and lower astronomical clock, exactly regulated to each other, had each on the balls of their pendulums an illuminated disk, about the size of a crown-piece. Exactly in front, and within a few inches, hung a free (Kater's) pendulum, suspended on very hard steel, shaped to an obtuse angle, moving on an agate plane. The number of vibrations of the clocks within any given time, are of course registered by the clocks themselves. The number of the vibrations of the free pendulums, produced exclusively by gravitation, were ascertained exactly by their proportionate number to those of the clocks. At intervals each free pendulum, which moves more quickly than the clock pendulum, passes and repasses in front of the latter, receding, first on the right and then on the left, the illuminated disk on the clock pendulum. When a certain series has been gone through, the illuminated disk is covered for a second or two by the free pendulum in front; and this obscuration, or coincidence, marks exactly the proportionate number of vibrations due to each. The exact time is then noted, the temperature, the barometric pressure, the relative time of the clocks above and below, by the *galvanic signal needle*; and then the observation is complete, both in the mine and at the surface.

This coincidence requires so exact an observation, and from a direct line in front, that a small telescope is fixed in the most precise manner within a few feet, to make the observations—in which so much precision and care were used that the tenth of a second was frequently noted, which develops in the calculations in some instances nearly the four-hundredth part of that brief period of time.

To ascertain the weight of the earth's crust will be more open to error. It requires that every description of stratum, lying between the upper and lower pendulum for these 1760 feet should have its weight exactly found, as well as its thickness measured. In some places, near the surface, there are clay and earth; in others, as you descend, sandstone, limestone, shale, and then seams of coal; some of the strata are saturated with water, others quite *dry*. All these varieties of deposits, in their respective conditions, must be distinctly examined and weighed. Difficult, as it may appear, all this may be done; and the genius that has hitherto arranged and developed this important experiment will doubtless find means to complete the operation.

Mr. Dunkin, of the Royal Observatory, Greenwich, conducted the experiments in Professor Airy's absence, assisted by Mr. Ellis, of the same Observatory; Mr. Pogson, of the Radcliffe Observatory, Oxford; Mr. Kumkin, of the Durham Observatory; Mr. Creswick, of the Cambridge Observatory; and Mr Simmonds, of the Red hill Observatory, Surrey.

The accompanying Illustrations shew a view of Harton Pit, which is merely interesting as being the scene of the observations. The lower Engraving shows Professor Airy's apparatus *in situ* in the room built for its reception at the bottom of the pit shaft (1300 feet below the surface). The lantern, placed on the block, is for the purpose of illuminating the pendulum disk, there being a glazed aperture in the side of the clock (shown on the opposite side) to admit the light. The spiral wires are the telegraphic conductors, which were carried up to the ceiling through the wall, and so up the shaft to the upper station. The instruments suspended from the iron support on the left, are two thermometers. No figures are introduced, inasmuch, as during the observations, no one was admitted into the room; the observer being seated in a separate apartment, and making his observations by means of a telescope through an aperture in the wall.

Professor Airy has kindly agreed to forward his lecture, explanatory of the noble subject, written *in extenso*, to South Shields for publication.

THE ARCTIC EXPLORERS.—TESTIMONIAL TO DR. ARMSTRONG.

On Tuesday, last week, advantage was taken of the paying off of the recently-returned Arctic ships at Woolwich, to present Dr. Armstrong, the surgeon of the *Investigator*, with a gold chronometer and chain, which the petty officers, seamen, and marines determined to purchase for him previous to quitting the ship, as a mark of their high estimation for his services as medical officer during the voyage. The gift (Barnett, maker, Cheapside), bears a representation of the *Investigator* imbedded in the ice, on one side; and on the other, the following inscription:—

GOLD WATCH PRESENTED TO DR. ARMSTRONG OF "THE INVESTIGATOR."

Presented, October, 1854, to Alexander Armstrong, M.D., (late) Surgeon H.M.S. *Investigator*, by the Petty Officers, Seamen, and Marines of that ship, as a testimony of their sincere respect and gratitude for his unwearied professional skill and humanity during the unparalleled Arctic Service, which resulted in the discovery of the North-West Passage.

The presentation took place at the Ship Hotel, where Mr. James Nelson read an appropriate address, bearing the following testimony to Dr. Armstrong's services:—"There are few, if any of us, who have not at some time experienced your kindness at the sick bed; some who have, under Providence, to thank your skill and attention for their lives; but, above all, your constant assiduity and unwearied zeal, to those departed shipmates, whom it has pleased the Almighty to take from us, can never be forgotten."

Dr. Armstrong replied, in an address of excellent feeling, wherein he said:—"I can lay claim to no higher merit than an anxious desire which I ever felt to do my duty; but that, even under our worst circumstances, was made to me a comparatively easy task by the bravest and the best ship's company that ever left England. The world knows something of what you have done, but nothing of what you have suffered. I have witnessed your courage and your daring when destruction so often appeared inevitable. I have seen you in health, and I know you in sickness, and but too truly have I known the hunger which you so long felt, when it lay not in my power to allay it. Then it was that you displayed all the higher qualities of our nature by the heroic patience and fortitude with which you bore your privations and suffering, and manifested in such a remarkable degree that discipline and noble conduct which proved you to be true British sailors. Our departed shipmates fell from the effects of what we all more or less suffered from, and that, too, at a time when the dark and dreary days of trial and adversity had passed, and when relief had so providentially reached us." Dr. Armstrong then thanked the company for the handsome gift.

Mr. Nelson then turned round to Lieutenant Bedford Pim, who was present, as the friend of Dr. Armstrong, and said, "Were it not for you, sir, many of us now present would never have seen Old England again. All of us look upon you as our deliverer, and none of us will forget the joy we felt when you reached us."

Lieutenant Pim, in reply, said—"I thank you, my lads. I shall never forget our meeting. I congratulate you most heartily upon your escape from a fate similar to that of poor Sir John Franklin."

The most hearty feeling was reciprocated between Dr. Armstrong and the men on the occasion, and he and Lieutenant Pim bade them an affectionate farewell on retiring.

THE NURSES FOR THE EAST.

On Tuesday week the Folkestone steamer carried, amongst other passengers, thirty-seven of the nurses attached to Miss Nightingale's staff. They were accompanied by Mr. and Mrs. Bainbridge, a clergyman, and a courier, who will see them safely landed at Constantinople. The authorities at Boulogne had received orders to pay every attention to them; and the news of their arrival having spread, a crowd had assembled to welcome the self-devoted band, and bid them "God speed!" on their mission of charity. Mr. Hamilton, the English Consul, was in

BOULOGNE FISHWOMEN CARRYING THE LUGGAGE OF THE NURSES FOR THE EAST.

attendance to receive and conduct them to the Hôtel des Bains, where a good dinner had been prepared for them.

On the Friday following Miss Nightingale and the thirty seven nurses who accompany her sailed, from Marseilles, in the *Vectis* steamer, for Constantinople. Throughout the whole of their journey through France they were everywhere received with demonstrations of sympathy and respect. The *Semaphore*, of Marseilles, pays them the following compliment:—

Miss Nightingale possesses all that could render existence happy and brilliant, young, handsome, and wealthy, she has chosen a life of abnegation and self-denial, and, after having presided over one of those institutions in London of which the idea was suggested by a true spirit of Christianity, her feelings of charity still more excited by the details of the sufferings of the sick and wounded soldiers in the hospital of Scutari, she has chosen as a new sphere of action a place where glory is purchased by the severest privations. Nothing could deter her, and at this moment the *Vectis* is conveying her to the East. She and her companions will find there their field of battle in the hospital wards and ambulances, where their sex so well qualifies them to fill a dangerous though heroic position. Captain Powell, the commander of the *Vectis* received those ladies with perfect courtesy, the officers and crew vied with each other in their attention in conducting them to the places reserved for them with all the respect due to their sex and their affecting mission.

THE "AMBULANCE," DEPARTMENT.

THE latest accounts from the Crimea inform us that the Ambulances, of which our Artist has given the annexed Sketch, have at length reached the spot where they are wanted. Great complaints have been made that, although a large number of these vehicles were sent from this country to the East, not one could be obtained to convey the wounded from the field after the battle of Alma. They had been forwarded from Varna to Old Fort, where they were landed on the beach; but, owing to some strange blunder, which has not yet been explained, they were left there while the army marched away to battle.

The Ambulances, which are now in daily use, for the conveyance of the sick and wounded, are divided into compartments—one in front, containing six seats, where the slightly wounded can sit back to back, and another division behind, where, as will be seen, there are four berths for patients who have suffered severely. These invalid carriages are drawn by six mules, and driven by postboys, in the Artillery undress: they were described in our Journal of September 23.

SIEGE OF SEBASTOPOL.—DR. SMITH'S NEW HOSPITAL WAGGONS.

THE ROAD TO SEBASTOPOL.—COMMISSARIAT WAGGONS, CONVEYANCE OF FASCINES, ETC.

THE SIEGE OF SEBASTOPOL.

(From our Special Correspondent.)

HEIGHTS ABOVE SEBASTOPOL, Oct. 13, Seven a.m., 1854.

A FULL fortnight has elapsed since the Allies took up their present positions in front of Sebastopol, and still the profoundest quietness marks the passage of each day. When first the expedition landed on the shores of the Crimea, our engineers were sure that, if once they were placed before this town, they could reduce it within ten days. A fortnight has elapsed and not a shot has been fired on our side. The whole extent of our labours has been to erect four batteries, mounting altogether fifteen heavy guns; and, as I write, even these works are complete. It is not with the intention of casting any blame on Sir John Burgoyne or our engineers that this is said; but there is no doubt that we might take a lesson from the French, who, within the same time, have succeeded in placing thirty-six guns in position. These delays will, doubtless, be explained by the difficulties of transport, the want of baggage and draught cattle, the scarcity of forage; but the French have suffered from these disadvantages as we have, and yet proceed with a vigour which is unknown to us. This state of things gives a degree of force to the arguments of the numerous croakers, who assert that the delay in opening fire from the trenches is likely to be fatal to the operations of the campaign; that the Russians, growing bolder in proportion to our inactivity, will regain that confidence which they had lost after the battle of the Alma; and that whilst we are slowly proceeding with our works, the enemy will strengthen his forts and batteries, to our detriment and annoyance. Further, they insist—and this appears to be a strong argument—that reinforcements will reach the enemy in greater numbers every day that we delay in opening the works. It must be borne in mind, however, that the English engineers have had to contend with greater difficulties than those which the French have met: the ground which we have to deal with is stony, and spare, covering to a very slight depth a stratum of

SIEGE OF SEBASTOPOL.—PREPARING A TRAIN FOR THE TRENCHES.—(SEE NEXT PAGE

hard limestone; the French, on the other hand, have been enabled to open trenches nearer to the body of the place—and this is so far necessary to them, that their pieces, generally, are less useful than ours at long ranges. It is fortunate that the weather hitherto has been so favourable to our operations: with the exception of a couple of cold days, during which a north-easterly wind prevailed, the atmosphere has been warm and genial: unlike the same period of last year, when the ground around Sebastopol was covered with two feet of snow. Everything, in fact, has been propitious; and there is not the slightest reason to fear that any amount of reinforcements which the Russians may send up, can in any way affect the great result to be attained. Sebastopol will fall, no one doubts it—the question is only one of time and on that, of course, the most divergent opinions exist. When the reinforcement brought into Sebastopol by Lüders, reached the city, the number of those who expressed fear as to the issue of the war, was not diminished; but it was considered by many as a favourable symptom; for it showed that there was no considerable force threatening our rear, and it proved that the Russians did not consider the large garrison already there, sufficient for the defence of the place. This much is certain, that since the arrival of our troops in their present positions, they have not seen any large force sufficient to molest them in the rear. Should such a force, however, make its appearance, measures have been taken to give it such a warm reception as will prevent the repetition of the attempt. The ground occupied by the Allies is a series of elevated undulations, which overlook not only the town of Sebastopol, but almost the whole of the surrounding country. On our extreme right, where General Sir de Lacy Evans is stationed with the Second Division, the ground slopes precipitously into the valley of a river called the Tchernaya. Our rear is defended by precipices, on the west of which are stationed two French divisions. Balaclava, which is attached to the position by a safe road along a vale protected alike from the view and the attacks of an enemy by crests of hills almost parallel to the sea, is defended besides by a corps of 1000 Marines, occupying an intrenched position, and by the Turkish force, which has left its central position to take up one nearer to the point under notice. On the slopes, between the crest and Balaclava, in and about the village called Kadikioi, is the main body of our cavalry, under Lord Lucan, and some batteries of artillery. The precipitous ground on our right has been strengthened with breastworks by working parties from our divisions, whilst in our rear the main road from Balaclava to Sebastopol has been blown up, and redoubts and breastworks have been erected by the French, to render approach from an enemy still more hazardous. In the rear of our left the French have also erected defensive works, and a large redoubt covers the road from Balaclava to the head-quarters of Lord Raglan—a village called the Traktair Inn. Should the Russians attempt to attack our flank or rear, they will have not only to contend with troops determined to resist at all hazards, but with difficulties of ground almost insurmountable. It is satisfactory at the same time to know that the force of the Allies has been increased by the arrival of 25,000 French at Kherson, all of whom are landed and ready for action. The force at the disposal of the Generals is, therefore, at present upwards of 75,000 men.

Sir De Lacy Evans's position—the extreme right—is one of the most picturesque that can well be imagined. It looks down upon the town of Sebastopol, and, at the same time, upon the vale of the Tchernaya, along which are to be seen the picturesque ruins of Inkerman. The sides of the hills are covered with scrub, which affords good cover for outlying pickets. On the left of the Second Division is the First Division—the various regiments of Guards covering the ground right and left of a very good macadamised road. A battery of artillery is close by, with Lord George Paget's 4th Dragoons on one side, and the 11th Hussars on the other. A large mill on the right of a small gorge has been turned into a powder magazine, and near it is the siege train, with all the heavy ordnance, furnaces, mortars, and other apparatus. Beyond the mill is the Light Division, with Sir George Brown; and the 4th, with Sir George Cathcart. Two battalions of Rifles are on each wing. The extreme left is held by Sir R. England's division. The whole of the army is thus distributed, fronting, as well as the undulation of the ground permits, the town of Sebastopol. I can scarcely better describe the progress of affairs here than by the following extracts from my diary:—

October 7.

The Allied armies have been actively engaged during the last four days in preparations for battering Sebastopol; and the enemy, on their part, have taken advantage of the time allowed them, to throw up works in advance of the town, from which they throw a few shells daily into our advanced pickets. The only casualties which have occurred are the loss of a sergeant and private of the 68th, who were killed by the fall of a shell into their tent.

On the 4th, the guns which had been moved from the *Diamond* and the *Highflyer*, were taken on shore by sailors told off from the ships, and were forthwith dragged up towards the lines. The utmost enthusiasm animated the men in the performance of this duty. They harnessed themselves to the guns, some thirty and forty in number, a fife playing a national air in front, and union-jacks flying in front and rear. As they passed the first village out of Balaclava, the cavalry, who were encamped on the hills, turned out, and gave a hearty cheer. The men passed forward them, and left their guns in another village, half way between Balaclava and Sebastopol. The entire number of guns was not drawn up till yesterday, when the whole had been brought to a short distance from the spot where the fire is to be opened. On the 5th the *Terrible* and *Beagle* came into Balaclava, the latter landing her heavy guns, and the former her two 95-cwt. Lancaster pieces. The sailors, of whom there are upwards of a thousand, also drew up these pieces, with the assistance of the artillery horses; and it is expected that the whole heavy siege train will be in position before two days.

Whilst the British have been landing their stores and ammunition at Balaclava, the French have likewise been actively employed at Kherson, a village situated in the bottom of Phanari Bay. The French works will attack the town on the side of the sea-shore, whilst the English are advancing from the land side. The position which the Allies obtained by the masterly march round Sebastopol is one which has numerous advantages: the heights not only command the town, but they are high above the plain, into which the Russians must debouche if they intend to annoy our flanks. The gorge which leads through the crest covering Balaclava has been fortified by the French, whose divisions form a reserve, covering the rear of the armies. Through this gorge the main road from Sebastopol to Balaclava passes; and the Russians appear to have spent some money in making and keeping it in order. It seems difficult, therefore, for the enemy seriously to annoy us in the rear during our attack of Sebastopol, but I believe that they have the intention of doing so as soon as we open fire from the trenches. On the 5th a reinforcement of 20,000 men entered the town under command of General Lüders, who forthwith issued a proclamation to encourage the inhabitants. Since then several reconnaissances were made—one of which, consisting of infantry, cavalry, and guns, marched to day into the plain on the right of our position, moved up the gorge, and were stopped by our artillery and cavalry below the crest, which overlook Balaclava. I was unable to ascertain the amount of infantry in motion on this occasion, but the number of cavalry was about 2500. On our part we have not so large a number of horses to oppose the enemy. Our regiments, which were undermanned at Varna, had had serious losses in horses on their way hither.

Continued in Number, page 435.

PREPARING TO GO OUT TO THE TRENCHES.

In this Sketch the Artist gives a representation of the scene which the English Camp presents when a trenching party is about to start for a night's work. On such occasions every precaution is taken to prevent noise. The wheels of the covering-guns, for example, are covered with sheep-skins, to prevent their creaking, which might guide the Russians to where the trenching-party has fixed upon to commence operations. Those who complain of the long time which elapsed before the preliminary works before Sebastopol were completed, ought to take into account the enormous weight of material which has been carried up from Balaclava to the heights. The *Constitutionnel*, in giving a description of the labour necessarily attendant on such an operation, gives the following estimate of the weight of the *matériel de siege* employed by the Allies before Sebastopol:—

The total amounts to 4,621,934 kilogrammes, which is equal to 10,042,750 lbs. avoirdupois. This enormous *matériel* is divided as follows:—

Cannon	... ...	258,890 kilog.
Gun-carriages, ammunition, and baggage-waggons, &c.		886,676 "
Projectiles	... ...	2,510,462 "
Powder	... ...	646,906 "

The remainder is composed of a multitude of objects too numerous to be mentioned; but it is to be remarked that in the above enumeration is not included the marine artillery, weighing 3520 kilog., or 2025 kilog. each gun, according to whether they are 30 or 30-pounders.

CHESS.

TO CORRESPONDENTS.

SOLOMON, I. M. of Bridport, and G. M A.—We still believe it impossible to solve Problem No 556 by playing Q to Q R 8th. Suppose, in reply to that move, Black play his Q to K 4th: how would you proceed?

L. C., Cleveland, Ohio, United States.—Mr. Cochrane's long-talked-of and much-desired "Loose Leaf on Chess Openings" will probably make their appearance next spring.

A. S.—If a player is guilty of the egregious blunder of taking an adverse Pawn *en passant* with an *advanced Piece or Pawn*, his opponent may oblige him to do so, are the move taken, property, or move his own.

G. M. A., Aberdeenshire; J. ION, Richmond; F. T. W. They shall be inserted on next week.

SOLILA, LUCIDA, CONSTANS, and others.—The series of Articles on the Progress of Chess from its Introduction into Europe in the Middle Ages down to the Nineteenth Century by Sir Frederick Madden and Mr. Forster Fitzgerald will commence immediately upon the termination of Mr. Forbes' interesting series in the East.

A. HENDRY, Oxford.—We are unacquainted with the game.

B. HALL. The conditions of all these and games which appeared under our notice to "AMERICA," last week, are, proper ly, "White to move and draw the game, or Black to move and win."

SIBILATRIX.—No one has yet furnished us with the true key to the position we gave in the last Number, from the MS. Treatise of Dosky; which is surprising, since it is not by any means difficult.

F. W. A., Hawick.—They deserve and shall have insertion the first opportunity

C. F. S.—Thanks. The two lots are very well conducted on your side.

HORSETOWN.—Thanks again. A friend, however, has obligingly supplied us with a copy. The other work mentioned is "Le Filosofa, Ovvero Il Facchu Degli Scacchi," &c., by Marcus Aurelius Severinus, but it never has been passed at our review.

HARK KLING, J. R., of Bridport; W. G., of York; HERR K., of Sittebardt; C. M. J., of Birmingham.—The Problem unlikely forwarded to us are now under examination, and shall be reported on next week.

TRAVELLER.—You will find a Chess-club at Falkirk; the members meet every Tuesday and Friday evening at Johnson's Hotel. The Cambridge Club assembles on Tuesday and Friday evenings at the Lion Hotel.

SOLUTIONS OF PROBLEM NO 557, by Adolphi M. P., Ellipse, G. H. W. ; J. M., of Sheerhardness; Decoun, J. P., Malden; W. J. P., Kingston, F. R., of Norwich. E. H., R. F. S., Dublin; Caxton, Annabel, Omar Pacha, are correct.

SOLUTIONS OF PROBLEM NO 558, by Grimmons, Semper Eadem, Sarkelands Rovers, M. P., M. A., Cambridge; R. S., Tooley Street; J. of Hanwell; R. Hall, John Ship's, Medical; F. K., of Norwich, J. M., of Shrewsbury; K. F., Royal Artillery, Whist, Philo-Minsky, H. M., are correct.

SOLUTIONS BY ENIGMAS, by Dorwan, S. T. W., J. P., Claudia, Express, Medicus, Foreigner, Mercutio, D. D., Toby, O. M. A., Aberdeenshire, are correct. All others are wrong.

SOLUTION OF PROBLEM No. 558.

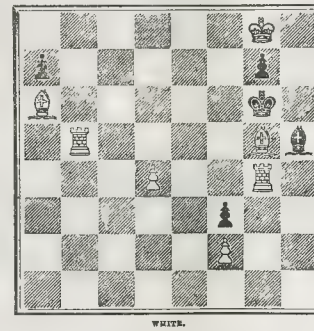
WHITE.	BLACK.
1. Q to Q 6th (ch)	K takes Q
2. R to Q 8th (ch)	P takes R, or *
3. P to Q Kt 5 h (dis. ch)	P to Q B 4th
4. P takes P in passing, and discovers checkmate.	

* 2. K takes P (ch) | K to K 2nd, K moves | 4. P Mates.

PROBLEM 559.

By J. B., of Bridport.

BLACK.



WHITE.

White to play, and mate in three moves.

CHESS IN THE PROVINCES.

A smart little *partie*, played at the Caistor Meeting, between Mr. STAUNTON and Mr. A. B. SHIPWORTH; the former giving the odds of a Knight.

(Remove White's Q Knight from the board.)

(Sicilian Opening.)

WHITE (Mr. Staunton).	BLACK (Mr. Shipworth).	WHITE (Mr. Staunton).	BLACK (Mr. Shipworth).
1. P to K 4th	P to Q B 4th	15. K B to Q B 2nd	P to K B 4th.
2. P to K B 4th	Q Kt to Q B 3rd	15. P takes P (in passing)	B takes P (d)
3. K Kt to K 2nd	P to Q 3rd		
4. K B to Q B 4th (a)	P to K 3rd	17. Q to her 3rd	K R to B 2nd
5. Castles	B to K 2nd.	18. Q to K R 7th (ch)	K to B sq.
6. K B to Q Kt 3rd (b)	P to K R 3rd	19. P to Q 5th (e)	Kt to Q 4th. (f)
7. P to Q B 3rd	Kt to K B 3rd	20. P takes P (g)	Q B takes P
8. P to K 5th	P takes P	21. Q R to Q sq	Kt (4) takes K R (ch)
9. P takes P	K Kt to K R 2nd	22. P takes Kt	K R to Q 2nd
10. P to Q 4th	P takes P	23. R takes R	Q B takes R (f)
11. P takes P	K Kt to Kt 4th	24. Q B to his 4th (ch)	K R to K 2nd (d)
12. Q B to K 3rd	Kt takes Kt (ch)	25. Q B to Q 4th	K B to his 3rd
13. K R takes Kt	K B to K Kt 4th	26. Q B to his 5th (ch)	
14. Q B to K B 2nd (c)	Castles.		

And the game was resigned as drawn.

(a) This drives B back from "pinning" the Kt as effectually almost as P to K R 3rd, because if he remained to play B to K Kt 5th, White could take the K B P with his Bishop and fly.

(b) A useful precaution against his centre being broken.

(c) Humiliating, undoubtedly, but forgoing with inferior force, and without Cavalry, it would have been full hardiness to accept every challenges to exchange.

(d) Better, possibly, to have taken with the Rook.

(e) To look at the aspect of the field, any one would think White had now an easy road to victory; but, in truth, the game is seldom more difficult, and requires the nicest management from both parti s.

(f) Well played: effectually preventing White from giving the deadly check he meditated at Q 8th, and subjoining him to a fitful attack of a most embarrassing kind.

(g) White hastened long moves too late and the plain-sailing line of Q to K R 8th (ch)... Q takes Q. R takes R. &c. The last or worst d have been far better than taking the Pawn.

(h) Black appears to have escaped at last, and to have the attack in his own hands. His opponent, however, finding that wresting was impracticable, turned his attention to a draw battle, and this he was now enabled to announce he could effect, let Black play as he might.

(i) Had he taken with the Queen, the game would have proceeded thus.—

28	Q takes K
24. Q to K R 8th (ch)	K to K 2nd (best)
(If B to K R sq, then White may win.)	
25. Q takes R, &c.	

(j) The game is equally drawn, whether he interpose the Bishop or play the King to B 2nd

CHESS MEETING AT CAISTOR.—We are driven by want of space to postpone the report of this pleasant gathering until next week, when we shall give a list of the chief visitors, and publish two or three of the finest games which were played.

EPITOME OF NEWS—FOREIGN AND DOMESTIC

The ribbon of the ancient and honourable order of St. Patrick, vacant by the death of the Marquis of Ormonde, is said to have been offered to the Marquis of Londonderry, and declined.

The French Emperor has authorised Prince Napoleon to wear the military medal, as a reward for his conduct at the battle of Alma.

Sir Edmund Head, the newly appointed Governor-General of Canada, has arrived in New York, accompanied by Lady Head and his family.

The Director-General of the Louvre has had a revolver cannon placed in the Museum of the Marine, capable of firing twelve shots in a minute, with the aid of two artillerymen to serve it.

Cardinal Wiseman arrived in Paris on Tuesday. He intends remaining there only two days, being anxious to reach Rome with as little delay as possible.

Baron von Hochschild, now Swedish Envoy to the Court of St. James's, has been honoured by the King of Prussia with the insignia of Grand Cross of the Red Eagle.

A dinner was given to Captain M'Clure, on Monday, at Hastings, by the inhabitants, among whom the gallant Captain has for some years taken up his residence.

A deputation of gentlemen connected with the manufacturing interests—consisting of Mr. Oliveira, M.P., Mr. Macgregor, M.P., Mr. Barnes, M.P., and others—are about to proceed to France, in order to obtain the most precise information upon the present stock of wines in the various districts, the yield of last vintage, and the capability of further production.

Almost all the Prussian Insurance offices, with the exception of those of Magdeburg and Silesia, have either altogether declined to renew policies on, or have considerably reduced their business in, Memel.

The first communications by the electric telegraph between Madrid, Perpignan, and St. Sebastian, were conveyed on the 23rd ult. In a few days the line is to be connected with that of Irun and Bayonne.

The impetus given to ship-building, in British North America, by the speculative prices lately current on this side, shows no abatement. On the 25th of September there were 37 vessels building at St. John's (N. B.), of an aggregate burden of 31,740 tons; and 30 at Quebec, of an aggregate of 28,360 tons—making a total of 117 ships and 118,080 tonnage.

Experiments have been made with success by the Prussian military engineers to connect a field or flying telegraph-line with the great permanent lines. In two hours ten men laid down a length of five miles of wire.

Ninety-one thousand nine hundred emigrants sailed, in the quarter ending June 30, from the ports of the United Kingdom at which there are Government emigration agents.

The Russian prisoners in London are making a capital trade with their toys, many of which are very ingenious. They seem quite pleased with their position, and find it more profitable than serving in the ranks of the Czar. Sixpence is the lowest price paid for a toy.

The vintage on the Moselle commenced last week. The quality is declared excellent, but the quantity is extremely limited—not more than one-sixth of the average.

Professor Taylor, the practical chemist sent down from London to aid the authorities of Newcastle-upon-Tyne in investigating the causes of the late terrific explosion, has given his opinion that it resulted from the mechanical confinement of gases generated during the fire.

A letter from Buenos Ayres, July, 1853, has been received from Mr. Hughes, surgeon of the brig *Adamica*, of the Grannell Exploring Expedition, which states that the health of the parties continued good.

Notwithstanding the establishment of a free public library in Bolton, the issue of Books at the Mechanics' Institution in that town, within the last twelve months, has been 380 more than those of the preceding year.

Great sensation has been produced in Hamburg by Russian agents buying up large quantities of Austrian Government securities. Several millions have been purchased at Amsterdam also.

Alexander Smith has been appointed assistant to the Astronomer Royal for Scotland; her Majesty, during her late visit to Edinburgh, being graciously pleased to stamp in this way her approbation of the young poet's astronomical descriptions.

Neville Hall, Ulverston, the ancient seat of the family of Neville, was brought to the hammer on Tuesday, and knocked down for the sum of 26,3l6.

The coming winter threatens to be an early one in America. Considerable quantities of snow have already fallen in the western parts of Massachusetts, New Hampshire, and Canada.

The King of Denmark arrived at Flensburg on the 24th, and was received with enthusiasm by the inhabitants. His Majesty was accompanied by three of his Ministers.

A fabulist statement has been issued, showing the amount of tallow exported from Russia up to a late date as the 2nd ult. It shows that the shipments during the present year have, for the first nine months, been no less than 42,921 casks.

It is quite decided that the Queen of Spain will open the Cortes in person, when it is expected that some sort of speech will be made. On the 8th inst. the day of the opening of the Chamber—she will assist at the ceremony of delivering the colours to the National Guard.

One hundred thousand pairs of wooden shoes, and the same number of woollen socks, are about to be sent from Lyons to the French army in the East, in order to protect the feet of the soldiers against damp and cold during the winter.

A detachment of Polish volunteers has just left Toulon for the East, where they will enter the Ottoman service.

Two rich copper mines have just been discovered at about five leagues from Askersund, in Sweden. They are to be immediately worked, and it is expected that they will prove a source of prosperity to that part of the country.

The General Screw Company has six vessels, comprising an aggregate of 11,321 tons, in the war service of the English Government, yielding a revenue to the company at the rate of nearly 340,000 per annum, Government finding coals.

The King of Naples has offered his sister, Donna Maria Christina de Bourbon, an asylum in his kingdom, which she has refused, on account of the position occupied by Count Montemolin at the Court of Naples.

The rental of a portion of Southampton Water for storing oysters is £30 a year, and the formation of a marine park wherein they are stored cost £200. Between twenty and twenty men are employed on the Southampton oyster grounds in the busy season.

At New York, as in London, all articles of food are at a high price. This is said to be one of the causes of the re-emigration to the old World which has lately set in. Since 1st August the emigration to Europe from New York has been from 10 to 15 per cent of that to New York.

Prince Vincent, Count de Mo[illegible]son of the King of Naples, died at Caserta on the 14th, of apoplexy. His Royal Highness was born on the 26th of April, 1851.

Colonel Outram, C.B., formerly British resident at Baroda, and more recently the political resident and military Commandant at Aden, has been appointed by the Governor-General of India to the office of representative at Lucknow.

M. Isuiel, the Minister of the United States at Madrid, who made himself so notorious some time ago by his quarrel with M. Turgot, the French Minister at the same Court, was last week refused permission to enter France on his way from this country to Madrid.

According to M. le Comte de Piecquelmont, the chief injury we have inflicted on the Russian navy in the Baltic this year, is that we have deprived them of their customary six weeks of *sea bathing*, which is found necessary to refresh the timbers of the ships debilitated by the fresh water of the Neva.

The Vice-Chancellor of Cambridge has informed the members of the University that Prince Albert has signified his intention to give annually a prize of a gold medal for the encouragement of legal studies in the University.

The fire at Memel destroyed 3 churches, 5 schools, 9 public edifices, 300 private dwellings, 14 warehouses, 133 stables, 49 coach-houses, and 2 mills, valued at 848 000 thalers, exclusive of merchandise.

A society has been formed in Dublin for the purpose of opposing and frustrating the insidious efforts of Mormonism in that city, by all legitimate means.

The divisions of the army of Paris have received orders to execute military promenades for the purpose of exercising the troops and accustoming them to long marches in heavy campaign order.

On the recent return of the Pope to Rome, the Portico of Raphael and the stairs of the Vatican were lighted with gas for the first time.

Workmen are at present employed at the Louvre in putting up some fine bas-reliefs of white marble, which have come from the temple of Diana at Magnesia (Greece). A frieze, composed of amazons and centaurs fighting, is almost complete. There are also some fragments of capitals and ornaments, which are of fine workmanship.

Letters from Russia state that there has been a complete stoppage within the last five months of nearly all the great potter-factories owing to the difficulty and expense of conveying raw materials by land.

FUTVOYE'S GOLD and SILVER WATCHES of Superior and Foreign Manufacture in Dennison cases, at the lowest prices ever offered, not to exceed the regular sum of a discerning public. 34, Strand, 154, Regent-street, Corner of Jermyn-street.

Strong Silver Tea-pot...	£12 12 0	Strong Silver ditto-pot...	£14 14 0
Ditto Sugar-basin, gilt	7 7 0	Ditto Sugar basin, gilt	8 8 0
Ditto Cream-ewer, gilt	4 14 0	Ditto Cream-ewer, gilt	5 5 0
Ditto Coffee-pot ...	9 9 0	Ditto Coffee-pot...	17 17 0
	£33 15 0		£47 16 0

The Guide to the extensive stock in the Show-rooms contains the weights and descriptions of newer plate of London manufacture, with gilt edges, may be had gratis, or will be forwarded free on receipt of a postage stamp. Warehouse, 9, Cornhill, London, opposite the Bank.

BY HER MAJESTY'S ROYAL LETTERS PATENT Messrs. S. and S. SOLOMONS, Opticians, 29, Cornhill, Corner of Freeman's Court, Opposite the New York Hotel, by valuable and extraordinary improvements in the most perfect and brilliant TABLE GLASSES, DARK, CASE-TRIAL, EAGE-COURSE, and OPERA GLASSES, to know the distance of objects viewed through them of great importance to the Army, Navy, and others; they are placed in Mahogany Cases, Morocco, to assume one pocket such extraordinary power as the same 34 inches, with an extra eyepiece, will read the smallest PRINT at 3 MILES, Distant Objects, and the Double Stars, with an same Telescope can be seen a person's countenance 24 miles distant, and on object from 3 to 10 miles. For the waistcoat pocket, and are of larger, and all vices, with increasing power accordingly. The Royal Exhibition, 1851, Valuable, new, powerful, very small, powerful, waistcoat-pocket glass—the size of a watch—by which a person can be seen at 2 miles distance—size and a half deep. They answer every purpose—on the race-course, at the opera-house, in the field, in the garden, and may be easily seen at 1 to 1 mile. They are invaluable for shooting, deer-stalking, yachting, gentlemen's tourists, gamekeepers, and tourists. Opera, hemp, race-course, and perspective glasses, with wonderful power; and others can be clearly seen from 10 to 20 miles distant. Invaluable constructed spectacle lenses, by the greatest transparent power. The great advantage derived from this invention is, that vision becoming impaired is preserved and strengthened; and very aged persons are enabled to employ their sight at the most minute occupations—can see with them lenses at a much less distance—never use them in the dark—require the frequent changes to the dangerous effects of further powerful assistance.

BEAUNESS, NEW DISCOVERY.—The ORGANIC VIBRATOR, an extraordinary powerful, small, newly-invented remedy for deafness, entirely 4 drums from all others, to surpass anything of the kind that has been or probably ever can be, protected. Being of the same colour as the skin, it is not perceptible; it enables deafness to be heard distinctly in church and at public assemblies; the most distant sounds of singing noises in the ears is entirely removed, and it affords all the assistance that could possibly be desired.—39, Albemarle-street, Piccadilly. Observe, opposite the York Hotel.

CAUTION.—For above thirty years S. MORDAN and CO. have been compelled to caution the Public with reference to the various imitations of their EVER-POINTING PENCIL.

The celebrity which this article obtained when the letters patent were first granted has resulted in numerous unauthorized and inferior imitations of the Patentees have been directed to justify these infringements.

In accordance with judgment of equity, S. MORDAN and CO. have been that numerous imitations have been produced, and the vendors sued, the sale of inferior goods, to realise a larger immediate profit.

If the name of S. MORDAN and CO. is not on the pencil, they decline the satisfaction, and to request the public, when purchasing, to see that the name is engraved on the pencil, to ensure that they are genuine.

At every [illegible] the name as from [illegible] Mordan, and [illegible] Mordan, and [illegible] Mordan, and

NEW BOOKS, &c.

JUVENILE WORKS,

THE ILLUSTRATED LONDON NEWS

No. 711.—VOL. XXV.] SATURDAY, NOVEMBER 11, 1854. [WITH TWO SUPPLEMENTS, 1S.

WHY WE ARE FIGHTING, AND WHAT WE ARE FIGHTING FOR.

MR. BRIGHT, in his recent letter to Mr. Absolom Watkin, of Manchester, affects not to know *why* we are fighting. He also affects not to know *what* we are fighting for. Perhaps we are wrong in believing that Mr. Bright's ignorance is assumed; but, if it be real, the English language wants a word still stronger than stolidity to characterise with sufficient accuracy the deplorable state of his mind. Fortunately, Mr. Bright can do no mischief in England, except to his own reputation; but as his words will, doubtless, be used out of England, by his model hero, the Czar, to misrepresent the state of public opinion in this country, his letter assumes sufficient importance to be worthy of indignant repudiation by every honest and sane Englishman.

If Mr. Bright do not know perfectly well why we are fighting, it may be useful to refresh his memory. We are fighting—

Because the Emperor of Russia is a greedy and rapacious despot, who, being desirous of possessing the whole, or the greater portion of European Turkey, a naval outlet to the Mediterranean, and the command of the whole commerce of the East, maliciously and wantonly picked a quarrel with the Sultan.

Because the Czar, in the prosecution of his design, the hereditary object of his nation and dynasty, took his opinions of the feelings of the great, free, and noble British nation from the speeches of Mr. Bright, Mr. Cobden, Mr. Joseph Sturge, and the "Peace-at-all-price" party. Knowing that these men, and others associated with them, had been powerful enough to force an unwilling Legislature to repeal the Corn-laws, the Czar, imperfectly acquainted with English sentiment and English character, imagined that Mr. Bright and other loud-vaunting orators of the platform, were the exponents of the British mind on the subject of peace and war. He deemed us, on the authority of Mr. Bright and his coadjutors, to be a nation of mean-spirited knaves or slaves; a people devoted to Mammon, looking solely to the shop and to the till, having neither intelligence to understand, nor patriotism to regard, any objects but those of trade; utterly unconcerned with the doings of the Kings and Potentates of the Continent; emasculated by a long peace; enervated by wealth and luxury; self-degraded from our former high position in the foremost ranks of civilised States; a nation of dastardly, pithless, honourless and base men—fat as hogs, sleek as Quakers; as unable as the one to feel a noble sentiment; or, as the other, to imagine that there are in this world many things worse than war, and among them the loss of liberty and of honour. We conscientiously believe that the Czar had this opinion of the British people, and that he drew it from the speeches and writings of Mr. Bright and his friends. He would scarcely have been mad or obstinate enough to have convulsed Europe by his wicked ambition, if he had not been comforted and abetted by this delusion. Mr. Bright says this war is a "terrible crime," and declares "that his hands shall be unstained with the blood which is being shed." We also think it a terrible crime, not upon the British nation, as Mr. Bright does, but upon the head of the Czar, whom he absolves; and we declare that Mr. Bright himself is morally guilty of aiding in the effusion of blood, not only by his present arguments, all of which will tend to make the Czar more obstinate in his resistance—but in having aided, with the leading orators of the Ultra-Peace party, to mislead that wicked man. They encouraged him in his evil courses by their misrepresentations of the state of public feeling, by their hostility to those with whom he was at hostility, and by their shameful avowals of sympathy with his object. Another reason why we are at war is—

Because the King, the Legislature, the statesmen, and the people of Great Britain did not sufficiently understand the aggressive policy of Russia on the occasions of the successive partitions of Poland; *because* they did not resist, as they ought to have done, that nefarious and bloody sacrifice of an independent state; *because* the British nation was quiescent under that glaring wrong; *because* they acted then as Mr. Bright would have us act now; *because* they considered it to be no business of theirs; *because* they thought the scene of warfare was too remote; *because* the Czars, having accomplished that object, were encouraged to persevere in similar aggressions; and *because* his predecessors having remained unchecked, the Emperor Nicholas thought the time had come for the last and final achievement of his ambition—the seizure of Constantinople. To these may be added other reasons:—

Because, at the critical moment when Colonel Rose ordered up the British fleet to Constantinople to support the Sultan's power, the British Ministry had not the sagacity or courage to see the urgent necessity of a display of vigour, which might have nipped the war in the bud;

Because they did not, as they ought to have done, declare the passage of the Pruth to be a *casus belli*; and

Because the Czar, ignorant as he was of the temper and wishes of the British people, was equally ignorant of those of the French, and never calculated as possible, or even probable, an alliance between these two great, wealthy, and high-spirited nations, in defence of the rights of mankind and the liberties of Europe.

If any more reasons were necessary to show *why* we are fighting, and if they would be of the slightest use in bringing to a more patriotic temper so wrong-headed and sturdy a gladiator as Mr. Bright, we could adduce them till they became as "plentiful as blackberries." But it is needless. Mr. Bright is pleased to appear as if he did not know why his countrymen are fighting. But he not only affects this ignorance; he goes farther,

ARCTIC FOXES AND BIRDS, JUST RECEIVED BY THE ZOOLOGICAL SOCIETY.—(SEE NEXT PAGE.)

and misrepresents. He states broadly that we are fighting for the "perpetual maintenance of the most immoral and filthy of all despotisms over one of the fairest portions of the earth." This is simply untrue. We cannot imagine Mr. Bright to be so densely and hopelessly stupid as to believe any such thing. Mr. Bright may say that "the law of nations is not his law," and, in the exercise of his argumentative pugnacity, may repudiate the motives which usually sway the generous minds of the people of the British isles; but, we doubt whether, in his own private life, he would be mean enough to act upon the principles which he promulgates as sufficient for the guidance of his public acts. When an individual is robbed and murdered, we do not seek justifications for the thief and the assassin either in the private life or public character of his victim. If a wayfarer (suppose it to be Mr. Bright or some other Quaker) were to see a man on the ground, with a bandit just about to cut his throat, preparatory to rifling his pockets, would his first impulse be to reason with himself, and to say—"The man is dirty—he has two wives—he is a tyrant at heart—he is heterodox in religion—he is scrofulous, or leprous—let him die! Why should I take his part or rescue him? It is not my business. I am a man of peace, thank God, and an enemy of all violence. Besides, I don't like the sight or smell of blood; it affects my nerves and stomach: let me go my way!" We think neither Mr. Bright nor any other Quaker would be such a coward; but that, like a man and a Christian, he would call for help and grapple with the assassin. Mr. Bright's "law of nations" (if he recognise any law of nations at all) is not founded on such high morality, but is the quintessence of immorality or imbecility. The "law of nations," which the representative of Manchester so glibly repudiates, permits no robbery or murder against an independent State any more than the Decalogue, or the private code of religion and morals, permits highway robbery and assassination. Europe tolerated the abomination once, and forgot the "law of nations," in the case of Poland, and is now paying the heavy penalty for the wrong.

Though Mr. Bright may deny the fact, the Allied Powers, now engaged in the struggle against Russia, are fighting for honour, justice, freedom, and religion. All these are involved in the defence of the Sultan, and not one of them is in the slightest degree compromised by an alliance with him, although the Government of Turkey may be a despotism, and its religion may be anti-Christian. It is not for Turkey, as Turkey, that we have taken up arms; but it is for the cause of right against wrong, and for the general protection of all Europe,—for the weakest of states as well as for the strongest, that we have determined to resist and to punish the aggressor. The struggle was not "recklessly plunged into" by the Government of this nation, as Mr. Bright alleges, but reluctantly commenced—too reluctantly, as the world well knows. The evil-doer had every opportunity to retrace his fallen steps in time. Every facility was afforded him to glide painlessly and quietly out of the dilemma into which he had thrust himself, and patience and courtesy were alike exhausted before the final and sorrowful conviction broke upon the minds of the rulers of Great Britain and France, long after it had broken upon the minds of the people, that there was no resource left but to grapple with and destroy him.

Thank Heaven we are not a nation of Brights and Quakers! If we were, there would speedily be an end of us, and Russia would be free to possess herself, not of Constantinople only, but of Manchester and London.

ARCTIC BIRDS AND FOXES.

A considerable number of valuable Arctic birds, foxes, &c., has just been received by the Zoological Society from the territories of the Hudson's Bay Company; having been brought in two of the Company's ships, the *Prince of Wales* and the *Prince Arthur*. The birds consist of three fine specimens of the American Eagle Owl, five rare white Arctic Grouse, one Ruffed Grouse, and a young White-headed Eagle. The varieties of the foxes are the White Arctic, the Red, and the Silver; one specimen of the latter has recently died. Besides ten Foxes, there are two young Black Bears. The whole have been presented to the Zoological Society by Mr. William George Smith, of the Hudson's Bay House. We have engraved most of these Arctic animals upon the preceding page. The whole have been added to the menagerie of the Zoological Society, in the Regent's-park.

THE ARCTIC SEARCH—CAPTAIN COLLINSON AND HIS CREW.

The public anxiety regarding Captain Collinson and his brave crew, has been set at rest by letters received this week, viâ San Francisco, by which we learn that, on the 21st of August, the *Enterprise* arrived at Fort Clarence in the Arctic Ocean, and that all the crew were then in remarkably good health and condition, considering the protracted hard ships they had endured. Only three deaths had occurred since the vessel left England—William Driver, the ship's cook; William Greenaway, able seaman; and William Cheeseman, private of Marines.

It will be in the recollection of our readers that the *Enterprise* left England in the spring of 1851, more than three years and a half since. Some few weeks since we obtained intelligence of her progress up to 22nd August, 1853. From this it appeared that she had spent the winter of 1852-3 in lat. 71 deg. 35 min. north, and long. 135 deg. 17 min. west; having previously passed through Prince of Wales Strait. It also appeared that she was almost on the track of the *Investigator*, Captain M'Clure, by whom the great problem of the North West Passage was solved. She even proceeded within 90 miles of Winter Harbour; but, being prevented from proceeding on account of the accumulated ice, turned into Wollaston Sound, where she came on traces of Dr. Rae's expedition. The winter of 1852-3 was passed in Cambridge Bay, Wollaston Land, 69 deg. north lat., 117 deg. 35 min. west long.; the following and last winter was spent in Camden Bay, 70 deg. 8 min. north lat., 145 deg. 30 min. west long. From this she was enabled to extricate herself on the 16th of July last; but only arrived at Point Barrow on the 9th, and Fort Clarence on the 21st August. It was intended that, after refitting, she should proceed to Hong-Kong, whence the next tidings of the gallant crew will probably be obtained.

The Band of the Guides.—At half-past nine a.m. on Sunday, the band of the Imperial Guides left Pulkestone, playing "God Save the Queen," amidst the cheers of the inhabitants.

Brigandage in Greece.—A letter from Athens, October 15, says:—"Brigandage is increasing in an alarming degree in Boeotia. Halfway between this city and Thebes. A band of twenty-five robbers lately attacked the inhabitants of a village, and three of the latter and one of the former were killed in the contest. Kyriakos, the robber chief, and some of his followers, on the 2nd instant, carried off in the open day the son of an inhabitant at Lamia, named Sellvanidis, and also the son of the late Lieutenant-Colonel Zoras, and took them to their haunts, where they keep them, demanding a very large ransom for their delivery. On the 8th, a band entered a monastery at a short distance from Athens, and tortured one of the monks who refused to give up the money of the establishment; and, on the following day, another party attacked and robbed a number of travellers."

FOREIGN AND COLONIAL INTELLIGENCE.

FRANCE.

(*From our own Correspondent.*)

PARIS, Thursday.

It is now resolved that the Court will not go to Compiègne. The reason given is that no official receptions shall take place or fêtes be given until the arrival of final and satisfactory news from Sebastopol. It is possible that the Emperor and Empress may go for a few days to Fontainebleau; but, as the idea of their long-talked-of journey to England, on the conclusion of the great affair which occupies all the public mind, seems to be renewed, this even is uncertain. Meantime they abstain from even appearing in public, or from entering into any but private amusements. The feverish excitement respecting the termination of this great event, which seemed a little time since to have somewhat spent itself, decidedly re-appears; the continually prolonged delays, the constant "hope deferred," cannot fail to produce their effects, especially as the frequent recurrence of false rumours keeps the attention of the mass perpetually on the stretch; and, once more, no other subject obtains attention, or excites interest.

Most of the French papers enter, with expressions of the warmest admiration and eulogy, into all the details of the undertaking of Miss Nightingale, and seem particularly struck with the spirit of tolerance and liberality that is so conspicuous a feature in the carrying out of it. That such a truly Christian feeling should pervade the minds of those of the different denominations that form the expedition as to unite them thus, closely together in one great interest, without distinction of creed or opinion, is, indeed, one of the most striking proofs of the march of civilisation and enlightenment, and seems to have made a most marked impression.

It is the intention of the Government, when all uncertainty with regard to the present crisis is over, to give the utmost impulsion to all sorts of fêtes and receptions for the benefit of commerce. Fancy balls will be particularly in vogue: from the Court to the *Ministères* of all the public functionaries, these festivities will be held; and the season is expected to be a most brilliant one. It is supposed, also, that as the direction of the Opera has been taken into the hands of Government, all the principal public officers will be required to take boxes for the season.

We suspect change of air and repose will be found essential for the maintenance of man y official healths this winter.

The cholera, though it has nearly disappeared from Paris, continues to rage in the provinces. The village of Presles is nearly depopulated, and such of the inhabitants as have been able to undertake the journey have come to Paris on pilgrimages to popular shrines.

In spite of the agitation of the public mind, there is a decided movement in the literary world. This movement, entirely of a grave and instructive tendency, is signalised by the announcement of a number of books, the names of some of which we give our readers. M. Guizot, entirely retired from the interests of the moment, is completing his work on the History of England. M. Victor Cousin is engaged on a little volume, entitled "La Philosophie du Peuple;" and Augustin Thierry is publishing in the *Revue des Deux Mondes*, a series of curious studies on the sons and successors of Attila. M. Jules Simon, formerly Member of the Assemblée Constituante, is completing a work named "Sénèque et Néron;" the Abbé Théobald Mitrand is about to bring out a second edition of a most interesting volume, "De la Nature des Sociétés Humaines;" and M. T. A. Mendez has just published "Le Livre de la Mort;" the intention of which is to lead to the abolition of the punishment of death. A book which, for many persons, will have much attraction, also, is the theory of M. Gasparin on the supernatural manifestations of the turning tables. M. Gasparin maintains that these phenomena proceed entirely from the influence of the magnetic fluid of the questioner.

Apropos of the Opera, it appears that Mdlle. Cruvelli has returned to Paris, but whether to her engagement at the Opera or not, is unknown M. Dietsch, whose mission we last week mentioned, has engaged at Strasbourg Mdlle. Poinlly, paying to the director of the Opera there a large sum for the cancelling of her engagement with him.

The Théâtre Française is threatened with an inextricable entanglement of affairs respecting its different engagements. The piece of Madame G. Sand, at the Gymnase, "Fiaminio," an adaptation of her novel, "Teverino" has but a moderate success. The characters are full of interest, but the machinery of the piece is defective, and it wants *ensemble*. The Italian Opera continues its successes. The Théâtre Lyrique is preparing "Robin de Reix," by M. Adolphe Adam; and a new work for the charming Madame Marie Cabel.

BELGIUM.

The King of the Belgians opened the session of the Legislature on Tuesday. In his speech he declared that Belgium rests more value than ever on its neutrality, confirmed by the sympathy and confidence of all Powers.

AMERICA.

The steamer *Europa*, which left Boston on the 25th ult., arrived at Liverpool on Sunday. The chief part of the political intelligence relates to the elections, which are going strongly against President Pierce.

The immigration at New York had been unprecedentedly large. Considerable mortality had occurred among the emigrants ships during the voyage. The *J. A. Gilchrist* had lost one of the crew and 13 passengers; the *Jacob A. Westervelt*, 30 passengers; and the *West Point*, 18 passengers and two seamen. The latter vessel sprung a leak during a gale, and the passengers had to work the pumps.

Similar intelligence to that furnished by Dr. Rae, respecting the melancholy fate of Sir John Franklin, had been received in New York, from Sir George Simpson, and created the greatest sympathy.

It is reported that a commercial treaty is under negotiation between the United States and Santa Fé.

Slight disturbances had occurred at Havannah, arising out of an official funeral given to the body of the individual who captured General Lopez, and who had been assassinated.

We have no further information respecting the loss of the *Arctic*.

The second reading of the Clergy Reserves Secularisation Bill was carried in the Canadian Parliament, on the 26th ult., by a majority of 99 to 15.

Hairbreadth Escapes.—There have been many narrow escapes. A red nightcap used by one artilleryman was taken from the head by a round-shot; but the person of the wearer remained untouched. A cannon-ball passed between the legs of an officer's horse while in the act of galloping; and, on another occasion, the gabion upon which an officer was seated was carried away, and the astonished gentleman suddenly let down, just as a shilling in the hat trick darts from its support into the tumbler beneath. Colonel Dixon and two Engineer officers had a narrow escape on the 20th, in one of the batteries before the town. A shell pitched on the parapet, and hopped down near a gun. It was thought to be a round-shot; but strange to say, Colonel Dixon, the only near-sighted man of the three, called out, "It's a shell: I see the fuse." The words were no sooner said than down went the fine fellows under the wheels of the gun, and up and about went the angry iron pieces seeking for victims; but it sought in vain.

A letter from a Colonel Dixon on board the *Labrador* gives the following account of what caused that vessel to withdraw from the attack on Sebastopol:—"Towards four in the afternoon, as we were looking anxiously forward for a clear opening to see the fortifications better, and to direct our aim more surely, we heard a cry on board of 'Fire! fire!' The fire is close to the powder-magazine! To the pumps!' In fact, a Russian shell of 80 had burst in the Captain's cabin, and had set fire to some ropes which were close to the partition of the powder magazine. At once the spot was cleared out; a vast quantity of water was poured both into the cabin and into the powder-magazine; and God so preserved us, for certainly we should have been blown up, as well as the vessel next us."

THE BOMBARDMENT OF SEBASTOPOL.

The projected assault, which was to have taken place on the 1st or 2nd of this month, appears to have been postponed—at least our accounts from the Crimea, by way of Vienna, to the 2nd, state that up to that date the assault had not taken place. It must be remembered, however, that General Canrobert, in his despatch of the 26th, stated that the 1st or 2nd would be the very earliest period at which it could take place; and as fresh difficulties have shown themselves at every step, we must not wonder if a further delay of twenty-four or forty-eight hours should have taken place. Some surprise has been felt that the besiegers have not hitherto succeeded in getting possession of even one of the enemy's outforts; but it appears to have been decided by the Generals, before commencing the siege, that their plan of operations should be utterly to destroy the defences of the place so as to render it untenable, and force the Russians to evacuate the town without an assault.

The *Fremden Blatt* has a letter of the 27th from Varna, in which it is stated that the storming columns will be under the command of General Canrobert. He says—

The corps which will attack the place consists of 40,000 men. The principal attack will be made from the French lines, and the storming parties will be protected on the left by the guns of the fleet, and on the right by the English batteries. Lord Raglan has the difficult task of protecting the flank and rear of the storming columns. The combined army is divided into two defensive corps under Lord Raglan, and three offensive divisions under General Canrobert. Since the 23rd, the bombardment of Fort Paul, and the batteries before the sailors' suburb, has ceased. The English have occupied the passes and heights on the left bank of the Tchernaya. On this (the eastern) side, the attacks of the Russians become more and more impetuous.

By the *Grénoque*—which arrived at Constantinople on the 27th, from the coast of the Crimea, with the wounded of the fleet—news from before Sebastopol to the morning of the 26th had been received. The siege was going on regularly. The Allies had traced their third parallel at 300 yards of the place, in which they did considerable damage by their incessant fire—which was, it possible, more formidable than on the first days. Accordingly, the approaching arrivals cannot fail to be of very great interest. The besieged were reduced to great extremities, and the troops forming the garrison, weakened every day by the new losses which they did not cease to make, were demoralised by sickness, fatigue, and the want of success. Most of the quarters of the town were in flames, and it was remarked that no attempt was made to extinguish the fires which broke out at every moment. The Allied fleets were, it is said, preparing to return to Sebastopol, where the *Charlemagne* and some other vessels were collected. It was believed that a new attack on the outer forts was reserved for them on the day of the assault. The deserters calculated the number of killed from the commencement of the siege at 6,000, and of wounded at more than double. The French army, on the contrary, was in the most satisfactory condition. The Inspector-General of the Medical Department, Dr. Levy, who had been to Sebastopol to see everything for himself, was almost astonished at the sanitary situation

Private letters, received by the *Ganges*, corroborate the above statements, and add that the sharpshooters of Vincennes had killed nearly all the Russian artillerymen who showed themselves at the embrasures. The shells thrown by the besiegers during the night did not give the Russians time to extinguish the conflagrations caused by the projectiles, or to repair the walls. Sebastopol is becoming a heap of ruins. The Russian squadron had taken refuge behind the houses running along the quay on the south, and new batteries, with red-hot shot, were to fire on the 25th in that direction. Owing to the confusion existing among the Russian troops, a number of Poles issued from the town to take refuge in the lines of the Allied armies. After some shots were fired at them they were recognised, and their officers have been called upon to serve at head-quarters. Lord Raglan refused, on the 24th, to grant the garrison of Sebastopol an armistice of four hours to bury their dead, because he had none to bury. The losses of the Allied armies were becoming every day less and less sensible.

No attempt at a sortie appears to have been made by the Russians up to the 2nd inst.; at least we may safely infer that, if they had done so with any effectual result, Prince Menschikoff would have made noise enough about it; seeing what a wonderful exploit he has founded on the failure of his attempt to spike the guns of a French battery. As regards General Liprandi's Division, one bulletin, of the 27th, very briefly states that the Allies made no attack upon it on that day, while another, also from Odessa, distinctly affirms that "the Allies attacked Liprandi's Division on the 27th, but *the result was unknown*." It is easy to guess what Russian official ignorance means, in a case of that kind; more especially as we have another laconic despatch, viâ Warsaw, which brings the gratifying intelligence that General Liprandi had "*retired* to the head-quarters at Bagtcheserai." All things considered, the news from the Crimea, though imperfect, are highly encouraging.

THE RUSSIAN ATTACK AT BALACLAVA.

The following interesting despatch, from Constantinople, appeared in part of last week's impression:—

FROM LORD STRATFORD DE REDCLIFFE.

Constantinople, Oct. 28, at Midnight.

The captain of an English steam-transport, which left Balaclava the evening of the 26th, confirms, in great part, the information brought this morning by a French ship, and transmitted immediately to London by way of Marseilles. It appears that the Russians attacked the forts in the vicinity of Balaclava on the 25th. Their numbers are supposed to have been about 30,000 men. The attack was unexpected. The Cossacks preceded the infantry. To resist them at first there were Ottoman troops and Scotch. The Turks gave way, and even spiked the guns, which, seized by the Russians, were turned against them. The Scotch, on the contrary, remained firm in their position. Other forces arrived, and the Russians were obliged to yield the ground, remaining, nevertheless, masters of two forts, from which they fired upon our troops. Three regiments of English light cavalry, exposed to the cross fire of the Russian batteries, suffered immensely.

The French took part in the affair with admirable bravery.

On the next day their position was attacked by a body of about 8000 Russians, as well from the side of the town as from that of Balaclava. They repulsed the enemy with great slaughter. Generally, the loss of the Russians must have been very great. It is affirmed that the fire of the batteries of the town had much slackened, and, according to the report of wounded officers, some of whom had arrived at Buyukdere, the belief continued that Sebastopol would be soon in the hands of the Allies. This is nearly what has been gathered from several persons who were eye-witnesses of what took place.

The names of the killed and wounded are reserved for the official occasion. Among the names there is none of a general officer.

(Signed) Stratford de Redcliffe.

GENERAL CANROBERT'S REPORT ON THE SIEGE.

Before Sebastopol, Oct. 22.

M. le Maréchal,—The construction of our approaches is still carried on in the manner indicated in my despatch of the 18th. Time fails me to write to you at great length, but I have the honour to enclose the journal of the siege, which will be found to exhibit the detail of our operations. The difficulties we encounter are of two kinds—those which arise from the nature of the soil, the bed of earth, already insufficient, gradually diminishing in depth as we get nearer, and those which result from the number and calibre of the pieces of artillery which the enemy opposes to us on a front which is nearly in a right line, and of very small extent. In this respect the resources which he draws from his vessels in port are, both in respect of men and material, almost inexhaustible; while ours, although augmented by aids from the two fleets, are necessarily limited: 68-pounders, howitzers throwing 80-pounders, and 12-inch mortars, are almost the only description of artillery to which we have to reply. This state of things renders the siege of Sebastopol one of the most laborious operations which have for a long time been met with, and the exertions which it has obliged us to make will explain the delays to which we submit

In the night of the 20th, the enemy made an attempt at spiking, which failed. A few men who contrived to enter our batteries by a surprise were killed there, with the officer who commanded them. The losses which we have suffered from the fire of the enemy are not by very much so great as might well have been expected, considering the difficulties of the situation just explained.

I send off my wounded in succession, and by every means which the fleet can place at my disposal, to Constantinople, where our hospital preparations are on a most satisfactory scale. The sanitary state of the army is satisfactory: sickness arises, for the most part, from the excessive fatigues which our brave soldiers undergo. The Marine artillerists who have been landed suffer from the same cause; they conduct themselves with a courage and devotion which are remarked by the entire army

FRENCH JOURNAL OF THE SIEGE.

The following is the journal mentioned in General Canrobert's despatch:—

Oct. 17.—At half-past six this morning—the signal having been given—the fire opened simultaneously from all the French and the English batteries—53 pieces on the part of the French (including the four that can be fired from the Genoese fort), and 72 on the part of the English: total, 120 pieces. The place answered them with much vivacity, also from all the batteries that bear on the two attacking parties; their ordnance cannot be estimated at less than 200 pieces. The fleets were not able to manœuvre so early. For three hours the firing was kept up with the same animation on both sides, without any perceptible result; when, at half-past nine, a bomb falling on the French powder-magazine of battery No. 4, burst through it, and blew it up. This explosion disorganised the battery, and killed or wounded fifty men. The firing was nevertheless kept up from the other batteries Three quarters of an hour after, a chess of cartridges exploded in the No. 1 battery, manned by seamen. The General-in-Chief left it to the judgment of the General in command of the artillery to determine when to continue the firing.

At half past ten in the morning, our batteries, against which the enemy's fire was concentrated, being much shaken, from having been reduced to three, to answer the cannon of the place without disadvantage, the General commanding the Artillery gave orders to cease firing. The fire of the enemy's batteries slackened immediately. The fire of the English continued without any marked advantage or the reverse; nevertheless [illegible] from the besieged, though well directed, did not produce [illegible]

About the afternoon an important magazine of the great [illegible] called the Redan, opposite the English, exploded, leaving only three guns capable of being worked

At four o'clock a magazine in the rear of the English exploded. This was the fourth explosion during the day.

At one o'clock in the afternoon the fleet had anchored, with the right of its line near the battery of the Genoese fort, directing its fire upon the Quarantine fort and upon the town. The fire was answered with vigour. The mass of shot thrown by the vessels occasioned great damage. The whole theatre of action, however, was so enveloped in smoke, that it was impossible to estimate the results of the fire.

At night the fire ceased on all sides, and silence reigned. The vessels returned to their anchorage without having experienced any particular damage, in spite of the persevering attacks of the enemy.

The loss we have suffered in these attacks consists in twelve guns disabled and two partially damaged. The embrasures and coffers of the batteries have also been here and there knocked down, and the ditches have been filled up in places.

About four o'clock in the afternoon the Russians sent out detachments to discover whether the batteries were abandoned. These detachments returned again.

During the day nothing remarkable took place on the part of the corps of observation.

Oct. 18.—The night of the 17th and 18th passed over tranquilly. There was no fire from the enemy's works. Great exertions were made to repair the embrasures, strengthen the coffers, and make the batteries again ready for action. This work was continued during the day in spite of an active fire from the enemy, which, however, did no damage. The batteries 1, 2, 3, 4, 7, and 8, were fit for service on the morning of the 19th. The engineers, towards the end of the day, advanced their works towards the right parallel, opposite the bastion called the Mât. The armament of the batteries was completed upon a new basis, in the following order, including a battery (No. 9) to be set up on the right:—

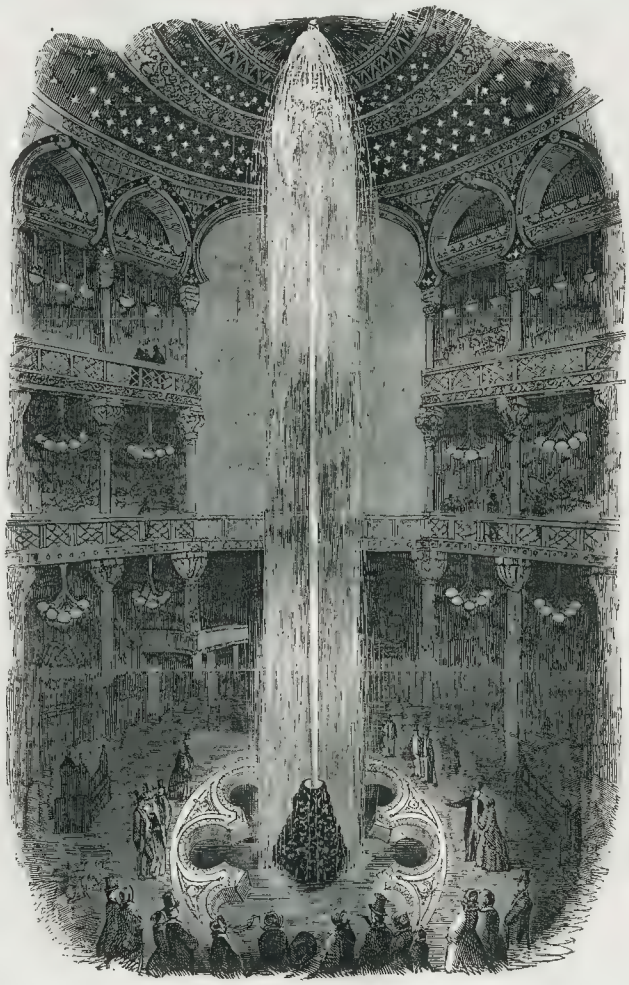
Batteries No. 1, 2, 3, 4	.. ..	Kept up.
Battery No. 5	.. ..	Suppressed.
Battery No. 6	.. ..	Kept up.
Battery No. 7	.. ..	10 24-pounders. 4 16-pounders.
Battery No 8	.. ..	2 mortars of .. c. 4 mortars of 22 c.
Battery No. 9	.. ..	4 Turkish mortars, 27 c. 3 Turkish mortars, 23 c.

The arrival of the last battalion of the 1st Regiment of the Foreign Legion completed the Fifth Division (Brailliard), which was landed on the previous days, and which consists of the following troops:—First Brigade—General De la Motte-Rouge—21st of the line, 42nd of the line. Second Brigade, General Constantin—9th Light Infantry, 46th of the line. Third Brigade, General Bazaine—2nd Regiment of the Foreign Legion, 2nd Regiment of the Foreign Legion. This division forms part of the besieging corps. It is encamped in the second line behind the trenches, and thus very conveniently placed, in the First Division, on the 17th of October, stationed itself on two lines to the right of the cavalry and general head-quarters, in a position half way between the corps of observation and the besieging corps. The English artillery continued its fire with changes that appeared favourable.

Oct. 19.—During the night between the 18th and 19th [illegible] were not disturbed. About half-past ten, however, an alert seems to have taken place in Sebastopol. Shouts were heard, followed by a sharp [illegible] fire, and [illegible] lively fusillade accompanied by [illegible]

THE LUMINOUS FOUNTAIN AT THE PANOPTICON.

THOUSANDS of sight-seers have already seen the magnificent Fountain at the Royal Panopticon, with its central jet leaping from an ensmelled base to a height of ninety-nine feet. The sight of this extraordinary column of water subjected to a powerful light, so as to exhibit a variety of the most brilliant hues, will surprise the spectator who may have become familiar with the ordinary aspect of the fountain, by day, or under the influence of the many lights disposed about the building at night. A strongly concentrated and reflected light at each end of the jet illuminates the whole length, effectually colouring, as well as making brilliant the up-springing shaft, with the detached particles which descend like a shower of many-tinted gems, into the inlaid basin. The indescribably beautiful effect of this illumination is most perfectly realised by the spectator, who takes his stand on the basement-floor of the building, a little removed from the edge of the basin; say within a foot or two of the projection formed by the galleries. The times for exhibiting the fountain, under the luminous aspect, are a quarter before five o'clock, at the morning entertainment; and a quarter to eight in the evening.



THE LUMINOUS FOUNTAIN, AT THE PANOPTICON, LEICESTER-SQUARE.

PAINTED TOMB DISCOVERED AT PÆSTUM.

(From our Naples Correspondent.)

WHEN we consider the antiquity of the Temples of Pæstum, and their wonderful preservation, they become the most interesting architectural monuments which time has left us. Gloomy, majestic, solitary—these huge temples are still standing on the deserted sea-shore of Magna Græcia; having escaped earthquakes, wars, and the desolating accidents of nearly three thousand years. Pæstum was one of the earliest of the Greek colonies, and a city of considerable importance, when it was known by the name of Posidonia. One historical fact alone shows the antiquity of this city:—Mention is made by Herodotus of a colony having been *planted* by the Posidonians 540 A.C.! Pæstum shared the fate of the other Achæan colonies: it had to contend with the barbarian Lucani, with the arms of Rome, the desolation of the Saracens, and the consequent mutations of war and conquest.

It is remarkable that Pæstum has only attracted the attention of the moderns within the last hundred years. Very little has been done by way of excavation. The walls of the city, however, are already traced; also the western gate, the amphitheatre, and the necropolis. By far the most remarkable and interesting Tomb yet known was discovered this year by Signor Bellelli, a landowner of the district; whereupon the Neapolitan Government sent Signor Abbate—the artist who painted the Pompeii Court of the Crystal Palace) to make a report and drawings of this Tomb.

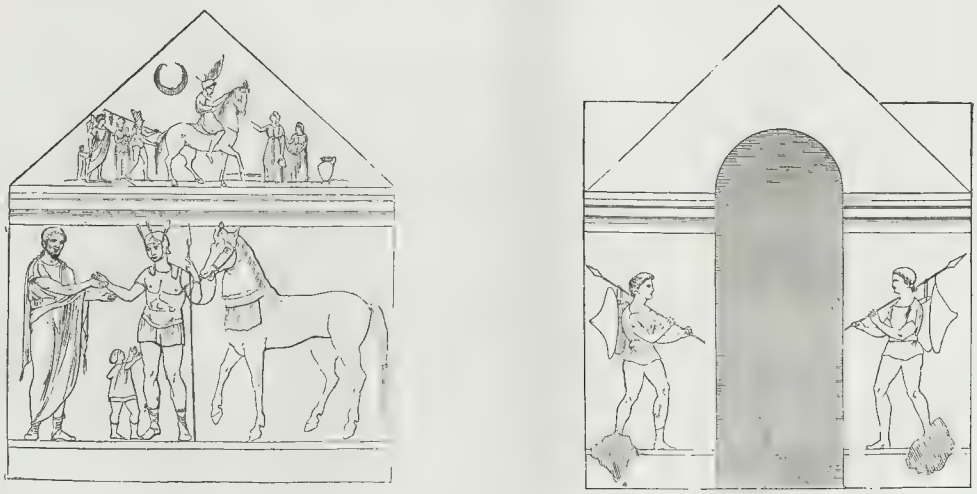
Signor Abbate found a tufa building, 10 palms by 7½. Illuminated with frescoes, remarkably perfect, and displaying, probably, the earliest examples of Greek drawing yet brought to light. The accompanying Illustrations are exact copies of the originals, from the large tracings made by Signor Abbate for the Neapolitan Royal Archæological Society. Professor Quarantu has read a brief paper on these interesting frescoes. He has no doubt taken a correct view. They are examples of primitive Greek art; which, although somewhat rude, yet contain evidence of that refinement and peculiar treatment of nature which immortalised the people who created such a noble school of art. The colouring of these frescoes is remarkably simple. The flesh is of a uniform dead red colour, the outline-shading, so to speak, being of a darker tint. The draperies are white; the armour, uniform yellow; and the horses, of light brown. No attempt at mixed colours occurs and the general effect of the frescoes is such as we see on Etruscan vases.

The artist has evidently represented the adventures of a warrior, whose body no doubt rested in this tomb, as some fragments of armour were found there, but nothing else. The smaller Drawing of the roof represents the hero leaving his family, on horseback. Behind him are the members of his family; before, are priestesses offering libations.* On the side walls the warrior's triumphs are depicted; and in the centre he is seen receiving the congratulations of a Consul, or some civil authority; whilst a child (may be, his son) also welcomes his return. The two youthful figures (probably shield-bearers) occur at the entrance wall of the tomb. The drawings by Signor Abbate are so admirably true, that I need not add any further description of these singularly interesting frescoes, which indicate the dawn of Greek art.

* I am unable to account for the yellow crescent which occurs in this drawing. Can it be the moon, indicating the period of departure?

BISON HUNTING AT TAYMOUTH CASTLE.—A hunt of an extraordinary character took place at Taymouth Castle on the 25th ult. On the previous day the Duke of Leeds arrived at the Castle; and next morning his Grace, accompanied by the Marquis of Breadalbane; Lord Panmure, Hon. C. B. Phipps, Keeper of the Privy Purse; Sir J. Pringle, Bart.; Sir A. Campbell, Bart.; Major Baillie; Mr. Menzies, of Chesthill; and Mr. H. Aitken, proceeded to enjoy the sport of hunting bi-ons, of which wild natives of the North American prairies there are several fine specimens at the castle. The sport went on with great spirit and excitement, and a bison was brought down at the first shot, promptly secured, and carted off the ground.

KIRKSTALL ABBEY.—Kirkstall Abbey, one of the finest ruins in the country, situated about three miles from Leeds, had a narrow escape from destruction by fire on Sunday morning. The most dilapidated part of the abbey is covered with ivy. The foliage becoming ignited, the flames spread to the height of the edifice. The utmost efforts were made to convey the news to Leeds, and by the prompt arrival of the Sun fire-engine, and a plentiful supply of water from the Aire, which runs within a few yards of the ruins, the flames were subdued without doing any great amount of damage; though it is evident that a short delay would have been attended with very disastrous consequences. How the fire originated is left to conjecture; one story is, that it arose from some boys throwing lighted squibs into the ivy; another, that it was caused by the ashes of a cigar, or a fusee.



PAINTING RECENTLY DISCOVERED UPON A TOMB AT PÆSTUM.

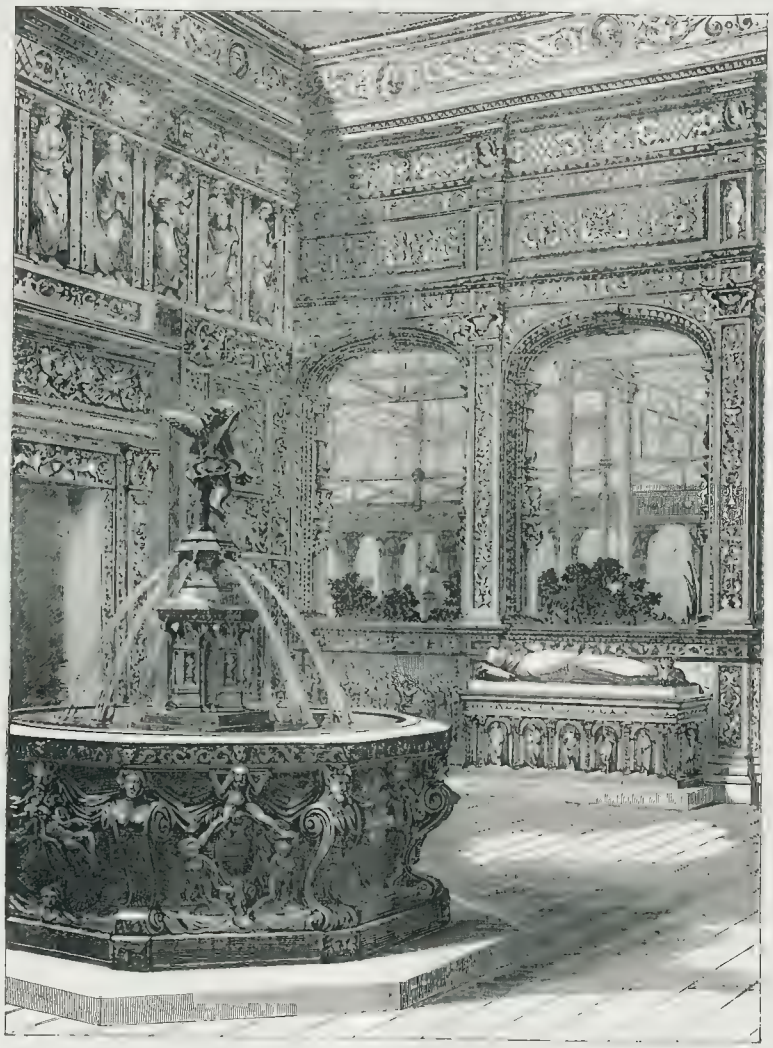
THE RENAISSANCE COURT, AT THE CRYSTAL PALACE.

In the General Remarks prefixed to the "Handbook to the Renaissance Court," by Mr. Digby Wyatt and Mr. Wornum, are a few well timed details of the origin of this school of art, "holding a distinct and proud position, between the decay of Gothic and the complete adoption of Antique art;" to which the name of "Renaissance," or Revival, has been given, and with justice, for its leading sentiments were the Antique. Still, the "Renaissance" implies not the revival of Antique art only, but the return to that great school which nature ever keeps open to us. Thus, "the love of nature, with the first great Renaissance artists, became a passion, and was the basis of their style. It is this which gives such a wonderful charm to the works of that illustrious triad, Ghiberti, Donatello, and Luca della Robbia — who, imbued with the true spirit of the Antique and an unusual sense of the beautiful, ennobled all, even the commonest subjects, which came from their hands." To the Renaissance artists of the fifteenth century are we indebted for the universal application of these two principles; although it is possible to trace step by step the gradations which led from the early Renaissance style to that adopted by the Italian artists of the sixteenth century. "A remarkable feature in the Renaissance artists was their combination of the talents of sculptor and architect, executant and designer; from which cause figures, foliage, and conventional ornaments were so happily blended with mouldings and other structural forms, as to convey the idea that the whole sprang to life in one perfect form in the mind of the artist."

Of late years the Renaissance style has been the subject of special labure; its reproduction of ancient forms failing to satisfy the Classical purist on the one hand, and on the other, its luxuriance causing it to be inapplicable to the higher purposes of art. The refinement shown in its execution cannot, however, be disputed; and the opening of the Crystal Palace may truly be said to afford, for the first time in this country, an opportunity for the study of the Renaissance styles of the Continent—hitherto known but to the few, since their monuments were accessible to the traveller only, and had been very poorly illustrated; whilst that style which prevailed in England from the decline of the Gothic to the adoption of Italian architecture, bears but a remote resemblance to them.

A careful inspection of the mouments and sculpture of this Court will, we are persuaded, lead to the just appreciation of the several gradations of the Renaissance. Among the examples are doors from Florence, statues from Venice, a painted ceiling from Perugia, an altar from the Certosa, and fountains from Nuremberg, brought together with conscious taste. The wall is covered with stained casts of old carvings of satyrs, cornucopias, Cupids holding tablets, birds pecking at fruit, ribbon-suspended medallions, and Graces, overgrown with foliage; in which the gilding shines between the elaborate richness of coloured tracery.

Mr. Delamotte, by aid of photography, has drawn for our Engraver a portion of the elaborate beauty of this Court—its graceful design, delicacy of execution, and chastened fancy. Part of the Arcade, and one of the enriched door-ways, are shown. The principal object upon the floor is one of the bronze wells from the courtyard of the Ducal Palace at Venice—an excellent specimen of the perfection at which bronze casting had arrived in the sixteenth century, and the style of ornamentation then prevalent. This well is the work, says Cicognara, of a certain "Nicholas confiator tormentorum," or military engine maker to the Illustrious Republic: and has a Latin motto of "Franco Ven.ero dux XXX. in princi. anno ii. 1536." In the upper small ovals are portraits of the Doges, and emblems of St. Mark. The large central panels contain subjects from the Holy Scriptures. In the small ovals beneath are river gods, &c.

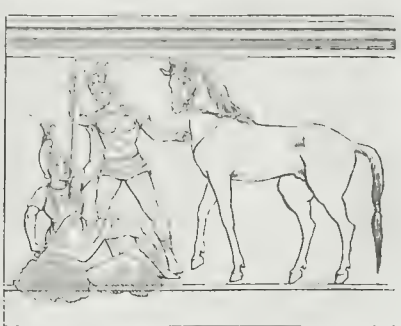


THE RENAISSANCE COURT, AT THE CRYSTAL PALACE, SYDENHAM.

This massive well, which has been arranged as a fountain basin, is surmounted by the statue of a bronze Cupid with a dolphin taken from the court yard of the Palazzo Vecchio, at Florence. It was executed by Andrea del Verrocchio, the celebrated Florentine artist: it is a work of great merit. Andrea was a pupil of Donatello; and on the death of that great master, and of Ghiberti, was considered the best sculptor and bronze worker in Florence (circa 1468).

Here we see a portion of the plinth of the Arcade, with the Granada bas-reliefs, and pilasters from the tomb of Louis XII. The other object upon the floor is the recumbent statue of Roberta Legendre, wife of Louis de Puncher, now preserved in the Louvre; and attributed by Lacaire to Jean Juste, of Tours, the same who executed the tomb of Henry II. The original statue is executed in a rough sandstone. It is remarkable for the breadth and well-arranged folds of the drapery, and in the face and hands, for great truth to nature. It rests upon an altar frontal from the Certosa, at Pavia. In the central niche is a statue of Christ: the two extreme figures are St. John the Baptist and Mary Magdalen; the remaining two represent St. Peter and St. Paul. The proportions and execution of this composition are very good, and its style reminds one of some of the earlier Florentine masters.

AMERICAN ARTISTS AND POETS IN FLORENCE.—Power is just finishing a beautiful statue of "Il Penseroso." His "America," already in marble, is one of the finest statues of modern days. Rogers has just left for America, on a short visit. Ives and Mozier have been spending the summer here. Buchanan Read is still embarrassed between pen and pencil, getting all the commissions he could execute in the way of pictures; but faithful, notwithstanding, to the Muse. His new poem is called "The New Pastoral," and is about the length of "Thomson's Seasons;" and is intended to give a poetic history of American rural life. The scene opens among the luxuriant farms of Pennsylvania, where Read spent his childhood. He probably portrays here the inspiration which all genius takes from its early surroundings. About the time that the reader feels so charmed and contented with these scenes, and willing to sit down and pass his life here, suddenly breaks out the "backwoods fever," which soon grown so infectious that few are able to withstand it. Then comes the breaking up—the sundering of all ties and associations—and presently the long line of waggons leads to the West. Then come the vicissitudes of the journey—crossing the mountains, flat-boating down the Ohio, &c., and at last, the burst into the primeval woods. Then the battle with the wild forest and frontier life. And, while the great progress goes on, success crowning heroic toil, still there are a few not equal to the task. These gear up their little teams and find their way back—too often the sad sequel of many a western adventurer's experience. The story is told with great simplicity and directness, and I think it is a work destined to make a lasting impression. Read seems to have a conscious faith in himself as a born poet, and I am inclined to think his instinct is to be trusted.—*Letter from Florence in N. Y. World's Home Journal.*



PAINTING RECENTLY DISCOVERED UPON A TOMB AT PAESTUM.

A LARGE VIEW OF SEBASTOPOL

WILL APPEAR NEXT WEEK.

FROM A SKETCH BY JOSEPH A. CROWE, Esq.

NOW WITNESSING THE SIEGE.

TOGETHER WITH OTHER ENGRAVINGS OF GREAT INTEREST.

CALENDAR FOR THE WEEK.

SUNDAY, Nov. 12.—2nd Sunday after Trinity. Leibnitz died, 1716.
MONDAY, 13.—St. Brittius. Curran died, 1817.
TUESDAY, 14.—Source of the Nile discovered by Bruce, 1770.
WEDNESDAY, 15. Westminster Bridge completed, 1750.
THURSDAY, 16.—Trial of Sir Walter Raleigh, 1604.
FRIDAY, 17.—Accession of Q. Elizabeth, 1558. Lotteries abolished, 1826.
SATURDAY, 18.—Cardinal Wolsey died, 1530.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, NOVEMBER 11, 1854.

At length the public is in possession of ample Official Intelligence from Balaclava and Sebastopol. The military and naval commanders of the British and French forces, have told their respective Governments the history of their doings. The siege of Sebastopol began on the 17th of October, and Lord Raglan and General Canrobert have succinctly narrated its progress from that day to the 23rd. Admirals Dundas and Hamelin have also told what part was taken by the Allied fleets in the attack upon the seaward fortifications. Our own Special Correspondent at Balaclava, to whose interesting letters we direct the attention of our readers, supplies details of a fulness and variety that are not to be expected in the official narratives of men in command. Up to the hour at which we are compelled to go to press, the latest official news dates to the 23rd inst. Should further intelligence reach London before our whole impression is worked off, we shall communicate it in successive editions. In the mean time the Electric Telegraph brings information to the 2nd of November, partly from Russian, and partly from other sources; and which seems to bear the stamp of authenticity. The Russian Generals have at last begun to tell the truth, and while no disadvantage to their arms has resulted, or can result, from that salutary novelty, they have raised themselves in the estimation of their foes by their plain dealing. Truth and courage always go together; and if the Russians, as we sincerely trust, are to be signally defeated by our arms, they will fall with dignity, and with the sincere respect of their opponents; which would not have been the case, had Menschikoff and Osten-Sacken continued to vie with each other in the falsehood of their bulletins.

Although the lying tale of the fabulous "Tartar," which immediately followed the authentic news of the victory of the Alma, had an injurious effect upon the public mind, both in this country and in France, by leading it to hope for sudden and complete success; and, although a feeling of impatience, if not of actual discouragement and gloomy foreboding, has taken the place of the undue exultation which formerly prevailed, there can be no doubt from the official despatches of Lord Raglan and General Canrobert, supported, as they are, by every letter, public or private, which leaves Balaclava, that the siege has been brilliantly and ably conducted; and that quite as much success as could reasonably have been anticipated has attended the efforts of the besiegers. Up to the 23rd, as we may see from the simple and straightforward story told by Lord Raglan, all the measures of the Allies were as well directed as they could possibly be; so well, that not a shadow of a doubt of the ultimate capture of the place remained in the mind of any soldier in either army. With the merciful intention of achieving the great object at the least possible sacrifice of human life to the Allies, the British and French commanders determined to besiege the city in the usual way; and although there are not wanting critics in this country who are of opinion that it would have been wiser to have attempted to carry it by assault, there is no evidence to show that the Generals were not perfectly right in coming to a different conclusion. The presumption should be, that responsible, qualified, and experienced men—acting from the fullest knowledge gathered upon the spot—are better able to form opinions and execute decisions than critics at a distance; and it is to be hoped that our gallant chiefs treat the remarks to which their acts are subjected by unreasoning, if not unreasonable *gobemouches*, in clubs, or elsewhere, with the indifference they merit. However this may be, it should be borne in mind that an assault immediately after the victory of the Alma—supposing such an effort were not physically impossible—might not have succeeded; whereas the operations of the first seven days of the siege succeeded to the full extent that was anticipated. Such a place as Sebastopol—defended as it is by a determined courage, such as the Russians have shown; and supported by such abundance of material; both of men and guns—is not to be taken so easily as civilians suppose. The Russians have shown themselves to be no contemptible opponents. The British and French armies, while they justly execrate the name of the man whose guilty ambition ordered all these legions to the war, will for the future look upon the Russsians as brave men, acting like themselves at the call of imperative duty. The glory of those who conquer the truly brave, is greater than the glory of those who gain easy victories over cowards; and it is but justice to the Russians to admit their heroism, and to wish that it was exerted in a better cause.

Although we have as yet no official accounts of the attack made upon the Allied camp on the 25th, by the Russian General Liprandi, and repeated on the following day by a smaller force, there are accounts of both affairs that may be depended upon for their general accuracy. These accounts, while they agree in the main fact with the statement forwarded to St. Petersburg by Prince Menschikoff, show that the losses of the British cavalry were greatly exaggerated, and that the Russian attack was, on both occasions, successfully repulsed. The object of Prince Menschikoff, after being joined by General Liprandi, was worthy of a skilful commander; and, if he had succeeded, he would have turned the right of the Allied armies, and offered them battle, not at Sebastopol, but at Balaclava. In this case, the fortunes of the war might have been wholly changed. The English and French might have been transformed from besiegers into besieged; and exposed to the fires of the garrison of Sebastopol from the North, as well as to the onslaughts of the victorious division of Liprandi from the South. On the 25th, when this able manœuvre was attempted, and when our Turkish allies failed us in the moment of peril, and fled precipitately before the overwhelming onslaught of the Russians, the Light Cavalry, under Lord Cardigan, the gallant Highlanders, and other corps of infantry, turned the fortunes of the day. The French General Bosquet also came up in the very "nick of time." The Russians were compelled to act on the defensive, and, finally, to abandon the field of battle, retaining possession, however, of the batteries which they had taken from the undisciplined Turks. The Turks are evidently the weakest arm of the Allied service, and appear, from all accounts, to be wretchedly fed, as well as imperfectly drilled. On the following day, we are informed that a second but feebler attempt was made, which was repulsed in gallant style by Lieutenant-General Sir De Lacy Evans, with a loss to the Russians of nearly a thousand, and to the British of not a dozen men. Perhaps, in this case, the loss of the Russians has been exaggerated. If not, that of the British would seem to be understated. But, whatever the respective numbers may be, the British were victorious. In the previous battle of the 25th, though our cavalry suffered severely, the loss was not 600, as stated by Prince Menschikoff, but 124 men. The total loss of the Allies, inclusive of the French and Turks, was 400 men. These, however small they may look in comparison with the grander exploit of the capture or destruction of Sebastopol, are, in reality, great victories, and will be so considered, we should think, by Prince Menschikoff and General Liprandi.

Upon the whole, we cannot see what grounds there are for discouragement. Those who on one occasion raise their expectations too high, are the very same who on another give way to despondency. They are too impulsive to be reasonable. They expect an impossibility; and when it cannot be obtained, they sit down, and predict the end of the world, and "chaos come again." But people in general are not so impracticable. It is true that the Allies may be defeated at Sebastopol, for the Russians are strong and numerous, as well as desperate; but it is equally true that they may not. Nothing that has yet occurred tends to favour the gloomy view of the subject; but everything—from the disembarkation in Kalamita Bay to the march to Balaclava—from the landing of the first gun to the discharge of the first shot, and from the close of the first night of the siege to the day to which the last accounts have brought us intelligence—shows the steady progress of the Allies, and favours the hope that victory will, are long, reward their efforts. It is too much to expect that such a place should fall within the first fortnight after it was attacked. The armies, we think, will work wonders if they take it within the month.

THE old and puzzling question "What is to be done with the thieves of England?" is continually thrusting itself upon attention. Not even the war, and the throes and convulsions of Europe can utterly efface it from consideration. The British nation has never adopted any means for preventing the growth of crime, by taking care of the infancy and childhood of the utterly destitute classes. Not until they commit offences against the laws by which Society is held together, does Society trouble itself about them; and then it commences a fierce war—a war which never ends, and which never produces the least satisfaction or the least glory to any one concerned in it. Hanging was the mode in which our forefathers endeavoured to rid themselves of the evil; but hanging for sheep-stealing, shop-lifting, pocket-picking, highway-robbery, and burglary, not being in accordance with the feelings of the people, was superseded by the milder punishment of transportation. In this case if we did no good, we saved ourselves trouble, and threw the burden and the disgrace upon distant communities. But our Colonies revolted against being made the cesspools of our moral filth; and told us, in unmistakeable terms, that if we did not choose to lose our Colonies, we must devise means to keep our criminals at home. So the nation, acting under sage advice, determined on trying what could be done in huge palatial prisons and Reformatories. It soon found that, instead of preventing, or punishing, it was encouraging crime;—that in fact, it was feeding the interesting burglar on better fare, and clothing him with better apparel, than fell to the lot of the honest and industrious labourer. Of course such a system was not to be tolerated by any people of common sense. What was to be done next? was the earnest inquiry of philanthropists and magistrates. For awhile there was no reply, nor hope of any. At last, what is called the "Ticket-of-Leave system" was adopted, with the expectation that it would operate as a means of reclaiming the criminal after he had undergone a modicum of probationary punishment. But this system has proved to be no better than its predecessors. One case that was brought a few days ago under the cognizance of the Magistrates of Middlesex will illustrate, among hundreds of others that might be cited, the mistake made by the well-meaning men who imagined it could work satisfactorily. A man was charged and found guilty, at the Middlesex Sessions, of stealing seventeen feet of leaden pipe and a metal tap. On inquiry into his previous career, it was found that five years and a half ago—in April, 1849—he was convicted of felony, and sentenced to three months' imprisonment. Shortly after the expiration of his sentence he re-appeared at the bar of the Central Criminal Court, on another charge of felony, and was sentenced to seven years' transportation. After a short detention, during which his behaviour was exemplary, he was discharged with a "Ticket of Leave," that he might, if he could, procure honest employment. But how could he do so? He was under the surveillance of the police (Englishmen, whether thieves or honest men, have a hatred both of the word and of the thing), and no one would give him the chance of a day's work. The honest labourer finds it difficult enough to support himself; and it can hardly be expected that a convicted thief, however penitent he may have appeared in gaol, will have less difficulty. With starvation on the one side, and a return to felony on the other, as his only possible alternatives, he took what may be considered even by stern Justice as the natural course, and stole. He again appeared at the bar, and was sentenced to six months' imprisonment, which, it is to be supposed, he underwent, with the comforting knowledge that, at all events, he would not starve during the interval. At the end of that period he was again let loose upon society, and duly appeared before Mr. Witham and the Middlesex justices, and received a sentence of six years' penal servitude. Scores of cases, differing from the foregoing only in the details, and not in the general and invariable result, occur every month, and force the attention of all who are concerned in the administration of the law to the total inadequacy of the new system to serve any useful purpose. If there be even the germ of good in the issue of "Tickets-of-Leave," the Legislature has taken the pains to nullify it, by prohibiting those who, after punishment, are considered penitent, and entitled to "tickets," from removing themselves out of the jurisdiction of the police, by emigrating to the Colonies. It ought, we think, to have struck the framers of the law, that if a really penitent and reformed man had any chance whatever, it would be in a new land, where his previous history was unknown, and where he might offer himself for employment without other recommendation than his strong hand and his willing heart; and that to shut him peremptorily from such a field for beginning life anew, was to shut him out of hope. The results show, in the clearest manner, that in over-crowded England, where good character is essential to success, even in the humblest walks of life—the "Ticket of-Leave" man—unless he is thrice as fortunate as the great majority of the labouring classes—must starve or steal. Penitence, after a sufficient dinner to-day, and the certainty of a dinner to-morrow, may possibly hold its place in the heart of a man undergoing imprisonment for a felony; but when penitence and the cravings of a hunger that there are no honest means of satiating, begin their struggle in his head and stomach, penitence gives way to desperation, and all the teachings of the goal chaplain, and all the good resolves of awakened conscience are scattered to the winds. But, instead of relying upon efforts to reform the juvenile or the adult thief, would it not be well if Society—abandoning the Ticket-of-Leave system, or reforming it so as to open the Colonies to the truly penitent—were to begin a little nearer to the beginning, and try to stop crime of its supplies, by locking more carefully after the infants of the criminal and destitute classes? Until that be done, there is little hope of any real benefit.

ARMY AND NAVY SURGEONS.—The following notice has just been issued by the Royal College of Surgeons:—"Nov. 3, 1854.—The Court of Examiners having taken into their consideration certain applications from students in various recognised hospitals, requesting examination before the completion of their third session of hospital and anatomical study, in April, 1855—on the ground of being offered commissions as Assistant Surgeons in the Public Service, provided they can obtain the qualification ordained by the warrant of her Majesty of the 6th October 1854 will admit to examination for the diploma of the College all such students of a proper age, at the end of the month of December next, on their presenting a certificate or letter from the head of the Public Department proposing to employ them, signify [illegible] when they have been proved competent.—EDMUND BELFOUR, Secretary."

LATEST INTELLIGENCE.

THE PROPOSED ASSAULT.

It is said that at the council of war held by the commanders and admirals of the Allies on the 27th October, it was resolved that the Allied fleets should not be allowed again to participate in the bombardment of Sebastopol from the sea side, it having been found that the ships are thereby exposed to severe injury, without being able to render a proportionally effective service. At the special recommendation of Admiral Dundas, the batteries No. 1 and 2, erected near the sea-coast, have been entirely manned by the marine artillery, whose services are beyond all praise. The gallant Admiral has now proposed to furnish several other batter es with naval gunnery, to be worked by marines and sailors from the ships—an idea which has been approved of and adopted. The storming columns are to be formed by volunteers from the *élite* troops. All the reinforcements of the Allies, which still arrive in the Crimea, are to be concentrated at the head-quarters of Lord Raglan, the Commander-in-Chief.

THE AFFAIR AT BALACLAVA.

The *Moniteur* of yesterday (Friday) morning publishes the following despatch from General Canrobert, dated Head-quarters, Sebastopol, Oct. 28 :—

The siege operations continue. On the 25th the Russian army showed itself in the plain of Balaclava. No serious engagement took place; but the English cavalry suffered some loss in a charge too vigorously pushed. On the following day 5000 men made a sortie from Sebastopol, and attacked the English left. The attack was repulsed, and the enemy driven back within the place with considerable loss.

The *Journal de St. Petersbourg* of the 2nd contains Prince Menschikoff's report of the affair at Balaclava. After describing the capture of four redoubts and eleven guns from the Turks by General Liprandi's force, it proceeds to say :—

The English cavalry, commanded by Lord Cardigan, now came up, and charged with extraordinary impetuosity the Hessar Brigade of the 6th Cavalry Division; but, taken in flank by four squadrons of the combined regiment of Lancers of the reserve, and thrown back on the cross fire of the guns of the 12th and 16th Infantry Divisions, which fired grape, the enemy suffered considerable loss.

At the same moment that it attacked our Hussars, the English cavalry also charged at full gallop the heavy guns of the Don battery, No. 3, where some artillery men were stunned.

Our loss in infantry does not exceed 200 killed and wounded. The loss of the cavalry and artillery is not yet known, even by approximation.

The loss of the enemy is not known, but we have taken about sixty English prisoners; among whom are one superior officer and two subalterns.

Of the four redoubts taken from the enemy, two will be immediately destroyed, and two more strongly fortified, in order to enable us to hold this important position, from which we can act on the village of Kadikoi, through which the road passes, which leads from Balaclava to the enemy's camp.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS,
TAKEN DURING THE WEEK ENDING THURSDAY, NOVEMBER 9.

Month and Day.	Corrected Reading of Barometer at 9 A.M.	Thermometer. Highest Reading.	Lowest Reading.	Mean Temperature of the Day	Departure of Temperature from the Average.	Degree of Humidity.	Direction of Wind.	Rain in Inches.

„ 9	30.165	45.0	34.4	38.0	— 6.6	89	N.	0.00

Note.—The sign — denotes below the average, and the sign + above the average.

The reading of the barometer decreased from 30.22 inches at the beginning of the week, to 29.89 inches by the 5th; increased to 30.30 inches by the 7th; decreased to 30.16 inches by the 8th; and increased to 30.30 inches by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 30.210 inches.

The mean temperature of the week was 42·6°; being 1·6° below the average of the corresponding week during 38 years.

The range of temperature during the week was 25·2°, being the difference between the highest reading of the thermometer on the 5th, and the lowest on the 7th.

The mean daily range of temperature during the week was 15·2°. The greatest was 19·8° on the 7th; and the least 10·4° on the 9th.

The weather, on the 3rd, 6th, 7th, and 9th was fine, and the sky tolerably free from cloud. During the rest of the week the sky was almost wholly overcast.

Fog was prevalent during the 4th; and slight rain fell on the evening of the 8th.

Lewisham, November 10, 1854. JAMES GLAISHER.

HEALTH OF LONDON.—During the week ending November 4, the births of 1276 children were registered within the metropolitan districts; being 134 above the average of the nine corresponding weeks of the nine preceding years: of these, 814 were boys, and 761 were girls, exceeding their averages by 97 and 54 respectively. The number of deaths during the week were 1262; the average of the ten corresponding weeks of the ten preceding years, corrected for increase of population, being 1021. Hence it appears that 171 deaths occurred above what the calculated rate of mortality would produce. Cholera exhibits a continued decrease, the deaths, which, in the four weeks of October were 411, 240, 163, and 86, declined this week to 31; and were distributed as follows :—under the age of fifteen years, 16 between fifteen and sixty; and 6 above the age of sixty years. The number of fatal cases from diarrhœa was 33; the numbers in the three preceding weeks being 109, 73, and 46 respectively. Scarlatina still continues above the average, the number of deaths this week being 113, and the average 58. To tubercular diseases 195 cases are referred; of these 144 are due to consumption, the average being 130. To diseases of the brain, nerves, and senses, 130; being 22 above the average. To diseases of the heart and blood vessels, 45; to diseases of the lungs and other organs of respiration, 217 (62 above the average); to violence, privation, cold, and intemperance, 30 deaths are attributed.

ARTISTS' AMICABLE FUND.—At the annual meeting of the above society, on the 3rd inst., Mr. Gilks, the wood-engraver, was elected president for the year ensuing.

ROYAL GEOGRAPHICAL SOCIETY.—The opening meeting of the society, for the season, will be held at the Theatre of the United Service Institution, on Monday next; when a paper will be read, "On the late Arctic Discoveries by Dr. Rae, and others."

THE LAST TRIAL BY JURY ANNIVERSARY.—On Monday night the friends of Parliamentary Reform met at Radley's Hotel, for the purpose of celebrating the sixtieth anniversary of the acquittals of Thomas Hardy, John Horne Tooke, John Thelwall, &c., from a charge of high treason, in 1794. At the last anniversary meeting, it was unanimously resolved that the present should be the last assembly in commemoration of these trials, and on that account, probably, it was better attended than usual. Mr. P. L. Taylor, who presided, gave the "Sovereignty of the People," which has always been the first toast on these occasions. He next proposed "the Queen, the Sovereign of a free people." Mr. J. W. Fox, M.P., in proposing the toast of the evening, drew a striking contrast between the state of public opinion in 1794 and that of the present day, and made some just and patriotic remarks on the war with Russia.

EXPLOSION OF FIREWORKS.—FIVE PERSON KILLED.—An explosion of fireworks took place on Monday morning in the house of a distryman, named Watson, in Coleman-street, St. George's-in-the-East, by which five persons were killed. It appears that Watson, who has been for some years in the habit of making fireworks to be sold on the 5th of November, had been working all Sunday night for the purpose of completing a large order for Monday. Between five and six o'clock in the morning, one of his daughters, who had been engaged filling in and finishing off fireworks, smelled a candle burning on the table. A spark fell upon some composition she was using, which took fire, and rapidly communicated to various piles of other pyrotechnical material, the whole of which exploded. Three of Watson's children were burned to death, and his wife and another child were so severely injured that they died a few hours afterwards.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

HER Majesty—or, rather, the Earl of Aberdeen—has been giving away more than one-half of the coming £1200 a year allowed for pensions to deserving literary, artistic, and other merit. We can commend most of the cases selected, though literature and art, it so happens, are both unrepresented on this occasion. The Patriotic Fund and its noble objects have called Lord Aberdeen's attention to Nelson, and Nelson's Horatia; and the first in the list of the four grants of the last month is that of £300 a year "To Eleanor-Philippa, Horatia-Nelson, and Caroline-Mary, the three daughters of the late Mrs. Horatia Nelson Ward, the adopted daughter of Lord Nelson, or the survivor or survivors of them." If it had been earlier it had been kind. Would that the innocent and suffering Horatia Ward could have lived to have seen this tardy recognition of her father's services! The second grant is of a like sum—"To Mrs. [Montagu, widow of the late Mr. Montagu, in consideration of her husband's services in the Penal settlement of Van Diemen's Land, from 1824 to 1842; and of his further valuable and important services to the British Treasury, and to the army during the Kaffir war, while Secretary to Government at the Cape of Good Hope, from 1845 to 1853, when he died, leaving his family in very straitened circumstances." This, however, should have been settled on Colonial funds, not on the miserable pittance of £1200 a year. The third grant is one of two hunded pounds a year—"To Mrs. Fullarton, widow of the late eminent Scotch Judge, Lord Fullarton, in consideration of the destitute condition in which she is left at his decease;" a case on which we have already commented, and which, we repeat, is in no way creditable to the character of the Scottish Bench, or to the Minister responsible for the expenditure of the public money. And the fourth and last is a grant of one hundred pounds a year—"To Mrs. Moore, widow of Colonel Willoughby Moore, who recently lost his life in the *Europa* transport, in aid of the Military Pension which has been granted to her as the widow of a regimental officer." Here is nine hundred pounds of the twelve hundred already vanished, and the claims of the widows and children of those who have rendered undying honours to literature and art are as yet unrecognised in the distribution!

We have had, it is said, too much criticism on Mr. Macaulay's "History," and in some respects we are inclined to fall in with the remark It has not, however, been observed before that the opening paragraph of his "History" has too great a resemblance to the opening paragraph of Swift's "Four Last Years of Queen Anne." Let our readers judge.

Here is Macaulay :—

I purpose to write the History of England from the accession of King James II. down to a time which is within the memory of men still living. I shall recount the errors which, in a few months, alienated a loyal gentry and priesthood from the House of Stuart. I shall trace the course of that revolution which terminated the long struggle between our Sovereigns and their Parliaments, and bound up together the rights of the people and the title of the reigning dynasty. I shall relate how the new settlement was, during many troubled years, successfully defended against foreign and domestic enemies; how, under that settlement, the authority of law and the security of property were found to be compatible with a liberty of discussion and of individual action never before known; how, from the auspicious union of order and freedom, sprang a prosperity of which the annals of human affairs had furnished no example; how our country, from a state of ignominious vassalage, rapidly rose to the place of umpire among European Powers; how her opulence and her martial glory grew together; how, by wise and resolute good faith, was gradually established a public credit fruitful of marvels, &c.

Here is Swift:—

I propose to give the public an account of the most important affairs at home, during the last session of Parliament, as well as of our negotiations of peace abroad—not only during that period, but some time before and since. I shall relate the chief matters transacted by both houses in that session, and discover the designs carried on by the heads of a discontented party—not only against the Ministry, but, in some manner, against the Crown itself. I likewise shall state the debts of the nation, show by what mismanagement, and to serve what purposes, they were at first contracted; by what neglect, connivance or corruption they have so prodigiously grown; and what methods," &c.

We are not, we are told, to mistake resemblances for thefts; but here the marks of imitation are too great to be accidental. Perhaps Swift's opening paragraph was ringing unconsciously, in Mr. Macaulay's ears whilst he was framing and elaborating his own well-turned sentences.

The London Mayoralty, which commenced so recently as Thursday last, will have, it is said, much to do that is is honourable with literature and art. Mr. Alderman Moon is a proper representative of Mr. Alderman Boydell. To both men art in this country has been much indebted. Who has not heard of the "Boydell Gallery"?—that noble work which gave an impulse to art in this country; and who that has seen those magnificent works, Roberts's "Egypt" and Roberts's "Holy Land," will not look upon them with additional interest, when they reflect that such noble works would not have been produced at all in our time but by the public enterprise of the present Lord Mayor? It was the custom of old for poets—dramatic poets especially—to laugh at each successive Lord Mayor: indeed, the follies of each Mayor were too often only too provocative of laughter: but here we have a Lord Mayor whose sympathies are still with art; and whose public spirit and fine taste have been the means of extending to many enduring examples of what Dr. Waagen would call the treasures of art in Great Britain.

If the chief of the civic chairs of this country has gained (as it certainly has) an accession of importance in the person of Mr. Alderman Moon, we have to regret a civic eclipse this week in a really splendid annual—the late Mayor of Oxford, Mr. Spiers. Oxford, so long the seat of literature through its University, has only of late been represented in art. The Heads of Houses at Oxford have been lying too long indifferent to the demands of the age; and, odd to say (what our forefathers would not have believed), the Town-council are stepping in to do for art what Vice-Chancellors and Boards of Delegates have too long neglected. Mr. Spiers, the late Mayor of Oxford, has, during his too brief reign, done much to redeem the too common and just complaint made by authors and artists to a corporate want of taste that is all but universal. He has brought around him, through his own liberality and good sense, some exquisite specimens of the English school, enjoys them, and (shall we say it, better still) likes others to enjoy them.

Architects have been alive and yet at torture during the present week. Oxford is spending thirty thousand pounds on a Museum of Zoology and other kindred matters; and plans have been required and sent in for a suitable design, to be erected somewhere in the neighbourhood of Wadham College. Competition is in favour at Oxford; and our architects have replied rather willingly than ably to the advertisement of the University. The designs sent in—some three-and-thirty in number—were opened on Monday last in the inspection of the public. They are, as might have been expected, of all kinds: some are Classic, some are Gothic, some are Crystal Palace creations, and some are after barbarian abominations. A few have a cemetery-like appearance. In short, everything has been attained in the designs but excellence. The names of the competitors are, of course, unknown. Each exhibits by a motto, and all have worked "Spes" and "Fortuna" to the very edge of death. In our cursory examination of them, it occurred to us too frequently that convenience had been sacrificed to portico and mere elevation. The first requirement in a building and of an architect is utility. The University of Oxford does not want "a work to wonder at," so much as it wants a receptacle for its curiosities. When a building is so adapted that it can receive what it is intended to receive, then decoration may follow, and then decoration is, indeed, welcome; but architects are too apt to think that the sum voted for a building is voted for the special purposes of architecture, and not of house-room. It was easy to trace some of the architects, though anonymous. Thus, the three designs sent in with the same motto (and those three among the best), have a young Barry character about them that is unmistakeable.

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—*Rectories*: The Rev. H. Beaumont to Freshford, near Bath; the Rev. J. W. Ware to Ullingswick, with little Cowarne annexed, in the diocese of Hereford. *Vicarages*: The Rev. R. Hughes to Pentraeth, Anglesey; the Rev. R. Dawkins to Weston Zoyland, near Bridgewater; the Rev. J. A. Wallace to Welton, near Bath. *Incumbencies*: The Rev. Mr. M'Gill to Christ Church, St. George's East; the Rev. C. T. J. Blake to St. Martin of Coslany, Norwich; the Rev. J. D. Elliott to the new parish of Hendford, near Yeovil; the Rev. W. Prince to Piahill, diocese of Oxford.

THE Rev. E. G. Parker, formerly British Chaplain at Bahia, the Rev. R. Freeman, and the Rev. G. B. Eade, have been appointed Assistant-Chaplains to the army in the East, under the auspices of the Society for the Propagation of the Gospel in Foreign Parts.

The French Academy has announced as the subject for its yearly prize for 1856, "The Origin of the Phœnician Alphabet." The prize is two thousand francs.

The Hon. Edward Fitzclarence, brother of Lord Munster, has been appointed to an Ensigncy in the 7th Fusiliers, and Sir Charles Figot to the 90th Foot.

Baron de Paiva, the Portuguese Minister, had an audience of the French Emperor on Monday, and presented to his Majesty the Grand Cordon of the three United Orders of Christ, Aviz, and Saint James of the Sword.

Mr. Macaulay has just returned from a lengthened tour in Switzerland.

PRESENTATION OF COLOURS TO THE 1ST SOMERSET MILITIA AT PLYMOUTH, BY THE COUNTESS POULETT.

AFTER forty years' peace we are again startled, in all directions, with imposing military spectacles. A few short months ago we little dreamt of our Militia Regiments having to undergo much beyond a mere muster, or a few weeks playing at soldiers. We now see them drilled, disciplined, mustached, well-armed and equipped, performing all the duties of our garrison towns, and not to be distinguished from our regular forces. In stirring times like these it is impossible to say what may be the fate of such a force, or where destiny may lead it before another year has passed away. The 1st Somerset Regiment has now been six months doing garrison duty in Plymouth, and its high state of discipline, the appearance, steadiness, and good conduct of the men, and the bearing of its gentlemanly set of officers, have gained the regard and admiration of the whole neighbourhood. The Presentation of Colours to such a regiment, a real embodied Militia Regiment, fairly moulded into serviceable soldiers, was naturally anticipated with great interest. On the 31st Oct., the day fixed for the great event, it rained as it can only rain in Plymouth. At eleven o'clock, however, the mist, that had enveloped the citadel, cleared away. The regiment, under the command of Lord Hinton, its Colonel, was drawn up on the Hoe, at twelve noon, and a fine body of men we never saw.

Shortly after the arrival of the 1st Somerset, a carriage containing Lady Poulett and party drove up, and the platform was soon occupied by the Countesses of Morley and Mount Edgecumbe, Lady Adela Ibbetson, Admiral and Mrs. Eden, and the wives of a few officers of the 1st Somerset, namely, Mrs. Leekonby Phipps, Mrs. Quantock, Mrs. Surtees Cook, Mrs. Malet, Mrs. Lanydon, and Mrs. Villiers. In consequence of the uncertainty of the weather, the arrival of the South Devon (who were to keep the ground) was somewhat delayed. The tunics and bright new helmets, a novel description of military dress, which has lately been adopted by the South Devon Militia, excited great attention. The 1st Somerset adhere to the chaco and coatee, and looked completely like one of the regular regiments, save in the silver lace on the officers. The arrangements on the field having been complete, order was given by the Colonel, Lord Hinton, to the 1st Somerset, to form three sides of a square, two deep, in front of the two centre companies, so that the right of the Grenadiers and left of the Light Company rested on a line running at the base of the raised platform. The ranks were opened, officers recovering swords and stepping to the front, mounted officers taking up their position facing the platform—the Colonel in the centre, the Lieut.-Colonel and Major on his right and left, and the Adjutant in rear of the Colonel. The Colours (procured from Messrs. Moore and Co., of St. James-street, London, and by whom the regiment has been entirely equipped) were then unoased, and placed on a drum-head on the platform by Sergeant-Major Perry. The two senior Ensigns of the regiment (Ensigns Warry and Henley) advanced to the platform, and placed themselves on the right and left of the Colours. The Rev. G. W. Langmead, the Chaplain, then proceeded to consecrate the Colours: the officers and men taking off their caps until the prayers were concluded, and the mounted officers dismounting. The Bishop of Exeter, we understand, had been requested to officiate on the occasion: but, to the great disappointment of the regiment, he was compelled to refuse, on account of increasing years and delicacy of health.

The Colours having been consecrated, the field officers remounted, the men replaced their caps, and were directed to shoulder arms. The Countess of Poulett then presented the Colours to the two Ensigns, who received them kneeling on one knee; after which, her Ladyship advanced to the front of the platform; Ensign Warry, with the Queen's Colour, on her right; and Ensign Henley, with the Regimental Colour, on her left; the sergeant-major, with drawn sword, in the rear; and her Ladyship made the following address to the Regiment:—

It has fallen to my lot this day to present new Colours to your regiment, and proud am I of the office which has devolved upon me. The tie which connects a regiment constituted as yours is, with its native county, must necessarily be of the strongest; more especially must I feel a deep interest in your welfare, commanded as you are by my own son. You are all Somersetmen: you have lived more or less in intimacy with each other from childhood; born on the same soil with your officers; they, your natural protectors, are enrolled under the same banner. Soldiers of the 1st Somerset, it is impossible to say what the fate of events may bring about, and should these colours ever be unfurled in the battle-field, the men of Somerset, the men of the villages and hamlets which surround my native home, will, I doubt not, serve under our most gracious Queen and country as faithfully and as bravely as the heroes who have distinguished themselves so nobly on the heights of Alma (Cheers.) But I trust the blessings of peace may be restored, and that you, having done your duty as soldiers at the call of your country, will return to your English homes and firesides. Officers and soldiers of the 1st Somerset, accept at my hands these Colours presented to you by the ladies of the county of Somerset, and when you carry them in front of battle, the best prayers of your country woman and neighbour follow your steps.

The Queen's colour is the union, in common to all regiments. The other colour has a black ground, in keeping with the facings of the 1st Somersetshire, which are black; it bears the union in the corner; in the centre is a circular wreath of the three emblems of England, Scotland, and Ireland—the rose, the thistle, and the shamrock, surmounted by a crown. Within the circle are inscribed the words "First Somersetshire Militia;" and beneath was the motto, "Defendemus," worked on a scroll.

The accompanying Sketch of the ceremony has been taken from a window of the Esplanade, at the time of the Presentation of the Colours; with the Plymouth Citadel, Sound, and Hoe.

The Ensigns, with the Colours, having placed themselves in front of the Grenadier Company, and the regiment having been directed to "shoulder" and "order" arms, Lord Hinton, in an appropriate speech, returned thanks, in the name of the regiment, to Lady Poulett and the ladies of Somerset for their magnificent present. Three cheers were then given. The regiment (with the exception of the Grenadiers and Colours, which remained steady) was then thrown back into line, and again opened ranks. The Colours were then "trooped;" after which the regiment marched past, in slow and quick time, and performed several evolutions; finally, they again formed line, opened ranks, and presented arms to Major-General Eden, who has recently been appointed to the command of the Western District, in succession to Lieutenant-General Sir Harry Smith, removed to the Northern District. After an address by General Eden, the troops, headed by the band, marched of the ground.

The establishment of the 1st Somerset Militia, when at its full complement, consists of a thousand men with ten companies. The regiment, we believe, has been called upon, in the spring, to furnish about 650 men, with a proportion of officers, for permanent duty, was formed into six companies, each one hundred strong; and the remainder of the officers and men were placed in the disembodied list.

Assisted by the liberality of Lord Hinton, the commanding officer of the regiment, on this occasion, the Sergeants of the Regiment, who have a capital mess, were provided with an excellent dinner. Neither were the men forgotten; by contributions from the Captains of companies, as well as from their Colonel, they, too, fared sumptuously. A brilliant ball was given by the officers in the evening, at the Concert-rooms, St. George's Hall, Stonehouse, to which eight hundred invitations were issued.

THE NEW LORD MAYOR.

Mr. Alderman Moon, the new Lord Mayor of London, is one of those to whom the citizens of London have paid honour with remarkable propriety; for, in every sense of the word, he is one of themselves—a citizen by his birth, his parentage, his education, his commercial enterprises, and his official occupations. Alderman Francis Graham Moon was born in London, in the year 1796, of old city descent. In the seventeenth and eighteenth centuries there existed in London a class of gold and silversmiths, whose mode of business differed greatly from that of our modern jeweller. In those days the precious metals were for the few, not for the many; and those who, like Messrs. Rundell and Bridges, stored their gems in lockers, and their plate in chests, with iron clasps, and only exhibited their stock to a well-known purchaser, would have wondered not a little at the temerity with which the modern silversmith displays his rich and varied store to all the world, with no other protection than a thin glass plate. This class of tradesmen has gone out: but, for upwards of a century before the new Lord Mayor was born, his forefathers had carried on their goldsmith's trade in Holborn, on the good old-fashioned principle. His father died when he was very young; and, as he left no large inheritance, it became necessary to send forth the son to seek his own good fortune. His mother selected for him a trade with which the name of Moon will very long be associated. She placed him in the establishment of a Mr. Tugwell, then carrying on business in Threadneedle-street, who, it may be observed, was brought up by Sir William Domville, a well-known Alderman of London at the commencement of the present century. It was a coincidence, not unworthy observation, that Sir William Domville was Master of the Stationers' Company at the time young Moon was apprenticed; so that he was bound to his business, his company, and his city, by the very man he was destined to succeed in his trade, in his mastership, in the aldermanic gown, and ultimately in the civic chair of London.

Francis Moon, the young apprentice, was an orphan. It might be said that he was friendless; but that, in London, desert and enterprise never stand long in need of friends. Those who had business with Mr. Tugwell, soon discovered that the readiest and best mode of transacting their business in his establishment was with his active, intelligent, and agreeable assistant. When, at length, the master retired from business, the enterprise of that assistant determined him to succeed to it.

A young man of twenty, with but small acquired fortune, must be endowed with no ordinary amount of emulation, courage, and self-confidence, who seeks to succeed an old-established master. But if Francis Graham Moon possessed self-confidence, he had acquired also that which is still more important, the confidence of others. To men endowed with penetration and liberality, Mr. Moon had recommended himself; and when the opportunity offered, they came forward to help him place his foot on the first round of that ladder which led to his fortune and his fame.

Once placed in business for himself, Mr. Moon's enterprise and talent secured success. He opened up new fields of adventure, and gradually engaged himself in works of the highest consequence. About 1825, a great firm of book and print publishers, Messrs. Hurst, Robinson and Co., of Cheapside and Pall Mall, failed in business. Their valuable stock was offered for sale, and Mr. Moon saw an advantage in purchasing from it to the extent of very many thousand pounds. His purchases had proceeded to a large amount when an offer was made to him by some of the coadjutors of that firm, to take the whole, upon conditions which rendered his house in point of fact, the successors of Messrs Hurst and Robinson. Mr. Moon consented to this purchase, and became, in consequence of this junction, the chief and responsible partner of, perhaps, the largest print publishing establishment in the world; connecting himself, it should be mentioned, by another tie with the City of London, for Messrs. Hurst and Robinson were the immediate successors in business of Mr. Alderman Boydell; whose whole trade thus passed into the hands of Mr. Moon.

THE RIGHT HON. FRANCIS GRAHAM MOON, LORD MAYOR.

Thus placed at the head of a great firm, Mr. Moon had pre-eminent opportunities of distinguishing himself as a patron of Art and its disciples. To the manner in which he has used those opportunities, the world of Art, and the public at large, have borne ample and gratifying testimony. It may be said, without any exaggeration, that no man of business ever paid larger sums to artists, or ever gave the world more favourable opportunities of doing homage to those distinguished men. And whilst Mr. Moon gleaned, in the field they cultivated, his share of the fame and profit connected with their works, it is not a little to his honour to be able to record that, from the commencement of his career to this hour, his nearest and dearest personal friends have been the most eminent artists of the empire; that, at the special request of the executors, he followed Lawrence to his tomb in St. Paul's, "as his private friend;" that he lived on terms of the warmest friendship with Wilkie; and that, on the day of his inauguration as Lord Mayor, he was supported, at his dinner-table, not only by his brother Aldermen and fellow-citizens, but by such men as Stanfield, Leslie, Maclise, and Roberts—worthy representatives of the artists of our age.

But, whilst recording the private friendship of the subject of this memoir, due mention must be made of the many proofs of esteem in which he has been held by the highest personages in the realm. Mr. Moon has enjoyed the rare and distinguished honour of being recognised and treated with personal favour by three successive Sovereigns. King George IV entrusted to him, at Sir Thomas Lawrence's suggestion, the publication of the popular engraving by which his late Majesty is perhaps best, and is certainly most favourably, known to his subjects. King William IV., though not remarkable for his patronage of the fine arts, afforded Mr. Moon several opportunities of making His Majesty's portrait familiar to his people. But it was on the accession of our present most gracious Sovereign to the throne that Mr. Moon obtained the greatest privileges. Her Majesty condescended to give Mr. Moon her most zealous and active patronage. It may be said that all, or nearly all, the most beautiful engravings in which the Royal family of England are represented, emanated from that temple of the Arts over which Mr. Moon had presidency. The confidence reposed in him by our Queen was extended to Mr. Moon by Prince Albert, after the Royal union; and by the exercise of their Royal patronage the celebrity of the works for which he was responsible became European, and Mr. Moon became known not only at our own Court, but at the Court of almost every European Sovereign. At various times the Emperor of Russia, the King of Prussia and of Hanover, and his late Majesty the King of the French, presented Mr. Moon with marks of their esteem; and from the last-mentioned he received a compliment usually awarded only to the most distinguished personages—the honour of being received as an invited private guest at the Palace of St. Cloud.

The conduct of such a business as that of Mr. Moon not only required more than the ordinary enterprise and exertion of a commercial man, but required great love of the arts, a high power of appreciating them, a knowledge of the public taste, and great skill in supplying its varying requirements. Mr. Moon has shown himself possessed of all these qualifications in a singular degree. As some index to the varied character and unlimited extent of Mr. Moon's enterprises, mention may be made of that superb work of Roberts's, known as the "Holy Land," which alone cost £50,000 to produce; Brockedon's "Passes of the Alps;" of the large Engraving of the "Waterloo Banquet," at Apsley House, from Salter's picture; of the celebrated engraving of "John Knox Preaching,' from the picture in the gallery of the late Sir Robert Peel; of Leslie's pictures of "the Queen Receiving the Sacrament," and of "the Christening of the Prince of Wales," and of "the Princess Royal;" of the engraving of our "Queen's First Council," from the picture in her Majesty's collection; of Winterhalter's "Delineations of the Royal Family," &c. A remarkable testimony to the worth of the man who produced these celebrated publications, was given by the artists and amateurs of the metropolis, in 1843, when they presented Mr. Alderman Moon, at a public dinner, with a copy, in silver, of the Warwick Vase, mounted on a superb plateau, which bears an inscription, recording that "This Tribute was offered by Artists and Amateurs in testimony of Mr. Moon's public spirit and love of art, and of the liberality and taste which he has shown in his intercourse with painters and engravers."

Mr. Moon's public career, in connection with the City of London, commenced nearly a quarter of a century ago, when he was first elected a Common Councilman of the Ward of Broad-street, in the room of Mr. Cowan, afterwards Alderman and Lord Mayor. Mr. Moon served the office of Sheriff in 1843, with Alderman Sir John Musgrove; and, in 1844, he was elected the Alderman of Portsoken Ward. He was placed in the Civic Chair on Michaelmas-day last, by the unanimous plaudits of his

PRESENTATION OF COLOURS TO THE FIRST SOMERSET MILITIA, BY THE COUNTESS POULETT.—(SEE PRECEDING PAGE.)

ALLEGORICAL PICTURE, BY ABSOLON AND FENTON, PAINTED FOR THE INAUGURATION DINNER OF THE LORD MAYOR, IN THE GUILDHALL, NOV. 9, 1854.

fellow citizens. In addition to his civic honours, Mr. Moon is also a magistrate for Westminster, and for the county of Middlesex; and this year, it will come to his turn to serve the office of Master of both the Livery Companies with which he is associated—the Stationers and Lorimers.

A few years back, seeing the possibility of his election to the highest civic honours, and feeling that the citizens of London would, in such case, have a claim to his undivided time and attention, Mr. Moon felt it to be his duty to retire (though at an early period of life) from active business occupations. Although no longer a commercial man in the City, Mr. Moon continues, however, to be associated with it by the ties of property, having acquired one of the most valuable freehold and leasehold possessions in all London—that fine pile of building which stands to the North of our Royal Exchange, and in which so large a share of the business of the greatest business city of the world is every day transacted.

The new Lord Mayor undertakes, as he cannot but feel, a year of metropolitan administration, which promises to be pregnant with events. Those events "may be for weal or they may be for woe;" but, in either case, the man who has triumphed as Mr. Moon has done over every early difficulty, and who has received from his fellow-citizens at large so many and such remarkable testimonies of their esteem, may be assuredly regarded as one who will well fulfil the duties of the time, however trying, or in whatsoever direction the Fates may guide them.

The Lord Mayor has appointed his son, the Rev. Edward Graham Moon, M.A., as his Chaplain; and R. N. Philipps, Esq., B.C.L., and one of her Majesty's Deputy Lieutenants of London, to be his hon. private secretary, during the Mayoralty.

On Wednesday the Lord Mayor, the Lord Mayor elect, Sheriffs, Under-Sheriffs, Recorder, Town Clerk, and chief officers of the Corporation assembled in the Court of Aldermen, and after forming a procession, proceeded to the Guildhall, where, as a Court of Common Hall, the Lord Mayor elect was sworn into the office to which he had been elected. The usual formalities having been gone through, the Court broke up.

LORD MAYOR'S DAY.

THE last of the old City pageants, Lord Mayor's Show, was celebrated with artistic magnificence, on Thursday, the memorable Ninth of November. The weather was unusually bright and fine. At an early hour, thousands of persons repaired to the bridges, and the banks of the Thames, from which a glimpse of the City barges, as they made their way to Westminster, could be obtained. The land route was, as usual, well occupied, but the chief point of attraction was his Lordship's own Ward (Portsoken), in which visitors were accommodated with sittings, specially erected for the occasion. Against one side of the church of St. Botolph, Aldgate, many rows of seats were placed, the occupants consisting chiefly of his Lord l.'s constituents.

At eleven o'clock the procession was formed in the Guildhall-yard, from which it moved according to the following arrangement:—

Police Constables to clear the way.
Trumpets and Band.
The Boys belonging to the Royal Marine Society, in their Uniform.
City Marshal's Men.
The Band of the Royal Marine Society.
The Boys of the Royal Marine Society, in their Uniform.
Three Trumpeters.
Watermen carrying the Banners of the following Worshipful Companies:—
Banner of the Common Hunt and Coach Harbour Masters.
Banner of the Parishioners. Banner of the Moulders.
Spectacle Makers' Company.
Royal Standard. Union Jack.
Banner of St. George. Banner of Arms of the City of London.
Banner of the late Sir R. H. Carr Glyn, Bart. Banner of the late R. R. Baxter, Esq.
Banner of the late Alderman Lemon. Banner of the late Alderman J. Johnson.
Banner of the late Alderman Sidney, ex-Sheriff.
Banner of the late Alderman Challis, ex-Sheriff.
Banner of the Arms of the late Sir Peter Laurie, ex-Sheriff.
Banner of the Arms of the late Sir J. Musgrove, ex-Sheriff.
Banner of R. Swift, Esq., ex-Sheriff. Banner of A. Cox, Esq., ex-Sheriff.
Banner of J. Hall, Esq. Banner of W. H. Watt, Esq.
Banner of —— Esq. Banner of ——, Esq.
Banner of Alderman Sir Chas. Carr Glyn, Bart. Banner of Alderman Sir Jas. Duke, Bart., M.P.
Banner of the Marquis of Downshire. Banner of Sir W. B. Riddell, Bart.
Banner of the Rev. J. Jefferson Clapham, Banner of W. Clarkson, Esq., Master.
Banner of the Worshipful Company of Spectacle Makers.
Banner of Musicians. Banner of the Butchers. Banner of the Plasterers.
Banner of the Scriveners. Banner of the Coopers. Banner of the Founders.
Banner of the Palmer Stainers.
Banner of ex-Sheriff T. Contwell, Esq. Banner of ex-Sheriff G. H. Wheelton, Esq.
Banner of the Carpenters. Banner of the Girdlers.
Banner of the Orders. Banner of the Coachmakers.
Banner of the Vintners. Banner of the Merchant Taylors.
Banner of the Fishmongers. Banner of the Mercers.
The Worshipful Company of Bumboliers.
Police Constables.
The Beadle.
A Military Band.
The Bargemaster.
Watermen bearing the following Colours:—
The Royal Standard.
Arms of all Foreign Sir G. Marshall.
Arms of Mr. Alderman and sheriff Magnridge.
Mr. Alderman Wire.
Arms of the Butchers' Company
The Clerk of the Company in his Chariot.
The Court of Assistants in their Carriages.
The Warden in his Chariot.
The Master in his Chariot.
The Worshipful Company of Scriveners.
The Beadle.
A Military Band.
The Bargemaster.
A Military Band.
Watermen bearing the following Colours:—
Royal Standard. Banner of the Arms of the Union Jack. City of London.
Banner of the late Alderman Venables.
Banner of the Arms of Alderman Sir William Magnay, Bart.
Banner of the Arms of Sir John Key, Bart.
Banner of the Arms of the Right Hon. the Lord Mayor.
Banner of the Arms of the Worshipful Company of Stationers.
The Clerk of the Company in his Chariot.
The Wardens, in their Chariots.
The Court of Assistants, in their Carriages.
The Master, in his Chariot.

A SHIP, DRESSED AND MANNED,

Drawn by Eight Horses.
The Upper City Marshal, on Horseback.
The Lord Mayor's Beadle
The Lord Mayor's Barge-master, in his State Dress.
The Bargemen bearing the various Colours.
The Banner of the Lord Mayor.
The Captain of the Thames Navigation Barge.
The Principal Assistant Water Bailiff.
Ten Watermen, with Colours.
A Grand Military Band.
The Sheriff's Chaplains.
The two Under-Sheriffs.
The City Solicitor
The Solicitor-Solicitor.
The Comptroller.
The Secondary.
The three Common Serjeants.
The Judge of the Sheriffs' Courts.
The Common Serjeant.
The Town Clerk.
The Chamberlain.
Three Trumpeters
Three Esquires on Horseback, in full Armour, bearing the Banners of their Knights.
THREE KNIGHTS,
Mounted on Chargers, armed cap-à-pie.
Mr. Sheriff Muggeridge's Banner.
Three Trumpeters
Three Esquires on Horseback, in full Armour, bearing the Banners of their Knights.
THREE KNIGHTS,
Mounted on Chargers, armed cap-à-pie.
Three Trumpeters
Three Esquires on Horseback, in full Armour, bearing the Banner of their Knights.
THREE KNIGHTS.
Mounted on Chargers, armed cap-à-pie.
Two Guns of the Royal Horse Artillery, with Gunners and Horses,
Three Trumpeters. A Guard of Honour.

FLAGS OF ENGLAND, FRANCE, AND TURKEY,

Borne by Guards of Honour.
The Lady Mayoress, in her State Carriage, joined the Procession on its return from Westminster.
The Lord Mayor's Servants in State Liveries.
Two Bands of the Life Guards, mounted.
The Upper City Marshal on Horseback.
Gentlemen of the Lord Mayor's Household.

THE RIGHT HONOURABLE THE LORD MAYOR.

In his State Carriage, drawn by Six Horses,
Attended by the Chaplain, Sword Bearer, Common Crier, and the Water Bailiff.
A Guard of Honour on Horseback

Police Constables.

The ship noticed in the foregoing order of procession was a great object of attraction, and drew forth most enthusiastic bursts of applause at every stage of its progress along the line.

On leaving the Guildhall, the procession passed along King-street, through Princes-street, Cornhill, Bishopsgate-street, Houndsditch, Minories, John-street, Crutched Friars, Mark-lane, Tower-street, Eastcheap, Cannon-street, St. Paul's-churchyard, Ludgate-street, New Bridge-street, to Blackfriars-bridge, where his Lordship and his party took water. At a few minutes past two o'clock, the procession arrived at Westminster-bridge, and received a salute from the guns at the wharf of Mr. Searle, the City Bargemaster. The civic barge drew up at the east end of the Royal Palace of Westminster, when the Lord Mayor and the civic authorities proceeded in state to the Court of Exchequer, and took up their positions at the bar. They were received by Lord Chief Baron Pollock, Mr. Baron Parke, Mr. Baron Alderson, and Mr. Baron Martin. To these learned Barons the Recorder, in a brief address, formally presented the new Lord Mayor of London.

The Lord Chief Baron expressed his entire satisfaction with the choice of the Livery in the appointment of their Chief Magistrate, and the Lord Mayor took the usual oaths.

The Recorder in the name of the Lord Mayor and Sheriffs, invited their Lordships to the banquet to be given in the evening in the Guildhall; to which the Lord Chief Baron replied that some of the Judges would attend.

A similar ceremony having been gone through at the Courts of Queen's Bench and Common Pleas, the Lord Mayor and his suite re-embarked aboard the City barge, and on their arrival at Blackfriars-bridge rejoined the procession. At this point the Lady Mayoress, in her state carriage, also joined. Thus reformed, the procession moved along New Bridge-street, where it received as additions her Majesty's Ministers, the Ambassadors, the Judges, members of both Houses of Parliament, and other persons of distinction who had received invitations to the banquet.

The Lord Mayor's Dress Carriage, built by Messrs. Peters and Sons, of Park-street, is a "state coach," finished with the same care as the Court carriages of the nobility; and the details of its form and embellishment are characterised by good taste, with peculiarly high finish; such as might be expected from one who through life has been a warm patron of art. The heraldic work is executed upon the panels by one of the best artists, and the distribution of the several devices is successful. The exterior, in colouring is after the style of the Speaker's state coach; and the interior is of white corded silk, of the best manufacture. The panels, underpart, and wheels are painted deep corbeau, and enriched with gilt beads and mouldings. The upper parts of the body has a burnished cornice, and each corner of the body supports a massive circular lamp, of novel design; the upper part or crown of each is finished with festoonings, and bears the cap of liberty, richly wrought in metal. On the chief panel of the carriage is emblazoned the City arms, and on the other panel, the arms of the City companies, to which the Lord Mayor belongs, namely the "Lorimers" and "Stationers." The hammercloth is scarlet cloth, trimmed with white silk fringes, and lacings; and on the panels are his Lordship's badges of crest, &c., embroidered in gold. The state harness is richly chased.

THE GUILDHALL.

The Great Banqueting-hall has rarely presented so splendid an appearance as on Thursday evening. It was specially decorated for the great occasion; and there was an appropriateness in the character of the decorations which has seldom, if ever, been so well executed as for the present mayoralty inauguration feast. The most characteristic of the decorations, however, was an allegorical painting, which entirely filled the great eastern window of the hall; the Gothic screen serving as a base to the picture. The design is from the pencil of Mr David Roberts, R.A.; and painted by John Absolon and Frederick Fenton. The two principal cities of England and France (London and Paris) are represented by two female figures, each wearing a mural crown, and accompanied by emblems: both have drawn the sword in the cause of the oppressed; and they hold forth the laurel crown to the victor. In the left-hand compartment is Peace bearing her olive-branch over France and England; and in the right-hand compartment is Victory bearing the banners of England, France, and Turkey, over Constantinople. Above is Fame, recording the names of Europe's champions in the defence of the liberty of mankind. In the mid-centre is an obelisk, with medallio portraits of the Sovereigns of France and England; and above are cherubs scattering flowers, and other figures grouped beneath and around the City arms. The whole is seen through a double-decorated Gothic screen, emblazoned with armorial bearings. The centre is guarded by an English and French soldier; and the side compartments with a Turkish soldier and a British sailor. The entire picture was admirably lighted, and had a rich and gorgeous effect. Beneath the central figures are inscribed the words "SIDE BY SIDE IN PEACE OR WAR."

We have engraved this magnificent picture.

In the Court of Aldermen's superb chamber were two clever pictures of the "Embarkation of the Allies at Varna," and the "French before Sebastopol," by the painters of the great picture, Absolon and Fenton.

The other decorations of the hall consist of screenwork in the Gothic style, the panels in relief in the centre compartments being decorated with medallions of flowers most beautifully painted, classic female figures being placed on either side the whole, forming a *coup d'œil* of great splendour, and an appropriate adjunct to the military trophies and other decorations around the hall, the taste and elegance of which reflect great credit upon the artist. The whole of the decoration, except the picture in the east window, were designed and executed by Joseph Sioper.

THE BANQUET.

Soon after seven o'clock, the Lord Mayor and his distinguished guests entered the hall in procession, to the banquet.

The healths of her Majesty, Prince Albert, Albert Prince of Wales, and the rest of the Royal family, having been given and loyally responded to,

The Lord Mayor proposed the "Armies of England, France, and Turkey," coupling with it the name of Lord Hardinge (Loud and repeated cheering).

Lord Hardinge, in responding to the toast, eulogised the conduct of the English and French troops in the Crimea, and bore testimony to the bravery and skill which they had exhibited at Alma and at Sebastopol.

"Prosperity to the City of London," having been honoured,

The Lord Mayor next proposed the "Health of the French Minister, and of the other Foreign Ministers who have honoured the banquet by their presence."

Count Walewski (the French Minister, who was greeted with several rounds of cheers), returned thanks in the name of the diplomatic corps; and, after referring to the bravery and achievements of the Allies, he designated the union of France and England as the greatest event of the age.

The Lord Mayor then proposed "The Health of the Lord Chancellor," who briefly responded to the toast.

The Lord Mayor next gave the "Prime Minister, and the other Members of her Majesty's Government."

The Earl of Aberdeen, after returning thanks for himself and colleague, said—

On this day last year, when I had the honour of being present in this hall, and of addressing those who were then assembled, we still continued to enjoy a state of peace. It is true that our prospect was then threatening, but a war was not imminent; and, as the policy of her Majesty's Government was a policy of peace, I declared that no efforts should be wanting on our part to endeavour to preserve peace (Loud cheers). I think it not improbable that many of those who have been most eager for war in private, must easily discouraged by those vicissitudes to which a state of warfare is proverbially liable; but I trust you will never think anything of that sort on the part of her Majesty's Ministers. We are determined, under all circumstances, to persevere in the endeavour to perform our duties in such a manner as our Sovereign and our country have a right to expect from us (Cheers). Keeping fresh in view the great objects of the war, and looking to the paramount interests of this country—acting, too, in the strictest concert with our great Ally—I cannot entertain a doubt that we shall be enabled to bring this contest to a happy termination (Loud cheers.)

"The Health of the Lord Mayor," and "The Judges," having been given and responded to,

The Lord Mayor next proposed "Lord John Russell and the House of Commons (Loud cheers.)

Lord J. Russell, in acknowledging the toast, briefly referred to the late inquiry into the state of the Corporation, and was understood to express his conviction that they were quite ready and willing to remove all existing abuses (Cheers).

Lord Palmerston, in a humourous speech, proposed the "Health of the Lady Mayoress," which was duly honoured.

The "Bar of England," "Alderman Finnis and the Court of Aldermen," and "Mr. Masterman and the other Representatives of the City of London," were also given; and the dinner party soon afterwards broke up—a considerable portion of the company repairing to the ball-room, where dancing was kept up to a late hour.

LITERATURE.

THE ILLUSTRATED LONDON ALMANACK FOR 1855.
London: 198, Strand.

The annual growth of Almanacks has begun to put forth its leaves and blossoms, and to solicit the attention of the book buying and book-reading public. Foremost among them is that established favourite the ILLUSTRATED LONDON ALMANACK. As an illustrated periodical, its illustrations first demand the notice of the critic. Like its multitudinous readers, it is affected by the war fever, and has, for the first time, borrowed a portion of its embellishments from the military and naval history of Great Britain. There is, we believe a volume in existence entitled the "Calendar of Victory," in which it is shown that every day in the year is the anniversary of some victory, either by land or by sea, achieved by the arms of the British people. The ILLUSTRATED LONDON ALMANACK for 1855 shows very opportunely that every month of the twelve may boast of some great incident and anniversary connected with English history, and presents its readers with a spirited illustration for each, from the facile and graceful pencil of Mr. George Thomas. Corunna, Cape St. Vincent, Badajoz, St. Jean d'Acre, Ushant, the Nile, Assaye, Trafalgar, Ferozeshah, are some of the subjects which have been chosen; and the pictorial treatment of which will serve to refresh the popular memory in these stirring times, upon the warlike deeds of our ancestors, and stimulate, it is not improbable, the martial ardour of the people in the present war. The illustrations of the natural history of the month are novel in design and treatment; while, to gratify the tastes of those who expect to be amused even in an Almanack, is presented a series of papers on the characteristics, the festivities, and manners and customs of the people at each period of the year from the pen of Mr. A. A. Watts, with comic illustrations by Hine. But the real value of the Almanack does not consist in these light and sketchy matters—but in the solid astronomical and meteorological information communicated by Mr. Glaisher; and in a vast assemblage of useful facts of legal and commercial interest. The astronomical and meteorological department is especially ample and accurate in the information which it conveys. In addition to other articles of reference, which the Almanack contains, may be cited the full and elaborate abstract of the various Acts of Parliament passed during the last session—and the obituary of the persons of note and title who have died during the preceding twelvemonths. Time was when the best Almanack offered to the public cost nearly three times the money at which the ILLUSTRATED LONDON ALMANACK is published, and did not contain a hundredth part of the information. But a great improvement has recently taken place in these respects, and Almanacks have not only improved, but have kept pace with the spirit of the age. Amongst the best of them, the Illustrated London Almanack takes the highest rank; and while it is accurate and full enough of information for the desk of the man of business, and beautiful enough for a lady's table, it is cheap enough to find a place in the humblest workshop or cottage of the land.

MUSIC.

MANCHESTER maintains its long-established reputation of being, after the metropolis, the most musical town in England. Excepting London, no other town has so many distinguished resident professors, so many wealthy and influential amateurs, and so many musical entertainments of a superior class. A new Music-hall has just been opened for concerts and other performances on a great scale, and sufficient for the accommodation of 4000 persons, with an orchestra capable of holding 100 performers. The Hall is exceedingly handsome; and in its interior, as regards its appearance, every attention has been paid to the comfort and convenience of the public. The musical capabilities of the "Philharmonic Hall," as it is called, have already been tested by several performances, particularly those of the London Glee and Madrigal Union, whose present tour in the provinces is attended with great success.——The operatic performances at the Manchester Theatre-Royal continue to be carried on with spirit, notwithstanding difficulties and disappointments arising from indisposition of performers, particularly Madame Cb. Adolphe Berghart. Madame Rudersdorff has made a great impression by her performance of the character of *Valentine* in the "Huguenots," which the Manchester papers concur in describing as being equally remarkable for dramatic and vocal power. "Semiramide" has been performed, says a Manchester paper, "for the first time in Manchester these three-and-twenty years;" and Madame Caradori's personation of the heroine has produced a great effect on the public.

MEYERBEER, already a very wealthy man, has just succeeded to an inheritance of three millions of francs, or £120,000 sterling.

THE erratic Sophie Cruvelli has returned to her post at the Paris Opera. "It was," says the *Patrie*, "in consequence of an unfortunate misunderstanding that Mdlle. Cruvelli's absence prevented the performance at the Opera some time since from taking place—the person requested by her to inform the management of her departure having neglected to fulfil the commission. Mdlle. Cruvelli, frightened at the serious consequences, has not hitherto desired to re-appear before the public. Feeling now, however, that her prolonged absence would aggravate her involuntary fault, she has requested and obtained permission to resume her duties at the Opera forthwith."

ITALIAN OPERA IN SOUTH AMERICA.—Whilst Grisi and Mario are enchanting the North American amateurs, the Mexican journals boast that they have stars of the first magnitude in Madame Fiorentini (formerly of Her Majesty's Theatre), Signora Steffanone, Signor Salvi, the tenor; Signor Rovere, the basso; and Signor Marini, the basso (late of the Royal Italian Opera, Covent-garden). Madame Fiorentini was creating prodigious excitement in *Norma*, and in Donizetti's "Roberto Devereux," "Maria di Rohan," and "Belisario," and Ricci's "Clara di Rosemberg."

LETTERS from New York, dated October 20th, mention the arrival of Mr. W. Vincent Wallace in that city. Serious apprehensions were entertained by his friends that he was on board the *Arctic* when that vessel was lost. His opera of "Maritana" was performed for the first time in America on the 18th ult. Miss Louisa Pyne is said to be a great favourite of the Americans.

THE THEATRES.

PRINCESS'S.—An exceedingly magnificent spectacle was produced at this theatre on Monday. The drama has already appeared on the Parisian stage; and the subject of it is well calculated to excite patriotic enthusiasm. The fortunes of "Schamyl, the Warrior Prophet" of Circassia, form the argument, which is divided into three acts and eight scenes, including an epilogue, in which the hero, twenty years after the main transaction, is seen to welcome the English, French, and Turkish forces to the Circassian shores. The scenery is brilliantly painted by Mr. Grieve and his assistants, and exhibits the peculiar characteristics of landscape and atmosphere in Georgia and Circassia. To distinguish one of these scenes for special commendation, where all are so beautiful, would be an injustice to individual artists. In regard to the acting, too much praise cannot be rendered to Mr. Ryder, for the manly and dignified bearing with which he sustained the part of *Schamyl*—a part, indeed, that pervades and sustains the entire drama. The blended benevolence and fortitude of his aspect and action commanded universal sympathy. Mr. David Fisher and Mr. Walter Lacy had two comic characters, not remarkably effective, but to which they, nevertheless, gave great expression, mingled, with perhaps, too much vivacity. The former was the weak and vain nephew of the *Governor*, and the latter a travelling English physician of indisputable valour and eccentric tastes, who changes his costume from European to Asiatic as occasion requires, and substitutes *Schamyl* whenever the ruse is necessary. The house was well filled, and the new spectacle was received with approbation. We must not, however, conclude this notice without a word of praise to Mr. Oscar Byrne for the very characteristic dances introduced; and, in particular, to the Circassian ballet with which the piece concludes. The system, too, of composing appropriate overtures and *entr'actes* is adopted at this theatre, and forms, of itself, a commendable charm. Of course, in a piece of this kind, considerable machinery is necessarily introduced; and the phenomena of tumbling rocks and disrupted dykes were admirably treated by, and reflect great credit on, Mr. Hodsdon. These effects, appropriate to melodrama, will no doubt be found attractive.

EPITOME OF NEWS, FOREIGN AND DOMESTIC.

The Queen has appointed Sir W. Gibson Craig, Bart., a member of the Board of Supervision for the Relief of the Poor in Scotland, in the place of Mr. William Murray, of Henderland, deceased.

Negotiations for a Customs Union between Spain and Portugal have far advanced, and a bill on the subject is to be presented to the Cortes.

Several French and English officers who distinguished themselves at Alma will receive the decoration of the Medjidie; and for the soldiers the Sultan has ordered a medal to be struck, on which the flags of France, England, and Turkey are to be displayed together.

Viscount Ingestre, who has been for some time past in bad health, has resigned his commission in the 1st Life Guards.

The grave of Edgar A. Poe, says *Norton's Gazette*, in an obscure corner of the Potter's Field in Baltimore, has not even a stone to mark the resting-place of the deceased poet.

The Incorporated Law Society have memorialised the Lord Chancellor in favour of an early termination of the Equity sittings on Saturdays. They think it desirable that the Courts should on that day rise at one o'clock.

The Hon. Colonel Phipps's eldest son, the youthful Mr. Charles Phipps, now one of the pages of honour to the Queen, will shortly obtain his commission in the Guards, without purchase.

The Vice-Consul of England, at Widdy, has received orders from his Government, to form in that port a depôt of 10,000 tons of coals for the English fleet in the Baltic.

The produce of the silver mines at Mexico for the year 1850 exceeded that of the rest of the world by 1,000,000 dollars, the total yield being 33,500,000 dollars.

Mr. Trollope, son of the well-known novelist, and who for so many years was connected with the Post-office department in Cork, has been appointed surveyor of Belfast Post-office district.

During the last few days considerable purchases of cloth list have been made by the French Government. It is to be sent to the principal prisons to be made into sacks for the army of the East.

The Right Rev. Dr. Newman, Roman Catholic Archbishop of Philadelphia, has arrived in Paris on his way to Rome.

A destructive fire occurred at Baltimore on the 20th ult. The area of the fire covered two entire squares. The entire loss is estimated at nearly 200,000 dollars.

Her Majesty has been pleased to transmit to the Baron de Verdière, Captain in the Imperial Regiment of Guides, the sum of 100 guineas for the band, as a mark of Royal satisfaction at their brilliant performance at Windsor.

Twenty-four Sisters of Charity have just taken their departure in the *Lycurgus* from Marseilles, for Alexandria.

At the time of taking the last Census, there were in Upper Canada, aged 100 and over, 14 males and 19 females. The oldest was Captain Jan, an Indian residing in Alnwick, whose age is stated at 120; and his wife, also then living, had attained the age of 100.

The Grand Jury of Richland District, South Carolina, among its presentments, has recommended the re-opening of the African slave-trade! They set forth its supposed advantages, and even necessity, to the South, and justify its humanity and morality!

The Count de Morny has at length consented to accept the place of President of the French Legislative Corps. He is to have a seat in the Cabinet, without a portfolio.

One of the operatic novelties of the season at St. Petersburg will, it is said, be a work from the pen of a national composer—Alexander Lwoff. The subject is founded on an episode of the war of 1812.

A letter from New York states that the District Attorney of the United States will cause a large number of the crew of the *Arctic* to be brought to trial, under an indictment for mutiny.

General Stewart, one of the party injured by a recent coach-accident at Dunkeld, expired on Saturday morning. He was a General in the Austrian service, and claimed to be a lineal descendant of Prince Charles Edward Stuart.

"The Memoirs and Letters of Sydney Smyth" are at last ready to go to press. They have been edited by his daughter, in conjunction with Sir Austin. The book, for some unknown reason, is to be printed for "private circulation only."

Cardinal Sterckx, Archbishop of Malines; Dr. Dixon, R.C. Archbishop of Armagh; and Dr. Cullen, R.C. Archbishop of Dublin, arrived at Rome on the 26th ult.

On the 21st ult., the colossal statue of Birgher Jarl (Earl Birger, "Jarl" pronounced "Yarl"), the Lord Protector of Sweden in the middle of the thirteenth century, the Alfred and Charlemagne, and the greatest chief it has ever had, was inaugurated at Stockholm.

A new diving-bell, the invention of Don Antonio Tarsia, one of the engineers of the Neapolitan navy, was tried at Naples on the 16th ult. It remained three hours under water at a depth of fifty feet, with three men inside, who regaled themselves with a breakfast during that time.

An Imperial decree promotes to the rank of Commander in the Legion of Honour General Kalergis, Minister of War in the Cabinet of the King of Greece.

Among the passengers between Malta and Gibraltar by the *Candia*, which carried the Indian Mail, was Mr. Smith O'Brien, from Australia via Madras. He was a first-class passenger, and entered into familiar conversation with those on board on every topic except politics. He looked careworn. He was obliged to leave the *Candia* at Gibraltar, as he is prohibited, by the terms of his pardon, from visiting the United Kingdom.

A large number of persons have died from eating oysters in New York, and among them several cases of poisoning. The oysters that produced such fatal results were from Chesapeake Bay, where it is said the bivalves are affected with a strange and poisonous disease.

The Emperor Napoleon has informed the widow of Sub-Intendant Lebland, who was killed in the battle of the Alma, near the person of Prince Napoleon, that she need be under no apprehension for the future, his Majesty engaging to provide for her.

The late Mrs. Wilson, of Seton-square, London, has left the sum of £5000 to the Hospital for Consumption.

According to a Prussian law enacted last March, clergymen of all professions are forbidden to unite foreigners in marriage with Prussian subjects, unless the former are provided with attestations from house that no impediment exists to such marriage.

The Lords of the Treasury have ordered a reduction of the fees for searching in the County Court Registry Office.

Thomas Francis Meagher, the Irish refugee, proposes to migrate to California, and make San Francisco his future home.

There are agents now employed on the part of the Government, in Dublin and other parts of Ireland, in procuring supplies of strong serviceable horses, suitable for cavalry.

Queen Christina intended leaving Bagneres for Malmaison on the 10th or 12th ult.

Sir William Forbes, Bart., of Craigievar, who is only in his nineteenth year, has entered the army as Ensign and Lieutenant in the Coldstream Guards.

M. de Brunnow, the ex-Ambassador of Russia in London, has been summoned to St. Petersburg. It is supposed that the Russian Cabinet is desirous of making him the medium of diplomatic negotiations during the winter

From a Parliamentary return just printed, it appears that there are 480 Savings-banks in England and Wales, which are managed by 517 unpaid and 955 paid officers, at an annual expense of £95,478 14s. 2d. The number of accounts open is 1,063,304, and the total amount owing to the depositors £29,467,831 15s. 11d., of which £29,292,211 11s. 6d. is invested with the Commissioners for the Reduction of the National Debt.

The *New York Courier and Enquirer*, one of the most influential papers in America, commences a powerful article in favour of the Allies, by saying:—"No man who has a drop of Saxon blood in his veins will read of the conduct of the British troops at Alma without a thrill of admiration." There is some talk of a New York subscription in aid of the Patriotic Fund.

Lord and Lady Haddo are not expected to return to England from Egypt until early in the spring.

Sir Cusack Roney, the Hon. Francis Hincks, Sir Allen M'Nab, the Hon. John Ross, and Mr. Logan, have been appointed a Commission to secure a proper representation of the products of Canada in the Exhibition at Paris next year. It is stated that the Canadian Parliament will vote £10,000 for the purpose.

Positive orders have been issued that the whole of the Austrian army must be prepared for action by the 1st of January.

The last advices from the Cape of Good Hope report that twenty-five shares in the South African Mining Company, with £1 paid, had been sold at prices ranging from £35 to £39 each; and several shares of the Cape of Good Hope Mining Company, with 10s. paid, at £4 10s. each.

The Darmstadt Zollverein Conference has determined to prolong the free admission of grain and leguminous seeds until the end of September, 1855.

The Red Lodge, Park-row, Bristol, has been purchased by Lady Byron, the widow of the deceased poet, and placed at the disposal of Miss Carpenter, for the purpose of the Reformatory school established by that lady.

THE COURT.

Her Majesty and the Prince Consort paid a flying visit to the metropolis on Saturday last, for the purpose of calling upon the Duchess of Gloucester, at Gloucester House. The Duchess of Kent, who has recovered from her recent indisposition, dined with the Queen that same evening, at Windsor Castle.

On Tuesday the christening of the infant daughter of Lieut.-Colonel the Hon. Alexander and Mrs. Gordon took place in the private chapel of the Castle, her Majesty and his Royal Highness Prince Albert standing as sponsors. The Queen of Windsor performed the ceremony. In the evening the Royal dinner-party included her Royal Highness the Duchess of Kent, the Earl of Aberdeen, the Lady in Waiting to the Duchess of Kent, the Baroness de Speth, the Hon. Mrs. Grey, the Hon. Mrs. Gordon, and the Hon. Arthur Gordon.

On Wednesday the Queen, attended by the Countess of Gainsborough, walked in the Home park, and inspected the new grounds at Frogmore. His Royal Highness Prince Albert, attended by Colonel the Hon. C. B. Phipps and Captain du Plat, left Windsor by a special train of the South-Western Railway for London. His Royal Highness attended at the Duchy of Cornwall Office in Somerset-house, and returned to Windsor in the afternoon.

On Thursday the Prince of Wales completed his thirteenth year. The Queen had a dinner party on the occasion.

Lord Byron and Mr. F. Cavendish have succeeded Lord De Tabley and Major-General B. Drummond as the Lord and Groom-in-Waiting.

A Court mourning of ten days has been ordered for the Queen Dowager of Bavaria.

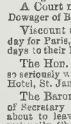
Viscount and Viscountess Palmerston will leave town on Monday for Paris, whence they proceed direct to St. Cloud, on a visit of a few days to their Majesties the Emperor and Empress of the French.

The Hon. H. Annesley, of the Scots Fusilier Guards, who was so seriously wounded at the battle of the Alma, has arrived at Ellis's Hotel, St. James's-street, from the seat of war.

The Baron de Geer, who for a long period has filled the office of Secretary of the Swedish Legation at the Court of St. James's, is about to leave London for the Hague, having been appointed, provisionally, Charge d'Affaires at that Court of the Netherlands. The Baron will be succeeded as Secretary of Legation in this country by Baron de Wrede, whose arrival from Sweden is shortly expected.

OBITUARY OF EMINENT PERSONS.

REAR-ADMIRAL NICHOLAS LECHMERE PATESHALL



THIS gallant officer, who died at Hereford, on the 18th ult., was born on the 13th of September, 1781. He was fourth son of the late Edmund Pateshall, Esq., of Allensmore-house, county of Hereford, and succeeded to the estates of his brother, Edmund Burnam Pateshall, on the 11th June, 1848.

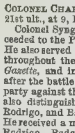
The family of Pateshall boasts of high antiquity in the county of Northampton. In the sixth year of Richard I. we find upon record the name of Simon de Pateshall, High Sheriff of that shire; and Camden mentions his descendants as performing the same duty during several successive reigns.

Edmund Lechmere, Esq., son of Soudamore Lechmere, Esq., of Fownhope, by Jane, his wife, sister and heiress of John Pateshall, Esq., of Allensmore, inheriting his uncle's possessions, assumed the surname and arms of Pateshall only Admiral Pateshall, the subject of this memoir, was fourth son of this gentleman, by Amy, his sister and heiress of William Burnam, Esq., of Westerton Court, Herefordshire.

He entered the Navy in August, 1795, as a third-class volunteer, on board the *Indefatigable*, 46, Captain Sir Edward Pellew, with whom he continued to serve in the same frigate, and in the *Fisgard*, 38, on the Home and Mediterranean stations, until June, 1801—the greater part of the time as midshipman and master's mate. In the former ship he assisted, in April, 1796, at the capture of *Utrecht*, of 36 guns and 255 men; and after a chase of fifteen hours, and a close action of an hour and forty-five minutes, of *La Virginie*, of 44 guns and 340 men. He was also, on the 18th of January, 1797, present, in company with the *Amazon*, 36, in a very gallant engagement of ten hours, which terminated in the destruction, with a loss to the *Indefatigable* of nineteen men wounded, of the French 74-gun ship, *Les Droits de l'Homme*. The *Impetueux* formed part, in June and August, 1800, of the expeditions to Quiberon and Ferrol. At Quiberon, where he was wounded in blowing up a battery, Mr. Pateshall was actively employed with the boats of the squadron, and at Ferrol he landed with the naval brigade. During the term of his attachment to the *Indefatigable* and *Impetueux*, he contributed to the capture and destruction, including the vessels already mentioned, of as many as twenty-three of war, carrying in the whole forty-six guns and 2987 men. In June and September, 1801, we find him successively joining the *Robust*, 74, Captain William Henry Jervis and *Ville de Paris*, 110—of which latter ship, bearing the flag of Rear-Admiral Thomas Cornwallis in the Channel, he was created a Lieutenant, 20th November in the same year. From this period to August, 1816, he was, with the exception of six months, continuously and actively employed in various parts of the globe, and his subsequent commissions bear date as follows:—Commander, 24th July, 1811; Post Captain, 18th February, 1815. He accepted the retirement 1st Oct., 1846; and became Rear-Admiral on the retired list, 6th Nov., 1850. He received a medal with three clasps. He, also, on the 15th Nov., 1802, on his return to his native county, for a brief period, received the freedom of the city of Hereford in testimony of his "meritorious services." He is succeeded in his estates by his niece, Ann Elizabeth, only child of his late brother, William Pateshall, Esq., who married Evan Thomas, Esq., and who, according to the directions in the will of the late Edmund Pateshall, Esq., assumed the surname and arms of Pateshall.

JEDEDIAH STRUTT, ESQ., OF BELPER.

THE death of this much-respected gentleman occurred at his residence, Belper, county Derby, on the 1st inst., at the age of 69. Mr. Strutt was son of the late George Benson Strutt, Esq., of Belper; and grandson of Jedediah Strutt, of Derby, who joined Sir Richard Arkwright in the great invention that raised both to wealth, and proved a source of national power. The manufactory and cotton-mill of the Messrs. Strutt at Belper are remarkable for their pre-eminence in mechanical improvements, and for the great benefit conferred by them on the locality. In 1832 the Duchess of Kent and her Majesty, then Princess Victoria, visited Belper, on their tour through the county of Derby. Mr. Jedediah Strutt, whose death we record, was a magistrate and deputy-lieutenant. He married—first, April 12, 1810, Susannah, only daughter



of Joshua Walker, Esq., of Clifton-house, near Rotherham; and, secondly, May 16, 1850, Jane-Roberts, youngest daughter of Myles Sandys, Esq., of Graythwaite-hall, co. Lancaster, and widow of the Earl of Sligo. The present head of the Strutt family is the Right Hon. Edward Strutt, of Kingston, Notts.

COLONEL CHARLES SYNGE.

COLONEL CHARLES SYNGE, of Mount Callan, county Clare, died on the 21st ult., at 9, Holles street, London.

Colonel Synge was appointed to the 10th Hussars in 1809, and proceeded to the Peninsula, on the Staff of Sir Robert Ferguson, in 1810. He also served as Aide-de-Camp to Lord Lynedoch and Sir Denis Packe throughout the war, and was mentioned on several occasions in the *Gazette*, and in General Orders, particularly in those which appeared after the battle of Salamanca, where he volunteered to lead the storming party against the heights of Arepiles, and was severely wounded. He also distinguished himself in the actions of Barba de Ponco, Ciudad Rodrigo, and Badajos, where he acted under the Duke's immediate orders. He received a medal with nine clasps, for the battles of Busaco, Ciudad Rodrigo, Badajos, Salamanca, Pyrenees, Nive, Nivelle, Orthès, Toulouse; and was in several minor actions. He was also entitled to two Portuguese orders.

Colonel Synge was second son of the late George Synge, Esq., of Rathmore, Kings County; who was brother of the late Edward Synge, D.D., of Syngefield; of the late Sir Samuel Synge Hutchinson, Bart.; and of the late Sir Robert Synge, Bart., of Kilbrogh, co. Meath. He was born 17th April, 1788; and married Caroline, daughter of P. Giles, Esq., by whom he leaves issue.

THE RAFT.*

BY MRS. T. K. HERVEY.

ALL shrouded by the blackening fog—
Sea-borne, without a sail—
Their prayers upon our quivering lips
Burst in one loud wail—
Two living days, two deathless nights,
We swept before the gale!

Each part billows seared us not—
Dear-bought release! Fear;
Time was annulled—He, e was no far,
Eternity so near:
The Earth slipped from us silently,
As an old forgotten year.

No room was there for one sweet thought
In all that boundless space:
In Memory's eyes—so fixed, so stern—
Our souls could find no grace.
The sins of all our lives rose up,
And mock'd us to the face.

Grim forms, torn frantic from their hold,
The cruel waters waft,
Till one dread cry along the sea
Rolls echoing fore and aft.
God! who shall be the last to stand
Alone upon the raft?

It came; the sickening horror grew
Like shape that thrill our sleep:
As dropped each corse, these eyes beheld
The ravening fishes leap.
Of seventy souls, one only left
To brave the angry deep.

With streaming hair, the dead—stone-eyed—
Peered where the raft was riven;
And through the chinks white faces glared,
Defying Fate and Heaven;
Till seemed the planks whereto I clung
By the snaked Furies driven.

Long gazed I, soul-struck and appalled;
I could not bless nor pray:
My life, like ships on rapids borne,
Went down another day,
Where, robed in fog, the Levite sun
Passed, scornful, on his way.

Nothing reeked of shows or signs—
Of mists that cleared and parted;
Nor rush of winds, nor chase of waves,
Nor bid as my presence started.
No voice brought more through my lost world—
Bread to the hungry-hearted.

Cold, gasping, tortured, and athirst,
My maddening senses failing,
Scarce could this arm the signal wave,
Some chance-brought rescue hailing:
When, lo! a goodly ship, full trim,
Across the moon-wake sailing!

Cast prone on the redeeming deck,
Sunk slow in shivering sleep,
By the meek tears, down-dropping warm,
I felt the Angels weep;
And saw, at last, with eyes of soul,
God, moving on the deep!

THE UNITED STATES GRINNELL EXPEDITION.—The statement that the American expedition under Lieut. Kane has been heard of this year, which has appeared in most of the London papers, proves to be a mistake. The letter of Dr. Hayes, who is attached to that expedition, bears the wrong date of 1854, instead of 1853. It was written in July of last year, from Baffin's Bay, a few weeks only after leaving New York, when the American expedition was entering upon its sphere of search, and this is shown by the very letter itself, which enlarges upon the preparations for the future. The expedition has passed one winter friendly in the far north, beyond the reach of communication, and had not returned to the United States at the date of the last advices from it; it may be expected throughout the present month. It is understood that should Lieut. Kane not return this season, the American Government will take up the matter, and probably despatch screw-propellers to his assistance.

OPENING OF THE ROYAL DANISH RAILWAY.

ORDER OF THE DANNEBURG, GIVEN BY THE KING TO MR. PETO.

IN our Journal of the 7th of last month we gave some details and illustrations of the inauguration of the Norwegian Grand Trunk, then recently completed by Mr. S. M. Peto, M.P., and his associate contractors and capitalists, for King Oscar and the Government of that country. We have now but no less agreeable duty of recording a still further development of railway progress among the populations of the Scandinavian kingdoms, through the same British instrumentality, and a still more emphatic Royal recognition of the services so conferred on our northern neighbours by our enterprising countryman, the member for Norwich, and his colleagues. The "Royal Danish" was opened by Frederick VII., King of Denmark, his leading Ministers, and the diplomatists of his Court, on Oct. 25th, under circumstances that left nothing to be desired, whether as regards the éclat that surrounded the festivities in the eyes of the Danish sovereign and his subjects, or the proofs afforded of the soundness of the original expectations of the projectors as to the line being availed of by the trading and travelling classes, to the consequent prospective remuneration of the proprietary.

Mr. Peto's party consisted of Mr. G. P. Bidder, the Engineer of the line, and his collaborateur, Mr. Jacob Bazley White, Deputy Chairman; and Mr. F. Geach, the zealous Secretary of the "Royal Danish" Company; Mr. J. V. Gooch, Superintendent of the Eastern Counties (builder of the "Royal Danish" locomotives); together with Messrs. Laurence and Risk, and others, the private guests of Mr. Peto. These gentlemen left Lowestoft on Saturday morning, the 19th ult., on board the North of Europe Steam Navigation Company's vessel *Cygnus*, Capt. Raymond, R.N., but specially "presided over," so to speak, on this occasion, by the Company's Manager, Captain W. S. Andrews. As the "Majesty of Denmark" was to be entertained on board, the *Cygnus* was provisioned with delicacies worthy of the regalement of a King, and with all the necessary appliances for serving them with befitting elegance and splendour. Mr. Howett, proprietor of the Royal Hotel, Lowestoft, whence the repast was furnished, personally superintended the arrangements of the tables. The vessel was further provided with a profusion of gorgeous streamers, flags, and banners. These, when subsequently unfurled in Tonning harbour, had an effect altogether unique amid the adornments of a like kind which all the craft in the port exhibited; and she further carried with her an assortment of fireworks—not only sufficient for her own *feux de joie*, but which permitted the inhabitants of Flensburg to be favoured with a pyrotechnic display which much delighted the natives; between whom and the English the best possible feeling exists. This is owing, not only to the English capital poured into their country both by the formation of the line, and by the North of Europe Steam Company opening up numerous British markets for native produce, but to the conciliatory spirit and excellent tact of all the English railway officials and *employés* resident in Denmark.

Through the weather was anything but calm, the *Cygnus* made the run in twenty-six hours from Lowestoft to Tonning. In this commodious and finely-situated coast terminus of the Railway, the benefits of its position are becoming evident, in its being the marine head-quarters of the fast-growing traffic between the two countries. It is by way of Tonning that the capital of Denmark, and consequently nearly all the

* Suggested by an incident recorded during the loss of the *Arctic*.

WOMAN OF OSTENFELDT.

Baltic ports, may be reached with a great saving of time, distance, and inconvenience, as compared with any other existing or possible route; and not only in summer but in winter, when Copenhagen is inaccessible by water, viâ Hull; while by the junction which the Royal Danish effects with the Kiel and Altona lines, all those great arteries of German and Prussian Railway Continental communication radiating from Hamburg, may be said to be placed at the command of the Danes. Moreover, it is at Tonning that are concentrated for exportation at Lowestoft, and thence direct for London, after having been fattened on their pastures, those immense herds of cattle which stud the fertile plains of Jutland. These animals likewise contribute to the exports of Tonning a most important item—namely, butter; the increase of which, between 1851 and 1853, has been from 307 to 164,857 tubs. In the same period the exportation of sheep has risen from 5623 to 16,131; and at the expiration of the current year this ratio will have been far surpassed: while the trade in wheat and cereal produce generally is also augmenting in a like degree. Hence, with so prosperous a present, it is obvious how flourishing a future is in store for this thriving port. The line is carried to its very jetty, as is also the case at Lowestoft—a most important arrangement for preserving the cattle from deterioration through having to be driven any distance either before or after being on ship-board.

Having duly inspected the town, the English party started at noon on the 21st from Tonning—thirty miles from Schleswig, and eleven from the mouth of the Eider—for Flensburg, forty-two miles inland, passing through the intermediate town of Husum (population 5000). Flensburg, containing about 18,000 inhabitants, is a remarkably well-built, beautifully situated, and highly interesting town. It combines many of the most quaint features of a mediæval age, in the aspect of its buildings and the usages of its people, with evidences of an observant attention to modern improvements. By the overland route of the "Royal Danish" a dangerous (and in winter impracticable) navigation of five hundred miles by the Skaw and Kattegat is saved, and with it the Sound dues, amounting, on fine goods, to the whole transit cost by railway. The port charges at Flensburg are exceedingly small, and the facilities for all shipping purposes admirable—the harbour being completely landlocked twenty miles from the coast, and there being ample depth of water, and no rise or fall of tide, requiring expensive contrivances for loading or unloading. The accommodation at Esch's Hotel, at which the English party stopped, show that Flensburg is quite on a par with towns of a like size in countries boasting of a more luxurious civilization than Denmark, and it is in course of being lighted with gas.

The Flensburgers were most enthusiastic in the loyalty of the reception of their King, in whose honour, and that of his Consort, Louise, Countess Danner, who accompanied him, immense preparations were made. Rejoicings of every kind were kept up incessantly for the whole period he remained in the town and neighbourhood, nearly four days and nights. His Majesty—a fine-looking man, of imposing mien and soldierly bearing, wearing on the left breast of his

THE LUTHERAN BISHOP OF TONNING.

military uniform the star of the Order of St. Vladimar—had in his suite his Excellency, Charles, Comte de Malthe, Minister for the Duchy of Schleswig; M. Frederick Ferdinand de Tillisch, Minister of the Interior; Count Geill. Chas Eppigner Sponeck, Minister of Finance; a large number of sides-de camp and superior officers of the household, together with the ladies in waiting on the Consort. Among the military, naval, municipal, and other authorities, by whom the King and Consort were received in great state on landing, were their Excellencies Von Rosen and Von Baluw President of Flensburg and Governor-General of Schleswig; his Royal Highness the Duke of Glucksbourg, and Prince William of Glucksbourg. The Royal party having remained for the night at Kayasser's Hotel, specially prepared for the occasion, his Majesty, next morning received the English railway party with great courtesy, surrounded by his staff; and having expressed how much he was gratified by the unexpected promptitude with which the railway had been completed, proceeded to the

WOMAN OF TONNING.

station, with military and civic pomp and popular rejoicing. Mr. Fete, in his Deputy-Lieutenant's uniform, and his English colleagues, having duly received the King and Countess, and the Ministry, and taken their seats with them in the Royal carriage, the train set out, the line on both sides thronged with admiring multitudes, and his Majesty no less pleased at the gratification his presence among his subjects on so auspicious an occasion created. At Husum, the Amptmand, or President, surrounded by all the local notabilities, and numerous troops, read a congratulatory address to the King; who, having suitably acknowledged such attestation of loyalty, proceeded with his Consort to the Castle of Husum, where the President of the district resides. Meanwhile, the officials from Copenhagen, and others who remained behind, profited by having explained to them the nature of the advantages likely to accrue to their country from the "Royal Danish" in its entirety. They saw that from Husum a branch proceeds through the important town of Schleswig, containing 13,000 inhabitants, to the town of Rendsburg, on the banks of the Eider, with which picturesque river, at that spot the water conveyance known as the Schleswig-Holstein Canal forms a junction; the Husum and Rendsburg branch of rail here also forming a junction with the Kiel and Altona lines, and so with the great Germanic and Dutch chains of intercommunication springing from thence. With the Rendsburg branch the length of this, the first section of the "Royal Danish," from Tonning, is 72 miles; constructed at a total cost of £540,000, including working plant, stations, and every contingency—an extremely moderate outlay, considering the difficulties of the country traversed, the transport of material, and other circumstances. So economic an expenditure, joined to the fact of the contractors having a lease of the line for fourteen years, at six per cent, with half the profits, affords a tolerable assurance of lucrative reimbursement.

The King, Consort, and attendants, having returned from the Castle of Husum, the train resumed its progress to Tonning, where his Majesty—after the reception of the burghers, as at Flensburg and Husum—proceeded to partake of the hospitality of his railway hosts on board the *Cygnus*—Captain Andrews enacting the part of Amphytrion to the

ARRIVAL OF THE KING OF DENMARK AT FLENSBURG.

THE KING OF DENMARK VISITING MR. PETO ON BOARD THE "CYGNUS."

Royal guest and suite. The whole company, English and Danish, numbered thirty-six individuals, which was all the saloon of the *Cygnus* would accommodate; but on shore sixty of the King's and Company's officers and others, including the British and Prussian Consuls, dined together. On board the *Cygnus* the toasts proposed were as follow (no acknowledgment being made in words, it being contrary to Danish etiquette to do so):—1st, The Health of the King, by Mr. Peto, in a brief encomiastic speech, thanking his Majesty for naming the Railway after himself, and supporting it by his Royal favour from the moment the project was first submitted to him; 2ndly, The Health of Her Most Gracious Majesty Victoria, Queen of England, by Frederick VII., King of Denmark; 3rdly, the Consort of the King, Louise, Countess of Danner, by Mr. J. Anderson, Deputy Chairman of the Royal Danish Railway; and, 4thly, Mr. Peto, by the King of Denmark; who, just previous to the commencement of the banquet, had summoned the member for Norwich into the saloon, and, assisted by Count Maltke and the Chancellor of the Order, made him Knight Commander of the Dannebrog. In bestowing upon him the insignia of this most ancient and distinguished Order—one of the noblest, and, we believe, the most ancient chivalric institutions in Europe; taking precedence of the Garter in point of time, and, like the British Order of the Bath, applicable to the reward of either civil or military services—his Majesty desired that the recipient might regard it not merely as a formal memorial of approval from a Danish Sovereign in whose reign a great Danish work had been executed by a great British capitalist and contractor, but as a souvenir of the King's personal esteem and regard for an amiable, liberal-minded, and accomplished English private gentleman.

Though contrary, as we have said, to Danish etiquette, at least in the presence of Royalty, to make any verbal acknowleigment of a toast, the King, on the breaking up of the dinner-party on board the *Cygnus*, reiterated his sense of the handsome compliment conveyed by so *recherché* a banquet. His Majesty then, in the same pomp, and amidst the same acclamations as accompanied his arrival, returned to Flensburg, where he went to the theatre in state. Throughout Thursday there was a renewal of the rejoicings out of doors, and a grand entertainment in the evening given by the King to the principal inhabitants of Flensburg, at the Town-hall, whereat his English hosts of the *Cygnus* the day before, became his guests. The health of the King and the Royal Consort, proposed by M. Maltke and M. Sponneck respectively, being the only toasts. Returning to his hotel, his Majesty was greeted with the most varied evidence of the Flensburgers' attachment. Beneath the windows, at which sat the King and Consort, there was sung the National Anthem (very similar to our own) by a choir of no less than 5000 voices. Then there passed a procession of 500 torch-bearers, in costumes *au outre*, and with gesticulation as singular, as the Anabaptists in the "Prophète;" and, in short, endless national exhibitions of a like kind.

The following day, Friday, his Majesty requited his loyal liege by a ball at the Town-hall. The Danish Monarch, on this occasion, exchanged partners for a moment in the promenade with every lady in the room, an act of Royal condescension that gave, of course, the highest gratification. On Saturday his Majesty and suite made an excursion to Schleswig, the nearest station to which is Kloisterking, where there was a vast multitude assembled; amidst whose plaudits he proceeded to the ancient Castle of Gottorp, and to the magnificent Cathedral; and, having partaken of a dinner, which the authorities provided, he made a tour through the richly-illuminated and most picturesque town of Schleswig. His inspection of these attractions lasted till ten o'clock at night, when the King started for Flensburg, where he arrived at midnight, the town being in gala costume, and all the inhabitants on the *qui vive* for his coming.

On the following day all Flensburg once more turned out for the

(*Continued on page 468.*)

THE KING OF DENMARK DINING ON BOARD THE "CYGNUS."

NAVAL AND MILITARY INTELLIGENCE.

MORE TROOPS FOR THE CRIMEA.

The reinforcements for our army in the Crimea to the amount of 4000 men—are for the most part on their way to the East: 1800, including the levies for the Guards, proceeded by the *Queen of the East* steamer from Portsmouth; the *Jura* steamer took 1000 from Cork; the *Orinoco* steamer conveyed 600; and the *Cleopatra* will take out 700. A mark of the amount of casualties in the several regiments in the East. In addition to the 7th Fusiliers, 46th, and 47th Regiments, which have joined Lord Raglan's army, and constitute a division under Sir G. Brown, now before Sebastopol. Officers, artillery, and cavalry are also required for the service, and the Commander-in-Chief has given orders that the requisite number of officers for the Cavalry are also to be sent out.

The Artillery, of that branch of the service in the Crimea, is defective, and is to be forthwith completed. Heavy Brass Ordnance, known as 68-pounders, and 100 and 200 strong, has, in reality, there are but two, which are not yet mounted. The 8th Dragoon Guards, which left Ireland for the East on the 25th ult. are [illegible] known to be very slow and unwieldy in their movements, but the men remained of the officers and men were incorporated with the 5th Dragoon Guards. The 1st Royal Dragoons and Inniskillings, as it will be seen, will leave many more than their horses; and the 2nd Dragoon Guards the only effective heavy cavalry regiment is the Greys, [illegible] condition. The Light Brigade [illegible] to be reinforced by the 8th and 11th Hussars, and 17th Lancers, are, at present, [illegible] pretty [illegible] less, although the 17th have [illegible] of the 25th ult are [illegible] known to be very slow and unwieldy in their movements, but they must be of service [illegible] with the pace of ensuing [illegible] slow and [illegible] but the [illegible] sort of horses, will [illegible] some delay in sending out the reinforcements. The cavalry regiments to be sent out have not yet been [illegible] Some time are the 1st, 2nd, 3rd, and 7th Dragoon Guards (Carabineers), [illegible] 4th Light Dragoons, 7th and 15th Hussars [illegible] cannot [illegible] obtained 16th Lancers, and 7th Hussars. All one of the heavy regiments, are the most likely to be dispatched.

WINTER CLOTHING FOR THE EAST.—Some idea may be formed of the magnitude of the account of winter clothing sent out, when we state that upwards of 70,000 [illegible] of woollen socks, 90,000 woollen jerseys, 60,000 pairs of flannel drawers, and 80,000 pairs of gloves have been sent [illegible] and further supplies [illegible] Arrangements [illegible] to be made to [illegible] which will be sent [illegible] already [illegible] by the [illegible] and the [illegible] with a zeal for the [illegible] rubbers [illegible] credit, have, at the request [illegible] government, completed [illegible] winter clothing, which had been [illegible] by the means.

A NEW FIELD BATTERY Z has been formed of the [illegible] Artillery at Woolwich, and is to be named the Field Battery of the [illegible] Drivers to be young men of [illegible] non commissioned officers and [illegible] are [illegible] to be ready to [illegible] up any vacancies [illegible] batteries of [illegible] Royal Artillery.

INDIAN VESSELS AND REGIMENTS.

A return has been [illegible] Wade, Esq., [illegible] Board, [illegible], of the number of vessels [illegible] Crown on behalf of the Crown, [illegible] Mitchell's office, [illegible] on Friday week, as to whether, at the time of the declaration of war by her Britannic Majesty against the Emperor of Russia, certain letters of [illegible] which were seized on behalf of the Crown, did or did not belong to the [illegible] the fittings consisted of masts, yards, &c., seized at Messrs. [illegible] Shilwell, and copper coals, &c., seized at the [illegible] Limehouse and Smithfield. It appeared that they were manufactured [illegible] and *Tortor*, which will be removed [illegible] Thames Police [illegible] by the Russian Government. At the time of the seizure they were incomplete; [illegible] the Russian vessel had visited the work [illegible] and had approved of [illegible] Messrs. Ferguson's contract [illegible] between Russia on the one side and England and [illegible] assignment of the articles was made [illegible] of recruiting them. [illegible] of the Czar; but, nevertheless, [illegible] seized on behalf of the Crown, and [illegible] whether, at the time of [illegible] were the property of the Emperor of Russia. Messrs. Ferguson's contract [illegible] of which they had received £5,000, in [illegible] sum of the other £10,000 had been paid. After hearing the evidence of the parties, who produced the contracts, the [illegible] found [illegible] were, at the time they were seized, the property of [illegible] and, therefore, that the seizure was lawful [illegible] Government which was resorted to. An inquiry will take place in Kent as to the seizure of the vessels.

NATIONAL SPORTS.

THE racing season of 1854 "still drags its slow length along;" but (as Hoylake is a mere amateurs' meeting) it at last comes to an end on Wednesday next, at four p.m., "by Shrewsbury clock." As a Clerk of the Course, Mr. Land will be made himself no foul reputation; and the Shrewsbury Handicap (61 subs.). the Column Handicap 5), the Copeland Nursery (28), the Welter Stakes (10), and the Hurdle Race (33), all attest his anxiety to show sport here on Tuesday and Wednesday. It remains, however, to be seen whether he can tempt out such an animal again as he did this time last year, when the wondrous Virago ran only fifth here in her maiden race. This "final close" of racing cause created on Thursday by a steeplechase day, the principal event of which has 20 subscribers. Rose, who beat Redwood for whom Mr Land is *said* (?) to have lost season refused 1000 guineas—at 34 lbs. this week by forty lengths, is very favourably in, despite her penalty. It was thought that the Needwood party "went for Lincoln;" and the speedy Rosa's owner was no doubt glad to buy her [illegible] Liverpool that he only took £100 to £10 about her. As it was, she fell twice during the race.

Ireland is big with anticipation of a steeplechase match, for 75 sovs. a side, over the Conyngham Castle Course, in the second week of December, between Mrs. M'Donough (the wife of Allan M'Donough, the crack Irish steeplechase [illegible] Knight of Glyn. Seaman and Victory are the two animals engaged. Mr. M'Donough is, we hear, well known for her exploits with Tip Queen; and, as she has [illegible] it is just half a century since Mr Thornton rode her matches against Frank Buckle and Mr. Flint, over Knavesmire.

The coming Races are rather [illegible] Newmarket Open commences on Monday, and lasts four or [illegible] Two great matches are on the list, in one of which the 3000 [illegible] Admirable as, we believe, engaged. The dispute about Ratsplan, and [illegible] merits is also likely to be soon decided, as [illegible] property protests against the ungentle practice of challenging a conqueror in the field, and trying to "tarnish his still green laurels"—offers to match Ratsplan, for one course or the best out of five, for 100 sovs a side, and if desired to run speed to the late Hardley (Salop) Meeting stands for Wednesday; the Caledonian St. Leger for Thur-day, &c.; and the Westward (Cumberland) for Thursday.

There are no boating fixtures of any importance beyond those on the Isis and Cam, where the rivalry of every "Bump" has thrilling interest for old University men, who, in their [illegible] breathless along the [illegible] side, and cheered the rival crews.

As regards sales, the next week has not very much to note it. Mr. Rogers [illegible] will be sold at Birmingham on Friday; and Lord Exeter's come to the hammer at Tattersall's for the third and last time on Monday. After the cullings which they have had, by private contract and two Newmarket sales, they only number Nutshell, four [illegible] and two yearlings. We are very glad to hear, on the best [illegible] that Lord Exeter has not sold Lockwell (whose winnings amount to £7016), or any of his brood mares; and that his absence from his favourite haunts, in the character of owner, will only be temporary. Besides these [illegible] will be sold at Hollingbourne, Little Midas and three other sires [illegible] going to let his Newmarket stables to his trainer Harlock in the meantime, who will take up [illegible] public trainer. The amount he has won for his township, during [illegible] seven years he has trained for him, [illegible] been very considerable; and, independent of his high [illegible] and talent, he has the [illegible] character [illegible] and the [illegible] heading a sanguine owner into the white tie, while no man knows better when he has a [illegible] in hand. We hope [illegible] will be seen on the [illegible] [illegible] [illegible] ment" as he ever led [illegible]

The general racing news of the day [illegible] of course, but this, alas! is to be gleaned in part from Lord Raglan's [illegible] despatches, which tell how Captain Rowley, one of our most popular [illegible] gentlemen rode and led [illegible] in the trenches he [illegible] [illegible] Massarosa [illegible] Bologne, will [illegible] Mr. Payne and Greville [illegible] Nat's winning [illegible] no relie behind him in Newmarket but his picture. At [illegible] 100 each, or £200 the pair, [illegible] Setting on and [illegible] to. The Reiver lately fetched [illegible] and [illegible] 400 guineas. On the strength of Andover [illegible] Admit Ray Middleton's prize next year will be 50 guineas, while Pyrrhus the First and Surplice will be at 40 guineas. Stockwell at 30 guineas, and Newminster (who goes to Tokenhill Castle), at 10 guineas. The entries for the coming stakes at Newmarket, &c., have not been very great, and the Blank Duck 1000 Triennial Stakes at York (1857), is reduced to a match between Gardyloo and Mr Mare. The Doncaster entries we have not seen, but we observe that the Curragh September Queen's Plate is thrown open to [illegible] Saberz and Thor remain in Newmarket under Smith. [illegible] Rose, who has been [illegible] will be lady for it [illegible], and losers still maintain that Natought to have gone to him with Rattle at the Duke's Stand, instead of waiting so long.

LIVERPOOL AUTUMN MEETING.—TUESDAY.

[illegible] Bourgeois, 1. Ton o, 2.

MONEY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

A [illegible] Crimea is not quite so satisfactory as could be desired, the market for most Nation Securities, this week, has been inactive, [illegible] downward tendency. We may observe, however, that [illegible] been effected on account of the public, and that the amount of stock in the hands of the jobbers is not to say [illegible]

The imports of the precious metals have been under £1 0 000, whilst the demand for gold on Continental account has been comparatively [illegible] took in the Bank of England is [illegible] we are of opinion that [illegible] ments of gold will shortly cease to [illegible] supply cannot [illegible] be much longer. There has [illegible] money, and decided acceptance [illegible] have been [illegible]

[illegible] of Trade of the value of the shipments of [illegible] United Kingdom during the [illegible] satisfactory. The total amount [illegible] compared with 1853, the increase [illegible]

[illegible] average business was transacted in the Consol-market on Monday. The Three per Cents were done at 94 ¾ ¾; the Three per Cents Reduced, 93¾; the New Three per Cents, 93¾ ¾; and Consols for Account 94⅞ ⅝. Long Annuities were 6 5-16. India Bonds were 10s.; Exchequer-bills, 6s. to 9s. prem. On Tuesday Bank Stock was 215¾. The Three per Cents Reduced marked [illegible] The Three per Cent Consols [illegible] the Three per Cents, 93⅝ ¾; and the New Two and a-Half per Cents [illegible] Long Annuities, 1860, 4⅜; India, [illegible] Bonds, 13s. 10s.; Exchequer-bills, [illegible] Long Annuities 4 7-16; India Bonds, 14s. to 15s. prem. Exchequer-bonds realised 100. On Wednesday Bank Stock was 215¾. The Three per Cent Consols [illegible] Three per Cents Reduced, 93¾ to 93⅝, the New Three per Cents, [illegible] Long Annuities, 1860, 4⅜ ⅝; Ditto 1885, 4 1-16. Exchequer-bills [illegible] per Cent. [illegible] and Bonds [illegible] Bank Stock, 215 to 214¾; the Three per Cents Reduced, [illegible] the New Three per Cents, 93⅝ ¾; Long Annuities 4 7-16; India Bonds, 14s. to 15s. prem. Exchequer-bills were 6s. to 9s. prem. On Thursday the tribute-money for the [illegible] was signed in the usual manner. The bondholders are informed that the firman, authorising the Pacha of Egypt [illegible] of the tribute-money regularly to the [illegible] Three per Cents Reduced, 93¾ to 93⅝, the New Three per Cents, [illegible] Long Annuities, 1860, 4⅜ ⅝; Ditto 1885, 4 1-16. Exchequer-bills [illegible] per Cent. [illegible] and Bonds [illegible] Bank Stock, 215 to 214¾; the Three per Cents Reduced, [illegible] the New Three per Cents, 93⅝ ¾; Long Annuities, 1860, 4⅜; India Bonds, 14s. to 15s. prem. Exchequer-bills were 6s. to 9s. prem. On Friday [illegible] per Cents, 49; Portuguese Three per Cents, [illegible] Three per Cents, [illegible] Five per Cents, 85¾; Spanish Three per Cents, 37¾; Ditto, New, 19¾; Turkish Six per Cents, [illegible] Second Series, [illegible] and-a-Half per Cents, 61; Dutch Four per Cents, 93¾; Venezuela Ordinary Bonds, 19¾; Ditto Deferred, 10¾; Buenos Ayres Six per Cents, 89; Swedish Four per Cents, 87; and Belgian Four per Cents, 91.

Joint-Stock Bank Shares have been steady, and prices are fairly supported:—Chartered Bank of Asia, 4¾; English, Scottish, and Australian Chartered, 14¾; London Chartered of Australia, 25¾; London Joint-Stock Bank of Australia, 7¾.

A fair average business has been transacted in Miscellaneous Securities, as follows:—Australian Agricultural, 40¾; Australasia, 14¾; Canada Six per Cent Bonds, 110¾; Crystal Palace, 8¾; Ditto, Second West India Docks, 121; London, 107¾; Victoria, 14¾; Ditto, Shipping Company, 13¾; Peel River Land and Mineral, 3¾; Ditto, Second Australian, 3¾; Scottish Australian Investment, 3¾; Canada Land Shares have been steady:—Ashton and Oldham Loan and Trust, 15¾; Birmingham, 93¾; Coventry, 209; Derby, 80; Grand Junction, 87¾; Leeds and Countess Shares, very little [illegible] has been doing. City of London, 100; Equitable, 26; Great Central, 11¾ ex div.; Imperial, 90 ex div.; Hatchil, 75; United General, 19¾; Westminster Chartered, 27¾. The value of Insurance Companies' Shares very little

AMUSEMENTS, &c.

THEATRE ROYAL HAYMARKET.—Last Six Nights of the Spanish Dancers, and the inimitable Senora Nena, who appears at Liverpool next Monday. Monday, Wednesday, and Friday, John Bull. Tuesday and Thursday, the Irish Ambassador; in both of which Mr. Hudson will appear. On Saturday, first time, a new piece, by Samuel Lover, Esq., to be called the Sentinel of the Alma; and last Night of Senora Nena.

ROYAL PRINCESS' THEATRE.—Monday and Thursday, the Courier of Lyons and Schamyl. Tuesday and Friday, Faust and Marguerite and Lyons Mail. Wednesday, the Certain Brothers and Schamyl. Saturday, Living too Fast, Prune Village to Court, and Schamyl.

GREAT NATIONAL STANDARD THEATRE, Shoreditch.—NOTICE.—The greatest Comedian of the day, Mr. WRIGHT, of the Adelphi, will POSITIVELY APPEAR TWO PIECES every Evening. Also, the remarkable FLEXMORE and Miss AURIOL, of the Princess's, in a Grand Ballet.

ONE SHILLING.—THE SULTAN and his COURT, in addition to all the highly-interesting Groups, giving a faithful representation of Turkish Life and Manners, at the Enlarged Bethnal Green Museum, for Ten days only, commencing on Monday, the 6th inst. Open from Ten a.m. till Ten p.m., as the ORIENTAL REBELLION and TURKISH EXHIBITION, Hyde-park corner, Piccadilly. Admission 1s. Saturdays, 2s. 6d.; Children 1s. 6d. Family Tickets for Five 10s. Hand Book, with Illustrations, to be had in the Gallery, One Shilling.

ORIENTAL ENTERTAINMENT.—SYRIA, NINEVEH, and the CHALDEANS.—ROYAL PANOPTICON, Leicester-square.—An Oriental Entertainment, comprising Panoramic Illustrations of North Syria, Assyria, Nineveh, and the Modern Chaldeans with specimens of Oriental skill, will, from and after Monday next, be given on each afternoon at the Royal Panopticon during the time and for the months which The Entertainments consist of three parts, and will be given on Monday, Wednesday, and Saturday, at 3 p.m., and on Monday, Thursday, and Friday, at 7 p.m. Also a Cosmorama of St. Peter's-Rome, including a Portrait of the Sculptor Nicholas. The Luminous and Chromatic Fountain, throwing Illuminated Water 100 feet high. Dioramic and Diaramic Views of Venice. A splendid Collection of Chromatropes Heinicke's Diving Apparatus. The Stereoscope 1 gift, &c. Scientific Lectures and Demonstrations by Professors, and Performances on the Grand Organ by M. Lemmens. Last Saturday's well take place at the Extraordinary Exhibition Morning Evenings, November 13th, 20th, and 27th at Eight o'clock.

Admission to the Whole [illegible] Children under Ten Years of Age Half-price. Open from Ten a.m. till Ten p.m.

ZOOLOGICAL GARDENS, REGENT'S-PARK. The collection of Living Animals includes a magnificent series of Lions, Lion Whelps Clouded Tigers, Hunting Dogs, and other Carnivora, Elands, Elephants, Rhinoceros, a pair of Hippopotami together with an immense number of Birds, Reptiles, Fish, and some Marine Animals. Admission, 1s.; on Sundays, 6d.

CALDWELL'S SOIREES DANSANTES EVERY EVENING from Eight till Twelve.—Admission, 6d. Six Private Lessons, at any hour, £1 1s. Grand Evening for the 19th of GRAND BALL MASQUE, on TUESDAY, NOVEMBER 28.—Dener-street, Soho.

EVENING SCIENTIFIC LECTURES.—The first of a series of one, six of Evening Lectures at the Government School of Science, will consist of TWENTY Lectures on the CHEMISTRY of FOOD and MEDICINES, with experiments, and open to those gentlemen in towns to whom by the HONORARY FEES, on the 11 days of Wednesdays and Fridays, at Six o'clock, commencing on the 15th November next. Tickets for the whole course may be obtained at the office, on application to the Registrar, at the School, Museum of Practical Geology, Jermyn-street. SPECIAL TICKETS for SCHOOLMASTERS or Public Schools, at Half-price. Tickets for the whole course may also be had there, and at the Department of Science and Art, Marlborough-house.

CRYSTAL PALACE, Sydenham. — THE PALACE and PARK are OPEN to the PUBLIC on Mondays at 9 a.m., and on Tuesdays, Wednesdays, Thursdays, and Fridays at 10 a.m., on which days the Admission is 1s. On Saturdays, the charge for Admission is 2s. on which day the Great Fountains are opened at noon and will be closed each day at 5 p.m. Tickets of Admission, including conveyance by Railway, may be obtained at the London-bridge Terminus and at the several Agents in London. The Sydenham Trains leave London-bridge every hour from 9 a.m. up to 4 5 p.m.; returning from the Crystal Palace station up to 5 p.m.

By Order.

November 4, 1854.

CALLAGHAN'S CRYSTAL PALACE PERSPECTIVE GLASSES possess such extraordinary magnifying power combined with portability (a size of one inch and a quarter drawn out), as to render them invaluable for viewing country, marine birds, and every other sort of object at a distance. Each day may be had at the booksellers of all the principal railway stations, from the Country, on receipt of stamps or money order payable to Wm. Callaghan, Optician, 63, Great Russell-street, Bloomsbury. N.B. Improved Military Field-glasses and Reconnoitring Telescopes.

GYMNASTICS and FENCING.—Captain MACIROSO (Professor at University College) and SON have the honour to announce that their new and spacious rooms, for most complete Gymnasium, are now open daily, for the above healthful and fashionable accomplishments, at No. 123, Oxford-street, near Regent-circus. Captain Carlesso and Son a Rooms, at 21, Newman-street, are open as usual. Private establishment, 38, Baker-street.

DR. K. P. TER REEHORST, Professor and Interpreter of French, German, Italian, Dutch, Danish, Swedish, and Swedish Translator of the above languages, Russian, Polish, Portuguese, and Russian (author of by Mariner's Friend), 30 Ten Languages.—41, Coleman-street, City, London.

FAVARGE'S COURS DE PIANO.—M. HENRI FAVARGE begs to state that his course of LESSONS has COMMENCED, at 37, GREAT MARLBOROUGH-STREET, CAVENDISH-SQUARE, where letters may be addressed; or, to Messrs. Cramer and Co., 201, Regent-street.

DR. K. P. TER REEHORST, Professor and Interpreter of French, German, Italian, Dutch, Danish, Swedish, and Swedish Translator of the above languages, Russian, Polish, Portuguese, and Russian (author of by Mariner's Friend), 30 Ten Languages.—41, Coleman-street, City, London.

FISHER'S DRESSING-CASES, for Ladies and Gentlemen, in silver or plated, are furnished with the assorted particulars, and warranted to stand the tropical climate also travelling and writing desks, work-boxes, &c. Fisher has one of the largest stocks in London, at prices to suit all purchasers. Catalogues post free.—188 and 189, Strand, corner of Arundel-street.

TO VISITORS FROM THE COUNTRY.

MR. MECHI has the pleasure to acquaint his friends and the public, that he has made most extensive alterations and improvements in his premises, which he doubts not will commend themselves to the approval of his patrons. All persons are cordially invited to inspect the novel and elaborate STOCK of FURNISHING IRONMONGERY, &c., which he has brought out among Mechi's Bazaar, 112, Regent-street, and 4, Leadenhall-street, near the India House. He has brought out among Mechi's Bazaar and novel specimens in paper mâché. Finding it impossible to display these advantageously in his former room, he has had an splendid show-room, to which he invites those who are desirous of seeing the most [illegible] this country can produce. He has the best Stock in London of [illegible]

Tollet and Work-table. Illustrated Catalogues [illegible] Mechi has secured the best location at the Crystal Palace.

REEVES' MOIST WATER COLOURS Warranted to keep to all climates. 113, Charing-cross, London.

CLEAR COMPLEXION.—Fleur de Lis, Fleur de Rose, Eider and Dandelion Milk. Amongst the first Plants, Cold Cream Soap. H. BEDDERBURN, Perfumer to the Queen [illegible] Scud-street.

BENZINE COLLA'S PATENT LIQUID, for removing GREASE STAINS of every description from Silks, Ribbons, Velvets, Carpets, Pictures, and Plans, also to dilute Colors mixed with oil and to clean Glover.—London Agent: J. FRY BELL and CO., 336, Oxford-street. Sold by all Chemists throughout the United Kingdom.

LIVERPOOL BLACK BALL CLIPPERS.—These celebrated Ships SAIL EVERY FORTNIGHT, for MELBOURNE, [illegible] and Adelaide. Unrivalled for Speed, first class, and have made the fastest passages on record. Cash orders issued to Australia from all upwards, and parcels forwarded. A copy to John Jeffrays and Co., 22, Great Helens, London, or to the owners, James Baines and Co., Cork-street, Liverpool.

MERSEY LINE OF AUSTRALIAN PACKETS Sailing from Liverpool regularly to Port Phillip, Sydney, and Adelaide, Landing Passengers and Goods Free.

Ships.	Commanders.	Tons.	Destination.	To Sail.
Ralph Wall'er	D Lewis	1603	Po., Phillip	November.
Phoenix Castle	P Ansquer	1050	Sydney	[illegible]

These A 1 Ships are approved of by her Majesty's Emigration Agents. Apply to WM. BARNETT and Co., 25, Philpot-lane, London.

ENCLOSED BERTHS FROM £16 16s.

LIVERPOOL "GOLDEN LINE" of PACKETS to AUSTRALIA.

Ships.	Commanders	Tons	For	To sail.
Gipsting Star	W [illegible]	1475	Melbourne	[illegible]
Londesbrh	J M'Donald	744	Sydney	Nov. 20.

[illegible] commanded by men of experience in the trade. The Vessels [illegible] to this Line are all new Ships, and the number [illegible] will not exceed 300.

Each ship carries an experienced Surgeon.

For Passage, &c., apply to MILLERS and THOMPSON, 4, Drayton-terrace, Liverpool.

Money orders on Australia granted free of char.

INDIA, CHINA, AUSTRALIA, and CAPE of GOOD HOPE.—W. O. YOUNG will despatch the following fast-sailing A 1 Clipper SHIPS, at the dates annexed as under:—

THE SIEGE OF SEBASTOPOL.

CAMP OF GENERAL SIR DE LACY EVANS, UPON THE HEIGHTS OF SEBASTOPOL.—(SEE CORRESPONDENT'S LETTER, PAGE 487.

CAMP OF THE SIEGE TRAIN (GENERAL SIR J. BURGOYNE), AT SEBASTOPOL.—(SEE PAGE 487.)

HOW THE RUSSIANS OBTAINED POSSESSION OF THE CRIMEA.

At the present moment, when public attention is so much engrossed by events in the Crimea, and which promise to destroy for ever the influence of Russia in the Black Sea, it may be interesting to present our readers with a brief account of the manner in which the Russians obtained possession of that country. We shall endeavour to display, in their true colours, the various schemes of diplomatic intrigue and warlike daring resorted to by the several Czars and Czarinas, from Peter the Great down to Catherine II., projects which, in due time, ended in the annexation of the Crimea to the Russian Empire.

The first attempts of Russia to obtain possession of the Crimea date as far back as the middle of the seventeenth century, but it was not until the year 1689 that the first Russian invasion took place, when a formidable army, headed by Peter the Great in person, suddenly appeared in the vicinity of Perekop, then called Orkapi. At first it seemed as if the invaders would become masters of the peninsula without a struggle; but the brave Khan Sélym roused his followers, met the foe, and drove them out of his territory.

This defeat, which cost the Czar nearly 60,000 of his best troops, seems to have inspired him with wholesome respect for the people whom he had hitherto despised; for it was five years before he again ventured to show his face upon the Turkish frontier. In the middle of the year 1696 he made a fresh incursion, and succeeded, after an obstinate struggle, in carrying by siege the important towns of Azoph and Taganrog. It was at this time that the Czar appears to have first conceived the idea of obtaining the command of the Black Sea. The prospect thus suddenly opened to his far-sighted ambition was of a nature to console him for many previous losses, and encourage him to persevere in his policy of aggression, even through defeat and shame. Shortly after the taking of Azoph and Taganrog, he issued a ukase, enjoining his people to grant him pecuniary aid in the "holy and glorious" attack he was about to make on an unoffending people. Persuaded by the eloquent appeals he made to their religious sympathies and to their national pride, the nobles, merchants, and priests poured immense sums of money into his treasury; so that, what with voluntary contributions, taxes, and extortions, he was soon enabled to raise a formidable army. But the great master-spirit that was to direct this expedition was not there in person to lead his troops to victory. The order that was to let loose upon the world these wild legions, came from an humble shipwright's yard, in the neighbourhood of Amsterdam. The Russian army, obedient to the voice of the Imperial shipwright, marched towards the Crimea, and took easy possession of the important fortress of Perekop.

On returning from his travels in search of instruction in the arts of civilisation, Peter the Great employed himself in building fleets, reinforcing his armies, and strengthening his frontier forts. Turkey, alarmed at these warlike preparations, demanded explanation; but the Czar replied that he was the master in his own country, and could do whatever he pleased, without asking the permission of the Sultan. This insolent retort was not likely—nor was it intended—to appease the already exploding anger of the Turks. The remembrance of the affair of Azoph was still a sore point with them; and the natural desire of regaining what had been so nefariously wrested from their grasp led to a declaration of war by the Ottoman Porte, and a simultaneous incursion into the Russian territory by the Khan Dewlet. The Czar, in this extremity, repaired in haste to Moscow, there to concert measures for a grand, and, as he hoped, final campaign against Turkey. Admiral Apraxin was dispatched to Azoph, to take command by sea and land; while the Czar hastened to the Pruth to the assistance of Marshal Cheremetieff, who was threatened by an army of a hundred thousand Turks headed by the Vizier Baltaji. It was well for Peter that he allowed his warlike spouse, Catherine I., to accompany him, for, as we shall see anon, she was the saviour of the expedition. She is said to have taken her post at the head of the army, mounted and accoutred *en Amazone*. When the Czar arrived at Yassi he was overtaken by bad news. The Hospodar of Wallachia, on whom he had depended for supplies, had secretly gone over to the side of the Turks. A long-expected supply of provisions was not forthcoming; a plague broke out suddenly among the troops; clouds of mosquitoes laid waste the fields, and the scorching sun dried up the small streams. Peter at once perceived that his only safety lay in keeping the river between him and the enemy, and acted accordingly. But it was too late; the Turks had already effected a landing. The Russian guards, whom he had dispatched to prevent the passage of the Pruth, returned in haste to the camp, the foe in hot pursuit. The two armies now stood in close proximity to each other. The condition of the Russian troops was most dispiriting. Hunger and thirst were making sad havoc in their ranks. Few had the courage to brave the fire of the Turkish musketry stationed on the opposite side of the river, so that hundreds perished of thirst, though water sufficient to drown a city was flowing within sight. Aware of the terrible position in which he stood, Peter retreated during the night, hoping that his disappearance might escape unnoticed until the morning. But the Turks were on the alert, and cut off all his means of retreat, besides slaughtering the greater portion of his rear guard. On the 20th of July the two armies met in a pitched battle, in which the Turks were victorious. We have few particulars of this important event, except that the conquerors lost 7000 men. The losses sustained by the Russians during this fatal campaign were estimated by Peter the Great himself, in his private dispatches, at 16 240 men.

On the night after the battle Peter retired to his tent, giving special orders to his guards that no one should, on any pretence, be allowed to break in upon his solitude. What took place in that silent chamber during that eventful night is unknown; but it is said that when the Czar retired, his lips quivered, and his knees knocked together like those of a man under the influence of some violent passion. Some even declared that they saw tears in the great man's eyes. Catherine, overcome by these manifestations, and by the disheartening effects they had upon the soldiers, stole gently into his tent unobserved by the sentinels. Peter did not chide her for disobeying his orders. First she soothed the drooping spirit of the man; then roused the ambition of the King. She then revealed to him certain plans she had formed, by which the shedding of more blood might be spared, and to which the Czaris described to have been a "greedy ear."

On the following day the Empress put her plan into execution. She stripped herself of her jewellery and furs, and sent them as presents to the Grand Vizier, together with a sum of money to be distributed among the Kiaia (or Council). The letter which accompanied these gifts is one of the most obsequious that has ever been tendered to a conqueror, and was treasured by the Turks as the proudest trophy of this glorious day. It was couched in the following terms, and addressed to the Grand Vizier:—"If I have had the misfortune to displease your Highness, I am ready to remove the causes of complaint that you may have against me. But I conjure you, most noble General, to prevent the shedding of more blood; and do exhort you to give orders for the immediate cessation of the excessive fire of your artillery. Receive the hostages that I have the honour to send to you, &c." M. Voltaire in his splendid but partial history of Peter the Great, attempts to refute the idea of this undignified letter having been the composition of the great man, whom he has converted into a hero of romance. But his refutation is timid and qualified, and the arguments which he brings forward are too weak to shake the strongly-established fact from its place in history. In less than twelve hours after the dispatch of this letter, the Grand Vizier gave orders for the suspension of hostilities. The Russian camp was filled with rejoicing at the glad tidings; crowds rushed to the river side to drink the dirty water, and hungry soldiers went to the enemy's camp to beg for bread. Among the conditions of peace required by the Grand Vizier, were the immediate withdrawal of the Russian forces; the evacuation of Azoph and the surrounding territory; and the destruction of Taganrog, Samara, and other forts. This famous treaty was signed at the village of Falksen, on the banks of the Pruth, in the year 1711, and is known under the name of the treaty of the Pruth.

Twenty years after this event, the Russians, violating the peace they themselves had sought, ravaged the city of Azoph. They then marched into the Crimea, and held it by force of arms for nearly three months, when they were compelled once more to retire to their own dominions. It now became evident to the Porte that Russia was determined on the conquest of the Crimea, and that it were best to keep itself prepared against the contingency of a fresh invasion. On the following year, accordingly, when the Russians again sallied forth upon the ill-fated peninsula, a Turkish force was prepared to give them battle. For a time, fortune seemed to favour the invaders; winter, one of the most formidable auxiliaries of the Muscovite army, having made dreadful havoc among the Turks. But when the marauders, by the departure of winter, were left to their own resources, they were signally if not ignominiously defeated. So long a time elapsed before the plunderers again ventured to lay hands upon the property they so much coveted, that it was thought the idea had been relinquished. But in 1738 the Russian plague of invasion again broke out in the Crimea, already distracted by pestilence of another kind.

Catherine II., commonly called Catherine the Great, who succeeded to the throne of Russia in 1762, pursued with zeal the aggressive policy of Peter I., and set about extending the limits of her empire in every possible direction and on every possible pretext. Some of her battles were fought with the sword in the open field; but most of her conquests were brought about by secret intrigue. Catherine's power of diplomacy was more than talent in her, it was absolute genius. Her ambition was large enough to grasp the whole world, and she had a tongue, to borrow the words of Shakspeare, "that could wheedle the very devil." She was unscrupulous, unprincipled, fickle, selfish, and unchaste; but she was patriotic, subtle, far-seeing, courageous, and persevering. She never failed in anything she undertook, whether for good or for evil. The most complete success crowned her every effort; and if she was not a perfect woman or a perfect lady, she was "every inch a Queen." Having succeeded in the year 1770 in causing the Porte to declare war upon her and in making herself appear the injured party, the Empress Catherine dispatched Count Romanzoff to the Crimea at the head of a large army. The campaign was opened by an attack on Bender, but the besiegers, after an obstinate engagement and much bloodshed, were compelled to relinquish it. Encouraged by this success, 80,000 Tartars, headed by Kaplan Khan, sallied forth to meet the invaders. The Tartar chief encamped on an elevated ridge on the banks of the Pruth, and Romanzoff on a hill opposite. The battle continued for nearly a month with equal success on both sides, when the Russian General becoming impatient, made a movement of retreat, which might have been intended as a snare. However that may be, it proved fatal to the cause of Turkey; the Tartars, heedless of discipline and of the commands of their officers, rushed pell-mell after the retreating battalions, who, turning sharply round, drove their pursuers back to their entrenchments, seizing their baggage and cannon, and massacring numbers of them without mercy. But it was now the turn of Romanzoff to receive a check at a moment when victory seemed inevitable. A hundred and fifty thousand men, headed by the Grand Vizier, suddenly appeared on the field. But the confusion of the Russians subsided when they perceived that they were still twice as numerous as the enemy. It was in vain the Turks fought. Military tactics were of no avail to an army overwhelmed by numbers. Courage and good discipline at last gave way to rude brute force; and the Russians remained masters of the field. The loss sustained by the Turks on this bloody day has been estimated at no less than 50 000 killed and wounded; the greater part of their baggage and munitions, together with 300 pieces of cannon, and 7000 provision vans falling into the hands of the conquerors.

This victory was followed by the taking of the towns of Ismailoff, Bender, and Achmaum. But the grand object for which the Empress struggled was the Crimea; and this was still in the hands of the Tartars, and under the suzerainty of Turkey. In order to bring about the conquest of this country, she announced her determination to declare the Black Sea free to the trade of all nations, to intervening with her disputes. She thereupon, in the year 1772, sent agents into the Crimea for the purpose of inciting the people to rebellion. This done, she dispatched Prince Dolgorouky to Perekop at the head of a large army. The second and final treachery and intrigue had begun. The 50,000 Tartars who defended the frontier were completely routed, and Dolgorouky marched triumphantly into the Crimea, receiving in acknowledgment of his services, the significant surname of Krimsky (Crimean) Imperial minister.

Shortly after this event an armistice was concluded between Russia and Turkey, and a Congress was arranged to take place at Fokhiani. Gifts and friendly greetings were interchanged, and all things promised a speedy termination of the Crimean dispute. But the demands of the Empress were too exorbitant, and the plenipotentiaries separated in high displeasure. On the completion, therefore, of the term of armistice the two Powers re-commenced hostilities. But the Empress had all this while been secretly endeavouring to win the Khan of the Crimea over to her cause, and had persuaded him to declare himself independent of the Porte, and subject alone to the necessarily or by gracious Majesty the Empress of all the Russias. Indignant at the treachery of the Khan, and the duplicity of Catherine, the Turks continued to harass the Russian forces for a space of nearly two years, when the famous Treaty of Kainardji was signed, by which Russia obtained the right of free navigation in the Turkish waters. The returns for which Turkey stipulated were, that no more than one Russian vessel should be allowed to anchor in the Ottoman waters at the same time; and that the Empress should restore her conquests, and withdraw her troops from the late wars, with the exception only of Azoph, Taganrog, and another frontier fort. But the declaration of the independence of the Crimea was the clause which, more than all others, affected the interest of the Sultan, and which revealed the ambitious Catherine for the relinquishment of her dearly-purchased conquests. This famous treaty was signed on the 25th July, 1774.

The conquests of Prince Dolgorouky had disposed a great number of the inhabitants of the Crimea to favour the pretensions of the Czarina, and to revolt against their new Khan, Dewlet III., who remained faithful to the Porte. The Empress, like an intelligent farmer that knows the nature of his soil, and what crops will best suit it, scattered gold and jewels throughout the peninsula, feeling sure that she had expected, yielded to her an abundant harvest of revolt. When she had given her plots time to ripen, she sent an army of a hundred thousand men to Perekop, which proceeded in laying waste and subduing the whole peninsula. As a first proof of her supremacy, the Empress deposed the Khan elected by the Sultan, and placed in his stead a distant scion of the Gherai family, and a minion of the Czarina's, named Sahim. To this assault on its independence the Porte refused to submit, and upholding the deposed ruler, who had fled to Constantinople for protection, solemnly declared the instalment of the new Khan to be illegal. But Sahim-Gherai was the virtual master of the Crimea, and all the remonstrances of the Porte were of no avail. Counselled by Russian agents, he sent a deputation of six myrzas or nobles to St. Petersburg, requesting the Empress to take the country under her protection. Catherine treated the envoys with the most flattering cordiality, and having enriched them with costly presents (each of which is said to have cost upwards of 4000 roubles), allowed them to depart to their master with assurances of her protection. Marshal Romanzoff had in the meanwhile assembled a numerous army on the banks of the Dniester; and the Porte saw with dismay that no open rupture with Russia was inevitable. But the Russian Ambassador at Constantinople, who had received special instructions to calm the apprehensions of the Sultan by gifts and words of friendship, had placed Turkey in such a dilemma that she scarcely knew her friends from her enemies; so that when the critical moment came, Turkey remained perplexed and undecided.

The Empress, who desired to give the whole of the Crimea to her protégé, in order that she might have the greater facility in despoiling it, furnished him with a guard of Russian soldiers. This guard is said to have been sent to the Crimea for the express purpose of being slaughtered, so that the Empress might, under the pretence of avenging their deaths, have a pretext for invading the peninsula. Things happened exactly as she had arranged; no sooner did the Guards arrive, than the Tartars fell upon and slew them. The Empress thereupon sent a fresh expedition to the Crimea, under the command of Prince Prozorofsky, who put to flight the enemies of Sahim. The Russian Minister at Constantinople used all his diplomatic skill to induce the Sultan to recognise the authority of the Empress's protégé, but in vain. The Porte, faithful to its engagements, faithful above all to its honour and self-respect, persisted in maintaining Selim. The Empress then formally announced to the Porte that the Crimea had placed itself under her protection, and that sooner than abandon the injured Khan Sahim, she would declare war—an alternative for which the Turks expressed themselves prepared. But at length, in 1779 a new treaty was signed between the two Powers, by which Russia bound herself to evacuate the Crimea, and Turkey to acknowledge its independence. This consummation appeared to Catherine so satisfactory, and was so much in accordance with the plans she had already formed, that she sent splendid gifts to the Sultan, as well as to her Ambassador at Constantinople. She also presented the Sultan with a magnificent Khan Sahim, she would declare war—an alternative for which the Turks expressed themselves prepared. But at length, in 1779 a new treaty was signed between the two Powers, by which Russia bound herself to evacuate the Crimea, and Turkey to acknowledge its independence. This consummation appeared to Catherine so satisfactory, and was so much in accordance with the plans she had already formed, that she sent splendid gifts to the Sultan, as well as to her Ambassador at Constantinople. She also presented the Sultan with a magnificent Khan Sahim, together with 300,000 roubles worth of jewels.

Affairs in the Crimea were now fast drawing to a climax. The Khan was completely in the power of the Empress. The weak-minded Tartar was far from suspecting that he was merely an instrument in the hands of an intriguing woman; nor was he aware that the sheep-wolf to whose protection he had fled, only loaded him with caresses previous to destroying him. Forgetful alike of his independence and of his dignity, he requested of the Empress a title and position in the Russian army. The Empress named him Commander-in-chief of the Preobrajinsky Guards, and sent him forthwith the uniform thereof, and a cordon of the order of St. Anne. Her agents were, in the meantime, dinning this and other unpatriotic acts into the ears of the poor Khan's people. Money, presents, and slander, assiduously weaned them from not only his support at large, but his most intimate friends and dearest relations. Even his brothers turned against him, and forced him, with his adherents, to take refuge in Taganrog. Thereupon a Russian army, headed by Potemkin, marched to his assistance. The Khan returned to his capital, assembled his chiefs, and asked them to choose between him and his brothers; declaring, at the same time, that he would abide by their decision. The assembled chiefs, overcome by the magnanimous words of their Sovereign, prostrated themselves at his feet, crying, with one voice, "Sahim Gherai our only Khan!" Nowise thwarted by this awkward turn of affairs, the Empress dispatched a courier to her Minister at Constantinople, enjoining him to extend the demands already agreed to by former treaties, and to endeavour to impose upon the Sultan the necessity of his remaining neutral in case of a disturbance in the Crimea. Mighty indignant at the insinuations of Russia, the Porte sent a Pasha to the Island of Taman, with orders to take possession of it, in the name of the Sultan; whereupon Sahim, instigated by Catherine, dispatched an envoy to the Turkish officer, commanding him to withdraw. But instead of obeying or returning an answer to these insolent summons, the Pasha had the envoy publicly executed. The news of this bloody deed filled the Empress with delight. She felt that the time was at length come for which she had waited so long and toiled so patiently. The old Jewish maxim, "Blood for blood," had ever received ready response in the heart of this merciless woman. "We must revenge the death of this innocent man," said the pious Catherine; and thereupon she laid the country waste, spread desolation in its peaceful fields and homesteads, and forced the Imans and other Tartar chiefs to take the oath of allegiance to her on pain of death.

The first and last clauses of the manifesto published by Catherine at the time, in extenuation of her perfidious conduct, are highly characteristic. "Our last war against the Ottoman Empire having been blessed with an ever-glorious peace, we certainly had the right to annex the Crimea to our Empire. Nevertheless we did not hesitate to sacrifice both this and other conquests, in our ardent desire to secure the public tranquillity, and to establish a friendly feeling between our Court and that of Constantinople. This was the motive which induced us to stipulate for the liberty and independence of the Tartars, whom our arms had already vanquished, hoping by this means to remove for ever all cause of dissension or of coldness between Russia and Turkey. . . . . Animated by a sincere desire to consolidate and maintain the peace concluded by treaty with the Porte, we believe that we are justified in putting a stop to the troubles in the Crimea. We, therefore, do annex to our Empire the peninsula of the Crimea, the Isle of Taman, and the whole of Kuban, which is but a just indemnity for the losses that we have sustained, and the trouble that we have been put to in our struggles to maintain peace and happiness."

On the 27th June, 1783, Potemkin, at the head of an army of 70,000 men, marched to the frontiers of the Crimea; another General named Repnin, following in his rear, with an army of 40,000 men; while a third army, under the command of Marshal Romanzoff, lay encamped at Kieff. While the fleet was at the same time put in readiness for immediate action, while that of the Baltic only waited the signal to pass into the Mediterranean Sea. It was in vain the English Ambassador advised the Porte to take up arms. Negotiation was preferred to a declaration of war; words were preferred to cannon-balls. A new treaty was forthwith signed, by which the Empress became Sovereign of the Crimea, the Isle of Taman, and a portion of Kuban. Thus did Catherine (1784) conquer, without a blow, a vast territory, and annex to her the enormous island sea, and upwards of 1,500,000 additional subjects. The next step taken by the politic Catherine was to retain what she had conquered; and this task she performed in a manner that was worthy of her former feats. None but a Russian Czarina could have dreamt of such an expedient as that to which this remorseless woman resorted. Fearing that the independent and liberal-minded people whom she had conquered would not long submit to her hard yoke, she transported them to Siberia, to the number of 78,000, and in exchange filled with the remaining population a number of her own serfs, whose abject state of subservience might, she hoped, set them a wholesome example.

One of the most important events in connection with the conquest of the Crimea was the triumphal entry of Catherine into that country. It had long been her ambition to make such an expedition, partly for the purpose of sowing dissensions, and partly, it is said, for the purpose of convincing her grandson, Constantine, to the gates of the vast empire which she intended to bequeath to him. On the 18th of June, 1787, she set out from St. Petersburg, accompanied by her ladies and favourites, and the Ambassadors of England, France, and Austria; but without her grandson, who, owing to contagion, was taken suddenly ill with the measles, just as the expedition was on the point of starting. The Imperial procession travelled day and night, without cessation; a great number of horses being posted at each station, in order that no time might be lost. Trees were lighted along the road, at equal distances, and immense woods were gathered in different parts to witness the spectacle, and to congratulate their Sovereign on her new acquisitions. Arrived at the Dnieper, she found fifty magnificent galleys in waiting, to convey her down the river. At Kaidak she was visited by the King of Poland; and at Krementschouk an army of 12,000 men brilliantly accoutred, enacted her wars with the Turks in divers manœuvres. The borders of the Dnieper were covered with fictitious villages, elegantly-dressed peasants and numerous flocks and herds, all in the most flourishing condition. So that what with the natural beauty of the season, and the magical effects of the artist, this barren, ugly region, had all the appearance of a delicious, richly-peopled country. At Kherson she was joined by the Emperor Joseph II. At Perekop she was welcomed by the principal Myrzas whose troops made evolutions; a thousand Tartars, at the same time, surrounding the Imperial carriages, to escort them into the peninsula. This movement at first excited considerable alarm; but Potemkin restored tranquillity by assuring the Empress that the Tartars in question had been chosen by him-elf for the express purpose of acting as her escort into her newly-conquered province. The degrading insult to the Crim Tartar race, couched under this obsequious homage, is but too apparent. Here were a thousand Tartars openly conducting a Russian Sovereign to the palace of their Khan. Not content with having bribed the people to betray their country and their King, the Russian intriguer must make them repeat the dastardly act for the amusement of the Empress! On the night of her arrival at Bagtcheserai, the seat of the Khanship, a distant mountain was speedily illuminated, to represent the appearance of a volcano in eruption. Various other spectacles were also "got up" for her amusement, and the whole of her sojourn in the Crimea was rendered one succession of brilliant fêtes. On her return to St. Petersburg, the famous battle in which Peter the Great was defeated by Charles XII. was enacted at Poltava for her recreation; and several other flattering exhibitions were paid to her by her rejoicing people. The triumphal entrance of Catherine into the Crimea is one of the most splendid events in Russian history. Like many other conquerors, this able Sovereign perceived that one of the best means of securing the allegiance of the multitude was by dazzling their eyes. She therefore spared neither pains nor expense to render this spectacle a brilliant one. But her main object was, to reconnoitre her new province, to measure its inhabitants against the Porte, and so to interest the Emperor Joseph II. in her past schemes of aggrandisement as to make him an agent in her future intrigues.

NOTES ON SIEGES AND SIEGE OPERATIONS, FROM THE FIRST INTRODUCTION OF ARTILLERY TO THE PRESENT TIME.

THE all-engrossing interest attached to the present campaign in the Crimea now going forward, and the anxiety evinced by all classes of society to appreciate the object and significancy of the military works now going forward there, induce us to consider that a few "Notes on Sieges and Siege Operations," in which their nature, progress, and purpose, shall be explained and illustrated by examples drawn from the page of history, may not be unwelcome to our readers. On a recent occasion (in No. 603 of the ILLUSTRATED LONDON NEWS) we gave a popular account of Modern Fortification; we propose now to open our observations with a brief historical review of the changes in the practice of Siege Operations—both of attack and defence—which have taken place since the introduction of artillery; illustrating our observations with as many examples as our limited space will admit of.

FIRST USE OF GUNPOWDER AND ARTILLERY.

Although the precise date of the invention of gunpowder, or rather of its first use in Europe, is still a moot question, it is generally fixed about the year 1320. But the first application of this new power was restricted to arms of small calibre; it does not appear to have been used for throwing balls or stones from cannon much more than a century later. Upon this point, however, there is also much conflicting testimony. Some writers date the first use of artillery between the years 1378–80, when we certainly hear of its being employed in the Italian wars. The Venetians are said to have used some weapons of the kind in their attack upon Guerande, speaking of them, says:—"These are huge iron weapons, bored throughout their whole length, and having large mouths: within them is placed a round stone, upon a powder of sulphur, charcoal, and saltpetre; this powder is ignited at a hole, and the stone is discharged with such a violence that no wall can resist it." It may be observed that some of the earliest pieces appear to have been a species of mortar; indeed the above description, where the largeness of the mouth, and the placing of the ball "upon" the gunpowder, would apply to this kind of weapon, rather than to a cannon of the usual modern form.

Probably one reason why gunpowder was not earlier universally adopted as the motive agent in siege operations, was that the full extent of its power was not at first known, or that the tubes by which it should be brought into operation had not yet been made of the requisite size and strength to supersede the mechanical appliances already long in use. Indeed, the mechanical artillery of the ancients had been brought to a state of efficiency and strength which even at the present day, with our large experience of the stupendous effects of gunpowder, strikes one with surprise. The catapulta of old is described by Polybius and others, as being capable of projecting stones of from 2 to 12 cwt., distances of from 200 to 400 yards; and these contrivances were much increased in strength by the moderns, more particularly in the Italian States. The Venetians, at the siege of Zara in 1343, employed *pierraces*, which threw masses of stone weighing upwards of 26 cwt. It is mentioned that Francesco del Sarzina, the artificer of these terrible machines, himself fell a victim to their power by the accidental discharge of one of them, which launched him headlong against the walls which he was preparing to overwhelm.

By the end of the 14th century the power of artillery was pretty generally recognised; and by the middle of the fifteenth it began to play an important part in the struggles, and to exercise a corresponding influence on the destinies, of nations. It is remarkable that, although the secret of the composition of gunpowder was first known among the Christian nations of Europe, to whom it might have been of so much service in repelling the aggressions of the Turks, it was not long before it was borrowed by the latter, who made free use of it. Upon this point, Gibbon writes:—"The Genoese, who transported Asiatic arms to Europe, must be accused as his preceptors; and it was probably by their hands that his cannon was cast and directed at the siege of Constantinople. The first attempt was, indeed, unsuccessful; but, in the general warfare of the age, the advantage was on *their* side who were most commonly the assailants; for a while, the proportion of the attack and defence was suspended; and this thundering artillery was pointed against the walls and towers which had been shaken only by the most less potent engines of antiquity. By the Venetians, the use of gunpowder was communicated, without reproach, to the Sultans of Egypt and Persia, their allies against the Ottoman Power; the secret was soon propagated to the extremities of Asia; and the advantage of the European was confined to his easy victories over the savages of the New World." We quote the passage on account of the elegance of its style, as well as the suggestive incidents glanced at in it, being, indeed, those of a very critical period in history, the transition period, which marks the close of the middle and the dawning of the modern age. We may observe, however, that the influential part borne by gunpowder in bringing about the great changes—the civilisation of society, the consolidation of states, and the colonisation of the New World, should not be lightly underrated; and we are sorry to find the philosopher, according to his temper, will laugh or weep at the folly of mankind." So far from the superstition here intended being justified by the fact, it is now pretty generally admitted on all hands that gunpowder, especially in its application to artillery, has had a direct influence in preventing wars, as well as in shortening them and mitigating their more terrible and cruel features, when they have occurred. These results have been owing to a variety of circumstances; but principally to the peculiar and overwhelming character of the power itself which may be brought to overthrow an enemy, or destroy a fortification at a considerable distance, without the necessity for the combatants to come into actual personal collision; the consequence of which is that whilst the result has been made more certain and conclusive, the rage and carnage incidental to close hand-to-hand encounter, have been to a great extent avoided. A further and very important consideration is that the substitution of artificial power for mere personal strength and prowess, calls upon the moral rather than the physical attributes; and puts it in the power of a comparatively small armament, having a sufficient material, by skilful dispositions, to maintain an equal combat against an enemy numerically its superior.

That the improved practice of warfare of modern times has tended considerably to mitigate the horrors and sacrifices of war, to diminish rather than increase the waste of human life, and of the products which support it, will appear from a consideration of the number of troops usually engaged in military operations in our times, as compared with the numbers formerly engaged, and the duration of the wars themselves. The expedition to the Crimea, which is now engrossing the attention of all Europe, has been spoken of very commonly as one of unparalleled magnitude. But such is not at all the fact. True, the distance of the expedition, and the time it has been performed in, considered together with the number of troops and the weight of material employed, make it without parallel in history, and justly entitle those who have conducted it to the admiration of the world. But the numerical force of the expedition—under 50,000 men—is not without precedent, under circumstances of similar requirement, even in comparatively recent periods; whilst, compared with the invading hosts of the Eastern nations, and the armies in the great German wars, five, four, and even two centuries ago, it would really appear inconsiderable.

Mahomet II. in his famous siege of Constantinople, in 1453, brought with him an army of 400,000: a similar number of troops also he employed against Belgrade, only two years afterwards, besides a numerous flotilla on the Danube; and, strange as it may sound, this armament of almost inconceivable magnitude was dissembled, and in a great part destroyed, by the brave Hungarians under Huniades. The siege of Rhodes, in 1522, was undertaken with 200,000 men; that of Candia, cost the Turks upwards of 100,000 killed and wounded; at the battle of Mohawk, the Turks again brought 200 000 men, and were defeated; Vienna, 1529, and again in 1683, must have been assailed by forces equally, if not more numerous—the loss of the Turks on the former occasion having been upwards of 40,000 men, and in the latter the whole army having been put to the rout by the brave Sobieski. And even in much later times we find similarly stupendous armaments brought into the field to dispute the possession of individual cities. Not to name other cases—in 1717, Prince Eugène besieged the Turks in Belgrade with [illegible] men; and the Grand Vizier came to the rescue of his co-religionists, with an army of even greater number.

MODERN FORTIFICATIONS.

THE BASTION SYSTEM.—ITS WEAK POINTS.

Holding in view the somewhat detailed account which we have already given (No. 603 of the ILLUSTRATED LONDON NEWS—July 16, 1854), on the subject of Modern Fortifications, it may be sufficient for the present purpose briefly to recapitulate the characteristic changes which it has been found necessary to make from time to time in works of defence to meet the gradually-developed resources of artillery and military strategy; taking them in the order of their coming.

The first necessary consequence of the introduction of cannon was the gradual abandonment of the ancient system of fortification. The extended curtain wall, lofty and machicolated, flanked with frowning towers, however imposing in appearance, and however well adapted to resist the battering-ram, the traveling *sappe*, the flight of arrows, and the assault by scaling-ladders, might be easily breached by cannon fired from a distance far beyond the sphere of the old weapons of defence. The disadvantage in which the besieged were thus placed was in many instances aggravated by the fact that the latter were precluded by circumstances from availing themselves of the new weapon of defence to resist their assailants, or, at least, to anything like the same extent, or with the same success. This was owing to the form and structure of the ramparts themselves, which were neither strong enough to support the shock occasioned by the firing of heavy artillery, nor afforded space for the recoil of the latter on being fired; whilst the very height of the walls was unfavourable to the direction of the fire at the proper range for sweeping down the forces of an enemy.

The natural change was to lower the height of the rampart, and increase its thickness, and its breadth at top; and, furthermore, to conceal its wall-facing (*revetment*) by earthworks (the *glacis*), sloping gradually down to the level of the surrounding country. With these new conditions, it is reasonable to conclude that the balance of attack and defence was at first in favour of the latter. The besiegers, who could not see the walls of the fortification, were forced to bring their guns to the top of the glacis, on the edge of the *counterscarp* before they could commence the fire by which they hoped to effect a breach in the scarp revetment; during all which process they were of necessity exposed to the fire of the [illegible]—whether from the ramparts, or covered-way—or in flank, by sorties. To avert this evil, the besiegers then resorted to the process of cutting trenches in the surface of the soil, by which they became protected from the direct fire of the besieged in their progress to the point where the breaching fire was to commence.

The next important change on the part of the besieged was the introduction of the bastion system, by which the contour of the works became a compact and homogeneous entity; its parts mutually protecting one another—the flanks of the bastions covering the curtain, their faces commanding the glacis; and one or other commanding all parts of the main ditch which surrounded the *enceinte*; whilst the fire from the projecting ravelin swept the approaches to the bastions themselves.

Vauban was the great engineer who introduced, or at least perfected, this important system; which would seem to have given immense preponderance to the defence, and to have rendered it well nigh secure. Unfortunately, the hand which raised, itself destroyed the pleasing illusion. It was Vauban who discovered the damaging effect of the *ricochet* fire; which, playing along the line of defence, parallel with its face, quickly dismounted or silenced the guns of the besieged, and cleared the way for the advance of the breaching battery. Numberless contrivances were adopted, both by Vauban and other engineers, his successors, both to counteract the effect of the *ricochet* fire, and to protract the defence after the breaching of the walls of a fortress. *Traverses* were put up on the *covert-way*, to stop the destructive career of the bounding ball; and retrenched works were added within the *enceinte*, to which the garrison could retreat, and from which they could resist the besiegers, after the latter had made themselves masters of the ramparts.

But, however,—notwithstanding these contrivances; notwithstanding, also the addition of advanced and detached works outside the main work, to resist the besiegers in their approaches, the art of attack quickly gained upon those of the defence; and it came to be acknowledged that no system of defensive works which depended simply on engineering or skilful disposition of engineering works, could effectually resist a resolute enemy, adequately supplied with materials and resources. Upon this point, Straith in his able "Treatise on Fortification and Artillery," states:—

By combined direct, vertical, and enfilade fire, the guns in the faces of defensive works are, even when well traversed, liable to be silenced from a distance; for, in the attack, the besieger occupies the great arc of a circle, and the besieged a small arc within it; so that, as the former has a choice of position, he can always dismount the prolongations of the faces of the ravelins and bastions, where he can erect his enfilade batteries, and establish his direct and mortar batteries in situations best situated to assist them, so that the guns on the terre-plains of the defensive works are exposed to a combined fire which soon produces the effect of slackening their action.

Marshal Saxe,—even in his day, in his "Reveries and Memoires on the Art of War," spoke contemptuously of the newly-invented bastion system. "With regard to myself," he says, "though I am not so vain as to think I am possessed of any uncommon share of knowledge in the art, yet I am not to be imposed upon by the exalted names of Messrs. De Vauban and Coehorn, who have constituted immense sums in the fortifying of places without having made any addition to their strength; at least any that was material or proportioned to what might have been expected, as is evident in the circumstance of their being taken with so much ease and expedition." He speaks in favour of interior retrenched works, which permit of resistance by sheer close fighting after a fortification has been defeated on its scientific merits. "I have often reflected," he observes, "on the remarkable instance of a work that was taken and re-taken at the Siege of Candia thirty-six different times, and which cost the Turks above 25,000 men—a circumstance that has given me a great opinion of such whose construction will admit of their being attacked, and recovered after they are lost." After some further remarks upon this point, he adds, rather naively, "In short, I am disposed to think that the attack upon a fort constructed upon this principle would not a little diminish that rage for sieges which exists at present."

THE CASEMATED SYSTEM—ITS SUPPOSED SUPERIORITY, AND THE OBJECTIONS TO IT.

The last generic change in the principles of fortification, is the introduction of the casemated system of building, by which guns are placed in covered bulwarks, supposed to be of sufficient strength to resist direct fire from cannon and the explosion of shells. This system was partially applied in respect of retrenched works by Vauban; and his followers made still larger use of it—Montalembert and Carnot applying it even to the outworks themselves. By these means it was proposed that the guns of the besieged being relieved from the damaging effect of the *ricochet* fire, might play at every required range upon the assailants, with almost as much security to keep them at bay. Furthermore, the garrison would enjoy protection when not on duty at the guns, and powder magazines, and other stores of *matériel*, be secure from harm.

The casemated system from the first had many opponents; but still even until our day, its merits have been questioned, the weight of authority (including that of the Duke of Wellington himself) being in their favour. In principle it was objected:—1. That casemated batteries weaken the rampart under which they are constructed; and that, when their arches are destroyed, the whole mass sinks down, exposing the interior of the work. 2ndly. That, in firing, the interior, on account of deficient ventilation, soon becomes filled with smoke, forcing the persons to leave their guns at intervals between the firing, which is rendered slow in consequence. 3rdly. That the checks of these embrasures are liable to splinter with every shot of the enemy, to the great destruction of the men serving the guns.

With respect to the first of these objections, it would be groundless, supposing the intention proposed, that of making a fortification of strength sufficient to resist the action of shot and shell to be realised. In such a case, the fortification could only be reduced by blockade. How far expectations of this kind are disappointed in practice, however, has been signally shown in the case of Bomarsund, in whose casemated walls a breach was made after a few hours' cannonading from a single gun; and where a few broadsides from a ship of the line brought a solid wall down in ruins. The second objection, of smoke, will depend to a great extent upon the economy of the internal arrangements; which we may suppose to be possibly be made such as to afford sufficient ventilation. In the case of Sebastopol, we have reason to believe it applies. But, in truth, the third objection is the most telling and serious of the whole, and would, of itself, be sufficient almost to countervail the proposed advantages of the casemated system. If, in addition to the telling fire of the Minié rifle, when it can be employed (as it was at Bomarsund), the besiegers' shot (striking the cheeks of the embrasures, scatter splinters sufficient to destroy or maim the men working the guns, it is obvious that the latter are as effectually silenced as they are by the *ricochet*, under Vauban's system; and of the validity of this objection in practice, there can be little question. It is a maxim in engineering that a work which commands a country must itself be commanded by it; and so it will always happen, with lofty casemated fortifications, that the besiegers will have an opportunity of planting their guns where they can bear upon the cheeks of the embrasures, without being subject to the fire of the casemated guns. A case in point is found in the attack and capture of the Castle of Scylla, in 1860, by the army under Sir John Stuart, in conjunction with Sir Sidney Smith in the *Pompée*, of eighty guns; thus described and remarked upon by Sir John Jones in his account of "Sieges:"—

On examining the interior of these casemates, whilst the terms of surrender were still copying out fair, and, consequently, before steps could be taken to clear or purify the castle, it was altogether surprising to observe the mischief that had been produced by shot which had deflected from the cheeks of the embrasures and entered the casemates. To judge from the indentations on the walls, and the marks of slaughter and destruction which everywhere presented themselves, a direct fire into casemated embrasures of the usual construction, must render [illegible] batteries untenable; indeed, in this attack, the French loss was chiefly by shot which entered at the embrasures, and passed through the rear of the casemates.

And then he goes on to remark:—

Such batteries should, therefore, be confined to situations where the embrasures can only be seen in the direction in which the guns they shelter are pointed; or else the engineers ought to guard against this action of shot deflected from the cheeks, in the construction of the embrasures, which surely would not be difficult to accomplish when the fire of the batteries is, as in most works of defence, for a specific and limited object; or, perhaps, it might prove more efficient, and it might be accomplished in most situations, when direct fire only is required—such as on a causeway, the entry of a port, or a particular tongue of land—to cause the gun to fire through a second opening made in a screen in its front; and then no shot could, by any possibility, strike the embrasure, unless fired perpendicularly to the two openings.

INVESTMENT AND ATTACK OF FORTIFICATIONS.

It would be impossible for a civilian to enter into and appreciate the many difficult considerations which the commander of a besieging army has to encounter in laying out his plan of attack. He has to determine whether to attempt taking the place by assault or *coup de main*; or by regular investment; and then whether by active siege operations or by the blockade. Having determined these questions, he has to direct the necessary field-works for the protection of his army against the enemy's forces, both those within the fortress and those beyond the lines of investment.

The case of Pampeluna, in 1813, is a remarkable instance of prudent decision on the part of the besiegers in substituting a blockade for ordinary siege operations. The latter had at first been contemplated—so much so that on the 1st of July, the Marquis of Wellington, attended by Sir Richard Fletcher, reconnoitred the place, with a view of giving the necessary orders for commencing operations. It was then, however, that, discovering the strength of the garrison (upwards of 4000 men, with 200 guns) and the limited resources of men and *matériel* which he could use for the purpose, he determined to substitute a close blockade for the siege; and most successful was the issue. A chain of nine field redoubts, made particularly strong in the profile, was quickly thrown up, on points from 1200 to 1800 yards from the fortress. These were garrisoned with from 300 to 900 men each; the rest of the blockading force being either placed under cover in the villages or bivouacking on favourable spots just within fire of the place; the whole, however, being in constant readiness for action in case of a sortie being made. In the middle of July Marshal Soult advanced with a strong force to the relief of the place; the British and Portuguese forces were concentrated on the Pyrenees to oppose him; and the blockade was entrusted to a Spanish army of 6000 or 9000 men. The redoubts were strengthened, and advanced posts placed along the roads of approach; and so vigilantly were these works guarded, that, during three months, although sometimes within sight of the force intended for their relief, not the slightest communication passed either way between the besieged and their friends. Sir John Jones refers to this achievement as "perhaps a solitary instance of the investment of a large place situated close to its own frontier having been so successfully maintained."

It will be seen that, in the field-works on this occasion the Duke of Wellington departed from the method of continuous lines of circumvallation (sometimes with lines of countervallation), which was orthodox with the engineers of the seventeenth and eighteenth century. In fact, he adopted the same principle with regard to works of attack which had already begun to be advocated with regard to works of defence, namely—of the superiority of strong detached works over continuous *lines* of works on the *bastion* system. This novelty of system the Great Commander applied generally, and with signal success, in his siege works on the Peninsula. The famous lines of Torres Vedras, constructed by English engineers, under the Duke of Wellington, in 1809–12, and intended both for the defence of the city of Lisbon from the threatened French invasion, and for the meditated retreat of the British army from Portugal; are a memorable example of strategical genius, and of the employment of a system of detached forts to a much more extensive purpose than attempted.

A striking illustration of the old system of investment, and upon an extensive scale, is afforded in the case of the siege of Belgrade by Prince Eugène in 1717. The town was completely surrounded by lines of circumvallation and countervallation, of so substantial a construction, that some remains of them are still to be seen. The Imperial forces amounted to 200,000 men; those of the besieged to 20,000 only. The attack was opened with vigour from all the batteries simul aneously, and the case of the Turks seemed to be hopeless. At this critical juncture a force of 150,000 Turks, commanded by the Grand Vizier, appeared upon the surrounding heights, coming to the rescue of the besieged city. Prince Eugène, like Cæsar at the siege of Alesia, found himself besieged [illegible] besieging others; and so placed between two fires. But, like Cæsar, he was equal to the occasion. In the night, in the midst of a vigorous bombardment of the town, carried on as a diversion, he well ordered troops, at a preconcerted signal, rushed upon the Vizier's forces in their intrenchments, and utterly routed them, with a loss of 15,000 killed and wounded; the loss on the Imperialist side being 5000. The next day the town surrendered.

Although approached by means of trenches and fascines have been referred to in our previous article on Fortification as the earliest and most ordinary description of siege works, there are cases, as in rocky countries, where they would be impossible; and in these cases sand-bags are resorted to. Indeed, this would be the preferable method, but for the labour incurred in providing the bags, and bringing them ready filled to the scene of operations. When they are used, it is considered that they save both men and time—a single night suffising for the construction of any battery for twenty guns to be ready for action in the morning. In the siege of Gerona by the French, in July, 1809, during a night of rain, a battery for twenty guns was formed in eight hours upon a rocky ground, having a height of seven feet six inches, and a thickness of parapet of thirteen feet six inches; the embrasures being nineteen feet nine inches apart. Eighty thousand sand-bags had been filled beforehand, and arranged in five separate heaps of 16,000 each, placed in hollows screened from the view of the place; and 30,000 workmen were allotted to carry them to the spots where they were to be used. The operation commenced at nine o'clock in the evening, and at five the next morning, to the astonishment of the besieged, this battery of twenty guns opened fire upon them. In the siege of Constantine (also a rocky site), by the French, in 1837, batteries and saps was formed, it is said, of sand-bags, with even greater rapidity than could have been done by gabions and fascines. These facts are of importance at the present moment, in the soil of the Crimea being of a rocky nature, unfavourable to trench-works, for which reason the Allied armies have taken with them a large supply of sand-bags, intended for siege operations.

(To be continued.)

WHY SO MANY RUSSIAN OFFICERS ARE KILLED.—From the fact of two Admirals or Admiral-generals in command at Sebastopol having been killed, it has been generally inferred that the slaughter on the side of the Russians has been very great. The inference as a [illegible] at once; but those deaths do not imply the same amount of general destruction as in ordinary cases. The Russian soldier is [illegible] but is deficient in what the French call *élan*, and cannot, when the [illegible] great, be brought into action, unless the [illegible] head, and he is, therefore, compelled to [illegible] except in the way of [illegible] This was the case at Silistria, where the discouraged troops could only be brought up to the walls with their Generals at their head; and the same thing has probably occurred in the defence of Sebastopol. When we infer, therefore, of the death of a Russian General-in-Chief, we are [illegible] that his troops were in a state of discouragement than that there had been the same amount of slaughter as there would be for a [illegible] Chief of any other nation to become a victim.

BOMBARDMENT OF SEBASTOPOL.—GENERAL SIR DE LACY EVANS AND STAFF.

THE SEBASTOPOL BATTERIES FIRING AT AN AUSTRIAN VESSEL.

On the 14th ult. the Russians are said to have fired 1300 shots, and only wounded one man. On the 11th, they seem to have been equally unfortunate in their gunnery, if one may judge from the efforts they made without effect to hit the Austrian vessel which ran under their batteries on that day. The ship, which was laden with hay for the English army, on approaching the fleet, inadvertently got within range of the "Wasp" Battery; and when in this position the wind, which was on the shore, nearly failed her. The "Wasp" Battery immediately opened fire; upon which the master and crew, having lashed the helm, took to their boats. Shortly afterwards the breeze freshened a little, and the deserted vessel, with all her sails set, passed slowly across the harbour of Sebastopol, within a thousand yards of the entrance. A tremendous fire was opened from the batteries on both sides, the shot and shell falling round her like a hailstorm. It was the wonder of all who witnessed the scene that she floated a minute under such a fire. The *Furious*, *Firebrand*, and *Mogador* were off the harbour; and the *Firebrand*, observing the vessel in distress, and also that the *Vladimir* had come out of the harbour, and was approaching the Austrian, as if with an intention of seizing her, immediately proceeded towards the spot—by her arrival taking off the fire of the *Vladimir*, and some part of that of the batteries. She for some time maintained this unequal contest, till, having been cut in the rigging, and being struck by a 40-lb. shot on the deck just abaft the funnel—which passed through the Captain's galley, the deck, and the coal-bunkers, and glancing off the top of the after-boiler, finally ricocheted into an oil-can, happily without injuring any one—Captain Stewart was reluctantly obliged to steam a little further out, as it would have been impossible to take the Austrian in tow without exposing the *Firebrand* to what, with moderate gunnery on the part of the enemy, would have been certain destruction. Meanwhile the ship sailed on as if bearing a charmed life, the sea around her ploughed into a foam by the shot, and actually ran into the little bay of Chersonesus, grounding near some storehouses, and protected by the high land from the batteries. There she lay, with all her sails set, protected by the vicinity of the French

THE SIEGE OF SEBASTOPOL—GORDON'S ATTACK WITH A LANCASTER GUN.

lines, till midnight; when Captain Stewart went up the creek in the *Beagle*, lashed her to the Austrian, and brought her out safely. A Russian steamer and some launches lay not far from the entrance, but did not attempt any opposition. It says very little for the gunnery of the enemy, if they really desired to hit the ship, that she was only struck about five times.

GENERAL CANROBERT AND HIS ESCORT.

WHILE riding alone in the neighbourhood of Sebastopol, our Artist happened to meet General Canrobert and his escort of Chasseurs d'Afrique, and he has forwarded a Sketch of the party, who appear to be galloping in the direction of the besieged town, in order to discover what the enemy is about. It will be seen from the French General's report of the first day's proceedings that he was then in good spirits, notwithstanding the untoward commencement, so far as the French batteries were concerned.

The following Order of the Day addressed to the Army of the East, by General Canrobert, on assuming the command-in-chief of the French troops, has recently appeared in the French papers:—

Soldiers of the Army of the East, my comrades,—The melancholy circumstances under which has fallen upon me the high honour of being your Commander-in-Chief would increase the weight of that task, if the co-operation of all were not assured to me in the name of the country and of the Emperor. Penetrated as I am with the grandeur of the historical mission which we accomplish on this distant land, you will each of you bring to it, each within your sphere, and with the most absolute devotedness, that active part which is indispensable to enable me to bring it to a successful termination. A few days more of sufferings and of trials, and you will have caused to fall at your feet the threatening bulwark of the vast empire which only a little time ago braved Europe. The successes which you have already gained are the guarantees for those which await you, but do not forget that the intrepid Marshal who was our General in Chief prepared them by his perseverance in organising the great operation which we execute, and by the brilliant victory of the Alma.

CANROBERT

THE SIEGE OF SEBASTOPOL—GENERAL CANROBERT AND ESCORT.

THE NIGHT BEFORE THE BATTLE AND THE NIGHT AFTER.

We lay—Blachford and I—rolled in our cloaks, on the sloping ground just opposite our huts: the night was closing in, and above us the clouds were drifting heavily, and only here and there a star peeped out for a moment to be again and again overshadowed by the dusky curtain that passed before it.

Blachford was thoughtful; and I had repeated my question as to what had been doing while I was away, before he seemed suddenly to catch what I had said.

"There's something in the wind," he answered, "for we have had sides de camp and orderlies riding up here by the dozen. Have you heard anything at head-quarters?"

"Not a word as to the when; but every one seems satisfied that we are to attack or be attacked before long—perhaps before many hours. Mark! what's that?"

We both listened attentively, and could distinctly hear the measured tread of a large body in our rear.

"It is a brigade of our troops," said Blachford, as we now discerned them coming along the valley just below us, and marching towards the right of our lines, "probably the Light Division," he added. This guess was confirmed by the Adjutant of one of the regiments, who rode up the hill, and recognising us, shouted out—

"Good luck to ye, boys! and more power to your elbows to-morrow!"

"——by, what's up now?"

"Divil a bit know I, barring there came an aide-de camp a while ago, and turned us out of our comfortable quarters down there over the bridge, among the frogs and fen fever; and brought us up here in a mighty big haste, that left to me small time to pack up my wardrobe and take an inventory of my furniture."

The wardrobe of Mike Donelly, Adjutant of the —th, it was well known consisted of a razor, a piece of soap, and a coke of tobacco, all which he carried in his shako. Whether he had a relay of linen or not, I believe nobody ever knew; yet, withal, he was at all times scrupulously clean, and the whole army did not contain a more efficient officer (though he had risen from the ranks), nor a better natured fellow.

"But are we to attack to-morrow, Mike?"

"It's mighty likely; seeing there's such a stir in the hive. You, on the left, are out of the way of it all; but I hear the right is being strengthened, and that strong outworks are being thrown up at this time, when all decent people ought to be in their beds. Hallo! where's the Brigade? Good night."

"If that's the case," said I to Blachford, "our right is expected to to be attacked; and we on the left shall not have much to do."

"Don't be too sure of that," replied Blachford. "It may be that the enemy will commence with a feint on our right wing, and the real brunt of the attack will be borne by the left. Or it may be nice serod.

We were both silent for some time, when Blachford said thoughtfully—

"I had a letter from home this morning. My mother's health is failing, I fear; and, it seems, that fellow Waterton is again a frequent visitor there."

"The deuce he is!" I exclaimed; but you don't mean to say that Emmy——I mean that Miss Blachford"——

"My poor father think it would be an advantageous match for her; but I don't think Emmy likes the man."

"I'll swear she don't," I exclaimed. "That is—I think—I fancy—she can't like such a fellow."

"Well, well," said Blachford (and I could tell by the tone of his voice that he was smiling at my earnestness), "you must reason my sister out of any predilection she may have for him, and my poor father too. I wish you to write by the earliest opportunity. Write to my poor father kindly and affectionately."

"Good heavens, Blachford!" said I, startled by the strange melancholy of his manner, "what is the matter with you? I write? Why, you will write yourself, of course."

"Tears will not be time," he said.

"Come, come," said I, jumping up, and determined on making an effort to rouse him out of the melancholy fit that was brooding over him; "rouse yourself, man; you've got the blue-devils. Let's go into the hut. We'll have some brandy and-water, and then turn in, for we shall have early work to do, there's little doubt of it."

We crept into our shieling, which was built of poles, mud, turf, and stones, raised against the only remaining wall of what had once been a fine house; and there we sat, before such a fire as our servants had been able to forage for us in the course of the afternoon. Blachford still remained thoughtful—nothing I could say would rouse him; and, after a short time, he lay down on his bed, and, as I imagined, went to sleep. As I looked towards him, however, I could see that his hands were clasped together; and, in the silence of the night, I could hear the whisper of a long and evidently fervent prayer.

Presently he fell into a doze; and I sat before the fire, musing on a thousand things that came before my mind;—the dull solitude of the hut only disturbed by the heavy breathing of the sleeper. The time was growing towards midnight; but, though our hut was close to where our regiment was cantoned, the stillness was perfect, and not a sound from without was heard; even the very sangling of the wind was now hushed.

The silence for the last half-hour had become painful; and I had made up my mind to get out of the hut and do something, or go somewhere—anything or anywhere, to shake off the impression; when, just as I rose, Blachford gave a sudden leap from his bed, and uttering a fearful cry, put his hand to his side—

"Good God, I'm hit!" he exclaimed.

"How? where?" I said, rushing up to him. "You're dreaming, my good fellow. Something has unnerved you to-night; you're evidently not well. Lie down again, and get some more sleep."

"No, no," he said moodily, "not for a thousand worlds. I've seen and heard such things in my sleep"—And he trembled like a man in a strong ague fit.

I was still urging Blachford, when I heard a shout outside, and a voice calling. "Hallo, Rixon! are you there? Open the door, for deuce a bit can I find it in the dark."

"Here," said I; "come in!" and the Major of our regiment put his head though the opening that served us for an entrance.

"You must turn out, Rixon; and double quick, too. I've seen your sergeant, and given him his orders. He's rousing out the men; and by this time they've got their cross-belts and coats on, and are mustering. The pickets are doubled to-night; and the company that was to relieve the outlying picket between the Devil's Bush and the Ravine, has, by some confounded mistake, been ordered on duty at the new Redoubt. There's no help for it; so the sooner you're off the better, for the relief ought to be up there now."

There *was* no help for it, of course. So I buckled on my sword, put on a sheepskin jacket, and over that my cloak, and bent my steps through the darkness, towards the tents of the company.

It was with an uneasy feeling I left poor Blachford beh nd me—for he belonged to another company, and was not likely to be called on duty for some hours. The singular melancholy that had taken possession of him, and a foreboding which was evidently weighing on his mind, made me very anxious on his account; and I would have asked him to come up and keep me company on picket, but that it occurred to me he might get some rest, and so shake off what might be, after all, the mere effect of temporary bodily ailment.

On reaching the tents, I found the men ready; and, having given the word to "fall in," I marched them along the hollow and up the ascent, to the right of the old mill, where I found the outlying picket. It was a wild picturesque spot by day; but by night its grim character was sufficiently heightened to give a chill to the spirits, and make it anything but an agreeable place in which to while away the time.

Having posted my men, and ridden round the pickets to see that I had just relieved, I sat down with the sergeant on a stone, from whence I tried to pierce the gloom, and to observe any signs of movement on the enemy's side; but I could distinguish nothing. All was perfectly quiet.

The orders were to relieve the sentries every hour; and as I went the rounds myself with each relief, this kept me in tolerable activity. It was now but a short time before daylight—the coldest period, as all old campaigners know, of the whole night. There was a faint greyness just breaking over the horizon; when the sergeant, who was standing beside me, drew my attention to a dense mass that was moving along the ridge of the opposite hill. We stood looking at this for fully a quarter of an hour, when, suddenly, we were startled by the report of a musket from the sentry on our extreme left; and before we could look up, another and another succeeded, and the men fell back in turn until the whole line of sentries came towards us at the double.

I remained just still long enough to see a body of the enemy coming up the rising ground on the other side; at the same moment that the other and larger mass of the enemy's troops, which we had been observing, had changed front, and were marching in column across the ridge, in the same direction. Crack after crack, in quick succession, went the muskets of our outlying pickets along the whole left of the line; and as we scudded towards the in-lying picket we could see that the whole army beyond was beginning to stir, like a hive of bees. In a moment we were in the rear of the in-lying picket, and were waiting, like men, for the further demonstration of the enemy, before we fell back on the main body.

Just then a General of Brigade and two staff officers galloped up in hot haste: "Where's the officer commanding the picket on the left? Oh, ah! (as I stepped up to him) -Driven in, eh? What force! Ah, I see." Before an answer could be given, crack! crack! went along the line of the in-lying pickets immediately in front of us, and the enemy showed in close columns over the crest of the hill, where we had but a very short time before been posted. As we fired we fell back, and the old Brigadier-General, with his orderlies, galloped off to a rising ground, on which he stood like a statue, reconnoitring with his glass the position of the enemy, and calculating their force with a practised accuracy.

On reaching the main body, our regiment, with others, was ordered to advance rather to the left of our cantonments. Aide-de-camp, staff-officers, and orderlies, were galloping about; yet there was not the slightest confusion; the various masses of men appeared to be moved with all the order of a game of chess.

The sun had just risen above a mauve-breadth above the horizon, and as lovely and fresh a morn was breaking as ever shone on a far happier day than that was likely to prove for many. I had often seen a similar sunrise before, and from the same spot; yet, I know not why—probably from the surrounding circumstance connected with the events that were happening and about to happen—the view before me produced a solemn awe, which was all the stronger from the comparison suggested between the placid beauty of God's work before me, and the ruthless passions that had brought men out, in the face of that holy calm, to darken the very splendour of the scene with their own sad doings.

Much time was not allowed us for thoughts such as these; it, indeed, they occurred to any—for the action had already begun in earnest: at first a dropping fire, then a regular fusillade. A shot or two had told among our ranks before we were ordered to fire, and then, we were in the thick of it. I cannot relate anything that occurred; I cannot describe what was doing on my right or on my left. Here and there I saw men falling about me, but whether they groaned or shrieked, the incessant firing prevented my hearing. There was anguish depicted on the faces of some, which the blood that smeared them made more ghastly: here a man fell from a flesh wound, and he sat up looking stolidly about him as though he were stunned; here a man sprung into the air and came to the earth again like a stone, shot through the heart; here was another lying writhing on the ground, hit in the throat—you could see he was screeching, to hear was out of the question—straining for water—water for the love of God—into whose presence he was being fast hurried on the tide of the red stream that poured from his own veins.

It would have been a sickening—more than sickening—if one had been compelled to stand and contemplate all these things; but the mind was occupied in other ways, the body in active motion, the blood boiling with the fever of excitement; and, when the bugles sounded the charge, and we left the wounded behind us at every step, the wild shout, the curse, the shriek, the din of musketry, and the far distant roar of artillery, the cataract-like sound of shells and rockets as they tore through the air, crashing across us, over us, bursting among us—every thing tended to keep the mind in a maddening whirl that allowed no time for either thought or feeling.

The enemy fell back before our charge; and we were ourselves recalled after driving them some distance, but, before we had got far in our retreat, we were, in turn, charged by a heavy body of cavalry. Down they came upon our square, making the very earth shake; but a well-directed fire stopped them effectually—they broke, fell into confusion, and a second fire from our ranks added to the number of empty saddles on their side. We were scarcely delivered from this visitation, when we found ourselves assailed by a cloud of light skirmishers, who kept up an incessant *tiraillement*; yet, whose fire we could not effectively return. To dislodge them we were again ordered to advance, only again to fall back, because it was no part of our General's policy to push his left wing too forward.

We were making our retrograde movement in perfect order—harassed however, by the enemy's skirmishers in our rear—when, just as we were passing over a low ridge of earth, with a sort of dry ditch on the other side, I felt myself struck a crashing blow on the head or cheek, and down I rolled into the ditch. I could not immediately have lost all consciousness, for I have a distinct recollection of hearing the cry, "the cavalry, the cavalry!" and of our men rushing over me and past me; then I could again hear the heavy tread of a body of horse, and then the firing, and then—I heard, saw, felt, no more; I must have swooned.

How long I remained in this state I cannot tell; but when consciousness returned, it was long past mid-day. Everything around me was still and quiet.

Confused and in pain as I was, it was some time before I could collect sufficient sense to recall any of the circumstances that had brought me there; and longer still before I could force myself to believe that the whole had not been a dream. Where were our regiments? Where was the enemy? Those fearful charges of cavalry, too, were they not a dream? And, for myself—this bloody, was that unreal? My lips were glued together with clotted gore, save a small orifice in the centre, through which my breath whistled. I put my hands up to my face, and, feeling the parts which were the principal seat of pain, by degrees I arrived at a correct conception, namely, that a ball had passed through both cheeks, grazing and injuring the cheek-bones, and knocking away the teeth it met with in its course. I had been, also, severely cut about the head, and much kicked and trampled on. I felt stupid, moreover, whether from the concussion of the ball affecting the brain, or from what cause I cannot say. I got up on my feet, and tried to walk, but fell down again like a drunken man. My hearing, too, must have been affected; for though the action was going on, to the right of our line, fiercer than it had begun in the morning on our left (which had only been a feigned attack, after all), I could distinguish nothing of the noise, save a perpetual booming sound in my head, like that made by placing a sea-shell to the ear.

I managed to sit upright, and to gaze about me: and now I could perceive numerous vestiges of the late struggle. Horses, men, arms, accoutrements, lay scattered, here and there; but not a living soul was to be seen. I cannot tell how strangely the devastated solitude struck upon my mind—weak and confused as I was. I felt, however, that it was necessary to make some effort, or I might lie there till I sank altogether from sheer exhaustion. Having crawled to where I perceived a musket lying, I supported myself by it, and crept "with halting steps and slow," towards what I supposed the direction of our lines.

It was a weary journey (though the real distance was so short, and had been traversed so rapidly in the morning), before I came in sight of a party of our men, who turned down to assist me, and bore me to one of the tents. Here I was attended by a surgeon, who, after washing away the blood that covered my face, and examining my cheek and mouth, pronounced "No harm done—close shave though; got any brandy? take a little: all right.——Now then, rip up that sleeve: ah! must come off"—muttered." The latter remarks not being addressed to me, I was glad to get away.

Several officers and many of the men now came crowding about me, offering any little assistance in their power; and, while lying in one of the tents, another surgeon came to apply bandages to my wounds. My first anxiety, on recovering slightly from exhaustion, after some hour or two of rest, was as to the fate of Blachford; but I could only ascertain that he was "missing"—whether killed or wounded, nobody knew. Possibly, if wounded, he might have been carried to one of the hospitals in the town, or to private quarters there: and I determined on setting out to the rear with the view of ascertaining any particulars concerning him.

Mounted on a horse, which a friend lent me, I took my way, at a walking pace, towards the town. All along, as I verged towards the right of our position, the stream of wounded became greater and greater, while ammunition waggons and ambulance carts clattered over the road towards the scene of operations.

The evening was closing in as I reached the town; and the streets were filled with women and old men and children, who all seemed gesticulating and talking of the various acts of the drama that had been, or was then, going forward outside their walls. Now and then, as a blood-stained canvas "stretcher" was borne along the street with its maimed load, hands and eyes would be lifted towards heaven, and ejaculations of pity or horror would escape the bystanders.

Threading my way through these groups, and inquiring where the hospitals were established, I gained, at length, one of the noblest and most magnificent of the churches of which the town boasted; and here, I was told, accommodation had been made for nearly seven hundred wounded.

Within, the place was nearly dark, save here and there a few lights dotted about where the surgeons or their assistants were in attendance. The scene was a singular one. Imagine the interior of a fine church, such as one meets with every where in Roman Catholic countries; grand and imposing in its space, its architectural beauty, and decoration—its loftiness, its solemn prestige as a place of holy worship—imagine the whole area, even to the very altar, and above, amidst the choir on either side the organ—the whole filled with maimed and wounded human beings, very many "hurt unto death." It was a sight to shudder at even in the aggregate; but to walk along the rows of trestel-beds, and contemplate the sufferings in detail, was harrowing to the stoutest heart. Picture the long, long, weary night that was to pass over such a scene—the night that would seem interminable to the fevered and tortured watcher for the dawn—the night from which no morn would ever break for many.

None were placed in beds whose cases did not absolutely require that accommodation; and there were, therefore, many (whose wounds being of a comparatively less serious character) who were sitting, lying, or crouching in all spare corners—round the pillars, against the walls, at the foot of stairs—anywhere, everywhere—awaiting patiently the assistance that would be bestowed on them in turn.

That which struck the attention above all, or as much as all, was the general patience of women—very many of them ladies—some young and beautiful, some old—old, yet beautiful for the kindly sympathy that beamed in their faces, and the Samaritan feeling that dwelt in their hearts. Up and down and between the rows of sufferers they swept along, offering lemon-water (of which their servants carried pails full) to the parched lip; or ready with lint and bandage for the surgeon's use. All were quiet and unobtrusive, gliding wherever they thought they might alleviate a pain or smoothe a restless pillow. Those whom they tended were rough, brawny, bearded men, from whose contact these young, delicate, and well-nurtured ladies would have shrunk, had they met them under other circumstances; but, stricken down as these poor men were, it never crossed the minds of these Samaritan ladies that there was impropriety in their mission of charity. May heaven pardon them if there were! I know that many an uttered blessing followed them as they passed on, and I doubt not those blessings found a record where all things are set down both for and against us.

Of one of the staff surgeons, whom I knew, I inquired whether Blachford had been brought in there. He said that several officers had come in until more fitting quarters could be assigned them; but who they were, or whether Blachford was among them, he could not tell. My only course, then, was to make farther inquiries, or to go up and down the long aisles of the wounded in search of my friend.

A strange pilgrimage it was. Here, in one corner, huddled up, was a figure looking as though it were there to act some part in a childish mummery. His face was covered with a mask of white linen, in which were cut two diamond-shaped holes for his eyes, a triangular hole for the nose, and a long slit for the mouth. His whole front had been scorched by an explosion of powder. Here, stretched on a bed, lay a handsome lad, his dark-brown curly hair contrasting with his deadly pale face. He was a bugler, and belonged to a Rifle corps—as you may perceive by his dark-green dress, which was thrown across his feet. He had been brought in early in the day, and had received a severe wound when in the act of blowing the "advance." As he lay there, his eyes seemed never to move from some distant object which he appeared to contemplate, and his mouth gave a constant convulsive twitch on one side. His hands were engaged in a nervous picking at the bed clothes; and, as I stood looking at him, some acute pain caused him to shriek out: and then, suddenly lapsing into a state of apparent exhaustion, while the perspiration broke out on his forehead, he murmured, "No, no, mother, don't let father"——. Poor lad! delirium carried him back to former days, and to the scenes of home—perhaps not a kind home; but, whether kind or not, he was never to see it again!

Hush! in the midst of the surrounding groans and murmurs, and the hurrying to and fro, we came upon a little group gathered about the bedside of an officer. There was stillness among them, for the near presence of death seemed to hush their very breathing, save the prayer of the priest, who stood there in his long black cloak. At the foot of the bed knelt a young and beautiful girl, praying and weeping; and an attendant of the priest, who held a lantern, which shed but a feeble gleam on the dying man and those about him. There was light enough, however, for the girl to mark the last flicker of life that passed across the countenance of him she had loved with all the fervent passion of her race.

The officer was not Blachford; and I turned away to continue my pilgrimage in search of him. Everywhere the scene presented to the eye was the same, though varied in the degree of suffering. From time to time you heard the measured tread, on the paved floor, of the bearers of more wounded men summoned by or unconsciously you were jostled by the hospital men who were carrying out the bodies of those who had just died. There was little time or space lost: a man had but just ceased to breathe when his body was borne away, and another wounded man occupied his place.

It was with difficulty I got through my fruitless task; and, sick and weary, I left the place with the in ention of pursuing my search at a large building which I knew had also been fitted as a temporary hospital.

I was wending my way slowly and painfully up one of the streets that led to this building, when four men passed me, bearing on their shoulders a canvas stretcher containing some dead or wounded man. One of the men, as he came abreast of me, turned and looked in my face, and at the same time exclaimed, "Hait, mates! here's Captain Rixon: he was a friend of the poor gentleman."

"Who is it?" said I, "Is it Mr. Blachford?"

"True enough, sir; poor gentleman: and mortal sorry I am, too, for I was in his Company, and a kinder nor better officer never stepped. He was hit hard, sir, and must have drope dead at once."

"Lay him down," said I, "and let me see him."

They laid him down: and the man pointed to poor Blachford's side where the ball had entered. It was, as near as possible, the very spot he had himself indicated when starting out of his sleep on the previous night.

The men said they were on their way to the quarters of an officer on the staff (a friend of Blachford), by whose permission he was to lie there till the funeral. So they took him there; and I followed.

I sat by his side in the dark room, through that long, long night, shedding many a tear, as I thought of our old friendship; and of the home made desolate by his death; of his poor father and his sailing mother, and of the poor Emily, his sister, whose pride in him was only equalled by her strong affection.

In the early morning when somebody came and took me away, and told me I was in a high fever. What became of me at the time, nor for many a day after, I do not recollect, till one afternoon I seemed to awake up to consciousness, and I was told I was better, but that I had had a narrow escape—that the wound, and fever, had well-nigh made an end of me. After a time I got round again, and obtained "sick leave" to come to England.

When convalescent, and my leave had expired, I should have returned to my duties, but for the earnest entreaties of Mr. Blachford's father and mother, who pressed me to remain with them. I shall say nothing of the silent pleadings of Emmy, who, some time after (this is all the satisfaction I mean to grant to the curious) did not become the wife of Waterton. Time has passed over our heads since those days, but I shall never cease to remember THE NIGHT BEFORE THE BATTLE AND THE NIGHT AFTER.

B.

FOX-HUNTING.

THE FIRST DAY OF THE SEASON.

* * *

Loo in, little dearies! Too in

How eagerly forward they rush;
In a moment how widely they spread;
Have at him there, Ranger! Hush hush
'Tis a find or I'll eat my head.
Now for it, thou fox, and well faster
The hounds from cover are freed
The hunt is the youth of the master,
The spur to the flank of his steed.

With Cæsar's tongue'd, and Chorus,
Now that rose comme ce he sang,
Now Beauty and Juno join before us,
And Rubad is rising along."

TA-ALLO! ta-allo! Forrard! forrard! Yonder he goes. Ta-allo! Too! too! Twang twang-too! sounds the huntsman's horn. Crack! crack! goes the whipper-in's long thong, bringing up the tail hounds. "Eh, Bill!" shouts the plough-boy, in a tree; "what's he seeing what a whoppin teale. Biggest fox as ever I seed." "Now, sir, if you please," cries the man on the hot horse, "go yourself, or let me go!" "Open the gate, you boy!" "Pull down that rail!" Amid these sounds, half a dozen, who have got away on good terms with the pack, are sailing along three fields from the gorse cover, while Master Charley has quite just in time to save him if from a first and final "whoy."

And so commences the first run of the season, while the hedges are still full of brown and the ditches brimful with dead leaves, and the men and horses fat, fresh, and impatient. And now boring always frost and snow—every week until the end of March will see between thirty and forty thousand sportsmen, or, at any rate, horsemen, in every county, from Dumfries-shire to Land's End, hunting fox, or stag, or hare. Surely, then, hunting is a cruel that deserves some notice as a matter of news. In Whitaker's capital Hunting Map, we find England divided into ninety-eight fox-hunting and stag-hunting districts. Besides these, there are four or five packs of fox-hounds in Scotland, and twice as many in Wales and in Ireland, and there are at least one hundred regular packs of harriers in the three kingdoms, not counting many scratch packs kept by farmers, including the one maintained by the Sheffield grinders for their special amusement on "play" days.

Westmoreland (where riding to hounds is impossible), Middlesex (for obvious reasons), and Norfolk (where the inutility of the present generation are devoured by a passion for rearing pheasants), are the only counties of England not hunted by fox-hounds. York-shire—which is not only nearly double the extent of any other county, but also famous for its breed of horses and horsemen among its yeoman farmers—has nine packs of fox-hounds, besides the use of two or three packs which have their kennels in the adjoining counties. And, curiously enough, Devon has as many packs as Yorkshire.

To be sure, the hunting is as different as the character of the horses used in the two counties. The Yorkshire hunter is known all over the world for a first-class horse, able to gallop like a steam-engine, and jump any jumps in place at full speed. The Devon hunter is a well-bred cob, good at climbing up steep banks and cantering down precipitous hills, and especially clever at standing jumps. The Devonshire men are good sportsmen, and understand hunting as a science better than most of those who fill the field in grass counties, but the small fields, divided by lines of earth-banks covered with impenetrable hedges, varied by moors, studded by quarries, with hills to be ascended at a walk, and descended in a style alarming to any but a native, render riding up to the tail of hounds impossible. Many of the Devonshire packs are on a very small scale and hunt every day they choose to hunt. At the same time, few better sportsmen have ever thrilled to hound than the late Mr Ballett, of Flaxtree, or the late Hon Newton Fellowes or Shute Barton. Froude, and the Rev Jack Russell, Master of the North Devon, in Yorkshire, large fields of grass and light plough, large horses, and hard-riding men, give a first-class character to the sport. The most celebrated sportsman in Yorkshire, Sir Tatton Sykes, has lately retired in favour of Mr. Wilnaghby, who hunts over the Yorkshire wolds—a perfect contrast to the glens, woods, and miniature fields of Devon.

Of the advertised packs three hunt six days a week, that is to say, the Quorndon, in Leicestershire, Sir Richard Sutton, the Burton, in Lincolnshire, Lord Henry Bentinck; and Mr. Assheton Smithe, in Hamp-shire. About twenty four packs hunt four days a week, and the rest either two or three days a week (subscribers' days). The expenses vary from £1200 to £4000 a year. Four days a week may be done for £1500 with economy.

Now all those of our readers who know nothing, and have never thought anything about hunting, will roughly calculate the number of persons who are amused and interested in a sport which calls every muscle of the body into healthy exercise, and for the day deprives, dissolves, and extinguishes every anxious care and gloomy thought by a real merit which is followed by no painful reaction—they will agree that our "hunting fields" and "huntsmen" deserve the "Illustrated Notice," not ordeal but descriptive to which we propose to give occasional columns of the ILLUSTRATED LONDON NEWS in the course of the season.

All conditions of men, except Bishops, from ratcatchers to Royalty, are to be found in the hunting-field—equalised by horsemanship, and fraternising under the influence of a genial sport. Among fox hunters we can trace a long line of statesmen, from William of Orange to Pitt and Fox. Lord Althorp was a master of hounds, and Lord Palmerston we have seen, within the last few years, going—as he goes everywhere—in the first flight.

The progress of agriculture is indebted considerably to fox-hunting; for the three great landowners who did more to turn sand and heath into corn and wool and make popular the best breeds of stock and best course of cultivation—Bracer, Duke of Bedford, Coke, Earl of Leicester; and the first Lord Harborough were all masters of hounds.

When, indeed, we found the sports of our plays, and a drunken debauch formed the invariable appendage to every dramatic sketch of a fox-hunter, we were right. Squire Western was the representative of a class, who, however, was not more ridiculous than the patched, perfumed fox-hunters whom Hogarth painted, and Pope satirised. Fox-hunters are not a class now—roads, newspapers, and manufacturing emigration have equalised the condition of the whole kingdom, and fox-hunters are just like any other people, who wear clean shirts, and can afford to keep one or more horses.

It is safe to assert that hunting men, as a class, are temperate. No man can ride well across a difficult country who is not. We must, however, admit, that the hard livers who have made cockers their own seat have been chosen from sportsmen, chiefly racing men, who have turned writers to gain a penny. These unfortunate people, with the fatal example of "Nicotes Ambrosianæ" before them, fill up a page wherever their memory or their industry fails them in describing in detail a breakfast, a luncheon, a dinner, and a supper. And this has been carried to often, that the uninitiated are led to believe that every fox hunter must, as a matter of course, keep an immense cellar of port, sherry, madeira, hock, champagne, and all manner of liqueurs as well as a French cook.

The most select creatures are the Patricians—of which the squadron is the centre, and the Bath, the Atheneum, and the Cattemore, form part, and the Fytchley a continuation. In these districts the enclosures are large, chiefly grass, and regulated by wide and strong fences, in order to keep within bounds the great subjects that are pastured there in summer. In these hunts, with a burning scent, nothing but a well-bred horse, of size and power, perfectly trained, and well ridden, can live with the hounds. Every man who goes down there specially to hunt has two horses on at a time, the second, ridden by a clever boy, is brought along lanes, and by short cuts so as to be ready when the first is used up. Before, to hunt, and ride hard, six days a week in these districts requires a stud of eight horses at least. Some of the most forward horsemen are contented with eleven.

Last year in the Quorn country, Sir Richard Sutton, master of the hounds, hunting eight days a week with two packs, had 70 horses—(of course one of these were for the use of friends visiting him, as well as his huntsman and whips, the best of Whom, after eight months, Mr W. Little Gilmour, one of the oldest members of the Melton Club, and best horsemen. Sir Colonel Cavendish Taylor, a Marquis of Granby, a better man across country than in the House of Commons, 10 (and he is a very heavy weight); Lord Gardiner, 11; and Lord Forrester, 14.

But the Quorn and Fytchley fields frequently amount to between three and four hundred, but this number includes, in the first place, the hunting aristocracy, who come down to hunt, as they always go to the Highlands to shoot, and to Cowes to yacht, periodically. Next, small squires, and a number of real sportsmen in feeling and execution, who are professional men from the counties, or manufacturers—keeping one, two, or three horses; then a crowd of graziers, land-agents, farmers with horses to sell, horse-dealers, veterinary surgeons, and, lastly curious visitors, who have no idea of riding hard.

There first-class establishments are not confined to men of moderate means with small connexion. Nothing but a first-class horse can live with hounds on a free-and-easy, and it is not every one who can afford to have two or four first-class horses.

In the pursuit of country-gentlemen's sport is to be had at less expense, with more healthy exercise and pleasure, than in York-shire; with the Brocklesby, in Lincolnshire; the Heythrop, in Oxfordshire, the Berkeley, or the Beaufort, in Gloucestershire, or with Cheshire, and half-a-dozen similar packs, does not deserve a hunt at all—no one by from experience. We better than near Ashford, in Kent, there is a great deal of, equal to the best part of Leicestershire; but there seem on the south coast to be seldom equal to the Midland and Western Counties. Devonshire, with so many drawbacks, is generally a good scent and plenty of foxes.

As we are going quite as much for those who cannot hunt, as for those who can, we may venture to say that the popular notion of a fox hunt is as unlike the reality as a girl's notion of war—a grand charge and a wild victory.

Pictures always represent racing scenes—hounds flying away with a flying scent, horses taking at a bound, crumbling brook and creeping artificial fences, such lucky days, such brilliant horsemen, such hunting scenes and flying foxes are the exception.

At the two-thirds of those who go out, even in the most fashionable counties, never attempt brooks or five barred gates, or anything difficult or dangerous, but, by help of open gates and bridle-roads, which are found, parallel lanes, and gaps which are conveniently made by the first in front of the straight, border and the dealers with horses to sell, helped by the curves that founds gracefully make, and a fair knowledge of the country, with the galloping on a fast horse, they manage to be as near the hounds as the most thrusting horseman. Among this crowd of critters and road riders are to be found some very good sportsmen, who, from some cause or other, have lost their nerve; others who live in the county, like the excitement and society, but never took a jump in their lives, young ladies with their papas, boys on ponies; farmers counting four-year-olds, surgeons and lawyers, who are looking rather for professional practice than sport. On cold scenting days, with a ringing fox, the crowd keeps on until nearly dark, and heads many a fox. Many a beginner, in his first season, has been cheated by a succession of these easy days over an easy part of the country into the idea that he was no difficulty in riding to hounds. But a straight fox and a burning scent over a grass country has undercried him, and left him in the third or fourth field with his horse half or a hedge and half in a ditch, or pounded before a "bullfinch," feeling very ridiculous. There are men who put a very respectable figure in the hunting field who never saw a pack of hounds until they were past thirty. The city of London turns out many such; so does every great town where many young men live by their wits, and perhaps as ploughboys in the country. We could name three—one an M.P.—under their conditions, who would pass muster in Leicestershire if necessary. But a good seat on horseback, pluck and a love of the sport, are essential. A few years ago a scientific manufacturer set to work to create horseman, was ordered horse exercise as a remedy for mind and body, persevered by every remedy. He found that riding along the road like other gentlemen and wretched as ever. A friend prescribed hunting, purchased for him a couple of made hunters, and gave him the needful lessons in pounding. The first result was that he obtained such sound, refreshing sleep as he had not enjoyed since boyhood: the next, that in less than two seasons he made himself quite at home with a pretty tolerable, and now rides more boldly than he would at hunting any more subscription than he had been a fox-hunter from his youth upwards.

(To be continued.)

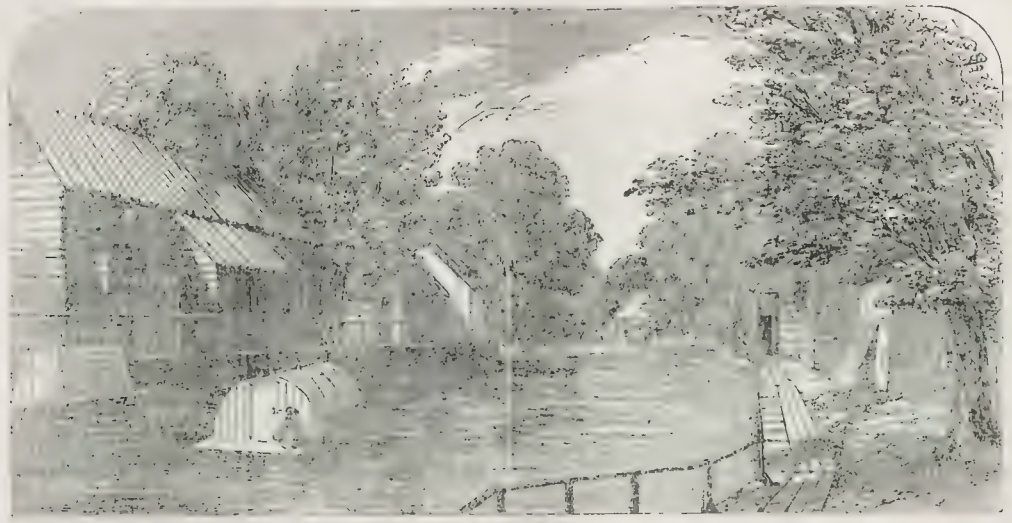
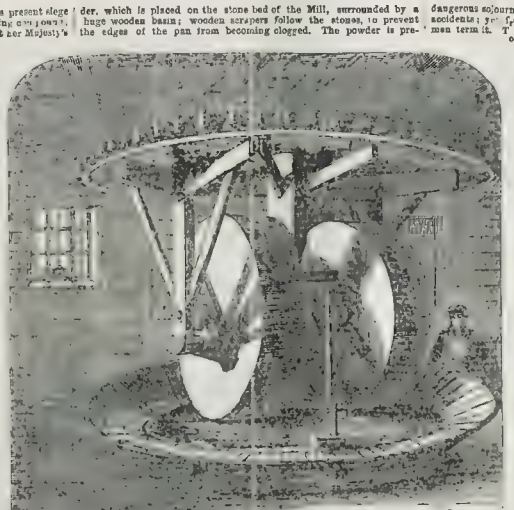
HER MAJESTY'S GUNPOWDER MILLS, AT WALTHAM ABBEY.



THE GUNPOWDER MILLS.

GUNPOWDER, and particularly cannon powder, during this present siege [illegible] cannot fail to be considered a very interesting subject; we propose, therefore, to carry our readers, in idea, to visit her Majesty's Gunpowder Mills, at Waltham Abbey, in the [illegible]. These Mills are, we should premise, [illegible] to the production of all the powder [illegible] the Army and Navy, the greater part [illegible] being purchased by the Government from the manufacturers. The danger incurred by the admission of strangers to works of this kind will account [illegible] that is generally known of their nature. [illegible], the saltpetre, or "petre," as it is [illegible] which is principally imported from Bengal, [illegible] (in large pans), evaporated, and crystallised in a building far removed from the Gunpowder Mills, properly so called. So, also, are the alder and willow charred to make the charcoal element of the powder. These processes are preliminary, and the materials are carried in boats to the separate mills in which they are to be ground.

A walk of half a mile brings us to these works, and [illegible] from [illegible] is that the spot is very pretty, and very [illegible]-looking indeed—a glance at our Illustration will show that there is nothing very fearful in the external appearance of these deadly houses. Our first visit is to a "Petre," or Nitre-mill, where the saltpetre, having been purified of its salt, and cast into cakes weighing about forty pounds each, is [illegible] in the breaker, by a pair of heavy circular stones slowly revolving on a stone bed; it is subsequently sifted, and the coarser particles re-ground. Before entering this house we are required to encase our feet in goloshes (innocent of nails; and the greatest care is taken that the stranger's own boots shall not touch the platform in front of the Mill The sulphur, or brimstone, and the charcoal (some of which is manufactured from the willow-trees which grow so plentifully in the neighbourhood) are ground in similar mills, but, of course, comparatively without danger. As yet we have but been concerned with the three separate ingredients; but we now—with some misgiving, probably—proceed to the "Mixing-house," where every precaution is needed. Around [illegible] om there is a hoop, some two feet high; and at its side kneels a workman, who fits a pair of over [illegible] shoes on your feet, carefully pinning each, as it is covered, within the charmed circle: here a sense of danger first strikes you, for you are actually walking, or rather sliding about, in gunpowder—not in its [illegible] form certainly, for if the "composition," [illegible] here called, were to take fire, it would burn only, as to use the schoolboy's word, a fizzle or devil, throwing out showers of sparks sufficiently destructive in a large quantity. Here, in bins, are found the [illegible], brimstone, and charcoal, solid weights, of the exact proportions of each, are provided, so that no mistake can occur. The quantities of the constituents are, as most persons are aware, saltpetre, 75; sulphur, 10; charcoal 15 in every 100 parts. A quantity of the three ingredients, weighing 49 lbs., is placed in a hollow drum, which revolves rapidly, and contains a fly-fan, which rotates in an opposite direction. In about five minutes a most complete mixture is effected, and a bag is tied over the lower orifice of the drum to receive the charge. If we follow this "composition," we shall next arrive at the "Incorporating-mills," the exteriors of which are shown in our first Illustration. Here the gunpowder, which enters merely as a combustible compound, obtains its explosive power, by the ingredients becoming thoroughly incorporated. They are here ground together, and although no precaution is needed as to the feet of the visitor, here is, perhaps, the greatest danger to be apprehended. The nature of the Mill is shown in our second Illustration. A pair of circular stones called "runners," weighing about three tons and a half each, steadily and slowly roll over the powder, which is placed on the stone bed of the Mill, surrounded by a huge wooden basin; wooden scrapers follow the stones, to prevent the edges of the pan from becoming clogged. The powder is previously damped, as it could not be safely ground in its dry state, about seven pints of water, called here, as by the brewers, "liquor" being added to the charge of 42 lbs., during the three hours and a half of its dangerous sojourn in this mill. All possible care is taken to prevent accidents; yet from time to time these houses will "blow," as the workmen term it. To obviate the chance of any irregularity in a clock, the water-wheel which works two of these mills in one house also marks its revolutions on a dial, so that the attendant can never be mistaken in the time that the charge has been "on"—a most important point, where the over grinding of too dry powder might produce a fearful result. The chief cause of explosion has been a portion of the wood-work of the roof, or mill, becoming detached—such as a cog of the wheel—and falling into the pan, it would naturally act as a skid on one of the runners, and produce an amount of heat, by friction, sufficient to explode the whole mass of powder. In our Engraving it may be observed that small semi-cylindrical boxes are suspended under the axles of the runners, the iron collars having at times dropped into the pan; it seems strange that this precaution is of comparatively recent introduction. The risk incurred by each house containing a pair of Mills is greatly diminished by the expedient of a flat board, being suspended over each Mill; this is called the "blow-board," and it is the first thing to move by the concussion of the air beneath it. It is connected by wires, with a cistern of water, immediately over the pan of its fellow Mill; its movement, therefore, causes the upsetting of this cistern, which instantly drowns the gunpowder in such dangerous proximity. The attendants are as little in these Mills as possible; they work in watches of eight hours each, and at the present busy time these Incorporating-mills [illegible] constantly, except for the renewal of the charges, from four o'clock on Monday morning until late on Saturday night. It is surprising to find that lamps are used, but they are never allowed to enter the house. The projecting window shown in our first Illustration is double, and contains a lamp in a small reservoir of water, and it is only approachable from the outside. In no other part of the works is an artificial light used, the men leaving their work at half-past three o'clock in the afternoon both summer and winter. After all we are not sorry to hurry our Sketch, and leave these Mills; but we find that more hazardous processes are to follow. The powder, thus incorporated, is in hard flat lumps; and it has now again to be reduced to dust. This is accomplished in the "Breaking-down House," where an inclined plane conveys the solid hard pieces through the rollers, crushing nearly 500 lb. in the hour. Here the goloshes are again called into requisition; every object in the house being covered by a sort of bloom of gunpowder, and this, too, in its most explosive state. The powder has now once more to be brought to a solid form; and we next visit the "Press House" [illegible] goloshes again; and we remark that a mass of earth and brickwork forms a blast wall between the house containing the mill and that occupied by a fine hydraulic press used in the process. We have here an enormously strong box, about three feet square, containing nearly fifty gun-metal plates. The fine powder is filled in between these plates and then submitted to hydraulic pressure of about 120 tons to the square foot; in fact, to nearly a pressure of 700 tons on the whole mass, for three-quarters of an hour. This reduces it to one-third in bulk; and, on opening the box, we find, instead of the fine loose powder, solid square flat cakes, about three-eighths of an inch in thickness, and nearly as hard as slate. Before leaving this house, these cakes are roughly broken up, and sent in buckets to the "Granulating mill," where the hard, flat pieces are treated in a similar manner to that in the "Break-down Mill," of which, indeed, this is only another form. Sieves regulate the sizes of the broken fragments which constitute the *grains* of that which we at last recognise as gunpowder. This house has its



THE INCORPORATING-MILL.

STOVING-HOUSE AND TRAVERSES.

ELECTRIC TELEGRAPH FOR THE SEAT OF WAR.—THE WAGGON.

floor covered with hides, fastened down with copper nails; the side of the room against that in which the workmen waits is bomb-proof; and, all preliminary arrangements having been made, the mill can be started or stopped by a rope passing through this wall, thus avoiding much risk to the men. We need hardly say that no iron is used in any part of the place: all tools are of copper, or gun metal. The powder is then dried, by heat, in a "Stoving-house;" and, as this is a process in which there is not much to see, and considerable risk to be incurred, we content ourselves with admiring the arrangement of the traverses—mounds of earth, some 30 feet thick (shown in our third Illustration)—which are built in order to confine the explosion, as far as possible, to the one house; though, from some unexplained cause, there seems an awful contagion in these matters; and near this very spot, in 1843, several mills exploded within a few moments of each other, with no any apparent communication, and seven workmen were destroyed on that unfortunate occasion. There is yet one more process: the gunpowder, though now in grains and dry, is still mixed with a quantity of dust, or particles finer than the grain, it has therefore to undergo a "reeling" in the "Dusting-house" (the white building in the distance of our first Illustration). The powder is here placed in cylindrical sieves of different degrees of fineness, corresponding to the quality of the powder. These sieves revolve with great velocity, and the dust escaping through the meshes, the clean gunpowder is drawn off from the interior of the reels, through a sort of tap into the barrels for packing. For the finest powder there is still one more ordeal, that of "glazing," where a portion of black-lead is shaken up with the grain, to impart a gloss to its surface: this luxury is not allowed to cannon-powder, which is at present the only manufacture carried on at the Waltham Mills.

THE COMMISSARIAT IN THE CRIMEA.—An old campaigner, in a letter dated Oct. 14th, Camp over Sebastopol, says, "I must in fair play give praise to our commissariat department, for I never saw a better rationed army in all my life. Not one day have we been without food and who some provisions—the pork, twice a week, admirable, and every other day excellent beef or mutton, 1lb. each man, tea and sugar daily, and though it is the fashion to abuse the commissariat officers give what they may, still the tea is, I believe, only done by boys, who expect to get turtle soup and champagne. Few can know better than myself how our army was provisioned during the late war—biscuit and the worst description of beef, no tea, no sugar; we now get a double allowance of the finest rum I ever tasted. They are a set of hard-working officers who do not certainly figure themselves; I have known many to be up all night riding to see after provisions. I like to give praise where it is due, and few can have better opinions on these subjects than those who have served in the Crimea campaigns; for, as I said before, boys who have seen nothing but regimental messes in England, can give no opinion on the subject. Every valley there are good cottages and villas, you enter a house with all the accommodation of an English gentleman—pier glasses twelve and fourteen feet high, pictures, libraries, Broadwood's grand pianos, all broken to pieces, and the rest done by us, but by their own detestable Cossacks."

THE RUSSIAN PRISONERS AT LEWES.—The war prison, which is open to the public, has been visited by vast numbers of persons during the past week, as many as 400 or 500 being admitted in the course of a day. Most of these come over from Brighton, and, as nearly all liberally purchase the toys manufactured by the prisoners, they have recently become greatly enhanced in price, and those for which, a few weeks since, the prisoners were glad to receive 6d., are now sold at 1s. or 1s. 6d. Many of the toys (the whole of which are made with large clasp-knives) are exceedingly pretty, and exhibit great ingenuity on the part of the makers. Not a little surprise has been excited by the progress they have made in acquiring the English language. In reply to the questions of purchasers, "How much?" they readily answer, in a good plain London brogue, "A shilling," "eighteenpence," "two shillings," or "half-a-crown," according to the value which they set on the particular toy. Their exchequer, at present must be in a very flourishing state, for, besides the large amount which they have received during the past week, the Duke of Devonshire has sent them £200, and the officers who are on parole have received £1000 from the Czar; so that both officers and men are pretty well off in a financial point of view. Until last Sunday the prison was thrown open to the public during the afternoon; but it was found very difficult to carry out the regulations of the prison, from the large number who availed themselves of the privilege, so the practice has been discontinued. On Friday morning Lieutenant Bann, the governor, took about 100 of the prisoners out for exercise on the South Downs and, as this was the first time they have been outside the walls during their incarceration, they enjoyed the change, and the weather was beautifully fine. It is intended to take them out in detachments at stated intervals, a guard of pensioners accompanying them.

A COOL EXPLOIT.—"Among the deeds of coolness I must mention that of a Light Division man. He was one of a picket, and, seeing a tent open in plain clothes riding out of Sebastopol, with a guard of three or four soldiers somewhat in his rear, watched him. Presently the horseman got off, walked a short distance on one side in order to sketch—probably he was an engineer officer taking the positions of our active to our sa ed the favourable opportunity, and quietly up to the mounted him, and rode off in triumph to his comrades, who received him with a British cheer."—*Letter from the Crimea.*

ELECTRIC TELEGRAPH FOR THE WAR.

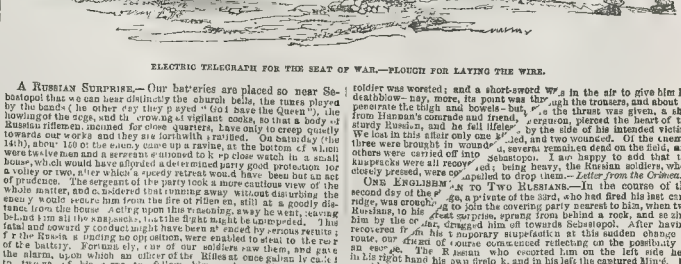
THE Electric Telegraph Company have lately supplied Government with a very complete and portable set of Electric Telegraph apparatus, adapted for use in the field, to accompany the munitions sent out to the East, where it will doubtless prove a valuable auxiliary to the service. It consists of two waggons, each containing a complete set of instruments batteries, and telegraph apparatus; and a sufficient supply of insulated wire, to establish, at a moment's notice, a telegraphic communication to a distance of ten or twelve miles either on land or under water. Each waggon is to be drawn by six horses, and to be accompanied by a staff of mounted officers and men; and Sappers and Miners have been educated for that duty at the Company's Central Station, at Lothbury.

The appliances for laying out the wire over irregular ground, and through marshes and rivers, are very ingenious, and the instruments are so thoroughly portable that after being shifted from place to place they can be fixed in working order in a few seconds. For communications by day and night, between distant points, such as the banks of a river, a distant outpost, or battery in intrenchments, between vessels at sea, and especially between the fleet and the shore, this novel auxiliary will doubtless prove of the highest utility.

The mode of communication is briefly as follows:—The wire is deposited by a subsoil plough in the ground, at a depth sufficient to protect it from ordinary casualties; the wire being coiled round a wheel revolving horizontally, attached to a carriage drawn in advance. The whole apparatus can be worked by the strength of eight men. Of course, this contrivance is available only for moderate distances. Twelve coils each a mile in length, are neatly packed in the waggon, which also carries the plough, and the requisite tools. The wire can easily be removed, and, if necessary, laid down in another direction.

The accompanying Carriage and Plough were sketched at Woolwich previously to their being sent to the seat of war.

COMFORTABLE QUARTERS.—Head-quarters had been established here, and all the best houses taken possession of. I had some difficulty in procuring one, but at length succeeded, and am now living in the house formerly occupied by a Russian officer. It is one of the best in the place, both as regards cleanliness and situation, being half-way up the hill, and considerably above the elevation of the town. It is well furnished—sofas, chairs, chintz, glass in abundance, and all we should expect to find in an English house—at least, in point of furniture. The cellars are well filled with flour, corn, &c.; so I am well off. An officer of Engineers is living with me, and our arrangements are very good. I have bought a cow and calf—this is to ensure fresh milk—and in addition to the luxury we are now baking our own bread, as none was to be procured, and we were tired of living on biscuits. For the cow and calf I gave thirteen silver rubles (equal to £2 5s.); this is considered a high price. The common rations are obtaining a goodly supply of oxen at 20s. to 30s., and excellent sheep at 2s. a head. Supplies of every kind are now made exorbitant in their charge, and most difficult to be had. There are no shops, and the only means of obtaining them are from the transports, price 7s. a bottle for brandy, 4s. a pound for candles, and other things in proportion. *Letter from Balaclava.*



ELECTRIC TELEGRAPH FOR THE SEAT OF WAR.—PLOUGH FOR LAYING THE WIRE.

A RUSSIAN SURPRISE.—Our batteries are placed so near Sebastopol that we can hear distinctly the church bells, the tunes played by the bands (the other day they played "God save the Queen"), the lowing of the cows, and the crowing of vigilant cocks, so that a body of Russian riflemen, mounted for close quarters, have only to creep quietly towards our works and they are forthwith ravilled. On Saturday (the 14th), about 150 of the enemy came up a ravine, at the bottom of which were twelve men and a sergeant stationed to keep close watch in a small house, which would have afforded a determined party good protection for a volley or two, after which a speedy retreat would have been but an act of prudence. The sergeant of the party took a more curious view of the whole matter, and considered that running away without disturbing the enemy would secure him from the fire of rifles en, still at a goodly distance, from the house. Acting upon this reasoning, away he went, leaving behind him all the sandwiches, but the flight might be unimpeded. This fatal and cowardly conduct might have been enforced by serious results for the Russian, finding no opposition, were enabled to steal to the rear of the battery. Fortunately, one of our soldiers saw them, and gave the alarm, upon which an officer of the Rifles at once gallantly called to twelve of his men to follow him. Away they went, of course supported as soon as possible by others—and the 150 Russians retreated before them very steadily. Now it was that a terrible, but interesting, conflict took place between the tall stalwart men of the 2nd Battalion of Rifles, and a huge Russian rifleman. Bannon, an Irishman, rushed at the Cape for his enemy, and a second shot after fired by his opponent, but fortunately a cap could not be found. Seizing this, Bannon dashed up, and with his fist knocked the Russian over a low wall, and leaped after him. The two now grappled, and a dreadful struggle followed, in which, at last, our soldier was worsted; and a short-sword was in the air to give him his deathblow—nay, more, its point was through the trousers, and about to penetrate the thigh and bowels—but, ere the thrust was given, a shot from Bannon's comrade and friend, Ferguson, pierced the heart of the sturdy Russian, and he fell lifeless by the side of his intended victim. We lost in this affair only one killed, and two wounded. Of the enemy, three were brought in wounded, several remained dead on the field, and others were carried off into Sebastopol. I am happy to add that the knapsacks were all recovered; being heavy, the Russian soldiers, when closely pressed, were compelled to drop them.—*Letter from the Crimea.*

ONE ENGLISHMAN TO TWO RUSSIANS.—In the course of the second day of the fight, a private of the 33rd, who had first his last cartridge, was crouching along to join the covering party nearest to him, when two Russians, to his great surprise, sprang from behind a rock, and seizing him by the collar, dragged him off towards Sebastopol. After having recovered from his temporary stupefaction at this sudden change of route, our friend of course commenced reflecting on the possibility of an escape. The Russian who escorted him on the left side held in his right hand his own firelock, and in his left the captured Minié. By a sudden spring the 33rd man seized the Russian's firelock, and, on the speculation of its being loaded, discharged it at its owner. The ramrod flew over one head, and as his companion was not less rapidly clubbed. Calmly looking up at his own Minié, our friend returned towards the camp and joined his regiment. This little episode was witnessed by a sergeant and several other skirmishers.

SANG-FROID.—Captain Peel gave one of his many proofs of determination and *sang-froid* on the 25th. A shell fell into the battery upon which he instantly seized it in his arms, and hurled it over the parapet, where it exploded harmlessly.

HOSPITAL SHIP NEAR THE SERAGLIO, AT CONSTANTINOPLE.

HOSPITAL SHIP AT CONSTANTINOPLE.

Our readers are already aware that many of the English and French who were wounded at the battle of the Alma have been taken to Constantinople, to find shelter and proper surgical aid. The French are mostly in their hospital at Pera; the rest are at their barracks at Ramichiftik. The English have a spacious and tolerably comfortable hospital near Cadikeiry, beyond the Scutari Barracks. At that place they remain till they become convalescent, when they are placed in an old Turkish hulk, transformed into an hospital, and anchored for the purpose near the Seraglio.

The accompanying Sketch represents that vessel: she is a large two-decker, and had been rotting for years in the dockyards of Kassim Pacha. The Scutari Barracks are seen on the right, and Scutari Proper on the left. The cool north breeze is freshening, and a French store-ship is gliding gracefully into the Marmora, under royals, her yards squared to receive the favouring breeze. Nearer to us, a small Turkish craft, or Chekdémé, laden with wood, dashing swiftly through the water, bears down with swelling sails to the harbour. These Chekdémés form a very pretty addition to the many picturesque objects found in an Oriental view.

Nearer still we see the harem of some Turkish Grandee taking a row up the Bosphorus, to spend the day at Geurk Sou, or some other charming spot—for it is Friday, the day on which the Turkish women, with their children, assemble on the shores of the Bosphorus or the Golden Horn, to gossip, eat *mahalabee*, and loll on the greensward beneath the wide-spreading plane tree.

Letters have been recived from Dr. Hall, the principal medical officer in the Crimea, stating that the sick and wounded at Scutari, are going on most satisfactorily; that every man is provided with all that is necessary for his comfort and accommodation: and that, although 2,103 beds are occupied, there are 1,100 more in readiness to receive any wounded that may arrive from the Crimea. A letter from the medical officer in charge of the 3rd Division, dated Oct. 11, Camp before Sebastopol, says:—"There has been no case of cholera in the 3rd Division for the last eight days, and no death from any cause."

A letter from the Camp, of Oct. 16, says:—"The sickness from which we so long and so seriously suffered has, I think I may say, quite disappeared. I have not heard of a case of cholera during the last two or three days; but we have many in hospital with diarrhœa, jaundice, dysentery, fever, and rheumatism."

RUSSIAN FLEET MOORED OUTSIDE THE BATTERIES OF SEBASTOPOL, UNDER THE GUNS, SEPTEMBER 22.

BATTLE OF THE ALMA.—SKETCHED FROM THE MIZEN-TOP OF H.M.S. "RETRIBUTION," BY LIEUTENANT MONTAGU O'REILLY.

Let the reader fancy himself for the moment on the mizentop of the *Retribution*, on the forenoon of the 20th of September, as our Correspondent was when he made the above Sketch of the scene which presented itself that day on the northern shore of the Crimea. First of all he would have seen a dense mass of troops marching southward along the shore road to Sebastopol, which runs pretty near the edge of that low ridge of white cliffs distinctly visible in the foreground, and rather forcibly reminding him of some parts of the chalky coast between Brighton and Beachy Head. These troops consist of the French Infantry and Horse Artillery. The long line of troops extends from the extreme left to the southern ridge of the Alma, up the steep banks of which a portion of the artillery has already been dragged, and where it is beginning to produce some effect upon the left wing of the Russian army. The Russian report of the battle, which we have given in another part of this week's publication, and which is much more truthful than the ordinary bulletins from St. Petersburg, confesses that the appearance of the French in that unexpected quarter was rather a damaging affair. After stating that the Zouaves had crossed the Alma near the shore, and pushed rapidly along the narrow ridges to the heights, the report gives the result as follows:—"The appearance of these troops on our flank, and almost in our rear, obliged Prince Menschikoff to throw forward the Moskau and Minsk regiment from the reserve, together with a regiment of Hussars." But neither the "Moskau" nor the "Minsk" invincibles could save the Russian General from a shameful defeat, as the report is forced to admit at last. "The French had already succeeded in bringing a battery up to the heights, which received our reserves with a hot fire. The two regiments were compelled to retire. As Prince Menschikoff now saw that his left flank was turned, and that his centre and right, after the losses they had sustained, could no longer hold their ground, he ordered all the troops to fall back upon the Katscha." That retreat, however, was at a later hour of the day than the one at which our Sketch was taken. It represents the march of the English army soon after the commencement of the attack. The English centre may be seen not far behind the French, marching for some distance in parallel columns with their allies apparently. The left wing, consisting of English infantry, has parted from the main body, and is taking its course along the rising ground to the eastward, with a view to turn the right flank of the Russian army. The smoke a little to the left of the centre marks the Village of Burliuk, and the vineyards near it, where a party of Russian Rifles had taken up a galling position, from which they were speedily driven by our troops. To the right of the smoke, caused by the cannonading at this point, may be seen those dense masses of Russian infantry in front of the hill, through which the English soldiers had to force their way, fighting every inch of ground, before they succeeded in planting their colours on the heights of the Alma.

OBITUARY OF OFFICERS WHO FELL AT THE ALMA.

ABERCROMBY (Lieutenant Robert), of the 93rd Regiment, was shot dead at the head of his company. He was, we believe, third son of Sir Robert Abercromby, Bart., of Birkenbog, Chief of the Clan. From this house descended, through a junior line, the famous Sir Ralph Abercromby.

ANSTRUTHER (Second Lieutenant Henry), of the 23rd Regiment—second son of the present Sir Ralph Abercrombie Anstruther, Bart., of Balcaskie, county Fife, by Mary Jane, his wife, eldest daughter of the late Major-Gen. Henry Torrens, K.C.B. He was of a race historically eminent in Scottish annals; and descended in the female line from the Hays, Marquises of Tweeddale, the Scotts, Dukes of Buccleuch, the Erskines, Earls of Kellie, and the naval house of Hamilton. His grandfather General Robert Anstruther, one of the most accomplished soldiers of his time, commanded the rear guard of Sir John Moore's army, which he brought safely into Corunna, on the night of the 12th January, but survived only one day the extraordinary exertions he had made. He died 14th January, 1809, and lies interred in the north east division of the citadel of Corunna. Lieutenant Anstruther was in his nineteenth year.

BRAYBROOKE (Lieutenant W. L.), attached to the 95th Regiment. This promising young officer was Lieutenant and Adjutant in the Cheshire Rifles, and, being on leave of absence, was prompted by his professional ardour to seek the opportunity of active service in the Crimea. He had obtained leave from Lord Raglan to join the 95th, and it was in the dashing charge of that regiment that he met a glorious death. He was the son of Col. Braybrooke, of the Ceylon Rifles.

BUTLER (Lieutenant Joseph H.), of the 23rd Fusiliers, was eldest son of the late John Butler, Esq., of Rathmoyle, Queen's County. Several of our contemporaries have erroneously stated that this young officer was brother of the hero of Sutlej.

CARDEW (Lieutenant and Adjutant), of the 19th.

CHESTER (Lieutenant-Colonel Harry Grenge), of the 23rd Royal Welsh Fusiliers, fell at the head of his regiment, and is mentioned with high commendation in Lord Raglan's despatch. The gallant Colonel was son of the late Major-General Harry Chester, of the Coldstream Guards, by Harriot, his wife, daughter of General Sir Henry Clinton, K.B., and grandson of Robert Chester, Esq., of the Middle Temple, by Harriot, his wife, daughter and coheir of Charles Adelmare Cæsar, Esq., the descendant of King James the First's Master of the Rolls, Sir Julius Cæsar.

COCKERELL (Lieutenant Robert), of the Royal Artillery, had only attained his nineteenth year. He was third surviving son of C. R. Cockerell, Esq., R.A., of Hampstead.

CONOLLY (Captain J. C.), of the 23rd Regiment, was a young Irish officer.

CUST (Captain Horace W.), of the Coldstream Guards, Aide-de-Camp to Major-General Bentinck, received so severe a wound in the leg that amputation was necessary, from the effects of which he died during the night after the battle. He was third son of the Hon. Colonel Peregrine Francis Cust, nephew maternally of the Duke of Buccleuch, and grandson of the first Lord Brownlow. His uncle, the Hon. Sir Edward Cust, of Leasowe Castle, Cheshire, is a Major General in the Army; and his first cousin, Captain Henry Francis Cust, was lately a Captain in the 8th Hussars, and Aide-de-Camp to the Lord-Lieutenant of Ireland. To the present head of the Cust family, John William, Earl Brownlow, the great estates of the Earls of Bridgewater have fallen, by the recent decision of the House of Lords. The gallant Captain Cust, whose death we record, had just completed his 28 h year.

DEW (Captain Armine), of the Royal Artillery, was fourth son of a Herefordshire country gentleman, the late Tomkyns Dew, Esq., of Whitney Court, in that county. He had reached the age o. 28.

DOWDALL (Captain George James), of the 55th Regiment, was son of Patrick Dowdall, and grandson of George Dowdall, Esq., of Cannestown, county Meath, by Catherine, his wife, eldest daughter of Patrick Drake, Esq., of Rosetown, the representative of one of the oldest families in Ireland. George Dowdall, D.D., a collateral ancestor of Captain Dowdall, was Archbishop of Armagh in 1543.

EDDINGTON (Captain J G.), and his brother, Lieutenant Edward Eddington, both of the same regiment—the 30th—fell together at Alma. They were the sons of the late Captain G. Eddington, formerly of the Royals

EVANS (Captain Francis-Edward), of the 23rd Fusiliers, was second son of Thomas Browne Evans, Esq., of North Tuddenham, Norfolk, and Deane, Oxford-shire, by Charlotte, his wife, daughter of Sir John Simeon, Bart. The gallant officer's grandfather, the late Thomas Browne Evans, Esq., was Irish Sheriff of Norfolk in 1795; and two of his brothers are in the military service of the East India Company.

KINGSLEY (Lieutenant and Adjutant H.), of the 95 h, joined at Portsmouth (together with Lieutenants Eddington and Pollitt), the day before the regiment embarked, after having escaped through the whole of the Kaffir war.

LUXMORE (Lieutenant Frederick), of the 30th Regiment, descended from an old Devonshire family, one of which (John Luxmore, Esq., of Witherdon), sat in Parliament as member for Okehampton at the close of last century. The young officer, who fell at Alma, was the younger son of the present Rev. Charles Thomas Corndon Luxmore, of Witherdon, Vicar of Guilsfield, county Montgomery, by Frances Brooke, his wife, granddaughter of Sir Richard Brooke, Bart., of Norton Priory, county Chester. Lieutenant Luxmore was aged twenty-five.

MONTAGU (Lieutenant Francis Du Pré), of the 23rd Regiment, had just attained his twenty-fourth year. He was only son of the late Lord William Francis Montagu, second son of William, fifth Duke of Manchester, by Susan, his wife, sister and co-heiress of the last Duke of Gordon. Thus, in both lines, he descended from families pre-eminently distinguished in the military records of his country.

MONCK (Captain the Hon. William), of the 7th Fusiliers, was younger brother of the present Viscount Monck, a popular and highly esteemed nobleman in Ireland, nephew of the late Earl of Rathdowne, and the lineal descendant of Robert Monck, the brother of John Monck of Potheridge, ancestor of the renowned General Monk, the Restorer of the Monarchy. Captain Monck was born 28th February, 1823.

POLHILL (Lieutenant Robert Graham), of the 95th Regiment, was 2nd son of Edward Polhill, Esq., of Brunswick-square, Brighton, by Anne, his wife, daughter of Thomas Graham, Esq., of Edmund Castle, Cumberland, a descendant of the old-time Border family of Graham, of Esk, from which also springs the present First Lord of the Admiralty. The Polhills are an old race in Kent and Sussex; but their wealth and landed position were greatly increased by Richard Polhill, Esq., of Howbury-park, Beds, an eminent banker in the city of London, and a tobacco merchant in Southwark, who sat in Parliament for that borough, and died in 1756. He was great-grandfather of the young officer who so gallantly fell at the Alma.

ROSE (Brevet Major John Baillie), of the 55th Regiment, sprang from the distinguished Scottish house of Rose of Kilravock Castle, in the county of Nairn, to which John Baliol, King of Scotland, gave a crown charter at the Barony of Dingwall. In all times the house has maintained a leading position in their native country, and the gallant death of their descendant, on the heights of Alma, will not add the least brilliant name to the family pedigree. Major Rose was second son of the late Hugh Rose, Esq., of Kilravock Castle, by Katharine, his wife, daughter of Colonel John Baillie of Dunain, county Inverness. He was married to Miss Ellen Fatson.

RADCLIFFE. (Lieutenant Frederick Peter Delmé), was eldest son of Frederick Peter Delmé Radcliffe, Esq., representative of the family residing in an unbroken line at Hitchin Priory Herts, since Henry the Eighth took that Priory from the White Carmelites, and bestowed it upon Sir Ralph Radcliffe, Kn.ght. His paternal grandmother and maternal great aunt, the Lady Betty

NEW BOOKS, &c.

POPULAR EDUCATIONAL WORKS,
PUBLISHED AT
MILFORD HOUSE, MILFORD-LANE, STRAND, LONDON.

Fifth Edition.
WEBSTER'S DICTIONARY of the ENGLISH LANGUAGE; exhibiting the Origin, Orthography, Pronunciation, and Definition of Words; comprising also a Synopsis of Words variously Pronounced by different Orthoepists, and Walker's Key to the Classical Pronunciation of Greek, Latin, and Scripture Proper Names. TO THE PUBLIC.
DO NOT BELIEVE Lady Scott and interested STATEMENTS
WARNER'S COMMERCIAL and
GENERAL LONDON DIRECTORY, and KELLY and CO.'S Publishers of "Kelly's Post-office Directory."
The Public are hereby cautioned against false statements disseminated by Kelly & Co., and by Count Scott, respecting "Warner's General and Commercial London Directory."
To obviate Kelly and Co. must now be apparent to every one they can by no chance and does not pretend to have "Warner's Directory" in his possession of by a person thereby buying such a publication for their book, and a continuance of the audacious tales which for years they have upon and upon can pass to
The "Post-office Directory" is charge made for the "Post-office Directory" is proved by the recent extension of that work, without addition to the price at which it was sold before the present completion, and by the vast increase of the number of pages it must have considered a larger than it at present
Without entering further upon this subject (as there is no interest of maintaining a paper war), or calculate how from their pressure of time Messrs. Kelly and Co. could have found time for the "Post-office Directory," if there was no rival in the field the proprietors of Warner's Commercial and General London Directory," can merely continue the public against placing reliance upon any statements which may be made by Kelly and Co., and to state that Warner's is per fect willing to allow his Directory to depend on its own merits, and to leave the public to form their opinion fairly comparing the books and their respective prices, viz.:—

Kelly's Post-office Directory, 30s.	Wakkin's Commercial and General London Directory, 21s. With Supplement, 24s.

—Warner's "London Commercial and General London Directory" will be the work preferred.
WARNER'S COMMERCIAL AND GENERAL LONDON DIRECTORY OFFICE, 7, Finsbury-circus, London. Oct. 25th 1854.

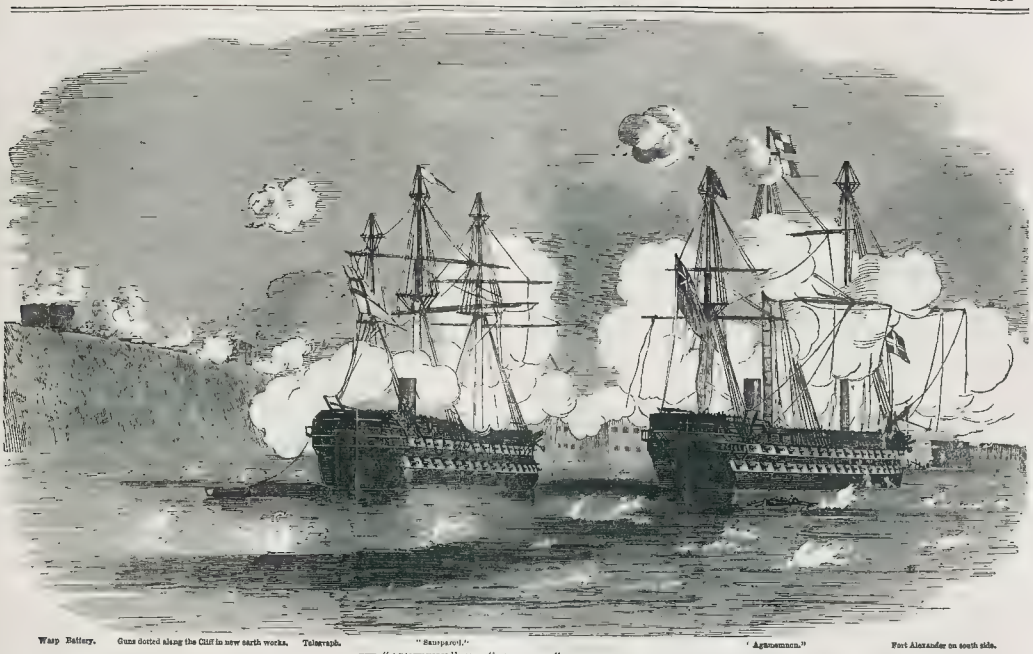
THE SIEGE OF SEBASTOPOL.—EXPLOSION OF A POWDER MAGAZINE IN THE ENGLISH TRENCHES.—(SEE CORRESPONDENT'S LETTER PAGE 487.)



THE "AGAMEMNON" AND "SANSPAREIL" ATTACKING SEBASTOPOL.

BOMBARDMENT OF SEBASTOPOL.

ATTACK OF FORTS CONSTANTINE AND ALEXANDER BY THE ENGLISH SQUADRON.

Off the Crimea, Oct. 23.

As the eyes of the world at the present moment are directed to the Crimea, and as the great question of Sebastopol being invincible is still in doubt, while our people at home are anxiously inquiring when the long-looked for object will be accomplished,—a few remarks as regards the state of affairs may not be without interest. On Tuesday, 17th, the trenches being ready, at 6.30 a roar of cannon commenced, which was kept up without a moment's cessation during the day. It had been decided on the night previous, that the fleet should act in concert, and make an attack [on Forts Constantine and Alexander. The sun shone most gloriously, and one quite enjoyed the cheerful morning, as the mist rolled away before a warm sun. The morning was spent by the ships in the combined fleet in clearing for action, and stowing everything below; while some were busy in arranging shot, sanding the decks, getting all useless spars out of the way, and preparing for a warm struggle with the frowning forts. At 10.50 the

BAR-SHOT, WHICH STRUCK THE FORE-YARD OF THE "AGAMEMNON."

Agamemnon weighed, and the English squadron followed her in the following order:—

Sanspareil.		London ..	towed by Niger.
Albion ..	towed by Firebrand.	Vengeance ..	,, Highflyer.
Queen ..	,, Vesuvius.	Rodney ..	,, Spiteful.
Britannia	,, Furious.	Bellerophon	,, Cyclops.
Trafalgar	,, Retribution.	Arethusa ..	,, Triton.

With *Samson*, *Tribune*, *Terrible*, *Sphinx*, *Lynx*, and *Spitfire* as look-out ships. The French weighed a little earlier, and proceeded towards the South Forts. At 1.10 the batteries opened fire on the French, which was quickly returned, but the shot appeared to fall short. At 1.30 the *Agamemnon* began to draw close to the land, and opened fire from her large pivot gun on the "Wasp" Fort, to try the range, which the Fort instantly replied to; and in a few minutes more, a large mud battery—Fort Constantine and Fort Alexander—opened their guns, as the ship drew into her station. She appeared to suffer fearfully at this time. At two o'clock the *Agamemnon* anchored head and stern in quarter less five fathoms, 750 yards off, and opened her port broadside on Fort Constantine. At 2.5 the *Sanspareil* and *London* anchored astern, and opened on the new batteries, on the cliff by the Telegraph Station and "Wasp" Fort; and at 2.20 the *Albion* anchored and engaged the "Wasp." At 2.32 the action became general. The *Britannia* was some way out in 15 fathoms of water, and 2300 yards off, opening fire. At 3.20 the *Albion* was seen to haul off, being on fire, and having suffered

OPENING OF THE BOMBARDMENT OF SEBASTOPOL.—CHAPMAN'S BATTERY.—(SEE CORRESPONDENT'S LETTER, PAGE 487.)

severely; she was followed soon after by *Arethusa* and *London*. The fire of five batteries was now directed on the *Agamemnon* and *Sanspareil*, doubtless the Admiral's flag being the mark. At 3.45 Lieutenant Coles, the Flag Lieutenant, was sent, amid showers of missiles, to the *Rattlesnake*, to come up and take off the fire, or the *Agamemnon* must be sunk; at the same time hinting that she did not intend to move, and that if she did not float she must sink. These ships did great service, and the *Queen* came up in good order. At 5.15 the *Agamemnon* slipped to avoid the *Rodney* falling aboard and backed astern; and at 5.35, opened on the "Wasp" Fort, to take off the fire from the *Terrible* and *Samson*. At 5.50 the *Agamemnon*, with the *Sanspareil*, who kept her place well, came out of action, when the firing ceased, and followed the rest of the squadron to their anchorage, off the river Katcha. The missiles used by the Russians consisted chiefly of shot, solid 68 lb., shell, rockets, and bar-shot, one of which struck on the foreyard of the *Agamemnon*, and broke in two parts, one falling on the poop, the weight of this shot was 78 lbs. Some little idea may be formed of the coolness and zeal of the crew of the *Agamemnon*, backed up by their officers, by their having, in the few hours they were engaging the batteries, fired 370 shot and shell from one broadside. The general opinion in the squadron was, that this ship could not exist under the batteries twenty minutes; but, from the judicious management in taking up her place and going close in, she suffered sloft more than in her hull. She came out of action a perfect wreck, having been struck 240 times; her hull showing gaping holes, her rigging hanging in shreds, her main-yard cut in two places, and almost every spar more or less damaged, including the mainmast, which had two shots in its head. Twice the ship was on fire—a shell having burst in the main-top, and set fire to the mainsail; and a shell having burst in the port side, and run up the lining of the ship, setting fire to the hammock nettings. No sooner was the ship again safely at anchor, than the Captains paid their respects to Sir Edmund Lyons; on Sunday last the French Admirals and Captains also paid a visit to the *Agamemnon*, being loud in their exclamations of the good service of his ship, and declaring that she had held the "post of honour." The accompanying Sketch shows the *Agamemnon* and *Sanspareil* as they appeared in the afternoon; and the Plan, at Page 457, explains the position of the different ships. I send also a Sketch of the Bar Shot, which struck the *Agamemnon*.

OFFICIAL DESPATCHES.

(From the *London Gazette* Extraordinary.)

LORD RAGLAN'S DESPATCH.

Portman-square, Midnight, Nov. 6.

His Grace the Duke of Newcastle has this evening received despatches, of which the following are copies, addressed to his Grace by General Lord Raglan, G.C.B.:—

Before Sebastopol, Oct. 28, 1854

My Lord Duke,—The operations of the siege have been carried on unremittingly since I addressed your Grace on the 18th inst.*

On that afternoon, the French batteries not having been able to reopen, the enemy directed their guns almost exclusively on the British intrenchments, and maintained a very heavy fire upon them till the day closed, with but little effect. I am happy to say, to the works, and with fewer casualties, than might have been anticipated.

On the following morning, shortly after daylight, General Canrobert not only resumed his fire from the batteries which had been injured, but materially added to the weight of his attack by the fire of batteries which he had caused to be constructed during the previous days and these have continued ever since; and he has had it in his power to push his approaches forward, and, like the English, materially to injure the defences of the place; but these are as yet far from being subdued; neither is a serious diminution of their fire perceivable.

Our fire has also been constant and effective; but the enemy, having at their disposal large bodies of men, and the resources of the fleet and arsenal at their command, have been enabled, by unceasing exertion to repair their redoubts to a certain extent, and to replace many of the guns that have been destroyed in a very short space of time; and to resume their fire from works which we had succeeded in silencing.

This facility of repairing and re-arming the defences naturally renders the progress of the sanitaire more slower than could be wished; and I have it not in my power to inform your Grace, with anything like certainty, when it may be expected that ulterior measures may be undertaken.

I have the honour to transmit to your Grace the return of killed and wounded between the 18th and 20th inst. inclusive.

In my last I announced to your Grace the death, which had just been reported to me, of that deeply-lamented officer, the Hon. Colonel Hood, of the Grenadier Guards. No other military officer has since fallen; but Major Prince Edward of Saxe-Weimar was slightly wounded on the 19th His Serene Highness insisted, however, upon remaining in the trenches until the detachment to which he was attached was relieved at the noon hour, and he has now resumed his duty.

Captain Lord Dunkellin, of the Coldstream Guards, was unfortunately taken prisoner yesterday morning, before daylight, in front of the trenches.

The naval batteries have continued their exertions without intermission, and I regret to have to report the death of two gallant officers of the Royal Navy—the Honourable Lieutenant Ruthven, who had died of his wounds, and Lieutenant Greathed, of her Majesty's ship *Britannia*. Both are universally regretted. The latter received a mortal wound while laying a gun, after having, to use the language of Brigadier-General Eyre, who was then in charge of the trenches, "performed his duty in the batteries in a manner that excited the admiration of all."

A considerable body of Russians appeared two days ago in the vicinity of Balaclava, but they have since withdrawn, and are no longer to be seen in our front.

I have reason to believe that Prince Menschikoff is not in Sebastopol. He is stated to have placed himself with the main body of the army in the field, which is represented to be stationed in the plains south of Bagtchera.

Admiral Cernilof, the chief of the staff, and temporarily in command of Sebastopol, is reported to have died of his wounds the day before yesterday.—I have, &c.,

RAGLAN

His Grace the Duke of Newcastle, &c.

NOMINAL RETURN OF CASUALTIES AMONGST OFFICERS FROM THE 18TH TO 21ST OCTOBER, 1854, INCLUSIVE.

2nd Battalion of Grenadier Guards—Colonel Hon. F. S. Hood, killed; Captain Cameron, Major his Serene Highness Prince Edward of Saxe-Weimar, Lieut. F. Davies, wounded.
30th Regiment—Lieut. E. F. Smith and Capt. Rideout, wounded.
44th Regiment—Capt. A. Brown, Lieut. M. Bradford, and Assistant-Surgeon J. Gibbs wounded.
side Regiment—Captain H. H. Mcrant, wounded.
Artillery Major C. C. Young, wounded.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

RETURN OF CASUALTIES FROM 18TH TO 21ST OCTOBER, 1854 BOTH DAYS INCLUSIVE.

Artillery—2 rank and file killed, 1 officer, 2 sergeants, 19 rank and file, wounded.
Royal Engineers—1 rank and file killed.
3rd Battalion Grenadier Guards—1 officer, 3 rank and file, killed; 3 officers, 1 sergeant, 8 rank and file wounded.
1st Battalion Coldstream Guards—3 rank and file killed; 1 drummer, 3 rank and file wounded.
1st Battalion Scots Fusilier Guards—3 rank and file wounded.
42nd Regiment—3 rank and file wounded.
79th Regiment—1 rank and file wounded.
93rd Regiment—2 officers, 1 rank and file, wounded.
41st Regiment—1 rank and file killed; 1 rank and file wounded.
47th Regiment—2 rank and file killed; 1 rank and file wounded.
49th Regiment—3 rank and file wounded.
4th Regiment—2 rank and file killed; 4 rank and file wounded.
28th Regiment—1 sergeant; 1 rank and file killed; 5 rank and file wounded.
30th Regiment—3 rank and file wounded.
44th Regiment—1 drummer killed; 3 officers, 9 rank and file, wounded.
20th Regiment—3 rank and file wounded.
21st Regiment—1 rank and file wounded.
30th Regiment—1 rank and file wounded.
6th Regiment—1 rank and file killed, 1 sergeant, 2 rank and file, wounded.
68th Regiment—1 officer, 2 rank and file, wounded.
19th Regiment—1 rank and file killed; 1 rank and file wounded.
49th Regiment—1 sergeant killed; 1 rank and file wounded.
23rd Regiment—1 rank and file killed; 1 rank and file wounded.
33rd Regiment—2 rank and file wounded.
77th Regiment—1 sergeant, 2 rank and file, wounded.
1st Battalion Rifle Brigade—1 sergeant, 7 rank and file, wounded.
Total—1 officer, 2 sergeants, 1 drummer, 18 rank and file killed; 10 officers, 5 sergeants, 1 drummer, 98 rank and file, wounded.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

* This despatch has not been received.

NOMINAL RETURN OF CASUALTIES FROM 18TH TO 21ST OCTOBER, 1854, BOTH DAYS INCLUSIVE.

GRENADIER GUARDS (3RD BATTALION).

KILLED.—G. Bowell, J. Malone, R. Bridle.
WOUNDED.—Sergeant, sergeant-major Kay, corporal; W. Cooper, R. Luthers, W. Jackson, G. Beeshee, J. Harmon, R. Crickmay, W. Vine, privates.

COLDSTREAM GUARDS.

KILLED.—S. Bull, 6. Tighe, privates.
WOUNDED.—G. Saudle, F. Smith, privates; J. Martin, drummer.

SCOTS FUSILIER GUARDS.

WOUNDED.—A. Fenister, G. Edy, J. Purvis, S. Gerrie, J. Watson, privates.

42ND REGIMENT OF FOOT.

WOUNDED.—D. M'Kenzie, Corporal. R. McCready, G. Fox, privates.

79TH REGIMENT OF FOOT.

WOUNDED.—A. Saunderson, private.

93RD REGIMENT OF FOOT.

WOUNDED.—Michael Leonard, private.

41ST REGIMENT OF FOOT.

KILLED.—P. Hoey, private
WOUNDED.—M. Madigan, John Lyons, private.

47TH REGIMENT OF FOOT.

KILLED.—D. Flynn, T. Bill, privates.
WOUNDED.—T. Cable, Corporal.

49TH REGIMENT OF FOOT.

WOUNDED.—P. Cunningham, W. Murphy, privates.

4TH REGIMENT OF FOOT.

KILLED.—H. Ewen, J. Frawley, privates.
WOUNDED.—J. Banks, M. Mulqueen, J. Cross, J. Hagan, privates.

28TH REGIMENT OF FOOT.

KILLED.—W. Faulkner, Colour-Sergeant. S. Door, private.
WOUNDED.—J. Bailey, F. Darcy, J. Timson, J. Timpson, F. Cavan, privates.

30TH REGIMENT OF FOOT.

WOUNDED.—Myles Carrol., John Kelly, John Keef, privates.

44TH REGIMENT OF FOOT.

KILLED.—F. Neill, Drummer.
WOUNDED.—H. Simmons, E. Young, corporals. J. Keane, W. Kearns, J. Magnane, J. Black, W. Locke, T. M'Peake, R. Thompson, privates.

20TH REGIMENT OF FOOT.

WOUNDED.—James Hilton, James Dowell, privates.

21ST REGIMENT OF FOOT.

WOUNDED.—William Bishop, private.

57TH REGIMENT OF FOOT.

WOUNDED.—James Phillips, private.

SRD REGIMENT OF FOOT.

KILLED.—Robert Preston, private.
WOUNDED.—Thomas Fiel., sergeant. William Clarke, corporal. John Hannon, private.

68TH REGIMENT OF FOOT.

WOUNDED.—Patrick Holder, Stephen Hayes, privates.

7TH REGIMENT OF FOOT.

KILLED.—William Lisegar, corporal.
WOUNDED.—Charles Backer, corporal.

19TH REGIMENT OF FOOT.

KILLED.—William Dunn, sergeant-major.
WOUNDED.—John Dunn, James Renny, Jacob Beer, George Haigh, privates.

M'Kay, W. Withers, W. Donnison, Robert Russell, John Ilgh, John Hill, John Honey, John Bradley gunners and drivers.

ROYAL ENGINEERS.

KILLED.—William Denholm, private.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

VICE-ADMIRAL DUNDAS'S DESPATCHES.

Admiralty, Nov. 5.

The following despatches from Vice Admiral Dundas have this day been received at the Admiralty:—

Britannia, off the Katcha, Oct. 13, 1854.

Sir,—1. I beg you will acquaint the Lords Commissioners of the Admiralty that the Allied armies are employed in erecting batteries to the south of Sebastopol, but, I hear, are much retarded by the rocky nature of the ground; the Russian fire of shot and shell by day and night has produced little or no effect. The naval and marine battalions are healthy, and there is less sickness in the army.

2. Sir Edmund Lyons, in the *Agamemnon*, with the *Diamond*, and a squadron of steamers, is at Balaclava, assisting the troops. A French squadron, under Vice-Admiral Bruat, is anchored between the lighthouse and the harbour, in communication with the left of the French army. A division of steam-vessels watches the mouth of the port constantly, where four or five Russian steam-vessels always have their steam up; and the large sailing vessels are, with Admiral Hamelin and myself, anchored off the Katscha River, the weather hitherto having permitted our remaining in those positions.

3. The *Sidon* and *Inflexible*, with *Cacique* and *Calon*, are still in Odessa Bay, to prevent any communication by sea with the Crimea, and I have sent a transport to them with coals and fresh provisions, which I have drawn from Sinope.

4. On the 11th an Austrian vessel, laden with hay for the Commissariat, got within range of the batteries, and was deserted by her crew at the second shot; she ran on shore about 1500 yards south of the harbour mouth, and was got off that evening and towed to Balaclava. I enclose the report of Captain Jones, of the *Samson*, who, with Capt. Stewart, of, the *Firebrand*, and Mr. Boxer, Second Master in charge of the *Beagle*, assisted by the French launches of the inshore squadron, got the Austrian to sea from under the batteries in a very successful and creditable manner. The *Firebrand* has four shots in her hull, but fortunately no casualties.

5. I learnt from Captain King, of the *Leander*, of the approach to Eupatoria of a large Russian force near the town. I have sent the *Firebrand* and *Vesuvius* to assist in the defence, should it be attacked, and shall send two other vessels to-day.

6. The French and Turkish troops sent for from Varna and Constantinople by the *Simoom*, *Vulcan*, *Cyclops*, and our transports, are hourly expected; they have been kept back and detained by the late strong northeast gales. I have, &c.,

(Signed) J. W. D. DUNDAS, Vice-Admiral.

To the Secretary of the Admiralty, &c.

Britannia, off the Katcha, Oct. 18, 1854.

Sir, 1. I beg you will acquaint the Lords Commissioners of the Admiralty that the siege batteries of the Allied armies opened fire upon the Russian works south of Sebastopol, about half-past six o'clock yesterday morning, with great effect, and small loss

2. In consequence of the most urgent request of Lord Raglan and General Canrobert, it was agreed by the Admirals of the Allied fleets that the whole of the ships should assist the land attack by engaging the sea batteries north and south of the harbour, on a line across the port, as shown in the accompanying plan; but various circumstances rendered a change in the position of the ships necessary and unavoidable.

3. The *Agamemnon*, *Sanspareil*, *Samson*, *Tribune*, *Terrible*, *Sphinx*, and *Lynx*, and *Albion*, *London*, and *Arethusa*, towed by the *Firebrand*, *Niger*, and *Triton*, engaged Fort Constantine and the batteries to the northward, while the *Queen*, *Britannia*, *Trafalgar*, *Emperor of Lodney*, *Belleraphon*, with *Hauntis*, *Rodney*, *Leviathan*, *Highflyer*, *Spitfire*, *Sprightly*, and *Cyclops*, lashed on the port side of the several ships, gradually took up their positions, as nearly as possible as marked on the plan.

4. The action lasted from about half-past one to half-past six p.m., when, being quite dark, the ships hauled off.

5. The loss sustained by the Russians and the damage done to Fort Constantine and batteries cannot, of course, as yet be correctly ascertained.

6. An action of this duration against such formidable and well-armed works could not be maintained without serious injury, and I have to regret the loss of 44 killed, and 286 wounded, as detailed in the accompanying lists. The ships, masts, yards, and rigging are more or less damaged, principally by shells and hot shot. The *Albion* has suffered much in hull and masts, the *Rodney* in her masts, she having failed on the reef, from which she was got off by the great exertions of Commander Kynaston, of the *Spiteful*, whose crew and vessel were necessarily exposed in performing this service, but, with the exception of the *Albion* and *Arethusa*, which ships I send to Constantinople to be repaired, I hope to be able to make my squadron serviceable in twenty-four hours. Foreseeing, from the nature of the attack, that we should be likely to lose spars, I left the spare topmasts and yards on board her Majesty's ship *Vulcan* at this anchorage, where I had placed her with all the sick and prisoners.

7. I have now the pleasure of recording my very great satisfaction with he ability and zeal displayed by Rear-Admirals Sir Edmund Lyons and the Hon. Montagu Stopford, and all the Captains under me by command, as well as my sincere thanks to them, and to the officers, seamen, and marines employed, for their unremitting exertions, and the rapidity of their fire, in the absence of a large number of the crews of each ship, who were landed to assist in working the siege batteries, &c., on shore; and to this circumstance I attribute the small loss of killed and wounded.

8. The gallant and skilful conduct of our French allies in this action was witnessed by me with admiration; and I hear with regret that they have also suffered considerable loss.

9. I beg to express my gratitude at the manner in which Ahmed Pasha, the Turkish Admiral, did his duty. I have, &c.,

(Signed) J. W. D. DUNDAS, Vice-Admiral.

The Secretary of the Admiralty, &c.

A LIST OF KILLED AND WOUNDED IN THE SQUADRON, IN THE ATTACK ON THE FORTS OF SEBASTOPOL, ON THE 14TH OCTOBER, 1854.

HER MAJESTY'S SHIP "BRITANNIA."

WOUNDED.—James W Vaughan, Lieutenant; Wlj am McNeil., John Andrews, William Parkyn, A.B's; Martin Grindlegy, James Spraunt, ordinaries; William Carey, boatswain; Joseph Richard, 1st class boy; William Vare, 2nd class boy.

HER MAJESTY'S SHIP "AGAMEMNON."

KILLED. John Smith (3); Robert Grey, boatswain's-mate, William Pegg's, A.B.; Jesse Spicer, ordinary.
WOUNDED.—Thomas S. Sanson, lieutenant; Duke D. Yonge, naval cadet; James Tope, Amara's domestic; William Chapin, John Ails, Augustus Jones, A.B.'s; William Plately, John M Carthy, George Robinson, John Parker, Percy Boyle, Robert Rummer, Patrick Smith, Edward Hammond, George Whitby, John Burton, ordinaries; John Spiers, Thomas Hayes, seamen Marines; John Martin, corporal; William Reeves, Daniel Ipps, 1st class boys, Philip Mason, 2nd class boy. Royal Marines William Warnford, bombardier; Thomas Rose, John Mundy, privates.

HER MAJESTY'S SHIP "QUEEN."

KILLED. John Curtis, 1st class boy
WOUNDED.—William Johns, boatswain's mate; Charles Lambard, A.B.; Henry Newman, Daniel Bayley, James Fitzhern, Jonathan Rogers, ordinaries, John Sheppard, Royal Marines.

HER MAJESTY'S SHIP "SANSPARELL."

KILLED.—Mr. Charles Maddox, midshipman; George Dicker, John Durham, John Heard Thomas Gaines, James Carr, William Jes., Swaine Hicks, James Barnes, A.B.'s; Henry Bath, 2d, sailmaker's crew; Thomas Bowden, 1st class b y
WOUNDED.—Mr W. L. Anderson Br Gunner Hall, Lieutenants. Mr C Pardoe, Second Master; Thomas Stevens, Abraham Gordon, Henry Avey, boatswain's mates William Parr, captain of mizentop; Joseph Cartmell, captain of the yard, John King, leading seaman; James Adamson, Richard Thomas, William, John Gaines, Thomas Claude, Alfred Noble, George Mallory, Jeremiah Donovan, William Hart, Thomas Howard, William Leonard, Oliver Mc Donald, John Williams, Michael Connelly, Thomas Clarke, Charles Rogers, Robert Jones, John Neville, Dennis Harrington, Thomas Bryant, Timothy Burwright, David Higgins, James Cook, Frederick Pearce, John stanley (2), Henry Page, Wisdom Sullion, James Joyce, William Steward, John Gibson, John Sark, Joseph Hounsome., Frederick Belonger, John Hosking, Nicholas Cudlip, William Hall, John J. Fenwick, Ichnes Jackson, Edward Blackmore, ordinaries Patrick Fitzgerald, band; William McCosley, Thomas Lacy, leading seamen; Henry Curtiss, sticker; Thomas Kenneth, James Harris, John Johns, George Rees, 1st class boys, William Langley, 2nd class boy. Royal Marines: William Bythesay, bombardier; George Tuck, gunner, John Boundy, private

HER MAJESTY'S SHIP "TRAFALGAR."

WOUNDED.—Thomas Blake, ordinary; Charles Goff, private, Royal Marines.

HER MAJESTY'S STEAM-FRIGATE "SAMSON."

KILLED.—John Mahoney, A.B
WOUNDED.—Stephen Cook, captain of maintop; James Frost, stok

HER MAJESTY'S STEAM-FRIGATE "TRIBUNE."

KILLED.—Thomas Harrison, ordinary
WOUNDED.—John Bird, A.B; Alfred Gasson, James Hemright, ordinaries Royal Marines; Thomas Eady, Henry Warner. Henry Leach, William Forg-hen

HER MAJESTY'S STEAM-FRIGATE "RETRIBUTION."

WOUNDED.—George Barber, F. Coleman, ordinaries.

HER MAJESTY'S STEAM-FRIGATE "FIREBRAND."

WOUNDED. Captain W. H. Stewart, Charles Featherstone, yeoman of signals; James Magee, ALMONER; William Shaffer, seaman; Joseph Wyatt, Captain after-guard.

HER MAJESTY'S STEAM-SHIP "SPHINX."

KILLED.—James Tracey, ordinary.

HER MAJESTY'S STEAM-SHIP "SPITEFUL."

KILLED.—William Wimerburn, bombardier, Royal Marines, Edward Thornton, ordinary.
WOUNDED.—Lieutenant Drummond, Henry Irvin, Mr. Baker, midshipmen; Charles Sallis, A.B.; Charles Sale, Ordinary; Mr. Ingram, Engineer; James Cason, 1st class boy; Robert Carter, James Frederick George.

HER MAJESTY'S STEAM-SHIP "CYCLOPS."

WOUNDED.—Joseph Badcock.

HER MAJESTY'S STEAM-VESSEL "TRITON."

WOUNDED.—Mr. R. Lloyd, Lieutenant-commanding; W. Janney, A.B.; Joel Winch, carpenter's mate; Charles Hiscutt, Royal Marines, Thomas Murray, boy.

HER MAJESTY'S SHIP "ALBION."

KILLED.—Lieutenant Chase, Thomas Bickford, coxswain, barge; Lewis Walding, captain mizentop, John Snipe, captain maintop; coxswain, John Parker, John Pound, James Lee, James Knipe, James Lambell, ordinaries; John Shropshire, cook's mate.
WOUNDED.—Mr. Peal, master; Mr Forster, paymaster; R. D. Mason, surgeon; William Chapman, quartermaster, Wm. H. Large, Thomas Bowden, captains mizentop; Stuart M'Clure, second captain after-guard, James Cason, seaman 1st class; John Burton, leading seaman; Just Jordan, Corr. Bowden, Pom. Fenlaith, Henry Rankin, John Finn, Alex. M'Connell, Charles Palmer, Robert Sinclair sen. William Sampson, John Murray, Thomas Grengan, William Williamson, James Maybell, 1st. Hanson, John Keegan, James Sutton, Stephen Sullivan, James Smith, James Daily, Peter Saville, John Abram, Richard Rendell, Samuel Jenkins, John M Donald, John Stacy, Henry Johnson, John Kinsey, Thomas Chandler, James Sudden, Wm. Swain, John Hall, James Wall, Joseph Thomas, Wm. Cundle, James Allsopp, Wm Gudgeon, Samuel Farrington, ordinaries; John Carrol, John Bushell, 2d; Jabez Hutchinson, Samuel Hall, John Wade, blacksmith's mate, Ed. Anderson, carpenter's crew Mm. Cooke, captain's cook; George Harris, cauliker's mate, Wm. Hemmings, carpenter's crew; John Attenborough, sick berth attendant; John Westcoly, Charles Bragg, 2nd boys, 1st class; Alexander Langwash, William Marshall, 1st class boys, William Treacy, Matthew Potter, 2nd class boys. Royal Marines: Robert Ramsay, diet; John Snook, Charles Simmons, Daniel Pull, privates

HER MAJESTY'S SHIP "SPELLEROPHON."

KILLED.—Robert Johns, coxswain of launch; William Cantrell, A.B; Edward Forles, ordinary; Richard Hall, William Jackson
WOUNDED.—Mr. Mr. Fraser, midshipman; James Smith, coxswain cutter; William Hill, A.B; George Wentworth, Joseph Jones, Daniel Bryant, James Adams, Alfred Hill, ordinaries Edward Davis, ordinary 2nd class, Thomas Joy, 1st class, band; William Stone, Alfred Fisher, 1st class boys; William Payne, 2nd class boy; Richard Chandless, marines.

HER MAJESTY'S SHIP "SODNEY."

WOUNDED.—Simon Coombes, ordinary, Robert Lisle, A.B.

HER MAJESTY'S SHIP "VENGEANCE."

WOUNDED.—William James, A.B., Richard Hick, leading seaman.

HER MAJESTY'S SHIP "ARGYLL SA."

KILLED.—Thomas Hunt, quartermaster, Henry Turnbull, A.B.; Charles Craig, ordinary; A. Edwards, boy.
WOUNDED.—Thomas Thorn, boatswain's mate, John Johnson, George Orchard, John Gill, John Gay, Frederick Long, A.B.'s, William Geddes, Daniel Finnesey, ordinaries; Osborne Critchell, boy. Royal Marines: Richard Webber, John Causey, Charles Yarnold, Thomas Harrison, George Roach, privates.

HER MAJESTY'S SHIP "LONDON."

KILLED.—Henry Penfold, George Sena, A.B.'s; Patrick Connor, ordinary, Michael Canlin, ordinary 2nd class.
WOUNDED.—Charles E. Stephens, lieutenant; Charles Burt, boatswain's mate; James Macshall, captain of forecap; James Wilson, Wm. J. Wilson, Alex. Johnstone, Stephen Lewis, John Newton, Robert Lee, John Cooper, James Hales, A.B.'s; Richard Lahine, James Bailey, James Leitch, ordinaries. Royal Marines: Thomas Lowe, Stephen Sharp, each Subers, Richard Kadgiel, privates.

HER MAJESTY'S SHIP "NIGER."

KILLED.—Edward Palmer, boy.
WOUNDED.—John Aldred, A.B.; Benjamin Avery, boy Royal Marines: Ramsey Reid, Edward Bibbs, privates.

HER MAJESTY'S SHIP "FURIOUS."

WOUNDED.—six. Returns not received.

ADMIRALTY.

Dundas—Wounded, 3.	Cyclops—Wounded, 1.
Lyons—Killed, 4, wounded, 26.	Lyons — Wounded, 3
Stopford—Killed, 11, wounded, 28.	Admiralty—Killed, 16; wounded, 71.
Canrobert—Wounded, 4	Britannia—Killed, 1, wounded, 15.
Raglan—Killed, 1, wounded, 2.	Rodney — Wounded, 2
Canrobert—Killed, 1, wounded, 2.	Vengeance—Wounded, 2
Hamelin—Killed, 1; wounded, 2.	Arethusa—Killed, 4, wounded 16.
Hamelin—Wounded, 2.	Admiralty—Killed, 1, wounded, 15.
Forbes—Wounded, 2.	Niger—Killed, 1, wounded, 4.
Admiralty—Killed, 1.	Furious—Wounded, 6.
Spiteful—Killed, 2, wounded, 9.	Total—Killed, 44; wounded, 286.

DAVID DEAS, Deputy Medical Inspector of Fleets.

Admiralty, Midnight, Nov. 6, 1854.

A despatch, of which the following is a copy, has this night been received at the Admiralty:—

Britannia, off the Katscha, 23rd October, 1854.

Sir,—I beg to acquaint you, for the information of the Lords Commissioners of the Admiralty, that, since my letter of the 18th instant, the siege batteries have continued their fire against the Russian works, which appear to have suffered much, and the fire slackened, although it is considerable.

2. The Naval Brigade are doing good service, and up to the 20th had a loss of 12 killed and 53 wounded, as per annexed list. By the desire of Lord Raglan, I have reinforced them by 410 officers and seamen, and placed Lord John Hay in the *Wasp*, under the orders of Captain Lushington.

3. Captain Brock, at Eupatoria, supported by the *Leander* and *Megæra*, has maintained his position well, although threatened and attacked by heavy bodies of cavalry, with guns; we have drawn large supplies from there, but as the Russians are destroying all the villages, I fear they will in future become very scanty and uncertain.

4. Since the action of the 17th the enemy have been working incessantly in repairing their batteries, and in constructing new works on the north side of the harbour, commanding the approaches by sea and land.

5. I have sent the *Albion* and *Arethusa* to Constantinople to repair; the other ships of the fleet have fished their masts, &c., and are ready for service.

6. The *Lynx*, *Sphinx*, *Stromboli*, and *Viper*, have arrived.

7. The weather hitherto has been very favourable, and the crews of the ships are generally healthy.

8. The English and French Steam Division still continue in the Bay of Odessa, actively employed in preventing communication with the Crimea.

I have, &c., (Signed) J. W. D. DUNDAS, Vice-Admiral.

To the Secretary of the Admiralty, &c.

LIST OF KILLED AND WOUNDED IN THE NAVAL BRIGADE ENGAGED IN FRONT OF SEBASTOPOL, DURING THE SIX DAYS ENDING OCTOBER 29, 1854.

"BRITANNIA."

KILLED.—Mr. George Greathed, lieutenant; William Naylor, A.B.
WOUNDED.—James Brown, boatswain's mate; Thomas M'Credie, Edward Lattoo, Francis Lewis, Bernard Killarney, Richard Hinlin (or Hinton), A.B.'s; Thomas Worrell, carp. serw.

"ALBION."

KILLED.—Sidney Smith, A.B.
WOUNDED.—William M. Dowell, lieutenant; Richard Wallace, William Hall, Henry Pidcot, John Foster, Wm. Wheeler, A.B.'s; George Lewis (or Rose), Charles Murphy, ordinaries.

"QUEEN."

KILLED.—John M'Conchie, A.B.; Alfred Barober, ordinary.
WOUNDED.—Mr. W. Sanctuary, mate; Joseph Maslin, Thomas Bush (since dead), A.B.'s; Richard Smith, George James, William Chasson, John Faithful, Nicholas Smith, Samuel Dine, ordinaries; Edward Hallet, carpenter crew.

"TRAFALGAR."

KILLED.—Charles Wilding, A.B.
WOUNDED.—Mr N. Norman, lieutenant; Mr. Ed. Bullock, Mr. R. T. Bullock, mates; Norman Ferguson, Richard O'Brien, A.B.'s; William Hurds, Joseph Puddifoot, Thomas Cock, ordinaries.

"BELLEROPHON."

KILLED.—Fred. Vincent, A.B.
WOUNDED.—Thos. Heddon, John Carils John Cosey, James Proudfo Wm. Alexander, Cann, Mathews, Henry Patterson, Wm. Supple A.B.'s.

"VENGEANCE."

WOUNDED.—Mr. Geo. Lyons (or Leyon), mate; Jos. Murdock captain forecap; Thos. Phillipps, Saml. Langlin, Geo. Roberts, A.B.'s.

"LONDON."

KILLED.—John Carser, John Anderson, A.B's.
WOUNDED.—Hen. C. R. Basham, lieutenant; John Gilham, James Murray, A.B's.

"RODNEY."

WOUNDED.—James Archer, John Fallen, A.B's.

"DIAMOND."

KILLED.—Edward Churchill, William Lakamas, captains maintop.
WOUNDED.—Alfred Mitchell, lieutenant; James Ingraham (or Pregraham), boatswain's-mate; W. M'Cann, William Matson, William Higgins, Thomas Symes, George Thompson, John Buchan, Nathaniel Anthony, William Dowling, A.B's; Arthur Knott, C.M.

"ARETHUSA."

KILLED.—Michael Blakeney, A.B.; Joseph Brown, sailmaker's crew.
WOUNDED.—Thomas Lander (or Landon), William Thomas, A.B.'s.

"BEAGLE."

WOUNDED.—Austin Rae (or Rice), A.B.

"FIREBRAND."

WOUNDED.—William Moorsom, Captain.

ABSTRACT.

Britannia—Killed, 2; wounded, 7.	London—Killed, 1; wounded, 3
Albion—Killed, 1; wounded, 5.	Rodney—Wounded, 2.
Queen—Killed, 2, wounded 10.	Arethusa—Killed, 2; wounded, 2
Trafalgar—Killed, 1; wounded, 5.	Diamond—Killed, 2; wounded, 11.
Bellerophon—Killed, 1; wounded, 5.	Beagle—Wounded, 1.
Vengeance—Wounded, 5.	Firebrand—Wounded, 1.

TOTAL—Killed, 12; wounded, 66.

STEPHEN LUSHINGTON, Captain Commanding Naval Brigade.

The Military Secretary to H. E. Lord Raglan,
Commander-in-Chief of the Army.

FRENCH OFFICIAL DESPATCHES FROM THE CRIMEA.

The Marshal, Minister of War, has received from General Canrobert Commander-in-Chief of the Army in the East, the following report, dated Head-quarters before Sebastopol, Oct. 18, 1854:—

DESPATCH FROM GENERAL CANROBERT.

Monsieur le Maréchal—Yesterday, at sunrise, we opened fire, in concert with the English army. Matters were go ng on well, when the explosion of a powder-magazine belonging to a battery—which, unhappily was a large one—created some disturbance in our attack. The explosion had the more effect, as our batteries were accumulated round the spot where it took place. The enemy took advantage of it to increase their fire; and, after consulting the General commanding the artillery, I deemed it advisable to suspend our fire to repair our damage, and complete on our right, by new batteries, nearer to the English lines, our system of attack.

This delay is certainly much to be regretted, but cannot be helped; and I am taking every means to render it as short as possible.

The city has withstood the fire much better than was expected. The *enceinte*, in its enormous development in a straight line, carrying all that it can receive in heavy calibre from the fleet, allows it to prolong the struggle. On the 17th our troops took possession of the plateau situated in front of the point of attack, called the mast bastion, and occupy it. This evening we construct there a masked battery of twelve guns, and if possible a second battery at the extreme right, above the declivity.

All our means of attack are concentrated on this bastion, and will, I hope, soon clear it, with the assistance of the English batteries, which take it in the left flank.

Yesterday, about ten a.m., the Allied fleets attacked the exterior batteries of the place; but I have not yet received the reports to enable me to give you an account of the results of that attack.

The English batteries are in the best possible condition; they have received nine new mortars, which will have great effect; yesterday, in the battery which surrounds the tower situated on the left of the town, an immense explosion took place, which must have done great hurt to the enemy. Six of them the fire of that battery has been very slack, and this morning only a few guns were able to fire from it.

I have no precise news of the Russian army. There is nothing to indicate that it has modified the position in which it awaits reinforcements.

I have received nearly all the infantry reinforcements I expected from Gallipoli and Varna. General Le Vaillant has just arrived with his *état-major*, which to increases five divisions of infantry, the army I command

The health of the troops is very satisfactory, their moral condition excellent, and we are full of confidence.

DESPATCH FROM ADMIRAL HAMELIN.

The Government has received the following despatch from Vice-Admiral Hamelin:—

Monsieur le Ministre,—By my letter of the 13th of October, I announced to your Excellency that, with all my Staff, I went on board the *Mogador* frigate to cast anchor as near as possible to the French head-quarters, and to combine with the Commander-in-Chief in general attac by land and sea against Sebastopol, as soon as the siege batteries should open fire. On the 14th I had an interview with General Canrobert, whose views coincided with mine.

On the 15th a council of the Admirals of the combined squadrons was held on board the *Mogador*, and the dispositions for a general attack were agreed upon, and then submitted to the Generals o the army o land, who at once agreed to them.

This general attack was fixed for the 17th, the day upon which the siege batteries were to open fire.

As regards the naval portion, it was to take place as follows:—

The French squadron undertook to face the breakers on the south, and take up a position at about seven cables' length from the 360 guns of the Quarantine Battery, from the two batteries of Fort Alexander and the Artillery Battery.

The English squadron, about the same distance, was to face the 120 guns of Fort Constantine, the Telegraph Battery, and the Maximilian Tower, to the north.

If your Excellency will imagine a line drawn along the entrance of Sebastopol, from east to west, that line separates in two parts the position of attack of each squadron.

The Turkish Admiral, with the only two line-of-battle ships actually at his disposal, was to cast anchor at the north of the two French lines, that is to say, in an intermediary position between the English and French vessels.

On the morning of the 17th inst. the siege batteries opened fire; but the weather being calm it became necessary for the steam-frigates to take the liners in tow before the line of twenty-six vessels could be formed before Sebastopol. Notwithstanding this difficulty, and the breaking up of the French line which it caused, as one portion was anchored at Kamiesh and another before the Katscha, I have the satisfaction to inform your Excellency that the vessels of our first line advanced, about half-past twelve in the day, under the fire of the batteries of Sebastopol, which they breasted for nearly half an hour without replying to: they then opened their fire in reply, but suffered some inconvenience owing to their small number. Later, the other English and French vessels came up, and the attack became general.

At about half-past two the fire of the Russian batteries slackened: the Quarantine Battery was silent. This was the chief object of the French squadron. Our fire was redoubled, and continued till nightfall.

At the moment I am writing to your Excellency I am ignorant of the success of our siege batteries, which opened their fire the same time that we did against the Russian land batteries.

If the Russians had not closed the entrance to Sebastopol by sinking five vessels and two frigates, I do not doubt that the Allied squadrons, after the first fire, could have successfully run in and placed themselves in communication with the land army. Perhaps they would not have suffered a greater loss than we have now to lament; but the extreme measure adopted by the enemy to sacrifice a portion of their fleet obliges us to content ourselves with keeping up a five hours' cannonade against the sea batteries of Sebastopol, with a view to silencing them for a time, and to occupy a portion of the garrison at their guns, and thereby to afford material and moral aid to our land army.

To day, the 18th October, I have only time to give your Excellency a general idea of this affair, which, in my opinion, does great honour to the French navy. I subjoin a list of killed and wounded on board each ship. I will send shortly a detailed account of the attack, and the part taken by each vessel.

At the commencement of the action the enthusiasm was extreme; during the action it was no less so. Before opening fire I made the signal, "France observes you." This was replied to by shouts of "Vive l'Empereur!"

I am, with profound respect, Monsieur le Ministre, your very obedient servant,

Vice-Admiral Commander-in-Chief of the Mediterranean squadron,
HAMELIN.

USE OF A PLAID IN BATTLE.—A letter was received a few days ago by a draper in Inverness, in which occurs the following curious circumstance:—"The big rough plaid which we got some time ago for Captain Campbell, 42rd Regiment, saved his life at the Alma, as four balls several balls in it after he was carried off the field on the 20th September."

ALMA AND ALBUERA.—The battle on the Alma has been treated as an almost unexampled instance of frightful carnage in so short a space of time. The slaughter was greater at Albuera; and here is the proof. At that memorable conflict, which lasted under four hours, there were 32 British officers killed, and 158 wounded. The rank and file and non-commissioned officers killed were 854 in number; and there were 2467 wounded. The Portuguese regiments had 2 officers killed and 16 wounded, and 100 soldiers killed and 243 wounded. Total killed and wounded, 3781; about double the number of the Alma casualties. Besides these, about 500 men were taken prisoners.

BRITISH FEELING IN CANADA.—On receiving the news of the triumph of the Allied armies in the Crimea, the House of Assembly in Canada unanimously adjourned for the evening, in order to mark its sense of the glorious achievement. The motion made by the Premier, Sir Allan M'Nab, was carried by both sides of the House rising simultaneously, and cheering their hearty approval.

A STONING MATCH.—Our skirmishers did good work on the second day of the siege. The Russian skirmishers were completely driven back by the superior skill and activity of our men. A man of the Rifles was seen to pick off eight men in succession from a Russian battery. The skirmishers, in fact, found their work so exciting and agreeable to their feelings, that, on being relieved, they expressed much regret. Towards dark, a party of ten men, belonging to the 33rd, found themselves without a single cartridge left. Returning home, they encountered a dozen Russian skirmishers, who had likewise expended all their ammunition. The two parties looked at one another with great astonishment, both expecting a volley. At length an impatient 33rd man took up a large stone and flung it into the midst of the Russians. The ice was broken; it was followed on both sides, and the original spectacle of a stone match now offered itself. The English at length became tired of the exercise, and charged the Russians with the bayonet, with which the latter, with very good judgment, declined to be tickled, and consequently retired.

THE WORKS ROUND SEBASTOPOL.—We have before us a sketch of the works of circumvallation executed by the army now engaged in the siege of Sebastopol; and, without pretending to give our readers a perfectly correct idea of them, we will describe them as summarily as possible. It must first be recollected that the place is not defended on the side of the attack by regular works. The southern side being lined with inaccessible rocks, the engineers charged with fortifying Sebastopol never dreamt of the possibility of a landing in that direction. There is, consequently, no *enceinte continue*, properly speaking. The town, however, is protected on that side by a crenelated wall, with a ditch and some advanced earthworks, hastily thrown up, and which the garrison has actively laboured to complete since the bold manœuvre by which, after the battle of the Alma, the Allied troops moved from the north to the south of the place. At some distance in front of those works stand three large towers, faced with masonry, communicated together by works provided with bastions, forming a kind of imperfect half-moon. The portion of the city thus attacked by the Allied army contains the barracks and the prison, situate at its highest point. To the east is the harbour, and beyond it the quarter inhabited by the seamen, against which the English attack is particularly directed. To the west are a cemetery and a lazaretto, opposite the French line of attack. The three towers are in advance of those positions, and it is on them the fire of our batteries must first be brought to bear. The line of communication forms a sort of semicircle, the left of which rests on the bay of Chersonesus, where we landed our siege *matériel*. The right extends to the river Tchernaya, in advance of the road by which the army marched upon Balaclava, when it turned the city. Independently of the half-moon formed by the towers, the French army will have to silence the forts of Alexander and the Quarantine, erected for the defence of the place on the sea-side. They, however, also protect the south, and it will be necessary to silence their fire.—*Moniteur de l'Armée.*

SOLDIERS' SUPERSTITION.—When the 93rd Highlanders embarked at Portsmouth for the seat of war, they were in great despondency owing to their being accompanied by the 44th Regiment, which sailed with them in the time of the Peninsular War, in which they were almost decimated.

THE

SIEGE OF SEBASTOPOL.

(*From our Special Correspondent.*)

Heights above Sebastopol, Oct. 16, 18

THE siege of Sebastopo lbids fair to rank as the most remarkable operation in the annals of modern warfare. It is true we are no longer at a time when sieges were carried on with guns of small calibre, requiring a near approach to the walls to be effective against them. All the science of first parallel and second parallel is growing old, and armies, when they have advanced within 900 yards of stone walls, find that they are as close as they require; and, that with heavy 95 cwt. pieces, they can batter and breach to such purpose, that the work of a fortnight in the olden time is completed in twenty-four hours. But, whilst it is fully admitted that the use o four enormous guns forms a new era in the history of sieges, it is equally certain that in no instance have besieging armies been placed in front of works so heavily armed as the batteries of the Russians in Sebastopol. Novelty begets novelty. In the old sieges, of which we have all read descriptions, we are told of batteries opened at 800 yards, containing four or five guns, and commencing breaches upon fixed points. The business of the besieged was to repair as fast as possible during the night the damage done by the besiegers during the day, or to make all the necessary arrangements for rendering the breach as d ngerous as possible to the parties told off for the assault. Now, however, we are not content with attacking one of the enemy's works in the manner which time and the art of sieges has taught; but we make a general onslaught on the whole fortress at once: so at least, our leaders intend to act against Sebastopol—a place of great strength, doubtless, but not fortified according to the rules by which inland fortresses are strengthened. There is this disadvantage in the delay required to erect the numerous batteries intended to act simultaneously against Sebastopol—that it gives the enemy time to meet the danger which threatens him, and to erect new works in positions previously unoccupied. Thus the Russians, since the beginning of the attack by the Allies, have commenced erecting works which, if they were to be completed in time, would do serious damage by enfilading our trenches. They were partially successful in an attempt of this sort made upon the French works, and it behoved our allies speedily to make arrangements to defeat this new movement. But all will be of no avail against the tremendous energy of the besiegers, who, by working with extraordinary vigour, have so far brought their efforts to a satisfactory termination, that the delay and impediments placed in the way by the enemy, as well as by the natural difficulties of the ground, will only retard for a brief space the complete destruction of all the Russian d e fences.

The operations carried on by the Allies have been divided into three. We shall have simultaneously, Gordon's attack from the extreme right, and Chapman's attack from the extreme left. The third attack is that of the French, who are nearer to the town than we are, but whose means in the shape of guns of heavy calibre, are not so powerful as ours. Gordon's attack consists of two enormous batteries, of which I have already given you a partial description. On the brow of a hill of which the sides slope down to a gorge leading to Sebastopol, is the first of our redoubts. Immediately in front of it lie several of the large ships of war, which it is our particular object to destroy. Upon the level a work heavily armed plays directly upon the front of our battery; whilst on the left the circular tower and its outer works, throw shot and shell right into it. This, our extreme right battery, is armed with four 64-pounders from the *Terrible*, one Lancaster gun from the *Beagle*, and two 10-inch mortars. It is so admirably traced out that every shot which ricochets from the earth-works in front of the Russian circular fort, and every shell which goes beyond that fort, will hit or damage other works situated behind, or strike into the middle of military buildings of the town. The hills which form the opposite side of the gorge, are a great advantage to us by affording cover to our pickets on the extreme right, sheltered as they are from the fire of the batteries at the end of Sebastopol harbour. These batteries contrive, however to annoy us considerably; for, though they cannot see either pickets or redoubt, they can fire over the hills at random and cover a great deal of ground with their shot and shell. When a red-coat shows itself in this direction, Cossacks, who line the distant hills, are seen to wave small flags as signals, and forthwith a three-gun battery begins to play, and throws its projectiles at various angles, so as to cover at least forty-five degrees of ground; whilst, at the same time, a nasty spitfire of a steamer treats the crest of the hill to shrapnel, which rattles about amongst the bushes with wonderful vivacity.

The second battery in Gordon's attack is much nearer the town than the first. It is built on the brow of an undulation, behind which is a hill parallel to those on its right. One front of the work faces a Russian redan, or earthwork, from which it is distant 1340 yards. It faces the angle of that work which cannot return its fire. The second face fronts the round tower and earth-works already alluded to, and is distant from it 1600 yards. The right face is merely a shoulder, to cover the flank and defend the redoubt. The left face fronts the shipping in the Yhungenara, or Admiralty harbour, which is about 1700 yards distant. The armament of this battery, which was completed to-day is two 64-pounders, with furnaces for red-hot shot, for the shipping; six 8-inch guns for the redan, seven 32-pounders, from the *Diamond*, for the round tower; and four 24-pounders, as flanking defence: six 10-inch mortars complete the armament of the work.

Immediately behind this work, on the crest of a precipice, is a one-gun battery, mounted with one of Lancaster's guns, which was destined to batter a three-decker in the Admiralty harbour. This object has been defeated since the erection of the battery, by the withdrawal of the vessel; but a second embrasure has been made, and the Lancaster gun will now be directed towards the fated round tower against which so many snarling muzzles are already turned with dreadful purpose.

Chapman's attack is made in the plain below, and fronting the camps of Sir George Cathcart and Sir Richard England's divisions. It consists of four large batteries, attached to each other by a parallel 1200 yards long. Battery No. 1 is armed with six heavy 64-pounders, to batter the right face of the redan already alluded to, at a range of 1460 yards. Battery the second is armed with eleven guns, to batter the circular fort, at a range of 2250 yards, and one gun directed against the lazaret. These two batteries are to be manned by the Royal Artillery. Battery the third is armed with fifteen heavy guns, against the round tower, at a range of 2300 yards; and six guns to silence a battery on the left, called the Barrack Battery, 1460 yards distant. Battery No. 4 is armed with six heavy pieces to batter the redan at a range of 1460 yards; one gun is directed against the road leading up to the round tower, at a range of 2100 yards; and another at a spot called the Garden Battery. Four guns are directed against the Flagstaff Battery, which is the extreme point of the English attack; and one piece is placed to enfilade the redan. Besides this heavy armament, six mortars are placed to shell various points, not as yet specified. Batteries 3 and 4 are to be manned by the Royal Navy.

The French attack consists of several batteries connected by a parallel. Their chief point of attack is a casemated tower on the extreme left of their position. It is much stronger in appearance than that against which our efforts are directed; and will, doubtless, require a number of guns to bear on it. The batteries of the French are armed

BALACLAVA HARBOUR.—(SEE PAGE 491.)

with seventy guns; ours will have a total of seventy-one and fourteen mortars. The following extracts are from my daily journal:—

Oct. 13.

The night of the 12th was spent in tolerable quiet, and to-day there was no novelty during the whole forenoon. At about three o'clock, however, a small party of Russians was discovered creeping up from a ravine to the right of Gordon's large battery, and presently they deployed in skirmishing order, showing great pluck. The rifle picket in front of the Light Division stood to its arms, and began to extend from its right in order to catch them, but the skirmishers had meanwhile drawn close in to the battery, and were fired at within rifle distance, say about 400 yards, by a covering party of the Fusilier Guards. No sooner had the fire opened than the daring skirmishers began to retire, and as they did so our fire redoubled in vigour. But there was more smoke than aim, and the Russians got away in safety, and possibly with the certainty of knowing all they want to ascertain. A similar skirmish with similar results took place on our extreme right, where some Russians attempted to force back our pickets; but they were kept at bay till a party came up to their assistance, and they fell back with loss.

Oct. 14.

To-day the enemy attempted a reconnoissance, on a larger scale than usual, towards our right. A party of 300 of them crawling up the ravine below [Gordon's extreme right battery, surprised an out picket of the 47th, which fell back, leaving its packs and blanket ruined house. The Russians advanced until they were checked party of the 2nd battalion of Rifles, which opened on them from t doubt. A picket of the 47th at the same time opposed them the opposite sides of the ravine. The firing now became heavier, a De Lacy Evans moved the 55th and 95th Regiments to the hi our right, whilst the Rifles, the Guards, and other regiments, the First and Light Divisions, were moved forward, and halted b Gordon's battery. Six guns were also ordered up, three to the lef three to the right, and remained a proper distance in the rear. I meanwhile, however, the Rifles had put an end to the Russian de

BALACLAVA—VIEW INSIDE THE PORT.—(SEE PAGE 491.)

ration, by driving back the enemy and killing several of his men. party of Russians had entered the ruins, where, but a few minutes fore, the picket of the 47th reposed, and carried off the packs and nkets. They succeeded, most of them, in slipping away with their oty, but two of them fell victims to their plundering propensities. The st was a burly fellow, who had already shouldered an English pack, hen he was seized by a Rifleman, who collared him. The Russian ould not surrender, but drew a straight sword he had by him; on this a struggle of a deadly kind ensued, and the Russian ll dead from a shot through the head. The other Russian was cap- red in the ruins, and taken prisoner. He was a fat, burly fellow, out twenty-two years of age, and not less in stature than six feet. 'e had in this skirmish two men of the 2nd battalion Rifle Brigade ounded—one through the thigh the other through the ribs.

During the day the Russians commenced a furious cannonade upon the rench lines, and kept up an incessant fire from all the guns they could t to bear, for about half-an-hour. It seems that the French have en in the habit of sending in their skirmishers close to the walls, to t at the embrasures. This so annoyed the enemy that they sent a rricane of projectiles into the French lines, and caused them some s. It is said—but I know not how far the story may be true—that e Russians had a battery enfilading part of the French works. They d kept quiet, however, till their guns were in position, when they ped to do some mischief. The French discovered the danger in time, kily; and it was whilst they were making alterations in their works at the Russians came down upon them. A few men killed was the fly loss incurred.

A Russian deserter came over from Sebastopol, after having received e remendous flogging for delaying to turn out on the occasion of the t alarm. He said that the Russians had moved all but seven thou- nd men to the other side of Sebastopol harbour.

October 15.

To-day, as well as last night we were undisturbed. The usual amount of lling took place in the trenches, and a few casualties occurred, but grave cases. The *Orinoco* and *Medway*, which arrived at Bala- va yesterday, landed 3000 Turks from Constantinople. They were mediately moved to the front of Balaclava, where they assisted in npleting the series of works already commenced for fortifying our dition. The French, who had finished a line of breastwork along the ole of our rear and flank, completed a large redoubt at the summit

THE ENGLISH AND FRENCH ARMY POST-OFFICES AT PERA.—(SEE NEXT PAGE.)

he hill, above the main road leading from Sebastopol to Balaclava. English have also finished the breastwork along the right flank of position. The *Agamemnon*, flag of Admiral Lyons, was moved out Balaclava to-day. She and twenty-five other ships are, it is said, to part in the bombardment on the 17th.

October 16.

t ten o'clock this morning a red and white flag was hoisted from ominent spot in Sebastopol; and, at the same moment, the whole eries, from the tower to the flagstaff, opened fire upon Chapman's illel. The numerous working parties had barely time to rush under r of the parapet and abutments, when the most terrific shower of dles poured down upon them. Shells burst simultaneously on the apet, in the work itself, and beyond the work. Large 64-pound shot ghed up the ground all round, and the air was covered with round , ragged pieces of shells, dust, stones, and smoke. In a few minutes astopol was enveloped in clouds of stinking vapour, and nothing was e seen through it except the blazing guns as they were discharged n one spot. For half-an-hour the terrific peal lasted—the sharp of the 24-pounder making harmony with the noise of the 32- nders and 64-pounders. Then suddenly this firing ceased, with the e regularity as it had opened, and left the workers at leisure. I am ved to say that we suffered considerable loss from this fierce attack. tain Rowley, of the Grenadier Guards, was killed behind the bat- where he lay with a covering-party. He and his men were behind nk of heavy stones, over which the shot and shell passed without m. One shot, bounding on a stone, was thrown straight up into th. and fell down perpendicularly upon Captain Rowley, who was lying n to avoid the bursting shells. The spine was injured; and, though th was not instantaneous, the wound was fatal. Several men of the were hit, one colour-sergeant of the Rifles disabled, four men of Royals, and some in the 63rd and 68th hart.

r Colin Campbell has been appointed to the command of Balaclava, mportant post at this juncture.

his evening I went down to visit the trenches. I chose the largest our works as that which offered most interest, and accordingly cted my steps towards that part of the lines called Chapman's ack. The road to it lay down a precipitous ravine, the sides of which e lined with a prickly scrub—the only vegetation that seemed able row in the hard sides of the vale. Here and there the rock had n itself into strange holes and fissures, and formed cavities into ch men might creep; and boulders, under the protection of which might hope to defy the effects of bounding shot. A broad pathway,

ENTRANCE TO BALACLAVA HARBOUR.

thickly strewed with cannon-balls, blind-shells, and remains of hostile missiles, led down the ravine in a serpentine course. Even the scrub appeared unable to grow in the craggy rocks which projected on both sides. There was nothing around but rock or iron. At one of the turns of the road I took advantage of a break in the side of the ravine; and, ascending its rather steep incline, I came in sight of the object of my visit. It was evident, however, that the dangerous ground to pass over was that which separated me from the cover raised by the busy workers in front. The road appeared to rise to a point somewhat dangerously exposed to hostile view. I know no more nervous feeling than that of passing over a spot in full sight of a grinning range of 32 and 64-pounders; but the enemy, as if disdaining single enemies, allowed me to pass into the battery without opening any of its fires. A minute had not elapsed, however, when shell and shot began to fly about the spot with considerable vivacity. There were enormous parties in every part of the work, many busy with the pick and shovel, many filling sand-bags, and others carrying shot and shell. The officers commanding the working parties were mostly seated in convenient places, under cover of a parapet ten feet high: some were eating, others reading newspapers and commenting upon the latest intelligence. There was something striking in the contrast between the peaceful occupations of eating and reading and the hostile apparatus which surrounded us. Gabions, fascines, shot, shell, sand-bags, and guns, lay about in confusion; around were the outward signs of deadly purpose, whilst the whizzing projectiles of the enemy showed that they were at hand, and that the quiet of the present moment might be changed in the next or hostile encounter. In the midst of the working parties, the Engineer officers appeared to command. The scientific portion of their work was striking to the eye of one who had seen more than usual of the preparations for attacking a fortified city. I had seen the works raised by the Turks at Kalafat, and those which the Russians erected in front of Silistria; I had seen the field-works of Slobodzie, and the fortified position of Giurgevo. But all these sank into insignificance before the size, the strength, and the scientific qualities of the breaching batteries of Sebastopol. The parapet thrown up by our Engineers was twenty feet thick and ten feet high, faced internally with sand-bags and gabions, and strengthened by abutments of the same material, six feet thick, to prevent the possibility of enfilade. The guns—most of them of enormous calibre—were fixed on beautifully-finished slides and platforms. Large shell-proof magazines were made in rear; and everything had that appearance of force and duration for which the English are pre-eminently distinguished. The position of the working parties at a distance from this parapet was such as to render them more liable than the rest to the effects of the enemy's fire; and to diminish the danger, sentinels were placed at intervals along this parapet, with their eyes on a level with it, to give notice of fire. The enemy's fire was thus always known before the projectile came. At the word "Shot," you might see a general rush of the men from their work into safe places; many, indeed, had become so hardened to them that they took no notice; but at the word "shell" the movement was much greater, and there was a general rush to the friendly cover of the parapet. But even then there was but comparative safety, for the pieces were as frequently thrown by the explosion in the direction of this cover as they were to the outside. Presently a relief party made its appearance upon the road leading into the redoubt. They came separately, running at wide intervals; but the enemy had seen them, and down came a shell, exploding with a thump in the midst of them; then followed a second—a third—a fourth—a fifth—and a sixth; yet, miraculous to relate, though they fell true, they struck no one! It is, indeed, marvellous how many chances a man has of escaping from the effects of fire from one or two heavy guns. After all, a shell is a very small thing compared to the space which it covers, be its size ever so great. The return from a battery is a more nervous task than the going to it. In the one case, you see the danger coming; in the other, it comes on you by surprise.

THE BOMBARDMENT.

Sebastopol Heights, Oct. 17th, 1854.

A general order issued by Lord Raglan late on the evening of the 16th, made known to the troops the gratifying intelligence that fire would be opened from the trenches against Sebastopol at half-past six on the following morning. Covering parties from all the regiments were told off to protect the batteries against a sortie, should the enemy attempt it; and two men from each company in the several regiments were allowed to volunteer on the dangerous service of moving forward to within 500 yards of the Russian works, to pick off the gunners at their pieces. The sun rose upon a splendid sky, barely skirted, by a bed of light and silvery clouds. The embrasures of our batteries—which had been carefully masked until the moment of their use—had been cut open, and, as the dawn burst upon the defenders of the besieged fortress, they saw seventy embrasures yawning before them in the English lines. The French had not been backward in their preparations, and were likewise ready with seventy guns. As the sun rose—long before half-past six—the enemy commenced a steady fire on all their line against our works, which preserved a grim silence, and never returned a shot. At half-past six precisely, the signal—three mortars fired—was given, and all the guns in the Allied lines burst forth with a tremendous boom. The effect was terrific. The air was filled with mighty sounds such as had never stirred the echoes of these hills before. As volley after volley succeeded each other in quick succession, and were met by return fires from the Russians, at first more numerous than our own, the peals were deafening. A heavy smoke began to darken the works on both sides, in the midst of which the large circular tower on our right shone out in grand relief. The Russians were now firing from this tower with four guns upon its summit, and large earthern batteries at its base. Scarcely half an hour had elapsed before the most terrific changes were visible in its aspect. Several shells had burst upon the top, and thrown off the earthworks on every side: three of the guns were at once dismounted, and the fourth alone stood up. A solitary gunner appeared to be working this gun, and he manfully held

CAPES PHERIENT AND AIA, AND BALACLAVA BAY.

THE ENGLISH AND FRENCH ARMY POST-OFFICES IN PERA.

THE Post-office for the English army has just been removed from Galata to Pera. The building it now occupies is substantially built, of stone, and may be called a fine house for Constantinople. It is situated on the road leading from the four corners (*quatre rues*) of Pera, down to Tophana, and immediately above the Hôtel d'Europe. Next door, above the English, is the French Army Post-office, where two Turkish soldiers mount guard, and salute all French officers who pass. This is rather a novel sight for Constantinople. These buildings face the south-west, and command a view of the entrance to the Golden Horn and the Marmora Sea.

INCIDENTS OF THE SIEGE OF SEBASTOPOL.

AN ALARM IN A FOG.

On the 15th and 16th (says a private letter), about daylight, there was rather a dense fog. On the first of these occasions the besieged took the opportunity to try and make a reconnaissance in force, in which, however, they badly succeeded. They endeavoured, under cover of the fog, to steal a march round our right flank, on which I have before told you the Second Division forms an outlying picket of the army. It is our most exposed and weakest point in the event of the Russian army coming in our rear, because on our immediate rear the French have fortified a very strong camp position. But to resume the enemy having advanced under cover of this fog, up a gorge on our right, were rather suddenly brought to view by the power of the sun reducing the fog. Their appearance, of course, led to an alarm. Horse artillery were galloped towards the spot, and after a skirmish of no great moment, they were glad to make a hasty retreat to their quarters in Sebastopol—nothing particular happening beyond the capture of a Russian prisoner or two. The other little excitement occurred yesterday morning, when, without any particular object that I can ascertain, the whole of the Russian batteries opened simultaneously, I suppose, with the idea of injuring our works. The roar was stunning for the moment, but the effect, as far as the works were concerned, nothing. I am sorry, however, to say, it was attended with some loss of life—about eleven killed and wounded. But even this cannot be thought anything of. The Grenadier Guards, who were relieving the guards on the works, were the sufferers; and, last one Officer, Captain Rowley. He was lying under cover at the time, but a shot struck a large stone behind him, and came back on him, killing him on the spot.

THE NIGHT BEFORE THE BOMBARDMENT.

By Monday afternoon, the 16th, the French works had been completely repaired, and all was in readiness on our side for a combined attack. Monday night was an anxious time. As if the enemy also anticipated the coming struggle, and reserved their strength for the following day, we were but slightly annoyed by their fire during the night. A deserter who came over to us that evening, however, imagined a very different reason for the slackness of the Russian batteries. He said that all the officers of the garrison were that evening giving a grand ball to the inhabitants of Sebastopol, and that it was attended by all the leading ladies and gentlemen in the town. He said also that both town and garrison are perfectly certain of success, and of repulsing all our attacks within a fortnight; their earthworks and batteries he knew were powerful; and General Liders, who commands in chief, was daily expecting news of the advent of an immense body of troops. The statements of these deserters may be well open to doubt, but this fellow appears to have told the truth. Certainly, from whatever cause it arose, the enemy fired little that night. By grey dawn on the 17th, when it was barely light, the enemy commenced a desultory cannonade. The noise, and the hope—for we were not yet completely certain—that our trenches would answer it, set everyone astir, and a large number hurried up to the remains of a lone house on the hill, which is situated between two of our batteries, and commands an almost bird's-eye view of the town and harbour of Sebastopol.

THE MORNING OF THE BOMBARDMENT.

Nothing could exceed the clear beauty of last night, the 16th. The Milky Way was unusually conspicuous, and every star in the firmament, so clear was the atmosphere, appeared to be shining with unusual brilliancy. The calmness was only disturbed by the cannons' occasional booming, and the passage through the air of their fiery messengers. Towards daybreak a thin veil of mist became stretched over the town and the camps, but a gentle breeze from the south-east slowly wafted this away, and a warm sunny day commenced. At half-past six a.m. the sound of the first English gun was heard in Sebastopol. The firing commenced in the battery on the right of our line, and was taken up immediately by every other battery along the line. The Russian batteries replied rapidly. Then commenced a thunder of artillery, which, as peal succeeded peal, can be likened only to the roar of a thunderstorm echoing among Alpine mountains. The air seemed to groan and lament from the peculiar sounds that were emitted during the passage of the iron hailstorm which was falling upon besieged and besiegers. Among these sounds that of the conical missiles discharged by the heavy Lancaster guns forced itself upon the attention, for it differed from all others. It resembled precisely the wavy rushing noise made by an express railway train when heard from a little distance. One of these guns, that landed from the *Arrow*, and placed in a battery in front of the 2nd Brigade, Light Division, was particularly directed at the line-of-battle ship the *Twelve Apostles*. In a very short time the ship was hauled off, and placed under the protection of Fort St. Nicholas, but not until she had been perforated by four missiles from the Lancaster. The battery near the Second Divisions, in which were two Lancasters and three ship's 68-pounders, directed its fire particularly at the Round Tower, and in less than an hour every gun on the summit was silent, and only three out of the eighteen guns which had been mounted in front and on each side of it were continuing their fire. This tower, from its isolated position, and from the fact of its rising sun lighting it up—as it did all the objects of the town, giving it the advantage in this respect—was particularly conspicuous; and each shot or fragment of shell even which struck its wall, by exposing the white stone from beneath the brown wash with which it was lately covered, could be immediately observed. The earthworks around it were soon rent and shaken; but the Russian artillerymen, in their shirt sleeves, could be seen working the guns which retained their position with the greatest alacrity.

THE RUSSIAN BATTERIES.

The first volleys (on the 17th) showed us what no soul in either army had hitherto been certain about—viz., the precise nature, both of our works and the enemy's—and it also showed us that, even in earthwork batteries, thrown up since we came here, the Russians immensely outnumbered the Allied lines. Not only were there extensive intrenchments, mounting twenty-five and thirty heavy cannon, but on every height and ridge guns of heavy calibre were placed in battery. I have been informed that the extensive nature of their works completely astonished our Generals, and we are by no means sure that we have seen them all yet, for, during yesterday, fresh ones were frequently unmasked in places totally unexpected. Facing our Green Mound battery is the redan wall, which shelters the south side of Sebastopol. It bristles with guns, and to shelter it still further, the Russians have thrown up in its centre a regular three-sided redoubt, carrying about forty cannon. Passing over several intermediate 6, 8, and 10-gun batteries, the main strength of the Russians on the right is in some int enchments called the Flagstaff Batteries. It is a huge hill, commanding the French lines perfectly, and intrenched for two tiers of guns, each about twenty-five in number. On the summit of the hill above the guns are banks for several large mortars. The existence of the upper tier of cannon appears to have been unknown, until the moment it opened a deadly fire on the French works. On the enemy's extreme right of all was a 10-gun battery, most commandingly placed, so as to enfilade the whole French line, and beyond this come the regular stone forts of the harbour, such as the Quarantine Battery and Fort Paul.

HOW OUR ENGINEERS ARE BAFFLED.

The spirit of over-confidence, which is the characteristic of the British nation will be loth to hear that Sebastopol did not fall, as was anticipated at home, after a twelve hours' cannonade. On the contrary, the contest hitherto has been between mud fort and mud fort—between offensive works and offensive works; and when these forts are taken or destroyed, the real task of taking the town will commence. It will be a severe trial this taking or destroying of Sebastopol; and many days, perhaps weeks, will elapse before the day of triumph will dawn. The irregularity of the works baffles slightly our engineers. Were Sir J. Burgoyne set down before Metz, or any orthodox fortified city, with regular walls and angles, and scarps and counterscarps, with a satisfactory glacis, I feel convinced that he would proceed with far greater confidence than against these mudworks of Sebastopol. The position is, in fact, trying. Here is a besieged force, which has established offensive works, mounted by a larger number of guns than the offensive works thrown up by the besiegers. The damage sustained in the day is repaired in the night, and the morrow dawns to witness a fresh waste of ammunition. The victory would, it almost seems, fall to him who possesses the largest stock of ammunition—and that, certainly, is not the Allies. From motives of policy or humanity (both misplaced in the present instance), Lord Raglan has determined to spare the town. Now, until the town is completely battered to pieces, or burnt to the ground, we have no hopes of success unless in an assault, which would now be attended with considerable risk and great loss of life. But the town once fired to the rear of the Russian redoubts, the gunners will either cease to work with the same confidence, or, what is more probable, will desert their disagreeable position. I do not mean to assert by these remarks that the siege of Sebastopol will rival in length that of Troy, but it is desirable that the British public should be upon their guard against gulled contemporaries and lying telegraphs.—*Letter from the Camp*, Oct. 19.

SHELLS AND ROCKETS VIEWED ARTISTICALLY.

The day has been sunny and hot, and the evening is now chilly, calm, and starlight. The enemy's batteries have ceased their fire, and so have the French; but from two of our batteries discharges of shell and rockets are still going on at intervals. The scene is beautiful, but to one who remembers the cruel realities connected with it, it is full of painful reflections. All is apparently still in the town, which is but obscurely seen through the evening mists and diminished light, and is only illuminated from time to time as the bursting shell or rocket throws a momentary glare around the spot where it has fallen. The passage of the shell in the air, thrown to an amazing height from the mortars, appears like that of a meteor. It rises and falls, seemingly to the eye almost perpendicularly; sometimes burning, as it turns on its axis, and the fuse disappears in the rotation, with an uninterrupted pale light—sometimes with a steady light, not unlike the calm luminosity of a planet. As it travels it can be distinguished, amid the general stillness, uttering in the distance its peculiar sound, not unlike the cry of the curlew. The blue light in the battery announces the starting of a rocket; it pursues its more horizontal course, followed by a fiery train, and rushes through the air with a loud whizzing noise, that gives an idea of irresistible energy. It is impossible not to think with sadness on the errands of these destroying messengers. Across the main valley leading to Sebastopol, looking northward, where a large Russian force is said to be encamped, can be seen, thickly scattered, the enemy's fires; and, on turning in the opposite direction from this aspect, there are the long lines of fires belonging to our own troops, who are investing the doomed city and town. Let us return to them, and in peaceful sleep forget for some hours the duty in which we are occupied.—*Letter from the Camp*, Oct. 18.

THE TRENCHES AT NIGHT.

On the night of the 20th I was enabled by ocular testimony to judge of the little harm effected by the Russians on our batteries, and of the scientific and solid manner in which the latter had been constructed. A night visit to the trenches is always impressive. The silence in the batteries, broken alone by the spade and pick of the sappers smoothing the earth disturbed by the enemy's balls; the massive guns frowning from their embrasures; the stupendous strength of the parapets and traverses; the calm slumbers of the covering party, enveloped in their blankets; and the rumbling of approaching ammunition waggons—one and all strike the imagination of the spectator. An occasional shell from the Russians enlivens the proceedings, the tract of the projectile being traced by the burning fuse from the muzzle of the gun to the point of explosion.

THE LOOKERS-ON.

A little in advance of the Fourth Division camp is a slight embankment, from which a beautiful panorama of Sebastopol, extending from the granite forts to beyond the ruins of Inkerman (including both hostile and friendly batteries), may be seen and admired. It is here that the idlers of the camp delight to assemble, as they pleasantly observe, to see the "fun." Cavalry, artillery, and infantry officers, with a sprinkling of silver-epauletted Frenchmen, form here a constant cesterie, watching earnestly the fire of our guns, applauding any superior hit, and becoming uproarious at a Russian explosion. How many an eye gazes with envy on the clean white buildings of Sebastopol, suggestive of good kitchens and good dinners! To many an old fire-eater, who would as soon eat his head as open a book, the large public library with Doric columns, has suddenly become an object of interest. But the most seductive building is the "Club;" and many a sigh have I overheard—heaved by some gallant fellow, to whom the recollections of the "Rag and Famish" at home had been thus painfully awakened. An hour's inspection suffices to disgust one with the monotony of a siege; and really nothing more wearisome can be imagined than the constant roar of the batteries. The spirit has gone out of the business, and impatient for more active and satisfactory operations.

A STOUT-HEARTED LADY.

Oct. 17, Two p.m.—The most awful thunder of cannon is now in my ears. The fleet has entered, and the forts, shipping, redoubts, and musketry are all engaged. I have just come from the post where the town and harbour are generally visible from the sea, where our fleet is engaged, the smoke is so thick that nothing whatever can be seen. I hear the constant whizzing of the Lancaster guns; and shall be able to report better of their effect to-morrow. We have one lady in our camp—the wife of the Paymaster of the 8th Hussars. I saw her quietly looking on while the place was being bombarded from the land.

THE LANCASTER GUNS.

Conspicuous among the din could be plainly heard the Lancaster guns. Their sharp crack, different from the other heavy guns, was like that of a rifle among muskets. But the most singular effect was produced by its ball, which rushed through the air with a noise and regular beat precisely like the passage of a rapid express train at a few yards' distance. This peculiarity excited shouts of laughter among our men, who instantly nicknamed it the express train, and only by that name is the gun known. The effect of the shot seemed most terrible. From its deafening noise the ball could be distinctly traced by the cart to the spot where it struck, when stone or earth alike went down before it. A battery of twenty and thirty such guns would destroy Sebastopol in a week. Unfortunately, from a short supply of ammunition, we can only afford to mount two, and even those are only fired once in eight minutes.

RUSSIAN TRICKERY.

From the commencement of the siege the Allies noticed a large structure in the central part of the city, which was surmounted by a yellow flag, indicating that it was an hospital for the wounded. A communication to that effect was made to the Generals commanding the Allied armies, and strict orders had been given to spare that part of the town. Some time after, however, some deserters from the place gave information which led to the conviction that a deceit had been practised; in fact, it was found that the building, which was supposed to give shelter to the sick and wounded, was anything but an hospital: it was a vast magazine, where the ammunition and stores of the besieged were deposited. Acting on this information, some shells were thrown into it, and the pretended hospital blew up with a tremendous effect. The ground around it shook as with an earthquake, and houses were thrown to the ground in all directions.

A PROVIDENTIAL ESCAPE.

The contents of three tumbril waggons had been landed o. le ground, within a couple of hours previous, and a small portion only o this supply had been used. The waggons, excepting one which had been disabled near the same spot by the bursting of a shell, had left the ground. A large covering party of the 88th Regiment had only just quitted the neighbourhood of this exposed magazine on account of the severity of the fire in that direction. Two of the men had just been killed, and two others desperately wounded—one poor fellow losing at the same moment both legs and an arm by the bursting of a shell which fell among them. The officer in command had therefore moved the party a short distance, to a more protected position. There remained, however, close by, another covering party, consisting of four companies of the 19th Regiment. Twenty paces only from the ammunition, was lying a group of officers of the 19th; and extending from them to the right and left, were lying the rest of the men and officers, sheltered by a loose heap of stones from the fire of the enemy's guns. The force of the concussion, the noise of the explosion, and the shower of earth and stones, deprived most of those who were near, for some moments, of consciousness, and for a long time of hearing; and each, as he recovered his faculties, seems to have been impressed with the belief that he was the only one saved from the effects of some terrible calamity, of the true nature of which he was quite ignorant. One man only of this regiment was injured by the explosion, and he not dangerously. Their salvation seems to have been owing in some degree to their very proximity. The force of the discharge was chiefly directly upwards. One of the dead horses was carried up in the air, and thrown down thirty or forty yards beyond the troops. Portions of the disabled waggon and of the burning wood of the ammunition boxes were thrown for a wide distance round. Nothing remained on the ground where the powder had been laid; but the earth was rooted up, and fell, mixed with unexploded gunpowder, thickly on all sides. The smoke rose at first perpendicularly upwards in a condensed column; then, unfolding and expanding, it extended outwards, until, meeting a strong current in an upper stratum of air, it floated away like a large fleecy cloud.

HOW THE DAY'S WORK BEGINS.

As daylight casts its first rays into the camp, and often long before, a loud voice generally asks some such question as this—"Williams, what are you for to-day I'm going to Balaclava arabajeeing?" "Are you?" responds his friend, "my pursuit will be infinitely more exciting; I am going to open the ball at half-past six, with Prince Menschikoff as my *vis-a-vis*. I am afraid we shall find it very warm work, as one is so closely confined in a battery. I prefer a good English ball-room where one can dance at one's ease—plenty of lady companions, and good ventilation." I cannot tell you how beautiful was the scene as I stepped out of my tent. The heavens were studded with stars of a diamond brightness—a waning crescent moon walked the sky like a modest virgin clad in light—the air was soft and balmy, and the many animals which are ever found in a camp, were looking hopefully and beseechingly for a kind hand to supply the early meal, so acceptable to man and beast. The only intrusion upon the soothing quiet, was the occasional twanging of some braying mule, and the following quaint instructions of a linguist Sapper:—"Arabajee, caval soo, yok; haidee Balaclava Adjutant Ivett; chabook Johnny no forget haidee, chabook; buono, yes, understandy," which jargon from custom, was as well understood by the Crim driver, as if the soldier had spoken the best Turkish. Just as the sun gets above the horizon, we have a new scene: the officers who have been engaged in the batteries during the night return to camp; and when some distance from the tents, the name of a servant is heard, "Carly,"—or Felice, or Salvo, or Gul-eppe, as chance may have it—"coffee ready? Fry some ration pork and biscuit; and then see that my bed is all prepared; and when I get into it, don't let a soul disturb me, for I am quite done up." The coffee is soon presented in a black saucepan, and a fat or two adorn the beam which is stretched as a seat near the fire; the frying-pan is put by the feet of its master, reeking with frizzling pork and finger-burning biscuit; and the hungry, tired, hairy-faced son of Mars devours a hasty meal, smokes his soothing cigar, and, five minutes after the last puff, is seen at full length in his tent, as fast asleep as if he had been fed with poppy-heads from his babyhood upwards. At half-past six the bombarding again commences, and once more the hands are being rent by the demoniacal voice of war.—*Letter from the Camp*, Oct. 18.

SEBASTOPOL NOT SO EASILY TAKEN.

Sebastopol holds out, although there can be no doubt of our taking it when the time is come. That fortress is not such an easy prey as many people at home and on foreign stations seem to believe. If victory were to be had at so cheap a price, the Generals would be almost to blame for having taken out so large a force, when a smaller corps and armament would have done as well. It is true Sebastopol is open on the land side, and we have nothing to do but to walk into it. But it is open in the manner that Alma was: our troops will have nothing to do but to walk into it, but they must first get the better of some three or four batteries and redoubts, and walk up to the very mouths of some forty or fifty pieces of heavy ordnance. It is true that after Alma our men may reasonably be expected to do anything—to conquer all obstacles, brave all opposition, and defy all danger. Not a man in the army doubts that if the order were given, our brave regiments would carry the Sebastopol batteries as they carried the position of Alma, at the point of the bayonet, and in the very face of destruction. But the loss would be frightful; and it is to avert that loss and make the conquest cheaper, that our batteries have now for four days past been hurling their round shot and shells against and into the mud forts which flank the White Tower and the double redoubt which protects the centre of the Russian position. The guns on the White Tower were silenced after a cannonade of a few hours, and have not opened again. But the mud batteries and redoubts, although frequently silenced, repair their damage, replace their broken gun-carriages and guns by fresh ones, send in drafts of fresh men to take the place of the killed and wounded, and return our fire till they are again silenced, only to open again after a few hours' pause. We cannot expect to reduce the town by our cannonade; even the most sanguine must have abandoned that hope after the events of the last two days, will neither compel the garrison to abandon their post or offer to come to terms. Our regiments will have to fling their bayonets into the scale before it inclines to our side. But the object of this cannonade—as of all cannonades under similar circumstances—is to do the enemy as much harm as possible—to draw their bravest and ablest men into the batteries, and there to kill or disable them: to keep the garrison on the alert and hard at work in the batteries, in their parks, and workyards, and in the town, to watch for and extinguish the commencement of a conflagration; and so to harass, worry, and fatigue them by day and night, that, broken in body and mind—starved with want of food, sleep, and comfort—they are more or less incapable of personal resistance, and the wild fury of a hand-to-hand conflict. When an unceasing cannonade has reduced them to that point, and at a period when their batteries are altogether or wholly silenced for the hour, then will be the time to lead our men of Alma to the assault.—*Letter from the Camp*, October 20.

THE WEATHER IN THE BLACK SEA AND THE CRIMEA.

Seldom has any enterprise met with so few checks from circumstances that could not be foreseen or controlled. Although the prophecies of some foreboding spirits were unmanly and absurd; yet, when it is all over, we can afford to confess that we have escaped dangers which might have prevented success, or caused it to be purchased at too dear a price. The first great operation was the transport of 60,000 men a distance of 300 miles over a sea liable to sudden storms, at a season when the storms sometimes partake of the nature of tropical hurricanes. As if some guardian spirit watched over the fortunes of the Allied host, one of these gales burst over the Black Sea a few days before the departure of the expedition, at a time when the fleet would actually have been on its voyage if it had left Varna on the 2nd of September, as had been originally proposed. On the 5th a lull took place, and from that day till the arrival of the combined squadrons in Kalamita Bay there was nothing that could be

called unfavourable weather, or which could render necessary the precautions wisely taken for the immediate anchoring of the transports on the first sign of a tempest. The coasting along the southern shores of Russia was carried on without accident; the landing was effected with a smooth sea, which lasted three or four days, and though the troops endured a rainy night on the 14th, the fine weather can hardly be said to have been interrupted during the whole time that the vast armament has been on Russian ground. At this moment (Oct 24) the sky is pure and cloudless, and yet the autumn sun is not too oppressive for that they inspired before the expedition sailed, are now forgotten. It is both impious and hypocritical for a nation, however just its cause, to declare itself under the special protection of Providence, and boast of blessings as if they were nothing more than its due; but we may still be permitted to call to mind the singular exemption from all calamity which the enterprise has experienced, and which no prudence or skill could have ensured had natural circumstances been other than they were.

THE TARTAR DESPATCH.

The premature report which came out in the London journals of the 2nd and 3rd inst., has been a source of some annoyance to our troops. Not only do they think they are unfairly dealt with by their countryman at home believing the task assigned to them a very light, easy, and most pleasurable one, while in reality it is neither of the three, but they fear that friends at home will have welcomed the false Simon Pure with such exuberance of feeling that neither joy nor sympathy will be left for the arrival of the real one. And, as our soldiers never move a step or strike a blow without a look homewards, since their achievements acquire their choicest zeal by the thought of what people at home "will say to that," or "think of that," the getting up of this false report about Sebastopol, is like robbing them of what they consider their due. Yet we out here have certainly no right too loudly to accuse either the precipitancy or the credulity of our friends at home, for the expectations expressed by part of the army, and that part the most scientific one, were quite as highflown and ill-founded as the hopes which our friends at home cherished for us. The Engineers and Artillery who reconnoitred the fortress in the first days of our stay at Balaclava spoke very loudly of the openness of Sebastopol on the land side, and the defensive works of the Russians were mentioned by them in a slighting and contemptuous manner. The Artillery, in particular, fresh from the practising and experimentising grounds at Woolwich and Chatham, spoke with all the assurance belonging to the votaries of a highly-cultivated and untried science. Some of the officers resented it as an insult to suppose that it would take them days to overcome the resistance of the defensive works—the discomfiture of the Russian was to be consummated in a few hours. They were both right and wrong. They expected to silence the Russian batteries in a few hours, and so they certainly did; and if this were an intrenched camp, or a position like that of Alma, nothing could have been more correct than their anticipations. But they forgot that the Sebastopol land forts and redoubts have an arsenal in their rear—that enormous fibres of materials are at the command of the Russian Generals, and that the broken guns and gun-carriages can be, and are, at once replaced. And to go on smashing the Russian guns until the stores of Sebastopol are exhausted is too long and tedious an undertaking, with the winter hanging over our heads and the Russian army in our rear. Under these circumstances there is but one alternative—a heavy cannonade and a rush with the bayonet.—*Letter from the Camp*, Oct. 20.

THE NAVAL ATTACK.

At eight o'clock on the morning of the 17th the captains and masters proceeded to the flag-ship, to receive final directions; and by ten most of the steamers were under way, and proceeding to take the liners in tow This was done by firmly lashing the steamer on the port side of the line-of-battle ship. The *Britannia* in tow of the *Furious*, was first to leave, closely followed by the *Queen*, with the *Fewnius*. The other ships followed, accompanied as follows:—The *Arethusa* with the *Highflyer*, the *Bellerophon* with the *Spitfire*, the *Albion* with the *Firebrand*, the *London* with the *Niger*, the *Trafalgar* with the *Retribution*, the *Arethusa* with the *Triton*, the *Rodney* with the *Cyclops*. The *Agamemnon*, *Sanspareil*, *Samson*, *Terrible*, *Tribune*, *Arrow*, *Lynx*, *Spitfire*, and *Sphinx* (which last vessel arrived in the morning, just in time for the honours and perils of the day) proceeded independently. At ten minutes after one the French fleet, which had preceded, lashed as ours, against the southern batteries, commenced their fire, and at half-past one the *Terrible* commenced; the other independent ships quickly followed; and at two o'clock there was an explosion in Fort Constantine, on which the ships loudly cheered. About twenty minutes past two the *Albion*, having run in within 700 yards, opened fire, which she kept up for about two hours, when, one of her towing-hawsers having been shot away, and the ship being on fire in two places, she was with difficulty towed out of fire. About the same time the *Arethusa*, and very soon after the *Queen*, were obliged for the same reason to come out. The fire was kept up, without the slightest intermission, till the fall of night compelled the ships to come out. The enemy fired much red shot, which did great damage. When night fell, the "Wasp" Fort, save an occasional gun, was silenced, and the firing from Fort Constantine and the "Star" Fort had sensibly slackened The guns on the upper tier of Fort Constantine are generally dismounted; but though much battered, we have no apparently done much damage to the other tiers, their firing continuing to the last. The *Rodney* which behaved very gallantly, was the last, I believe to come out The French firing was very beautiful—one continuous roar; but the general opinion was that they were somewhat too far out, being in general about 1400 yards from Fort Alexander. The *Napoleon*, however, and the screws frequently approached much nearer. The general distance of our sailing lines (except *Albion*, who was much nearer) might have been 1200 yards. The advantage of screws was signally displayed, for the steamers found it difficult to fault to turn or move with the line-of-battle ship in tow. Admiral Lyons, in the *Agamemnon*, was the theme of general admiration. At one time he went quietly in, and anchored opposite the "Wasp" fort, where he remained till it was completely silenced for the time.

THE DETACHED STEAMERS.

The detached steam-rs on the left were decidedly the heroes of the day. To them was assigned the position north of the shoal running out from Cape Fort. While the other vessels went down outside as far as Quarantine Bay and then veered round and opened their fire from the starboard broadside, the detached steamers [steamed straight down inside, near the shore. The first were the *Samson*, *Terrible*, and *Tribune*, who advanced like *éclaireurs* before the *Agamemnon* and the *Sanspareil*, which formed the main strength of this division. These two, after having tried the range of their long pivot-guns at the "Wasp" Battery, steamed right down to the fort on Cape Constantine—the formidable casemated battery at the left of the entrance into Sebastopol, and engaged it. There you could see them anchored, the *Agamemnon* 800 yards, and the *Sanspareil* a little behind, enduring, with unbroken firmness, the heaviest fire of the enemy, and returning it with great vigour; while the steam-frigates, who could approach closer in the shoal water, hovered around them, making the most of their independent position. The position was the two screw line-of-battle ships was the most critical possible, exposed as they were to a heavy cross fire—on one side from the northernmost batteries running along the shore, from the Star Fort inside, and from the whole outward face of the fort on Cape Constantine. For two hours they had to encounter the whole fire of the enemy of that side alone; when the *Queen*, having left her first anchoring place, where the Turkish flag-ship had come in her way, passed inside of the other sailing line-of-battle ships from the extreme right to the left, and came up alongside the two heavily-pressed screw steamers, and drew off part of the enemy's fire from them—a movement which, as I told you, was acknowledged by Admiral Lyons hoisting the signal of "Well done, *Queen!*" It was a marvellous sight to see such an immense vessel as the *Queen* passing the other liners inside; and both Captain Mitchell and Captain Powell, the Commander of the *Fewnius*, deserve the highest credit for the skill and enterprise with which they took the vessel in as well as out. Unfortunately, the respite which she brought was only momentary; for, being in but six fathoms water, she was in danger of going on shore unless she anchored; while, if she had anchored, she would have had to leave her anchors behind, and perhaps something more, for she had caught fire from a red-hot shot: she was thus obliged to yield to the *forza maggiore*, and withdraw.

The *Sanspareil*, owing to her unwieldiness and the defects in her propelling force, which fails always when most necessary, would have had a hard fate had not the *Shark*, a tiny little steam-tug, which attends the *Sanspareil* as a planet does its sun, or the jackal its lion, gone in and towed her out The skill and courage displayed by the commander of this little craft, Mr. Baile, second mate, excited general admiration. It was a striking and practical illustration of the lion and the mouse, to see the little *Shark* help out the colossal *Sanspareil*, but, at the same time, it was a most gallant feat of seamanship. It is reported that Admiral Lyons sent in the Commander of the *Shark* with the words—"Go in; you will find there a coffin or your promotion." Both the *Agamemnon* and *Sanspareil* were obliged to leave buoys for their anchors, but they left also some heavy marks of their presence on the face of the forts. These two ships did not quit their posts until nightfall, for Admiral Lyons determined to be sunk rather than give in

THE FRENCH STEAMERS.

The following letter, from a young officer of the French fleet, gives an account of the affair from that point of view:—

Before Sebastopol, Oct. 18.

My ears are yet ringing with the cannonade they heard yesterday, but I have no time to arrange my thoughts, and I hasten to tell you that I am in excellent health. Yesterday morning the Admiral's signal, and our written orders left us no doubt about the intentions of the fleet. At nine o'clock every vessel received the order to advance. All the steamers, with the exception of the *Pluton* and *Eumenide* were lashed alongside ships to conduct them to the fire. In the night of the 16th and 17th the Captain of the *Pluton* had been ordered to lay down buoys along the coast to guide the course of the fleet; and this morning, as soon as the signal was given, the *Pluton*, as best knowing the way, took the lead. She was followed closely by the *Charlemagne*, which was ordered to anchor as near as possible to the coast, so that the other ships might take up positions in line to the north and north-east of her. Our progress was slow, in consequence of the immense weight of the ships which had to be towed. We were nearly an hour and a half doing three miles. At about half-past twelve the *Pantour*, ensconced in a little creek, opened the fire, which was the signal for the Russians commencing in their turn. A light whistling, like the noise made by certain birds of prey, was audible at the masthead. I asked myself what it could be, when a second rushing sound, more distinct, left me no doubt that it proceeded from a cannon-shot. Presently the bullets rained around us. We heard the noise they made before they neared us, and some time after we saw the flash of the cannon which propelled them. We received three of the shots in our hull and paddle-boxes; but, fortunately, they hurt no one. Our masts, from which we had taken down all the yards, were not touched. Most of the bullets passed over our heads. The firing carriages can be, and are, very good. Then we went in closer to shore to make way for the *Charlemagne*, and found ourselves a little sheltered from the batteries by a tongue of land. The *Charlemagne*, doubtless, appeared a formidable adversary in the eyes of the Russians, and may have checked their ardour a little. At one o'clock she anchored and began to fire, and it was, indeed, high time, for she had received several bullets in her hull, her masts were injured, and a shell had burst in her engine-room. At two o'clock we must have blown up a part of Fort Constantine, for just after we had watched one of our 80-pounder shells hit the mark we aimed at, we saw a tremendous column of smoke and flame rising up over the fortress. Dressing by the *Charlemagne*, the half of the other ships came into line in the direction north-north-west. The others formed a second line, and fired through the intersteces of the first. Two Turkish ships prolonged the French lines; and further on to the N.N.E. of the second Turkish vessel was a line of eight English. The fire went on for five hours without ceasing; but, unfortunately, the smoke was so thick that a great many shots must have been thrown away. We don't know how much harm we did to the enemy; only the Russians abandoned their batteries for about two hours; but they recommenced firing with redoubled vigour. Portions of their batteries were destroyed. There would not have remained one stone above another, if the bars which surround the entrance to the harbour had allowed us to approach within 400 or 500 mètres. As it was, we fired, on an average, at a distance of from 1500 mètres. We expended something like 24,000 bullets and shells. The Russians, though they fire pretty straight (as we can testify, for all their shots against us were very well directed), killed but few in the squadron. With regard to this, I only know that the *Charlemagne*, perhaps the most unlucky of all, had eight killed. Some say, however, the *Montebello* suffered still more. The *Jean Bart* had but two killed. The English fleet, anchored opposite Fort Constantine and the Telegraph batteries, fought vigorously. We don't yet know what losses they suffered.

OBSTACLES TO A NAVAL ASSAULT.

It is now established beyond doubt that the greatest defence of the sea forts of Sebastopol is the shallow water which does not allow a close enough approach to make ships' broadsides really formidable to them. The fact is very simple—a ship's broadside can produce a more formidable concentrated fire than any fort in the world; but ship's sides cannot resist fire so long. The closer, therefore, a ship comes to the battery the greater become its advantage; whereas its own danger decreases, from the forts not being able to depress their guns enough to hit the hull. An excellent proof of this latter fact—namely, that the danger of a vessel decreases by nearer approach, was furnished by the *Agamemnon* and the *Sanspareil*. Although not more than 200 yards from each other, the *Agamemnon*, which was closer in, suffered much less, vesse las well as crew; and then most of the shots fired into the *Agamemnon* damaged the rigging, while the *Sanspareil* suffered chiefly in her hull. The Russians have been perfectly aware of this. They sank therefore a number of vessels before the entrance of the harbour in a line from the shoal running out from Cape Constantine down to another shoal or reef, running out from the point opposite, on which Fort Alexander is built. They impede thus not only the entrance to the harbour, but the approach to the forts themselves. The grand fort on Cape Constantine is, besides, protected on the north face by another shoal running out from the point on which the telegraph is erected.

The night before the bombardment a boat, with muffled oars, was sent to explore the two shoals; the crew went all round, and so close in that they could hear the people talk, and would have been able to understand what they said, had they known their language. Two small Russian steamers, which were likewise outside of the sunken vessels when the action began, were lying off the entrance; but mistook the boat, as it seems, for a Russian. According to the observations made, the depth of water is so uncertain and variable, that large vessels could not enter beyond eight fathoms of water, which scarcely brings them within 1500 or 1600 yards. From these and other previous observations to the same effect, it became apparent that with vessels alone nothing could be undertaken against the forts on the sea side. It was only in co-operation with the army that ships could be of great service, by creating a diversion in favour of the advancing land forces, and helping to reduce the place. The question was only to choose the right time, and at that time strike with the greatest energy.

WOODEN WALLS v. STONE ONES.

In the late encounter between wooden walls and stone ones, stone had not the worst of it, as far as appearances go. The *Samson* went off Sebastopol on the morning of the 18th; but could see no further harm done than a few guns dismounted; and the whole face of Fort Constantine was as it were pock-marked with the impressions of cannon balls. It is the general opinion that no further attempt will be made by sea for the present. The only chance which ships have against batteries is running in within six hundred yards, and even then their loss must be very great. The fire of the batteries fell chiefly on the ships which went in within seven hundred yards. Wherever the fire was heaviest and the smoke densest, there one might be sure would be seen the Rear-Admiral's "red at mizen." The deductions from the *Edinburgh's* experiment at five hundred yards, at the walls of Somarsund, remind one of the story of the gentleman who did not much relish the idea of fighting a duel; and on being reminded that he was able to break a wine-glass with a bullet at twenty yards, replied—"Yes, that's true; but the wine-glass hadn't a pistol in its hand."

BALACLAVA.

The following account of the former condition of the town and harbour of Balaclava is from Professor Pallas's Travels:—The town of Balaclava has probably received its modern name from the strong Greek castle of Pallakium. It was formerly inhabited by Tartars; but, as most of the natives emigrated, or were dispersed, when the Crimea was occupied by the Russians, this town, together with the surrounding country extending to the banks of the Buyouk-Ouschen, including the villages of Kadikoi, Karani, Kamara, and Aissu (after removing the rest of the Tartar families to other places), were granted as settlements to a regiment of Albanians, now reduced to one battalion. Thus Balaclava has been completely changed into a Greek town. The town of Balaclava is situated close to the harbour, along the foot of the mountain, but it is not provided with good water. As the port is deep, sheltered by lofty mountains, and contracted towards the sea, its waters are in general as calm as those of a pond. The length of the harbour does not exceed one verst and a half, and its breadth is about 200 fathoms The entrance is very deep; yet being confined within high rocks its channel scarcely admits two vessels to sail abreast. Notwithstanding the apparent danger in entering this port, it afforded a salutary refuge to such vessels as were driven by storms against the Crimean peninsula, without being able to double the Cape of the Chersonesus. As, however, smuggling could not be easily prevented, on account of the confined situation of the harbour, Government was at length induced, in the year 1796, to prohibit all ships whatever from entering it; because the mercenary Greeks readily encouraged illicit trade, so as continually to expose this neighbourhood to infection from the plague. In consequence of such exclusion, several shipwrecks have already been occasioned. A small rivulet, proceeding from Kamara, and another brook arising from the western mountains, discharge themselves into the extremity of the haven.

The old fortress, like all the strong places of the Genoese and Greeks in this peninsula is erected on inaccessible rocks, close to the mouth of the harbour, on the adjoining eastern hill. It is fortified with high walls and towers.

The lower View of Balaclava, upon page 488, shows the inside of the port, which is only accessible through a very narrow circuitous channel, in the form of the letter S. The entrance is not seen at a cannon-shot distance, even when in the bay. The port looks like a pool in a little valley, surrounded by high perpendicular cliffs. On the left of a Genoese fortress (three round towers) lies the town—consisting of one street alongside the shore: it is hidden by the shipping (some sixty large vessels) in the port—a two-decker amongst them. A few houses lie scattered above the hidden street: on the left is the hospital. On the side of the mountain some camp fires are burning. In the foreground is the road leading to Sebastopol, with carts and waggons drawn by mules or oxen and two camels abreast.

We append the following letters, which give a graphic account of the defence of Balaclava:—

"I arrived at this little village about two hours ago, and found that all the troops were fast getting under arms to repulse an attack of the enemy. The fact is, we have been expecting such an attack for some days past; and, for that reason, Sir Colin Campbell has been left commanding the garrison. The latter has been further strengthened by the addition of 8000 Turks, all the English and French cavalry, two additional batteries of artillery, and 600 marines: altogether, the force to protect this place can be little short of 15,000 men. All the heights which command the approach across the valley to the village of Balaclava have been strongly intrenched, and some of the heaviest ships' guns mounted in redoubts. The enemy would have to storm and capture nearly forty such earthworks before they would be in a position to attack our infantry on the hills; so that I think we are pretty safe. It is a matter of paramount importance to us, not only that Balaclava itself should be retained, but that our communications with it should be perfectly free and uninterrupted. The knowledge of its importance to us will, of course, induce the enemy to attack us; and I believe we shall yet have a bloody battle at Balaclava. While I write, about 12,000 Russians—half of whom are Cossacks—have advanced into the plain towards our batteries. The Turks have opened their fire from the redoubts; and I am certain they will be no close fighting to-day. When the Russians seriously attack this place, they will do it in the night, when their superior local knowledge will give them advantages in skirmishing with the batteries."—*Letter from Balaclava*, October 25.

"On Wednesday last, the 18th instant, I had scarcely closed the letter to you with the hurried addition, and taken my *ci jresco* ablution, and was preparing to breakfast, which the faithful *Jean* had all ready for us, when the drums beat to arms—the Highland pipes brayed—and all was accoutre and arm. The Russians, in force, were on the plain below —artillery, cavalry, and infantry—in all about 10,000. Their cavalry appeared to be their largest arm. Our own cavalry and horse-artillery, with some Turkish battalions, who are camped in the plain, advanced, when the Russians retired without coming to an action. Our field-guns opened on them; but they retired, out of range, across a river and up a ravine, and did not return a shot. It is thought that they were a reconnaissance in force by some; others fancy they wanted to relieve the garrison of Sebastopol, but found our position too strong to attack. They do not, since Alma, like "the devils in red." Had we not been here they might have seriously inconvenienced the army before Sebastopol, by taking them in rear, while the garrison might have made a sortie, and placed the Allies between two fires; so, although we have not been ourselves under fire, yet by our presence we have covered the army in the lines. It shows Lord Raglan considers this place of great importance, for he would not have sent Sir Colin Campbell to take the command of this division of the army. We moved off with our second battalion on that morning to the lower part of the heights towards the plain, to keep up a chain of communication with our cavalry and artillery. The remainder of our line being between our second and first battalion, held the extreme right of our position, under the command of Captain Hopkins. McLeod commands the second battalion, and moved up off left in front. Captain Timson commands the left company, No. 8 of the 2nd battalion. We remained on the defensive all day, and saw the Russians light their watch-fires, under the cover of which they must have retired, as the next morning they had gone. This was a ruse to persuade us they intended an attack, and also to harass us, in which they partly succeeded; although many officers retired to their tents, and slept uncommonly well after being under arms all day.

"We saw nothing more of them, except a small picket at a great distance, until Friday afternoon, when they again appeared in great force, and Sir Colin ordered the whole of the division to be on the alert, and sent word by Aslett, our Brigade Major, to Lieut. Colonel Hindle to have two companies on the plain at the left of these lines, and about the centre of the Allied position. Capt. Timpson commanded this force, but the enemy did not come on, although we had two (alas, false) alarms. The first was the Turkish advanced sentries firing at—perhaps Russians. The second was our own people firing with rockets and great guns on—I think, brushwood (it was a very dark night). I had placed my command in such a low position, and kept them so quiet, that when I was visited and asked where my companies were, I pointed to a hollow. I had them lying down in their ranks with arms in their hands, ready capped and loaded, and gave strict injunctions not a trigger was to be pulled until I gave them the order, which I did not mean to give until I could see, as the black fellows say, "the whites of their eyes." Being asked what we would do if the Russians came on us before we had time to reload, I replied, "the bayonet," in a laconic manner; and added, I had a great opinion of it in English hands. The men were only, like their Captain, too happy to think there was a chance of being the first company to meet the enemy If was a fearfully cold foggy night, and of course we could have no fires—not even our pipes—until the moon got up, when we smoked away like steam-engines. The men of both companies behaved admirably—quiet, obedient, and steady. I doubt not that, had we had the good fortune to have been attacked, we should have licked three times our number. My men never imagine I am to be shot, as I tell them, when they come asking me to do this, that, and the other, in case they fall. All my suite, lame and lazy, turned out and fell into the ranks on both occasions—so anxious are all to have a fight."—*Letter from an Officer of the Royal Marines*, Oct. 22.

15. French Fleet. 14. French Attack. 13. Chapman's Battery. 11. Lancaster One-gun Battery. 12. Flag-staff Battery. 10. Garden Battery.

SEBASTOPOL DURING THE SIEGE.—GENERAL VIEW.

THE SIEGE OF SEBASTOPOL.

(*Continued from page 469.*)

on for four rounds, which went off, amid the applause of numerous spectators. The brave fellow did not hold out to fire a fifth discharge, for a well-directed shell dismounted the gun, which was observed to stand in a singular position, looking up towards the sky. As for the tower itself, it had lost all its regularity and beauty, and was pounded into holes of various sizes, which gave it a strange and ruinous aspect. In about an hour the fire of the Russians had considerably slackened. The frightened gunners might be seen flying from their pieces, and running vigorously away to cover. They were rallied, however, by an officer on horseback, who brought back most of them to their guns, when the fire proceeded on both sides with considerable regularity. The Russian fire, though well directed, made no impression upon our splendidly-built batteries; whilst it was evident that the earth of their's was rolling away, and flying off in dust-heaps, from the discharge of our heavy guns. The large redan on the left of the tower appeared at first to suffer less from the effects of our fire, and all the guns in her continued for a time to cast upon us every species of projectile. The Garden and Flagstaff batteries were likewise busy, as well as the *Twelve Apostles*, a large three-decker in the Admiralty harbour, and several ships on our right. In a short time one of Lancaster's guns burst in Chapman's battery, and a 64-pounder was dismounted. The latter was immediately placed upon the Lancaster's carriage, and the fire continued. Four men had been hurt by the explosion. Meanwhile the right face of the redan slackened its efforts, being badly damaged by our enfilading fire, and for the rest of the day not more than one gun to the right of the salient angle was able to hold its ground. The tower on the right had been completely silenced. The batteries at its base continued the fire from a diminished number of embrasures, and the ships in the harbour received several bad hits. There was every promise, therefore, of a speedy advantage to our efforts, when a most untoward circumstance occurred in the French lines. A shell from the Russians entered the magazine of their principal battery, which exploded with a terrific crash, dismounting their guns, and rendering the position untenable. The efforts of the enemy were, therefore, concentrated from that moment upon the English attack, which only succeeded during the day in maintaining the advantages which it had obtained. As if to crown the French misfortune, a second explosion, equally terrific with the first, took place in another of their magazines, and their line was thus completely disabled. This second explosion occurred at noon; but the French had ceased firing at ten o'clock. At one o'clock the Allied fleets, whose large vessels had been slowly creeping up to the town in tow of steamers, opened fire upon the town, which from that moment became enveloped in a dense cloud of vapour. The noise of the united broadsides of the two and three deckers, added to that which previously existed before, was terrific. The flashes of the guns were to be seen in hundreds through the smoke; and defenders, as well as besiegers, were enveloped in one common blaze and smoke. At three o'clock the magazine inside the great Russian redan exploded, with a terrific noise; and at four a second magazine, further in the town, exploded, amidst the hurrahs of the English assembled on the hill. A short time afterwards the Russians returned the shout, when some naval powder-monkeys exploded in that part of Chapman's Battery manned by the men of the *Diamond*. Fortunately, no one was hurt. Evening came on, and the town remained concealed by smoke. The ships withdrew at dark, when the fire ceased on both sides. I must leave for another letter a more detailed account of the effects of the cannonade by the united fleets.

Before Sebastopol, Oct. 23, a.m.

Six days have elapsed since the Allies opened fire on the defences of Sebastopol, and they have succeeded in doing material damage to the works of the enemy. But the grand object in view is as yet not a whit less distant than on the first day. Every evening the fire ceases by mutual consent, and both sides proceed to repair their damages, replenish magazines, and take the necessary repose. Every morning they resume with fresh vigour the business of the day before, and continue at it with untiring perseverance; but progress is very difficult to note on our side; and however severe may be the loss which we inflict on the Russians in destruction of guns and human lives, their stock of both these commodities appears to be in nowise diminished. Our engineers and artillery, by the superiority of their practice, and the excellence of their guns, dismount the pieces in the embrasures of the enemy, kill the gunners at their works, and fancy for a moment that they have silenced a troublesome fire; but no sooner have they turned their attention to other quarters than the active enemy withdraws the damaged instrument and puts in a fresh one, which bursts forth again with renewed vigour. Nor is this all: such is the enormous reserve which the Russians have in hand, that now and then they surprise our officers by opening fire in new places. The first symptom of these novelties is a shot or shell from an unaccustomed direction; looking towards which a thin round curl of smoke is visible, escaping from the interior of the town, and in the midst of houses. The fecundity of

SEBASTOPOL DURING THE SIEGE.—GENERAL VIEW.

THE SIEGE OF SEBASTOPOL.—WORKING PARTY OF HIGHLANDERS AND SAILORS IN THE 21-GUN BATTERY.

Russian resources is unbounded, whilst those which we possess are by no means so. Under these circumstances, it is difficult for a non-professional person to discover how the work on hand is to be accomplished, unless it be by the speedy use of that favourite instrument, cold steel. The great misfortune hitherto has been, that our allies, the French, were seriously damaged and delayed by the mishaps which befel them on the day of the opening of the fire. Their largest battery was completely destroyed by the explosion of its magazine, which killed or wounded forty-two out of forty-six men who manned it, and overthrew and rendered useless most of the guns. Another of their batteries was seriously hurt by a similar misfortune. But this has not been the only ill-luck of the French: they were pursued by misfortune for three days; and, on the 18th and 19th were more explosions were caused by the Russian fire. The works on our side fell the low tone given to the French, and the enemy were able to concentrate upon us many of the guns which should have been kept away from us by the fire of our allies. The fleets, in the attack which they made on the 17th, were but partially successful, and did not, I believe, effect any damage in Sebastopol comparable to that which the Russians caused the Admiral Lyons, in the *Agamemnon*, gallantly opened fire. The *Brenda* had dashingly run in to sound, and was hulled six times in as many minutes. The *Bellerophon*, the *Arethusa*, the *Sanspareil*, the *Albion*—the leviathans of our navy—went in with the *Agamemnon*; whilst the French, headed by the *Napoleon*, followed our example. But the ships in no case went nearer than 1500 yards to the batteries, and the result was that they did comparatively little damage. How far the Admiral of the Fleet is responsible for the result I know not; but it is more than probable that, had our ships gone closer to Sebastopol, they would have done much more damage. As it was, they gave Fort Constantine a considerable shaking. They rolled their shot and shell all over the town; but they gained no grand nor palpable object; and Sebastopol re-appeared next morning, when it was clear of smoke, just as fresh and white as usual. On the other hand, both the fleets have lain up, repairing the damages caused by the red-hot and chain-shot of the enemy; and it is said that the *Albion* and *Arethusa* are to return to England to refit. The first day's operations against Sebastopol were so far unfortunate; and the loss of 46 killed, and upwards of 250 wounded on board our ships alone, was already a large instalment towards making up a future grand total.

On the 18th the fire of the Russians was totally directed against the English batteries; the few guns which the French were working being

THE QUARRIES FIELD, HEAD-QUARTERS OF LORD RAGLAN, OFF SEBASTOPOL.

THE RUSSIAN ATTACK AT BALACLAVA.

The *Constitutionnel* of Monday gives the following account of the attack made by General Liprandi on the Allied troops on the heights of Balaclava. The details are apparently derived from official sources:—

A Russian despatch, received a few days ago, announced that, on the 25th and 26th, General Liprandi had two combats with the Allied troops. No details of these two engagements were known. It was not even very certain on what point they took place. Some accounts placed the scene of them at Balaclava; others, at the north of Sebastopol, in the environs of Eupatoria; and, if in the latter place, it became difficult to understand how a French division could have taken part in them. The despatches published by the English Government, and some private letters, have thrown a complete light on the two combats, and dissipated the disquietude which may have been conceived. The Russians, after a trifling success, have lost the last chance of delivering Sebastopol. It is known that the Allied army forms a semicircle round Sebastopol. The French extend from Cape Chersonesus and the sea to the rivulet which flows into the military port of Sebastopol, and the English from that rivulet to the river Tchernaya. At about 24 leagues from the lines of the besiegers is Balaclava, where the English artillery was disembarked, where the magazines of the Allies are established, and where the latter communicate with the fleet. The protection of Balaclava was confided to 1000 or 1200 marines, supported by a detachment of cavalry and artillery. At two kilomètres (1¼ mile) above Balaclava, on the road which leads to Sebastopol, and at the point at which a second road leading to Simferopol and into the interior of the Crimea strikes off, we meet the first heights of the Tauric chain. These heights, which dominate on the one hand Balaclava, and on the other the barren steppe in which the Allies are encamped, were defended by redoubts, the guard of which was confided to the Turkish troops. Finally, at the foot of these heights, and in the rear of the besiegers, were the corps destined to cover the siege: for the French, the division of General Bosquet supported on the sea; for the English, the division of the Duke of Cambridge; and finally, two brigades of English cavalry, under the orders of Lord Lucan, protecting the Tchernaya.

After receiving General Liprandi's reinforcements, Prince Menschikoff resolved to turn the right of the Allied army, in order to place the besiegers between two fires, and make a bold attack on Balaclava. If this *coup de main* had succeeded, the Allies could only have communicated with the fleets by Cape Chersonesus, would no longer have had an open road to the sea, and would have been deprived of their magazines; and yet they would have been obliged to reply to the fire of Sebastopol, and to defend themselves in their intrenchments. They would, consequently, have become besieged in their turn. General Liprandi, with all the troops which Prince Menschikoff could spare, entered the mountain from which the Tchernaya flows, and which the Allied army had crossed in its turning movement from the Belbec to Balaclava. He does not appear to have taken with him any artillery, or even cavalry, which explains the rapidity and precision of his operations. He succeeded completely in disguising his march from the Allies, as is proved by the arrival of the English despatch, and the ignorance in which General Canrobert in his report says he was as to the position of the enemy. That, however, need cause no surprise in such a mountainous country, cut through by frightful ravines, and covered with forests almost impenetrable, in which, consequently, it is impossible for the cavalry to be on the look-out. All that the Allies could do was to be on their guard in their intrenchments; and that is why they had thrown up so many points of resistance from Tchernaya to Balaclava. The difficulty of the ground appears not to have permitted Gen. Liprandi to execute completely his turning movement. The absence of beaten paths obliged him, no doubt, to take the road from Simferopol to Balaclava; and on the 25th October the Russians appeared on the heights in face of the redoubts of the Allies. Whether the Turks, according to their custom, were not on their guard, or were not in sufficient numbers to defend themselves, is not known; but it is certain that they abandoned their redoubts, after spiking their cannon, threw themselves in complete disorder into the plain, and went to give an alarm to the corps which covered the siege. These corps immediately marched out. The Division of Light Cavalry, under the command of Lord Cardigan, arrived the first, and immediately charged the Russians, who descended in good order into the plain in pursuit of the Turks. In spite of their courage, the three regiments which composed this Brigade in vain endeavoured to check the march of the enemy. The Dragoon Guards went to their aid, and were at first more fortunate; but their ranks were broken by the artillery of the redoubts, of which the Russians had turned the cannon, after unspiking them, against the Allies. In the meantime the British infantry arrived in line. It held firm under the fire of the Russian infantry, and under that of the redoubts, and thus gave time to the Division of General Bosquet, the farthest from the scene of action, to come up, and to form. The Allies then took the offensive, and drove back the Russians to the heights. There the latter succeeded in maintaining themselves in possession of two of the redoubts which they had carried. Thus ended the first day, which was extremely sanguinary and undecided.

Of what took place on the following day we have only few details The bold movement of General Liprandi had partly failed, since Balaclava remained in the power of the Allies, and the latter preserved their communication with the sea; it had partly succeeded, since the Russians were in possession of the sole beaten road, which leads from Balaclava to Sebastopol, and had taken position in the rear of the besiegers. Accordingly, on the 26th, Prince Menschikoff made a strong sortie against the English lines, in order to place them between two fires. If he had succeeded in carrying them, and in effecting a junction with General Liprandi, in the midst of the besieging army, the operations of the Allies would have been almost irreparably compromised. But the 90th put an end to the hopes of the Russian Generalissimo, after a very sharp engagement, he was driven back into Sebastopol by the division of General Sir De Lacy Evans, with a loss of more than 1000 men. At the same time the Allies attacked in front the heights occupied by General Liprandi, took the redoubts which the Russians had captured the previous evening, and drove back the latter, completely broken and demoralised, beyond the Tchernaya, in the ravines of the mountains.

The fortunate issue of these two combats appears to us to decide the fate of Sebastopol. The attack of General Liprandi was the last chance which the Russians possessed of compelling the Allies to raise the siege. Unless the Russians receive, which nothing allows to be likely, sufficient reinforcements to give a second battle they cannot renew such a desperate effort, and the siege will henceforth follow its regular course. The result is the less doubtful, as, masters of the course of the Tchernaya, the Allies are equally in possession of the great aqueduct parallel to that river, which alone conveys potable water to the military establishments and all the eastern part of Sebastopol. By cutting off this aqueduct, the Allies have been able to reduce the garrison and the inhabitants to the water in the cisterns. As the rainy season has not yet commenced, almost all the cisterns are empty, and the place consequently suffers frightfully. Some letters even affirm that at the last date a glass of clear water cost a rouble. Two sanguinary but glorious combats, and crowned with complete success, the destruction of a part of the Russian army, the energetic continuation of the siege, and the exhausting the enemy's resources of all kinds—such is the summary of the last news. We see in it nothing but motives for hope.

THE RUSSIAN ACCOUNT OF THE BOMBARDMENT.

PRINCE MENSCHIKOFF'S REPORT OF OCT. 17.

In the night of the 16th, and early this morning, the 17th, the enemy made embrasures in his trenches, and at six o'clock this morning he opened a very heavy and uninterrupted fire on our batteries and bastions, which, however, answered him with redoubled activity, and a fair measure of success.

About noon, the pieces planted on the kourgane (hill) of Malakoff, were dismounted; but the batteries erected on this side, and all the bastions, have not ceased firing, and, with so much success, that, towards evening, the English had only two pieces left wherewith to continue their fire. The French batteries had been silenced (*étientes*) much earlier, owing to the explosion of their powder-magazine.

On our side, as far as I can judge before receiving detailed accounts from each bastion and battery, the loss cannot have been numerically considerable. It is great, however, in another respect, for Admiral Kornilieff, having been struck by a ball in the leg, soon sank from the effects of the wound. At half-past twelve o'clock, while the cannonade was still going on from the trench batteries, the ships of the enemy opened a violent fire, by broadsides, without interruption on the battery No. 10, the Alexander battery, and the Constantine battery; which three replied with the same vivacity. The density of the smoke, during an extraordinary calm and heat, completely obscured the sea, so that it was impossible to make out the injury done to our batteries, or on board of the enemy's ships—the number of which appears to have been fourteen at the commencement of this cannonade. The fire only began to slacken towards nightfall.

Although I have received no data by which to judge of the results of this bombardment, I shall not delay to give an account in all haste to your Imperial Majesty of all that has transpired this day.

During the bombardment I was at Sebastopol, and saw the army. I communicated to it the ineffably gracious expressions contained in the message of your Majesty (which had been brought to me by your Aide-de-Camp, Albedinsky), and I added that after the bombardment, the army would, perhaps, have to defend Sebastopol from assault in a hand-to-hand combat.

I hope the army will show itself worthy of your Majesty's expectations.

PRINCE MENSCHIKOFF'S REPORT OF OCTOBER 18.

The fire of the enemy's batteries and ships, which did not cease yesterday from sunrise to nightfall, and which was surprising, by its massiveness and resonance, did not do so much damage as might have been expected.

The Alexander battery, as likewise the battery No. 10, for which last there was most cause for apprehension, have suffered very slightly. Greater damage was sustained in the Constantine battery.

As for the bastions that were engaged with the trench-batteries of the enemy, the majority of them have not been struck, except the bastion No. 3, the thirty-three guns of which have nearly all of them been dismounted. It is here that we have sustained the heaviest loss in men.

Although I have not yet received lists containing the names of the killed and wounded, from the reports of Generals who have been on the spot it is consoling to see that our loss amounts to barely 600 men disabled.

Among the wounded are Vice-Admiral Nachimoff and the Post Captain, Yergomyschef—but the former very slightly.

As a new bombardment was expected to-day (the 18th), our men worked all night to repair the damage, and all the dismounted guns were again placed in position. The bastion No. 3 was reinforced by the erection of a battery at its side.

To-day the enemy's fire has been entirely directed against the tower of the kourgane (hill) Malakoff, and the batteries raised on that side. The tower has not been seriously damaged, and the batteries have successfully replied.

The fire of the English batteries—far less lively than yesterday, on the whole—has diminished sensibly since noon; probably because Major-General Semiakine had gone, by my order, to the heights of Balaclava, and by showing in the rear of the English encampment, had occasioned some disorder there; to such so, that the enemy's army had formed in haste and marched towards Balaclava. By this demonstration of a detached corps, the object in view—that of diverting the enemy from the fortress—has been attained. The French batteries hardly fired at all to-day against Sebastopol.

The vessels that bombarded yesterday, and which it would seem, were exclusively French, withdrew this morning in the direction of the Chersonesus lighthouse.

Yesterday, by reason of the smoke, and to-day, on account of the morning fog at sea, it has been impossible to make out what injuries the ships have sustained. It seemed as if one ship of the line had its spars broken, and as if two others had been set on fire by our red hot balls; but this I cannot affirm positively.

PREPARATIONS AGAINST THE ATTACK.

On the 13th and 14th, 4000 Irish Turkish troops arrived from Stamboul, and proceeded to the right front of the position of Balaclava, where they are making batteries for the defence of that position. It was easy to see that these Turks were from Constantinople, for more than usual care had been bestowed on their outfit. They had all warm winter clothing, and they were, moreover, provided with tents. The troops that a combatives us from Bulgaria are still in their summer dress, have no tents, and are compelled to sleep in the open air. The command of the troops in the position of Balaclava has been given to Sir Colin Campbell. The position is defended by twelve guns in five batteries, by 500 marines, with six guns, not in the batteries, the 93rd Highlanders, and Maude's troop of Horse Artillery. Almost the whole of our cavalry (about 4000 men), are camping within the lines of the position of Balaclava; in considering the broken ground, their usefulness would be very limited in case of a night attack. The prevailing opinion is that the Russian army in our rear is almost certain to attack Balaclava the moment our batteries open fire. But the Russian attack has been announced very frequently, and, now that we have strengthened the position, there is certainly no saying whether or not the enemy will attack us; but, at all events, we are prepared for their coming.—*Letter from Balaclava*, Oct. 16.

WARNING OF THE RUSSIAN ATTACK.

At Balaclava every preparation has been made to receive an attack from 15,000 Russians in our rear. A Hungarian officer deserted, and informed us of the plot. But when our disturbers arrive in the valley the field-works will astonish them; and should they manage to pass them, the *Agamemnon's* guns will sweep them away by fifties as they draw nigh the harbour; and a goodly supply of balls will be poured in by our 3000 men, supported by some 5000 Turks, who happily landed this morning. The French are also in force close at hand, so we need be under no alarm. Sir Colin Campbell has been sent down to Balaclava, to take command and direct the defence of the harbour, should the Hungarian's tale prove true.—*Letter from Balaclava*, October 13.

BLOCKADE IN THE BLACK SEA.

The following letter has been sent from the Foreign Office to a City merchant:—

Foreign Office, Nov. 8.

SIR,—With reference to our letter of the intentions of her Majesty's Government with respect to the blockade of the Russian ports in the Black Sea and Sea of Azof, I am directed by the Earl of Clarendon to state to you that it is the intention of her Majesty's Government to institute a rigorous blockade; but, pending the operations in the Crimea, no distinct assurance can be given as to the period when it will be effective.

I am, sir, your most obedient humble servant,

John Johnson, Esq. WODEHOUSE.

EMIGRATION NOTES AND FIGURES.—1815 TO 1853.

The Report of the Emigration Commissioners, just published, contains, buried amid a mass of matter, some very curious details respecting a movement which, in the last twenty-five years, has become not only one of the most important parts of the Shipping trade, but one of the most remarkable instruments of social change, in Europe, America, and Australia—a movement over which Government and laws appear to have very little control. In 1792 the minister of the parish of Tyrie reported to Sir John Sinclair, then preparing his Statistical Survey of Scotland, that "several of his parishioners, encouraged by people about Glasgow, have emigrated to America, where they have settled, and sent home money to their aged parents. By comparing in their letters their present with their former condition in this country, they have done much to excite others to follow their example;" and he adds "such examples, and some late publications, may do much hurt, unless seasonably prevented."

What the minister of Tyrie wrote in 1792, bankers, manufacturers, and farmers earnestly urge in 1854. They say that this country has need for every man—they pray the emigration should be discouraged. But they may just as well try to regulate the price of corn or the rate of wages, as endeavour to check or guide the tide of emigration which has flowed, ever since it began, into those channels where the best rewards for labour were to be earned.

In 1815 the total emigration from the United Kingdom was, in round numbers, 2000, of which one third proceeded to the United States, and the remainder to the British North American Colonies. In 1825 the total emigration had increased to 14,800: of which 485 proceeded to New South Wales; 114, to other places; and the remainder, to British America and the United States. In 1835 emigration amounted to 44,700. During the intermediate ten years colonising land-owning companies had been formed in Canada and New Brunswick, and agents for the sale of land in the United States had commenced agitation in this country. New South Wales had also a raised sum of money by the sale of land, for paying the passages of labourers, and the labour-demand of that colony was increased by the abolition of transportation. From these combined causes, emigration rose, between 1825 and 1835, from 31,000 to 56,900; and in 1832, under the influence of great distress among the labouring classes in Ireland, to 103,000.

Between 1835 and 1845 the machinery for carrying on and stimulating emigration, had largely increased by the natural operations of commerce. The timber trade with the Canadas, the cotton trade with the United States, afforded means for cheap conveyance; while the progress of canals, railroads, and other public works, carried on by loans obtained in Europe, afforded ample employment for unskilled labour, and, at the same time, opened up new tracts of fertile waste land for colonisation.

The emigration to the North American Colonies reached 54,000, in 1842; but the greater portion of this number merely made New Brunswick their road to the United States: the emigration direct to the States in the same year was 64,000. In the two following years there was a falling off in American emigration, followed by an enormous increase, which will presently be explained.

Between 1837 and 1842, the Australian Colonies and New Zealand became important as Emigration fields. The South Australian and the New Zealand Companies expended large sums in exporting labourers; while sales of land in New South Wales, and especially in the newly-settled district of Port Phillip, attracted emigrants with capital, and paid the passages of the needy. Under these influences, emigration to those South Sea Colonies was 5000 in 1837, 14,000 in 1838, 15,700 in the two following years, 32,600 in 1841; after which—South Australia becoming insolvent, and New Zealand a failure—it dwindled away to 830 in 1845—a year in which emigration to America reached 90,000. Between 1845 and the present time, emigration has taken its largest development. It was, in 1845, 93,500; in 1846, 129,800; in 1847, 258,000; and in 1852, 368,000.

The Irish famine, in 1847–8, raised emigration to the North American Colonies to 109,600, and to the United States to 142,000. These causes have contributed to stimulate American emigration. The re-emigration to Oregon and California, which left large openings for emigrant labour in the old settled States; the change from sailing to steam-packets, in the Transatlantic voyage, which left the large sailing packets to compete with each other for steerage passengers, and the extension of the remittance system. During the continuance of the Irish famine, persuasion was no longer needed to collect emigrants, the whole country only seemed wanting the means to depart *en masse*. What books, pamphlets, newspaper articles, private canvassing, and public speeches, had failed to do in previous years, the potato rot did; and now the Irishman takes to emigration as naturally as a duck takes to water; nor will the warnings of any hen-like landlord or priest avail to stop his emigrating propensities. Letters, containing not only minute and tempting descriptions of America, but remittances, have been received in every parish in Ireland, and are received every day. Nothing can withstand such arguments.

In 1848 the Irish in the United States remitted, to pay passages of relatives in Ireland, upwards of £460,000; in 1850, £957,000; in 1852, £1,404,000; in 1853, £1,439,000; besides the amounts sent through private hands and minor mercantile establishments, of which no note could be obtained.

At one period the emigration to British America and the United States was nearly balanced; and in 1847 the emigration to the British Colonial ports was swelled by ships dispatched by Irish and Scotch landlords; but since that period the departures for British America in seven years have fluctuated between this and forty thousand per annum; while to the United States direct they have risen from 142,000 to 230,000. Between 1845 and 1853 the South-Sea Colonies emigration, which had fallen to 830 souls, had risen to 61,000; in 1852 it was 88,000.

The increase has arisen from the increased taste of the country for emigration, from the increased pastoral and agricultural resources of Australia, from the operations of the Canterbury Company in New Zealand in 1850, and from the gold discoveries in New South Wales and Victoria in 1851-2. At present emigration

to New Zealand and the minor colonies has almost ceased. It was divided in 1853 as follows:—

New South Wales	10,573
Victoria	40,469
South Australia	6,388
Western Australia	955
Van Diemen's Land	201
New Zealand	1,420
	61,401

In the same year, the emigration to the Cape of Good Hope and Natal amounted to 269; and for the Falkland Islands—which have a Governor, a Chaplain, a Magistrate, and other functionaries, costing about £5000 a year, to rule over forty or fifty colonists—just one emigrant embarked.

If we wished to show how powerless written and spoken praise is to colonise a country, we have only to turn to the statistics of Emigration during the last twenty years. During that period the best-abused countries have been New South Wales and the United States of America. The countries about which the most glowing Guides Books have been circulated, and the largest amount of capital invested in promoting emigration, have been Canada, New Brunswick, South Australia, and New Zealand. But it was found that the Canadian and New Brunswick Land Companies could not keep in the colony the labour they had imported in the face of the public works carried on in the United States. But when public works, as at present, are carried on in Canada, the people re-emigrate from the States. At a period when it was the fashion to discourage emigration to the United States in every possible manner, before we discovered that a man in Mississipi Valley was as good a customer, and useful a labourer, as a man in Warwickshire, the people went in shoals, and nothing could stop them. All the elaborate machinery for praising South Australia, after the first insolvency, had no effect, until the Burra Mine was set to work; then emigrants and trade turned to South Australia. About New Zealand as much paper has been printed as would cover all the agricultural land in the Northern island; and every sort of influence—aristocratic, religious, financial, and political—but without effect. People would go to the Australian Colonies, where they could get a living, in spite of warnings and temptations from the New Zealand House. At present, under more favourable auspices, with cheaper land, quiet people emigrate from Australia to New Zealand. In a word, the emigrating public may be deceived once, but not twice. In 1854 mechanics and cottiers know more about the comparative merits of the emigration fields in all parts of the world than Colonial Ministers did in 1844.

The emigration to Australia was less by 26,000 in 1853 than in 1854. This diminution consisted in emigrants who paid their own passages. A reaction set in after the fever of 1852. The high rate of passage in 1854, coupled with the increase of wages in this country, may be expected to cause a further decrease; but then, against these drawbacks must be set the operation of Australian remittances, on the American plan, which are only just now coming into operation on a very extensive scale devised by Mrs. Chisholm.

As a set-off to the attractions which the gold diggings offered in New South Wales and Victoria, South Australia has established steam navigation on the river Murray for nearly two thousand miles; thus rendering available, by water carriage, the produce of a vast tract of country in New South Wales and Victoria, which will be most conveniently shipped from a South Australian port. On the banks of the waters recently navigated one million and a half of sheep graze, besides cattle. Large tracts will be stocked, and thousands of acres cultivated for corn and wine, now that cheap steam navigation has opened a road to a market. Thus a new field has been opened for settlers tired of the gold diggings.

We must note among the emigrants from British ports last year about 30,000 foreigners, chiefly Germans, proceeding to America by British ships. The whole emigration from Germany approaches 300,000 souls. A foreign emigration is also proceeding to Australia, where Germans are successfully established in great numbers. Italians, Hungarians, and Swiss, are also to be found there cultivating the soil: Frenchmen, too, but only as merchants or shopkeepers.

S. S.

THE RESTORATION OF POLAND.

(To the Editor of the ILLUSTRATED LONDON NEWS.)

CARLTON MINIOTT, Oct. 31, 1854.

Sir,—The excellent sentiments enunciated in your valuable Journal of Saturday last, on the restoration of Poland to a place amongst the nations of Europe, will meet with a warm response in the bosom of every honest man; and I sincerely hope that the editors of every other reputable newspaper will speak out on this important question to humanity in the same manly manner in which you have done. The true friends of Constitutional Government must not allow the present crisis to pass by without accomplishing something worthy of all the bloodshed and the treasure expended in the great struggle. Had England and France done their duty in preventing the first infamous partition of Poland by Catherine of Russia, Frederick of Prussia, and Maria-Theresa of Austria, in 1772, or the second spoliation of 1793 the present war would not have been needed for the protection of European freedom. Again, in 1830-1, an opportunity was afforded us by Heaven to make reparation for our previous neglect of duty; but we supinely allowed the brave defenders of Poland to be cruelly butchered, sent to the mines of Siberia, or forced to wander as poverty-struck exiles in more favoured lands. It is useless to repine at the past, though the young men of England cannot but look back with healthy sorrow on the political ignorance of their fathers. Thanks to that ark of liberty, the press, the people in city and village now understand how profession to the liberties of one nationality is essential to the security of those of others. With the domestic affairs of other nations, their forms of government, modes of faith, &c., we have clearly no right to interfere; but when, as in the case of poor Poland, some heartless despots, instead of honestly endeavouring to develop the resources of their own countries,

Cry Havoc! and let slip the dogs of war,

for the acquisition of territory to which they have no more claim than you or I have to a kingdom in the moon; then it is surely both just and politic for the other nations to interfere. Above all, it is necessary that the *peoples* should speak out, that their respective Governments may know at once what to do. What I now wish to suggest through the medium of your very widely-circulated paper is, that *parish meetings* be held, wherever practical, throughout the realm; and that respectful memorials be laid at the foot of the Throne from every nook and corner of this favoured land, earnestly impressing upon our beloved Queen the necessity for the immediate toration of Poland—both in justice to that suffering country, and as a barrier against Russian aggression; memorials from which the Ministry may see clearly that with nothing less than the restoration of Poland will the people of Britain rest content; but for that glorious and necessary act of justice, they who paid twenty millions of money to strike the manacles from off the poor Negroes in their colonies will cheerfully make any sacrifice—looking upon the restoration of Polish nationality as alike necessary to the security of the peace of Europe and the liberty of the world. Yours, &c., GEORGE MARKHAM TWEEDELL.

CHESS.

TO CORRESPONDENTS.

T. T., of Hanworth: M. de R., Paris; J. M., and Others.—We believe there is no flaw in Problem 557. Look at it still strivaly once more

G. B. F., Dundee.—The Variations submitted are now under consideration, and shall be reported on in a week or two.

J. T. L., WHITE, MILES, and Others.—Problem 559 admits of an easy solution in two moves. That is evident, but why have you not sought for the author's solution?

J. B., of Bridport.—Neat but beneath your ordinary standard.

C. M. J.—Pretty thumeh not at all difficult.

M. W. R. Winder.—Correct and clever.

F. HEALEY.—A beautiful and most ingenious little stratagem.

M. W. R.—Quite correct.

H. V., Preston.—The Game by Correspondence between the Preston and Birmingham and Edgbaston Clubs, shall be examined.

W. J. W., and R., OXON.—Assuredly not. He would move his King into check of the adverse Bishop by doing so.

C. M. J. S.—When a player can advance a Pawn to its 8th sq, he may claim for it any Piece he pleases, without reference to the pieces he has at that time on the board. See Rule 21 of the "Chess-players' Handbook."

CAVALLEROS, WORCESTER, FORDHAM, D.D.—They are now in the examiner's hands.

SOLUTIONS OF PROBLEM NO. 557, by J. B. M., Omicron, F. R. S., Jessie, J. W. P., Murphy, S. P. Q. R. are correct.

SOLUTIONS OF PROBLEM NO. 558, by E. W. Taylor, Derwent, A. L. M., J. P., Dalston; J. R. Melrose; Miles, D. W. F., Ossagh, A. Z., Sea-ary, are correct.

SOLUTION OF PROBLEM NO. 559, by J. F. of Dalston, is correct. All others are wrong.

*** The greater part of our Notices to Correspondents are unavoidably postponed until next week.

SOLUTION OF PROBLEM NO. 559.

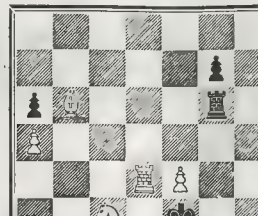
WHITE.	BLACK.
1. R to Q Kt 6th (ch)	K moves (best)
2. R to R 6th	K or B takes one or other Rook
3. B Mates.	

[This is the author's solution; but, to make his Problem perfect, the conditions should have been "White to mate in three moves, *neither more nor less*;" for it admits of an obvious and common-place solution in two moves.]

PROBLEM No. 560.

By Mr. W. GRIMSHAW.

BLACK.



WHITE.

White to play, and mate in four moves.

CHESS MEETING AT CAISTOR, IN LINCOLNSHIRE.

The meeting projected by the Chess Amateurs of Caistor took place, as appointed, on the 24th and 25th ult.; and, although from the circumstance of the Grand Bazaar and Ball at Hull, in aid of the Literary Institution, occurring at the same time, many expected visitors were absent, all things passed off in a manner which must have been highly gratifying to every one concerned. Among the chief amateurs, we noticed Messrs. Staunton, Oldham, and Löwenthal, who came from London expressly to be present, and who added largely to the interest of the gathering by their matches with the leading players of the country. Messrs. Palmer, Newman, Walker, Howlett, and Middleton, of Hull; Mr. Doughty, from Lincoln; the Rev. H. Maclean, the Rev. J. Fooley, the Rev. S. Parkin, the Rev. J. T. Bell, the Rev. S. Turner, the Rev. H. R. Lloyd, the Rev. G. Overton, Dr. Macintosh; Messrs. Henry, A. B. Skipworth, J. H. Daubney, Iles, Young, Marrie, &c., &c. On this, as on the former occasion, the ladies, of whom there must have been at least five-and-twenty present on each day, formed a prominent and most attractive feature in the assemblage, to which they imparted a grace and vivacity too frequently wanting in meetings of this description. Play commenced about twelve on Wednesday morning, and was kept up on all sides with untiring zeal until six in the evening, when the guests adjourned to partake of an excellent dinner at the Chief Hotel. On the morrow the sports were renewed, and with such spirit and determination that the final checkmate was pronounced only shortly before midnight.

We have been favoured with several excellent games, the fruit of this agreeable little Tourney, which we intend to give as occasion serves. The following game was played between Mr. STAUNTON, on one side, against Messrs. A. B. SKIPWORTH, T. C. OLDHAM, and other amateurs, in consultation together; Mr. Staunton giving to the Allies the odds of the Pawn and two moves.

(Remove White's K B P from the board.)

BLACK (Allies).	WHITE (Mr. S.)
1. P to K 4th	
2. P to Q 4th	Q Kt to Q B 3rd
3. P to Q 5th	Q Kt to K 4th
4. P to K B 4th	Q Kt to K B 2nd
5. K B to Q 3rd	P to K 4th
6. B P takes P	Q Kt takes P
7. Q to K R 5th (ch)	Q Kt to K B 2nd
8. P to K 5th	P to K Kt 3rd
9. Q to K 2nd	Q to K 2nd
10. K Kt to K B 3rd	K B to K Kt 2nd
11. P to K 6th (a)	P takes P
12. K B to Q Kt 6th (b)	K to B sq (b)
(ch)	
13. P takes P	Q B takes P
14. Castles	K Kt to K B 3rd
15. K to K sq	P to Q B 3rd
16. K B to Q 3rd (c)	Q R to K sq
17. Q Kt to Q B 3rd	K Kt to Kt 5th
18. Q R to K 4th	Q to her sq
19. P to K R 3rd	K Kt to K 4th
20. B to K Kt 6th (d)	Q to her Kt 3rd (ch)
21. Q B to K 3rd	Kt takes Kt (ch)
22. Q takes Kt	B to Q 5th
23. Kt to K B 6th (e)	Q R to K 2nd
24. P to Q Kt 3rd	K to Kt 2nd
25. K to K sq (f)	B takes B
26. R takes B	Q to her 5th (g)
27. Q R to K B sq	Kt to Q 3rd (h)
28. Q to K Kt 3rd	K R to K B sq
29. P to Q B 3rd (i)	Q to her Kt 3rd
30. Q takes Kt	

And in a move or two the Allies triumphed.

(a) This, with the succeeding move, is an ingenious conception. The Allies perceive their K Pawn is no longer tenable, and so determine to sell him dearly.

(b) He was compelled to move his King, and thus forfeit the right to Castle, or incur much more serious damage.

(c) It does not appear that they would have improved their game by taking the Bishop.

(d) Very well played. If White, in reply, had taken Kt with Kt, giving check, they would have captured the Kt with Queen, and have got a fine attacking location for her.

(e) The position is now one of some difficulty to both armies. The forces, to be sure, are equal; and thus far, considering he gave large odds at the beginning, the advantage may be on the side of White: but then the uncomfortable restraint in which his King is placed, seems so fully to counterbalance any little superiority he may have gained in other respects, that we should hesitate to give his side the preference.

(f) Prudent and far seeing.

(g) This move, so specious in appearance we shall find in the sequel, was indiscreet and ill-considered. Wis should rather have brought his long-imprisoned K Rook into action.

(h) This does not seem very well, calculated to improve White's prospects, and we must admit, after looking at the situation some time, we have not been fortunate enough to hit upon any move that does. If he had played the obvious coup of K Rook to K B sq, Black would first have driven away his Queen by Q Rook to K 6th, and then have given check with their Kt at K R 5th, winning easily. So, also, if he had moved his Kt to K Kt 4th, the Allies would have got an irresistible attack on him by Q to K Kt 3rd, and afterwards P to K 6th. Finally, if he had played his Kt to K 4th, his opponents must have won in a canter by Kt to K Kt 5th (ch), followed by Q to R 3 8th.

(i) A ruinless blow. After this White's game is beyond all ameliorants. If he still tries to protect the Kt by moving his Q to her B 4th, she will be dislodged again by P to Q Kt 4th, and the piece falls as in the text.

CHESS ENIGMAS.

No. 894.—By C. M. INGLEBY, M.A.

White: K at Q Kt 6th, R at K 8th, Kts at K 8th and Q B 2nd, P at Q R 4th.

Black: K at Q 4th, Ps at Q B 6th and Q K 4th.

White to play, and mate in four moves.

White to play, and mate in six moves.

FINE ARTS.

NATURE PRINTING.

Messrs. Bradbury and Evans have just produced a collection of interesting specimens of their patent electrotype process; by which botanical and other natural objects may be represented with all the exactness of the originals. The present issue of a "A Few Leaves from the newly-invented process of Nature-Printing," consists, as the title implies, of botanical subjects—chiefly ferns, and other wild flowers—upwards of thirty in number, and involving every variety of colour and treatment. They are, in all respects, admirably executed, and cannot but prove of great value to the student of botany, to whom the formation of collections of original specimens, though a labour of love, is one sometimes of considerable difficulty. The *modus operandi* of the new process may be briefly described:—The natural object h.ving been laid out and pressed on paper, a cast is taken of it by the agency of electricity; and this forms the printing surface, from which any number of impressions may afterwards be worked. Though most readily applicable to vegetable substances, which are at once capable of being arranged so as to present a surface in low relief, it is equally available, with a little arrangement, to the reproduction of fossils, and other natural objects. Considerable pressure is used in printing, whereby the branches, leaves, &c., are made to stand out in the same relief as the originals, when glued to paper. We look to great and valuable results from the prosecution of this and other novel applications of the art of printing—an art, after all, as yet in its infancy.

MR. BARKER'S PICTURES OF NELSON AND WELLINGTON.

The engravings from Mr. Barker's companion picture of "Nelson uttering his Last Prayer, just previous to the battle of Trafalgar;" and of "Wellington Reading the Despatches from the Seat of War in India," have just been issued. Both are executed in the finest line manner—the Nelson by F. Joubert, the Wellington by F. Bacon. For subject and treatment, the naval subject commands our decided preference. The likeness of the Duke is unmistakably accurate: he is represented as sitting in his study at Apsley House, and discussing the contents of newly-arrived despatches in his usual business-like manner. But all this matter-of-fact reality sinks to nothing when compared with the sublime sentiment embodied in the companion picture, where the great naval hero of an age, humbles himself upon his knees before his Maker, in the very hour of commencing one of the most brilliant, most arduous, and most conclusive contests ever fought upon the seas. If the contemplation of this incident, and what so nobly followed, do not suffice to stir up the old English blood, even in a Black Sea fleet, we know not what will.

MR. J. EVAN THOMAS'S STATUE OF WELLINGTON.

A fine pedestrian statue of the late Duke of Wellington, designed by Mr. J. Evan Thomas, the result of a subscription amongst the wealthy inhabitants of Brecknock, has just been cast in bronze, by Messrs. Robinson and Cotham, at their foundry, Lower Belgrave-place. The figure is colossal in dimensions, measuring eight feet six inches in height; the costume is the military frock-coat, with a cloak loosely thrown over the back; the attitude is very easy and dignified, and the likeness excellent. At the feet of the gallant Duke are the volumes of his celebrated Despatches. This fine work is cast in one piece, and has been admirably turned out.

LESSONS IN ART. By J. D. HARDING. Second Edition. THE GUIDE AND COMPANION TO THE LESSONS IN ART. By the Same. Day and Son.

Drawing is now beginning to be recognised as an essential branch of elementary education, and very properly so. It does not of course follow, nor is it intended to be implied, that every one who learns to draw should necessarily become an artist; the notion would be as absurd as to suppose that every one who learned to write should necessarily become an author. The power of representing by lines, and a certain quantity of shade, objects seen by the eye with the same amount of truthfulness as the ideas of the mind are by those adopted pencils of light, is all that is sought in the first instance; the application of the art is a matter for after consideration, which remains to be resolved by the practitioner. Whilst the acquirement of a good drawing hand will not be thrown away upon the most unimaginative and unambitious subject, even the ordinary vocations of life, the want of this instruction has caused many who have, or fancy they possess, a gift for art, to labour in the dark at the outset of their career; to waste much time and temper, and eventually to throw down the adopted pencil in disgust. And even those who persevere to the end; who, having acquired some facility in the mixing and spreading of colours, have adopted painting as a profession, how many instances do we meet with of ignorance in the principles of drawing, and awkwardness in the practice of it, deficiencies utterly preventing them from attaining any position beyond that of mere decorative or furniture-picture producers!

Mr. Harding, one of most accomplished and successful drawing-masters of the day, seems to have justly estimated the difficulties of the matter, and the principles upon which they should be overcome, and has put forward the result in a series of progressive lessons, forming the work first named above; to which he has added the "Guide," or Handbook, which, though chiefly addressed to teachers, is also available to the use of all students of ordinary intelligence.

Aware of the fatal error of attempting to learn to draw by the unaided guidance of the eye—in other words, upon the principle of mere imitation—Mr. Harding commences his course at the very beginning of all art-processes—the preparation of the tools and materials, and the way of handling them. He tells his scholars how to cut their pencils, and file down their shades, and then how to hold them; the method varying according to the nature and direction of the lines to be traced. Lines straight and curved, and all superficial forms capable of being composed of them, occupy the first twenty-three lessons, forming the first section of study. Then comes instruction in shading, and application in representing solid form; and then, in the following three sections, come rules in foreshortening and perspective generally, illustrated by numberless examples of geometrical and architectural forms, and articles in domestic use. So confident is the author of the necessity of step-by-step instruction, that he challenges any too ambitious student to attempt copying any one of the drawings in the fourth section when just out of the first, and keeping the result by him, compare it afterwards with his later labours, when he shall have arrived at the identical illustration in due course.

The author's instructions, more particularly those addressed to teachers, are full of sound and practical good sense. One important feature in his method is that he establishes a rule for everything, and obliges the student, on examination, to give the reason for the position, direction, length, &c., of every line in his drawing:—

By these means (observes Mr. Harding) the teacher unfailingly observes that his most intelligent are his ablest pupils. By subjecting the pupil to the critical review of his work, he is secure against careless attention to every lesson whilst engaged on it, knowing that, at its conclusion, nothing will be taken for granted; but that he will be required to give admissible and substantial reasons for what he has done; to show that he has worked out principles, and been guided by them, and has not followed an example in ignorance or blind reverence. He must have no hope that, to any question from the teacher, it will be sufficient to say that he has followed what he saw in his example, unless he can tell the reason for his example being as he found it, and his consequent reason for having followed it.

It appears to us that such a course of catechetical analysis, in a class—every individual in which has drawn the particular object under consideration, and every one of whom is anxious to supply the omissions, and correct the errors of others—must be invaluable.

Upon the whole, Mr. Harding has produced the best-considered, as well as the most intelligible and practical treatise on elementary drawing which has ever come under our notice; and we cordially recommend its general adoption. The engraved examples are admirably executed in wood and lithography; and some of them are after picturesque architectural remains which adorn our own or foreign lands.

In addition to the two volumes before us, and others in higher branches of art, Mr. Harding has devised a collection of art-models, which will enable the student to make a first application of what he has learned from surface-teaching to the treatment of actual objects in nature

THE MOUNTGARRET PEERAGE.—The fight for an Irish Peerage, with £10,000 a year annexed, supposed to have been decided at the last Kilkenny Assizes, will, in all probability, end to the manifest advantage of the gentlemen of the long robe, be fought over and over again before the winner of the great stake can be suffered to sit down at ease. A conditional order from the new court has been granted. The plaintiff has already assumed the title of Lord Mountgarret.

THE SIEGE OF SEBASTOPOL.—VALLEY OF INKERMAN.

THE SIEGE OF SEBASTOPOL.

(*Continued from page 483.*)

insufficient to turn away any important fire from us. Notwithstanding this, our men laboured with great spirit; and, whilst the French were losing another of their magazines by the explosion of a Russian shell, we were performing the same part for the enemy, by blowing up one of its magazines near the circular tower. The Lancaster one-gun battery did not, however, share in the general success. It never succeeded in striking the *Twelve Apostles*, which was the special aim of her fire. Our severest loss during this fatiguing day was that of Colonel Hood, who was killed whilst in the advance of Gordon's battery with a picket of the Guards.

On the 19th the French had so far repaired damage that they opened heavily on the Quarantine Battery, and did serious damage there: their guns were worked by sailors; but, as ill-luck would have it, their magazine was again blown up, and their fire slackened in consequence. They laboured hard, however, in making new approaches nearer to the town than those where they had suffered their losses. Our fire was kept up with such spirit during the day, that that of the Russian slackened considerably. Mortar batteries, which we had set to work were very much the cause of this advantage. At the same time every means were employed to fire the town. Rockets were sent in which caused a considerable smoke, but no general outbreak of flame; and it soon became apparent that all means to destroy the place by fire would be unavailing, so proof were the stone-built houses against burning projectiles.

On the 20th the guns in Gordon's right battery were withdrawn, as it was considered that they were working at too great a distance from the round tower against which they were directed. The Lancaster gun was left to fire at the shipping, which it merely annoyed, without doing serious damage. In the night two guns had been added to Chapman's attack, and increased the fire upon the Garden Battery of the Russians, which was annoying both us and the French considerably. The latter in the meanwhile continued active on their works in advance. The fire was vigorous between us and the enemy, and the redan and earthworks near the tower began to wear a very ragged appearance; but the result of the day was the same as that of the previous ones, and all efforts to fire the town were again unavailing. On the night of the 20th the Russians attempted a diversion, by marching several battalions of infantry, and a quantity of cavalry and guns to the front of Balaclava. The Turks fired several rounds at them from their new redoubts, and Sir Colin Campbell thought it necessary to send for reinforcements. Accordingly, General Goldie's brigade moved out at three in the morning to the front of Balaclava. Lord Lucan's brigade of cavalry struck tents, but the Russians retired without having molested us—content, no doubt, with giving us an alarm. The French continued their works during the night, and on the 21st. But they were hard pressed that day, and their parties suffered so, that General Canrobert wrote to Lord Raglan to request that the British guns should for a time be directed against the right face of the Russian redan, which was causing him serious annoyance. This was done by our guns with great success, and our practice elicited a letter of thanks from the French Commander-in-Chief.

The enemy's magazine in the round tower battery exploded again for the third time. During the previous night a new battery had been erected by the Russians near the ruins of Inkerman. A redoubt was commenced on the right of Sir De Lacy Evans's position to silence it. On the 22nd this was finished, and opening with two 18-pounders, silenced the enemy after he had fired four rounds. In the night a new battery for Lancaster's guns was raised to the right of Gordon's left attack, and about 100 yards nearer the town. At the same time works were commenced to approach Chapman's attack nearer the principal objects against which our fire was specially directed. The efforts made to fire the town were again unavailing, and the only visible damage done the enemy was the blowing up, for the fourth time, of his magazine in his circular fort. We learnt with surprise and concern that, in the night, Lord Dunkellin had been taken prisoner by the enemy. He started in the dark, with a sergeant, to join his picket, and both lost their way. Lord Dunkellin fell into the hands of a Russian party, which he took for our own, and was thus made prisoner. The sergeant who accompanied him escaped.

The following is the Memorandum of Orders issued to general officers on the night previous to the opening of fire:—

Before Sebastopol, Oct. 16, 1854.

The fire upon Sebastopol will commence to-morrow morning, about half-past six, from the French and English batteries, in co-operation with the combined fleets.

The precise moment of opening the fire, however, will be indicated by the discharge of three mortars from the centre of the works of the French army.

PLAN OF THE ATTACK OF THE ALLIED FLEETS ON THE FORTS OF SEBASTOPOL, AT 1.30 P.M., OCTOBER 17 1854.

The troops off duty will remain in their respective camps, ready to fall in at a moment's notice, without their knapsacks, great-coats, or blankets.

The horses will be attached to the field batteries.

There will be with each division parties of Sappers consisting of 20 men, under an officer of Engineers, ready to carry picks and shovels, crowbars, and sledges, bags of powder prepared, felling-axes, and scaling ladders.

Each division will also have with it a detachment of twenty artillerymen under an officer of artillery, with rockets and spikes for guns (the latter are only to be used in the event of the troops having to retire from a battery).

The arrangements for collecting the several articles above enumerated will be carried out by the officers of engineers and the officer of artillery.

The Generals of divisions will make every arrangement for the ready communication of the troops with the reserve musket ammunition, which, however, must not be placed upon the horses until ordered.

Previously to the opening of the fire, all advanced pickets, with the exception of the men selected to fire into the embrasures, will be withdrawn, under the direction of the general officer on duty in the trenches, and retire under cover to their respective camps.

The covering parties in the trenches will be kept clear of the batteries, and such of them as cannot find cover in the trenches will be moved to such positions in the rear or the flank as will ensure their being at hand to protect the batteries, whilst they will be themselves screened from the enemy's fire. These covering parties will be moved as the commanding officer of the party may see occasion, in consequence of the fire of the enemy; where the whole trench is occupied by guns the covering parties must be placed, as above stated, under adequate cover in the immediate neighbourhood.

The working parties will remain in the trenches, or be withdrawn, according to the direction of the commanding engineer.

As it is possible that the field batteries may be required to move, the senior artillery officer of the division and the officer commanding the battery will make themselves acquainted with these communications to the right and left.

The cavalry, under Lieutenant-General the Earl of Lucan, and the troops of all arms under Major-General Sir Colin Campbell, British and Turkish, posted for the defence of Balaclava, will be held in readiness throughout the day to act on the slightest notice.

The meat for the men's dinners will be cooked as early as possible to-morrow morning, in case of the army having to move forward.

In the event of an advance, the Commander of the Forces particularly requests the General Officers commanding Divisions and Brigades, the commanding officers of regiments, and the officers commanding companies, to impress upon the men the urgent necessity of maintaining their formation and keeping their order: the success of any operation they may be called upon to undertake, their honour, and indeed their own individual safety, depend upon their being under complete control, ready to repel any attack, or to overcome any resistance, that may be opposed to them.

Lord Raglan will be at the Quarries in front of the Third (Sir R. England's) Division; General Canrobert, at the Maison d'Eau, on the left of the British line, and on the right of the French position.

(Signed) RAGLAN.

PLAN OF THE ATTACK AT 5.30 P.M., WHEN THESE WERE ALMOST EXCLUSIVELY THE SHIPS ENGAGED WITH THE FORTS.

THE VALLEY OF INKERMAN.

THE Valley of Inkerman commences at the inmost extremity of the harbour of Sebastopol, and the river Inkerman runs through it. The Valley, where the Sketch was taken, was not more than 700 yards wide; some of our cavalry, having gone down to a farm-house, where there were some stacks of hay (which, by-the-by, is getting scarce), were suddenly fired upon by four field-guns, which the Russian Cossack Artillery had left masked behind the walls of the ruins. Fortunately, our men had taken most of the hay before the guns commenced firing; so they got off with a good share of the spoil before the Russians could do them any damage. The date of this affair was the 7th. After I had made this Sketch I went, with two other officers, on towards the cliff, on which are the two English sentries; and while there we observed a white flag held out of the door of the little house in the cliff opposite us, which is entered by a staircase from above, and immediately there came over us a shell from some battery, to which the white flag was a signal; they fired two or three more at us, and we thought it best to leave. Although there are sentries always close where we were, yet they did not fire on them—thinking, I suppose, that it was worth while risking a shot or two to bring down an officer.

NEW BOOKS, &c.

JUVENILE WORKS, PUBLISHED by Mr. HATCHARD:—
HARRY BRIGHTSIDE; or, the Young Traveller in Italy. By AUNT LOUISA. Fcap. 4s. 6d.
"A very popular boy's book, and we trust we'll exercise a beneficial influence upon the minds of all its young readers."—Bickerseth's Visitor.
"A book of instruction and amusement for young people; containing much information on the scenery, topography, works of art, and antiquities of Italy; written in a pleasing and familiar style, and in a spirit which commends the book to the use of juvenile readers."—Literary Gazette.

MISS CHARLOTTE ANLEY.
EARLSWOOD: a Tale for the Times. Second Thousand. Fcap., cloth, 7s. 6d.
"A pleasing and graphically-written tale, detailing the process by which persons of piety are sometimes perverted to Romish error."—Eclectic Review.
"This tale is singularly well conceived."—Evangelical Magazine.
"We can recommend it with confidence."—Christian Times.
INFLUENCE. A Story Tale for Young People. Fourth Edition. Fcap, cloth, 5s.
MIRIAM; or, The Flower of Truth. A Jewish Tale. Ninth Edition. Fcap., cloth, 6s.

THE LATE MRS. SHERWOOD.
The GOLDEN GARLAND of INESTIMABLE DELIGHTS. 12mo, cloth 6s.
"It well maintains the reputation of the Author."—Spectator.
The MIRROR of MAIDENS in the DAYS of QUEEN BESS. 12mo, cloth, 6s.
The HISTORY of JOHN MARTEN. A Sequel to "The Life of Henry Milner." 12mo, cloth, 7s. 6d
The HISTORY of HENRY MILNER. Three Volumes 12mo, cloth, each 6s.
The HISTORY of the FAIRCHILD FAMILY; or, The Child's Manual. Fifteenth Edition. Three Vols., 12mo, cloth, each 6s.
JULIETTA DI LAVENZA. A Tale. 18mo, cloth, 3s.
The HEDGE of THORNS. Fifth Edition. 18mo, cloth, 1s.
VICTORIA. 18mo, boards, 4s.

MISS ANN FRASER TYTLER.
LEILA IN ENGLAND. A Continuation of "Leila, or the Island." Fourth Edition. 12mo, price 6s., cloth.
LEILA at HOME. A Continuation of "Leila in England." Third Edition. fcap. 7vo, cloth, 6s.
"Leila at Home, in continuation of 'Leila in England,' is written in the same pleasant style, and conveys similar lessons of a sound and instructive and religious tendency."—Literary Gazette
LEILA; or, The Island. Sixth Edition, price 5s. cloth
MARY and FLORENCE; or, Grave and Gay. Ninth Edition, price 5s., cloth.
MARY and FLORENCE, at SIXTEEN. Fifth Edition, price 5s., cloth.
"These works are excellent. Miss Tytler's writings are especially valuable for their religious spirit. She has taken a just post for between the rationalism of the last generation and the puritanism of the present, while the perfect manner and pure style in which she addresses her juvenile life, show power which might be more ambitiously displayed, but cannot be better bestowed."—Quarterly Review.

MISS MARGARET FRASER TYTLER.
The WOODEN WALLS OF OLD ENGLAND; or, Lives of Celebrated Admirals.
LIVES of the GREAT and the BRAVE. Containing Memoirs of Wallace, Bruce, the Black Prince, Joan of Arc, Richard Coeur de Lion, Prince Charles Edward Stuart, and Napoleon Bonaparte. Fcap., cloth, price 5s.

MISS ANN THOMSON GRAY.
The TWIN PUPILS; or, Education at Home. A Tale addressed to the Young. Fcap., cloth, 7s. 6d.
"The story is well planned, well varied, and well written."—Spectator.
"More sound principles and useful practical remarks, we have not lately met in any work on the much-trodden subject of education. The book is written with liveliness as well as good sense."—Literary Gazette.
A volume of excellent tendency, which may be put with safety and advantage into the hands of well-educated young people."—Evangelical Magazine.

REV T. GOODWIN HATCHARD.
In Ornamental Cover, printed in gold or silver, price 1s.,

FUTVOYE'S GOLD and SILVER WATCHES, of English and Foreign Manufacture.—The long-tested qualities of these articles are of themselves sufficient to ensure the approbation of a discerning public. Retail, 154, Regent-street, Corner of Beak-street.

FUTVOYE'S DRESSING-CASES FOR LADIES and GENTLEMEN, in Leather, Wood, and other styles suitable for a Wedding Present, &c. Her MAJESTY'S DESPATCH BOXES are so fitted as never to require comment.—Retail, 154, Regent-street, Corner of Beak-street.

FUTVOYE'S PAPIER MACHE.—The superior qualities of these articles need only be seen to be fully appreciated, arising from the well-known fact (among the Aristocracy and Nobility) that Mr. Futvoye is the son of the original inventor of this beautiful work, whose name is a household word throughout her Most Gracious Majesty.—Retail, 154, Regent-street, Corner of Beak-street.

FUTVOYE'S FRENCH TIMEPIECES.—The statistical account presented by the Emperor to the House of Commons, proves that Messrs. Futvoye are by far the largest importers. 300 of the most elegant Clocks, in Ormolu, Porcelain, with Glass Shade and Stand complete, from Two to One Hundred Guineas, may be inspected at 154, Regent-street, Corner of Beak-street.

FUTVOYE'S PARISIAN NOVELTIES, Toujours Nouveaux, from 1s. to 100 Guineas, may be more easily imagined than described. Retail, 154, Regent-street, Corner of Beak-street. Wholesale and Export Warehouses, 23 and 26, Ryder-street, Golden-square, City, 23, Great Winchester-street. Paris, 24, Rue de Rivoli.

FUTVOYE'S WEDDING and BIRTHDAY PRESENTS.—It would be impossible to enumerate the enormous variety of articles, both valuable and inexpensive, which may be inspected daily at this establishment. All goods marked in plain figures. Illustrated Catalogues sent on application. It may be well to state that visitors to this magnificent establishment will meet with a polite reception, whether purchasers or otherwise.—Retail, 154, Regent-street, Corner of Beak-street.

TESTIMONIALS by PRESENTATION having become so much the custom, and in consequence of Messrs. FUTVOYE having been fruitfully applied to for suitable articles, they would beg to state to all those who would pay such graceful tributes to merit, that in all cases where it is clearly shown goods are required for such a purpose, and the amounts exceed £20, they shall have one or more from their regular marked prices.—Illustrated Catalogues sent free on application.—154, Regent-street.

JONES'S £4 4s. SILVER LEVER WATCHES, and £6 10s. GOLD LEVERS, at the Manufactory, 338, Strand, opposite Somerset House, are warranted not to vary more than half a minute per week. On receipt of a Post-office Order, payable to JOHN JONES, one of the above will be sent free. Jones's Sketch of Watchworks, free, for 2d.

BANK NOTES.—The full value given in cash for DIAMONDS, PEARLS, OLD GOLD and SILVER, GOLD and SILVER LACE, and all ENGLISH and FOREIGN COINS, at SELIM DEAN, and CO.'S, 9, Coventry-street, Leicester-square (Irish, Scotch, and Foreign Notes exchanged). N.B. A large assortment of Jewellery, Plate, and Watches to be sold at very reduced prices. Gold Watches, £4 15s.; Silver Ditto, £3 15s.; warranted.

KARL'S ARGENTINE SILVER PLATE.—17 and 18, Cornhill. This beautiful metal continues to stand unrivalled amongst all the substitutes for Silver. Its intrinsic worthiness, combined with its brilliant appearance defies all competition. It is upwards of thirteen years since this manufacture was introduced by Karl Lund and Son, and it has, notwithstanding the many spurious and unprincipled imitations, the confidence and extends a fair former possession; thus giving a convincing proof of its having answered the end proposed, which is to produce an article combining the durability and appearance of solid silver at one sixth its cost. The magnificent stock has recently been enriched with many splendid novelties in dinner, tea, and breakfast services, and never possessed so many attractions as at the present time. The Spoons and Forks remain most identical at the various patterns that are made in solid silver. A new and enlarged Pamphlet of Sketches and prices is just published and now ready for circulation. It may be obtained gratis by applying at the manufactories.—Karl and Son, 17 and 18, Cornhill. Observe.—The public are hereby cautioned that no article is genuine, except purchased at Karl and Sons'. No other parties are authorized to sell it.

PLATE.—A. B. SAVORY and SONS, 9, Cornhill, London.—The best WROUGHT SILVER SPOONS and FORKS, Double Thread Pattern, 7s. 6d. per ounce, Queen's Pattern, 7s. 6d. per ounce. The following are the weights recommended, but the articles may be had lighter or heavier, at the same price per ounce.

A Pamphlet, illustrated by wood engravings, and containing the weights and prices of the various articles required in family use, may be had on application, or will be sent, post free, to any part of the British Dominions.—A. B. SAVORY and SONS, Manufacturing Silversmiths, 9, Cornhill, London, opposite the Bank.

BY HER MAJESTY'S ROYAL LETTERS PATENT. Messrs. S. and B. SOLOMON, Opticians, 22, Aldermanbury-post, Piccadilly, Corner of Sackville-street (Opposite the York House), by valuable and extraordinary improvements in the most powerful, and brilliant LENS FOR CAMP, PROSPECTIVE, HALF OPERA, and OPERA GLASSES, to know the distance of any sea vessel through them—of great value to the Army, Navy, and others; they are fixed with Match German Glass. These Telescopes possess such extraordinary powers that scarcely credible, with no extra expense will show Saturn's Ring, Jupiter's Moons, Venus's Horns and Mountains of the Moon, with the same to recognise the bay even a person's countenance 10 miles distant, and perfect at 40 to 50 miles, for the waistcoat pocket, and are of large, and all sizes, with increasing power according to the Royal Letters Patent, viz., Portable, navy sextant, very small, powerful, watch-case pocket glass—the size of a watch—by which a person can be seen and knows a man and a hat distant. They answer every purpose—in the race course, at the opera house, sporting country, and as they are clearly seen at 10 to 14 miles. They are invaluable for shooting, deer-stalking, yachting—to ascertain, gentlemen, gamekeepers, and tourists. Also, the new Opera-course, and prospective glasses with wonderful powers, an object can be clearly seen from 14 to 20 m es distant have also been constructed upon the same of the greatest transparent power. The great advantage they have from the invention is, that views becoming impaired is preserved and strengthened; and very aged persons are enabled to employ their eyesight at the most pleasing occupations—can see with these lenses of a much less magnitude than any other, and they do not require the frequent changes to the dangerous effects of further powerful assistance.

DEAFNESS, NEW DISCOVERY.—The ORGANIC VIBRATOR, an extraordinary powerful, small, invisible, self-adjusting Instrument, for deafness, entirely different from all others, to surpass anything of the kind that has been, or probable ever can be, produced. Being of the same colour as the skin, it is not perceptible, it enables deaf persons to hear distinctly at church and all public assemblies; the most unpleasant sensation of singing noises in the ears is entirely removed; and it affords all the assistance that could possibly be desired.—29, Albemarle-street, Piccadilly. Observe, opposite the York Hotel.

CAUTION.—For above thirty years B. MORDAN and CO. have been compelled to caution the public against increase in the various imitations of their EXTRA POINTED PENCIL-CASES.

The celebrity which this article obtained when the testers patent were first granted has steadily and extensively increased, and the exertion of the Patentees have been directed to satisfy that confidence.

In no one of the very numerous of good reputation, the result has been that numerous metal cases have been produced, and the vendors enabled, by the sale of inferior goods, to realize a larger amount of profit.

Under these circumstances, B. Mordan and Co are induced to mention this notification, and to request the public, when desirous of purchasing the genuine article, to observe that they only guarantee those on which the words "B. Mordan and Co." are stamped.

As a test to the Public, that these cases are sound workmanship, each of B. Mordan and Co.'s goods, so difficult to be experienced in carrying this recommendation into effect.

Perhaps the above cannot be more strictly necessary than Cumberland Lead Pencils are proverbial for refilling the pencil-cases. Those these have been most extensively pirated in the same size of the pencil part, they will "could strictly confine."

Each box of the genuine lead pencils is stamped "Warranted B. Mordan and Co."

CEDAR PENCILS made from the Cumberland Lead, purified by Mr. Brockedon's Patent Process. B. Mordan and Co have always been aware that such process would prove a very great advantage to be obtained from the Black Lead from the Borrodale Mines. In consequence of the Limited Company having disposed of the whole of their stock of raw lead to the purchasers, B. Mordan and Co are now in the position to offer to the public pencils of the same quality as those which heretofore they have been compelled to use. The highest testimonials have been addressed to them from the following eminent artists, professors, and others, whose testimonies have been published in detail. To the following names we could

Clarkson Stanfield, Esq., R.A.	Conway Fielding, Esq., F.W.S.
C. L. Eastlake, Esq., P.R.A.	W. Wyon, Esq., R.A.
J. E. Millais, Esq., P.R.B.	Henry Richards, Esq., R.A.
Chas. Cowden Clarke, Esq., F.S.A.	J. L. Williams, Esq., A.R.A.
C. W. Cope, Esq., R.A., F.R.S.	H. O. Wilson, Esq., Director, Go
S. Prout, Esq., F.S.A.	vernment School of Design.
Philip Hardwick, Esq., R.A.	

Each Pencil stamped "Warranted Pure Cumberland Lead. B. Mordan and Co., London."

ESTABLISHED IN 1841.—By Appointment, The LONDON GENERAL MOURNING WAREHOUSE, Nos. 247, 249, and 251, Regent-street.

The Proprietors of this Establishment desire may be permitted to submit that, from their having been so many years engaged in the exclusive

SALE of MOURNING ATTIRE, and from the immense business transacted in their warehouse, as from the numerous commands they receive to attend in various parts of the country, they are enabled to sell their goods on more reasonable terms

Messrs. JAY have never deemed it unnecessary to quote prices, from a conviction that it only tends to mislead the purchaser, but they wish to offer the following assurance that no article may be purchased at their establishment will possess the value that is paid for it; and that, in addition to their

COURT, FAMILY, and COMPLIMENTARY MOURNING, they have every variety of quality and price, and suited to any grade or condition of the community.

Widows' and Family Mourning is always kept made up; also, Millinery, &c., &c.

CARPETS, CURTAINS, CABINET, and UPHOLSTERY FURNITURE, Purified Bedding, &c.; may be obtained in profuse variety, and for prices defying competition, at HOWITT and COMPANY'S Galleries and Warerooms, 295, 297, 299, 299, High Holborn.

AXMINSTER CARPETS.—LAPWORTH and CO. Manufacturers to the Queen and Royal Family, having become Proprietors of the Axminster Carpet Manufactory in consequence of the Proprietor's retirement, are enabled to execute orders for this beautiful fabric with the most elaborate designs and in beautiful and artistically worked.—Factory, Wilton, near Salisbury; Warehouse, 23, Old Bond-street.

NEW SEASON'S TEAS.—Finest New Season's Congou, just imported in the "Architect," 4s. per lb. Sir Robert Peel Souchong, 4s. per lb. Hall's Tea and Grocery Warehouse, 5, Clifton-road, Maida Vale.

DOMESTIC ECONOMY.—H. SPARROW and CO. beg to announce that, in consequence of the late reduction of Duty, and the greatly increased sale of the Tea-Caterer they are enabled to offer

Good Breakfast Congou at 2s. 8d., 3s. 4d., and 3s. 8d. per lb.
Fine ditto ... 3s. 6d., 3s. 8d., and 4s.
Strong ditto ... 4s., 4s. 4d., 4s. 8d., and 5s.
Gunpowder, 3s. 8d., 4s. 4d., 4s. 8d., and 5s.
Fresh roasted Coffee, 1s. 4d., 1s. 6d., and 1s. 8d.

With every other article in the Trade proportionately Cheap, and of that Sterling Quality for which they have been celebrated for the last Twenty Years. Price-lists of any may be sent by application, post-free, and parcels of 40 value and upwards, carriage paid, to any station in the Kingdom.—Observe, 8, Gracechurch-street, and 69, Wimbledon-street, Manchester.

COALS, Best Quality.—JUDKINS and CO. —Best SILVERDALE COALS, screened, at the lowest cash prices.—Address, Strand (known by the Office of the new Paper being at the corner).

NO CHIMNEY is WANTED for C. MORTON'S PATENT CALOMERIZE GAS STOVES in Halls, Shops, and Offices, where economy, cleanliness, and close application can be attached to convey away the burnt air.—Manufactory, 142a-street, Strand, opposite Charing-cross Hospital.

10,000 STOVES.—The Tenth Thousand Stove, Just Completed, is now on sale. These stoves so justly celebrated for preserving a pure and healthy temperature, and for their extraordinary economy in the consumption of fuel, are now in universal use throughout the Kingdom, by HARRIS, DEAN, and Co., 45, King William-street, London-bridge, and may be obtained of all ironmongers. N.B. Harris and Dean's Improved Venetian Stove, which is strongly recommended, may be seen at 45, King William-street, London-bridge, and, post-paid, for 1s.

SOMETHING NEW.—ALBANY CHAMBER LAMPS, with Patent Elastic Glass-holder from 4s. to 8. The application of an Elastic Glass-holder to Lamps for family use, is one of the most valuable and useful improvements for many a pure and delicate article—all, which form a light and beautiful shade, and are of the most popular shape, form and adjustable, is of general use in the nice Chamber and Ante-lobby with the Patent Battery, a an admirable Stand for infants and children.

Prepared only by the patentees, ROBINSON, BELVILLE, and CO., Platemakers to the Queen, 64, Red-lion-street, Holborn, London.

The Proprietors of Robinson's Patent Barley and Patent Groats, are desirous that public shall at no time purchase these articles of them as spurious imitations, especially since the public that every package is accompanied by the patent lithographic wrapper, bearing the name and address of the Proprietors.

ROBINSON'S PATENT GROATS, for more than thirty years have been held in constant and increasing public estimation as the purest farinas of the oat, and as the best and most wholesome preparation for making a pure and delicate gruel, which forms a light and nourishing supper for the aged and infirm, a popular food for young and infirmess, is of general use in the sick Chamber and Ante-lobby with the Patent Battery, a an admirable Stand for infants and children.

Prepared only by the patentees, ROBINSON, BELVILLE, and CO., Platemakers to the Queen, 64, Red-lion-street, Holborn, London.

The Proprietors of Robinson's Patent Barley and Patent Groats, are desirous that public shall at no time purchase these articles of them as spurious imitations, especially since the public that every package is accompanied by the patent lithographic wrapper, bearing the name and address of the Proprietors.

VIEWS IN THE CRIMEA.

EUPATORIA.—THE HARBOUR.

EUPATORIA,

One of the points at which the Allied Expedition landed on the 13th of September, lies on a spit of sand, and for a long time it was imagined that it was defended by heavy works, for the solid stone houses close by the sea-coast were so increased by refraction and lifted up so high, that they looked like forts. Towards the south are innumerable windmills; and several bathing-boxes, gaily painted, along the beach give an air of civilisation to the place. The chapel is a conspicuous object, and boasts a large dome; and two churches rise amid the red-tiled and stuccoed houses, and the minarets of two mosques are seen. Eupatoria covers a large expanse of ground. The country appears generally bare, possessing few trees; but plenty of horned cattle and sheep are upon its surface. Previous to the landing, the inhabitants of Eupatoria were seen consulting together in small groups about the town, and a great number of them were collected in front of a Government-looking building with a red roof and white columns.

THE RIVER ALMA.

The Alma is a tortuous little stream, which has worked its way down through a red clay soil, deepening its course as it proceeds seawards, and which drains the steppe-like lands on its right bank making at times pools and eddies too deep to be forded, though it can generally be crossed by wading who do not fear to wet their knees.

Along the right or north bank of the Alma are a number of Tartar houses, at times numerous and close enough to form a cluster of habitations deserving the name of a hamlet; at times scattered wide apart amid little vineyards, surrounded by walls of mud and stone of three feet in height. The bridge over which the post road passes from Boulganak to Sebastopol runs close to one of these hamlets—a village, in fact, of some fifty houses. This village is approached from the north by a road winding through a plain nearly level till it comes near to the village, where the ground dips, so that at the distance of 300 yards a man on horseback can hardly see the tops of the nearer and more elevated houses, and can only ascertain the position of the stream by the willows and verdure along its banks. At the left or south side of the Alma the ground assumes a very different character—smooth where the bank is deep, and gently elevated where the shelve of the bank occurs, it recedes for a few yards at a moderate height above the stream, pierced here and there by the course of the winter's torrents, so as to form small ravines—commanded, however, by the heights above. A remarkable ridge of mountain, varying in height from 500 to 700 feet, runs along the course of the Alma, on the left and south side, with the course of the stream, and assuming the form of cliffs when close to the sea.

BANKS OF THE ALMA.

THE ILLUSTRATED LONDON NEWS

No. 713.—VOL. XXV.] SATURDAY, NOVEMBER 18, 1854. [WITH A SUPPLEMENT, SIXPENCE.

THE BATTLE OF BALACLAVA.

THE Despatches of Lord Raglan and of General Canrobert give an intelligible history of the memorable days of the 25th and 26th October, when the Russians were defeated in their attempts to raise the siege of Sebastopol. The report of Prince Menschikoff to the Czar—corroborated, as it appeared to be, by the vague hints and half-statements of the Electric Telegraph—threw a gloom over London and Paris during a portion of last week, especially in the sensitive regions of the Money-market and the Bourse. But the publication of the Official Despatches dispelled the momentary alarm. If uneasiness still subsist with reference to the progress of the War, and to the heavy cost we have paid, and must yet pay for our victory, the uneasiness is natural. The lives that are at stake are too many and too noble to permit England to look with indifference at the possibility of their sacrifice. But, whatever may be the amount of anxiety which is felt, it is not complicated by any doubts of the military skill and courage of our Commanders, or of the undaunted "pluck" and the chivalric bravery of our soldiers. It is scarcely enough to say that our heroes in the Crimea—for heroes they are, if heroism ever existed in this world—will do all that men can do to maintain the honour of their country. They have already done more than could have been expected even of British and French manhood; and have thrown into the shade in the sober and scientific nineteenth century—the mythic deeds of the warriors of antiquity. Let no idle tongue allege for the future that the highest stages of civilisation impair the manly virtues; and that the aristocracy of Great Britain is effete, or its democracy ignoble. The great memories of Alma and Balaclava give the lie to the assertion, and make every true heart in these islands throb with pride to reflect that the men who gained such victories are its countrymen.

We refer elsewhere to the events of the 5th of November, and of our dearly purchased triumph of that day, and confine ourselves at present to the consecutive story told by Lord Raglan, Sir Colin Campbell, Lord Lucan, and General Canrobert; and to the ampler details communicated by our own Special Correspondents, and those of our daily contemporaries, at Balaclava. And, first of all, while rendering full justice to the modest terseness of the Allied Generals, let us say a word for the brave men who transmit information to the London journals, who gather it at the cannon's mouth, and amid dangers and difficulties of no common kind. The perils and hardships which they undergo are almost, if not quite, equal to those of the soldier; but have not the glory of the soldier to reward them. Though undertaken at the call of private enterprise, it is but due to these gentlemen to assert that their duties are performed with as much conscientiousness as if they were public trusts. They may sometimes err, in their judgment of individuals at home and in the camp; but, on the whole, their impartiality is admirable, their patriotism unquestionable, and their services, in keeping up the enthusiasm of the public at home, and making the war, in every sense, a popular and a national one, are of a kind that it is impossible to estimate too highly.

It is needless to attempt to epitomise the narrative, which we owe to their pens, and to those of the more important men whose business it is to act history—and not to write it. In every house, and every place of public resort within our realms, as well as in our sympathising Colonies, and among our brothers in blood and language in the United States, they will be read with the most eager and admiring interest. Wherever Russia has a foe they will be perused with avidity. Wherever Freedom has a friend, their details will excite both gratitude and hope. We shall merely allude to one or two points, which throw light upon our necessarily incomplete summary of last week, and which have since that time transpired to enlist the applause, or to excite the regret—perhaps the blame—of the nation. In the first place, the Official Despatches confirm the intelligence conveyed to us last week by the Electric Telegraph, that victory was on the side of the Allies, and that they gallantly repulsed an attempt, on the 25th ult., which, if it had been successful, would have saved Sebastopol, and inflicted loss of credit, if not ruin, upon our arms. They also confirm the statement that, on the 26th, a similar attempt was defeated, with little loss to our arms, and with great loss and discomfiture to the foe. When the raw and undisciplined levies of the Turks gave way, under the impetuous charge of the Russians, and the for-

THE LIGHT CAVALRY CHARGE AT BALACLAVA.—(SEE NEXT PAGE.)

tunes of the campaign depended upon the bravery of a few British regiments, those regiments, with a solidity which excited the wonder and applause of the French, and with a daring which approached the sublime, were true to their duty, and not only retrieved the losses of the day, but inflicted heavy damage on the enemy. The pithy despatch of Sir Colin Campbell shows in true military style how the deed was done, and of what first-rate material—physical and moral—the armies of Great Britain are composed. The achievements of the following day were equally great, when Sir de Lacy Evans defeated a force of Russians thrice, if not four times, his superiors in numbers—killing and wounding six hundred, while his own losses did not exceed eighty.

The country would have abundant reason to be satisfied and grateful, if these and such ordinary casualties of fair and open warfare were all that it had to deplore in these brilliant battles. To have defeated General Liprandi in an attempt which would have been ruinous to our arms if it had succeeded, no unavoidable sacrifice would have been too great. But, either from an improperly or vaguely-worded order sent to the Earl of Lucan by the Commander-in-Chief, or from a misconception on the part of the gallant Earl of the terms of a message which may have been perfectly well considered, the most grievous loss the nation has yet suffered befell the Light Cavalry Division. We cannot say which of the two suppositions is correct, and will not trust ourselves with the expression of an opinion. Lord Raglan does not state by whom the order was sent; and Lord Lucan does not say from whom he received it, or whether the message were a verbal or a written one. It seems to be agreed, however, that the bearer of the order was Captain Nolan—a gallant and daring cavalry officer, proud of his own branch of the service, and filled with the most exalted notions of the services it could render. It is also stated that he, in common with other cavalry officers, longed for an opportunity to make a dash at the enemy, and gain some portion of renown, which it appeared to him that the infantry regiments were monopolising. However that may be, the order which he conveyed was held by Lord Lucan to be imperative, and as admitting of no discretion in its interpretation. The Earl of Cardigan was charged with its execution, and did his duty like a Paladin, dashing on at the head of the Light Cavalry, amounting to little more than six hundred men, against the whole force of the Russian army, to repossess themselves of some captured guns. The deed was one of such unparalleled daring, that the very Russians held their breath in astonishment. Lord Raglan himself, and General Canrobert, when they saw the gallant band riding to certain destruction, with a coolness and order equal to that which they would have exhibited at a review, confessed, when too late, what a noble, and what a useless sacrifice of life had been consummated. Among the first of those who fell was Captain Nolan. Every spectator of the scene admits that it was impossible the attack could succeed. For a time it threw the ranks of the Russians into confusion; but, assailed in front, and by a murderous cross fire, and threatened also in the rear, the noble survivors were compelled to retrace their steps. Thus the British Light Cavalry was all but annihilated.

The subject will no doubt be widely discussed; and the blame, if blame there be, will fall in due time on the proper shoulders. But we, on our parts, shall do nothing to exasperate the controversy that is already raging. We shall but record the general sentiment of admiration at the gallantry of the act; and of regret that the lives of such magnificent soldiers were not spared for deeds less barren; and for glory, not greater in itself, but of greater service to their country.

We regret to observe a disposition, in some portion of the press and the public, to be continually "croaking," and predicting evil. Some critics of the war persist in shutting their eyes to the enormous efforts which have been made to carry it on in a manner befitting a great people; while others expect men in command to defy time and space, and to work impossibilities. We have, on the contrary, felt and expressed confidence both in the Government and in the Generals and Admirals in command; and, most of all, in the cool, steady courage of both the military and the naval branches of the service. That confidence we shall continue to express. We see no ground, as some do, for discouragement, but every reason to rely on the hope that victory will speedily crown the efforts of our armies. Though comparatively small in numbers, and decimated by disease, their only wish was to be led against the foe. No one can allege any short-coming on their part. All they have done has been well done. The landing at Kalamita, the storming of the heights of Alma, the flank march to Balaclava, the tedious but indispensable siege operations before Sebastopol, the repulse of General Liprandi on two consecutive days, and of Menschikoff and Liprandi combined at a later period;—all these achievements have been of a nature to inspire not only admiration, but thorough confidence. Let us hope that the large reinforcements which are on their way will arrive in time to be available for a crowning effort, and that no evil consequences have resulted from their tardiness.

THE CHARGE OF THE LIGHT CAVALRY BRIGADE.

At ten o'clock the Guards and Highlanders of the First Division were seen moving towards the plains from their camp. The Duke of Cambridge came up to Lord Raglan for orders, and his Lordship, ready to give the honour of the day to Sir Colin Campbell, who commands at Balaclava, told his Royal Highness to place himself under the direction of the Brigadier. At forty minutes past ten the Fourth Division also took up their position in advance of Balaclava. The cavalry were then on the left front of our position, facing the enemy; the Light Cavalry Brigade was on the left flank forward; the Heavy Cavalry Brigade *en echelon* in reserve, with guns on the right; the 4th Dragoons and 5th Dragoons and Greys on the left of the brigade, the Enniskillings and 3rd Dragoons on the right. The Fourth Division took up ground in the centre; the Guards and Highlanders filed off towards the extreme right, and faced the redoubts, from which the Russians opened on them with such guns as had not been spiked.

As the Russian cavalry retired, their infantry fell back towards the head of the valley, leaving men in three of the redoubts they had taken, and abandoning the fourth. They had also placed some guns on the heights over their position, on the left of the gorge. Their cavalry joined the reserves, and drew up in six solid divisions, in an oblique line, across the entrance to the gorge. Six battalions of infantry were placed behind them, and about thirty guns were drawn up along their line, while masses of infantry were also collected on the hills behind the redoubts on our right. Our cavalry had moved up to the ridge across the valley on our left, as the ground was broken in front, and had halted in the order already mentioned. When Lord Lucan received the order from Captain Nolan, and had read it, he asked, "Where are we to advance to?" Captain Nolan pointed with his finger to the line of the Russians, and said, "There are the enemy, and there are the guns, before them; it is your duty to take them," or words to that effect, according to the statement made since his death. Lord Lucan, with reluctance, gave the order to Lord Cardigan to advance upon the guns, conceiving that his orders compelled him to do so. The noble Earl, though he did not shrink, also saw the fearful odds against him. Don Quixote in his 81st against the windmill was not near so rash and reckless as the gallant fellows who prepared without a thought to rush on almost certain death. It is a maxim of war that "cavalry never act without a support;" that "infantry should be close at hand when cavalry carry guns, as the effect is only instantaneous;" and that "it is necessary to have on the flank of a line of cavalry some squadrons in column, the attack on the flank being most dangerous." The only support our Light Cavalry had was the reserve of Heavy Cavalry at a great distance behind them, the infantry and guns being far in the rear. There were no squadrons in column at all; and there was a plain to charge over, before the enemy's guns were reached, of a mile and a half in length. At 11.10 our Light Cavalry Brigade rushed to the front. They numbered as follows, as well as can be ascertained:—

	Men.
4th Light Dragoons	118
8th Irish Hussars	104
11th Prince Albert's Hussars	110
13th Light Dragoons	130
17th Lancers	145
Total	607

The whole brigade scarcely made one effective regiment, according to the numbers of Continental armies; and yet it was more than we could spare. As they passed towards the front, the Russians opened on them from the guns in the redoubt on the right, with volleys of musketry and rifles. They swept proudly past, glittering in the morning sun in all the pride and splendour of war. We could scarcely believe the evidence of our senses.' Surely that handful of men are not going to charge an army in position? Alas! it was but too true—their desperate valour knew no bounds; and far indeed was it removed from its so-called better part—discretion. They advanced in two lines, quickening their pace as they closed towards the enemy. A more fearful spectacle was never witnessed than by those who, without the power to aid, beheld their heroic countrymen rushing to the arms of death. At the distance of 1200 yards the whole line of the enemy belched forth, from thirty iron mouths, a flood of smoke and flame, through which hissed the deadly balls. Their flight was marked by instant gaps in our ranks, by dead men and horses, by steeds flying wounded or riderless across the plain. The first line is broken—it is joined by the second—they never halt or check their speed an instant; with diminished ranks, thinned by those thirty guns, which the Russians had laid with the most deadly accuracy, with a halo of flashing steel above their heads, and with a cheer which was many a noble fellow's death-cry, they flew into the smoke of the batteries, but ere they were lost from view the plain was strewed with their bodies and with the carcases of horses. They were exposed to an oblique fire from the batteries on the hills on both sides, as well as to a direct fire of musketry. Through the clouds of smoke we could see their sabres flashing as they rode up to the guns and dashed between them, cutting down the gunners as they stood. We saw them riding through the guns, as I have said; to our delight we saw them returning, after breaking through a column of Russian infantry, and scattering them like chaff—when the flank fire of the battery on the hill swept them down, scattered and broken as they were. Wounded men and dismounted troopers flying towards us told the sad tale—demigods could not have done what we had failed to do. At the very moment when they were about to retreat, an enormous mass of Lancers was hurled on their flank. Colonel Shewell of the 8th Hussars, saw the danger, and rode his few men straight at them, cutting his way through with fearful loss. The other regiments turned and engaged in a desperate encounter. With courage too great almost for credence, they were breaking their way through the columns which enveloped them, when there took place an act of atrocity without parallel in the modern warfare of civilised nations. The Russian gunners, when the storm of cavalry passed, returned to their guns. They saw their own cavalry mingled with the troopers who had just ridden over them, and, to the eternal disgrace of the Russian name, the miscreants poured a murderous volley of grape and canister on the mass of struggling men and horses, mingling friend and foe in one common ruin. It was as much as our Heavy Cavalry Brigade could do to cover the retreat of the miserable remnants of that band of heroes as they returned to the place they had so lately quitted in all the pride of life. At 11.35 not a British soldier, except the dead and the dying, was left in front of these terrible Muscovite guns.

The following letter is from an officer of the Light Brigade, who took part in the splendid charge at Balaclava:—

We were ordered to charge some Russian batteries and cavalry, and the Light Brigade went down—the 17th and 13th leading in line; the 11th were ordered to hang a little back as a support, and the 4th and 8th followed, in a sort of third line. We all knew that the thing was desperate before we started, and it was even worse than we thought. In our front, about a mile and a half off, were several lines of Russian cavalry and nine guns—to get at which we had to pass along a wide valley, with the ground a little falling, and in itself favourable enough for a charge of cavalry; but the sloping hills on each side gave the enemy an opportunity (which they used) of placing guns on both our flanks as we advanced; and not only guns, but infantry with Minié rifles.

However, there was no hesitation. Down our fellows went at the gallop—through a fire in front and on both flanks, which emptied our saddles and knocked over our horses by scores. I do not think that one man finished in the whole brigade—though every one allows that no hot a fire was hardly ever seen. We went right on, cut down the gunners at their guns (the Russians worked the guns till we were within ten yards of them)—went on still, broke a line of cavalry in rear of the guns, and drove it back on the third line. But here our bolt was shot; the Russians formed four deep, and our thin and broken ranks, and blown horses, could not attempt to break through them, particularly as the Russian cavalry had got round our flanks, and were prepared to charge our rear (with fresh men). We broke back through them, however, and then had to run the gauntlet through the cross fire of artillery and Minié rifles back to our own lines, with their cavalry hanging on our flank. The Heavy Brigade, which had made a good charge of its own in the morning, covered our coming out of action, and lost some men from the Artillery.

There is no concealing the thing: the Light Brigade was greatly damaged, and for nothing; for, though we killed the gunners and the horses of nine 12-pounders, we could not bring them away. Nolan (who brought the order) is dead. The first shell that burst hit him in the breast. He gave a loud cry, his horse turned, trotted back (with him still in the saddle) between the first and second squadrons of the 13th, and carried him so for some way, when he fell dead. He was hit in the heart.

RUSSIAN SOLDIERS.—I had seen something of a Russian army in 1793; but I found that even six years had made a surprising difference—at least in the appearance of their soldiers. Those who had served with us in Holland, were exactly the stiff, hard, wooden machines which we have reason to figure to ourselves as the Russians of the Seven Years' War. Their dress and equipments seemed to have rejected uniformity; they waddled slowly forward to the tap-tap of their monotonous drums; and if they were beaten, they waddled slowly back again, without appearing in either case to feel a sense of danger, or the expediency of using the ultra tap-tap steps to better their condition. But I must do their troops, in 1855, the justice to say that, in appearance, at least, and in movements at a review, they have made a surprising progress; they were now well armed and equipped, and had very much the outward character of good German soldiers. They were regular and firm in their movements, but they were still slow; and their regimental officers appeared to be very deficient in intelligence and activity. Even some of their Major-Generals were little better than semi-barbarian ignorant, sensual, selfish, and perhaps venal. The Montenegrins whom they brought with them, for the eventual benefit of Italy in case of an active campaign, were the wildest of the mountain robber tribes of their country. They had never seen, it was the noiseless creeping of a cat in search of prey: their long steps gave forth no sound; their eyes, though lighted by no passion, were incessantly moving, and marking all things before and behind, and on every side. A sort of coarse shirt, belted round their waist, with a capote of the skins of sheep or goats, formed their dress; and a long gun and a stout knife their arms. These are the little harm to the French, but they would have been deadly protectors to the Italians. In most respects I believe that the Russian infantry is now-a-days but little different from those who came to Naples in 1805; and, brave as the soldiery may be, I cannot regard their armies as very formidable out of their own country, or in a protracted campaign. Their hospitals and commissariat were and are deplorably bad; they are always in want of money, nor ever have they credit. Without the means of raising money, and without good hospitals and an effective commissariat, a great army cannot long keep the field.—*Sir Henry Bunbury's Reminiscences.*

The Austrian Minister of the Interior has just submitted to the Imperial sanction a new plan for the organisation of a national guard for the whole Empire.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(*From our own Correspondent.*)

PARIS, Thursday.

Still the same anxiety and the same impatience respecting the progress of the Allied armies continue to act on the minds of all, and to engross all interests. The Emperor, though doubting nothing of the result, is deeply affected by the loss of life, and the delays and hardships that the troops have undergone and are still suffering. At a recent semi-official dinner, at St. Cloud (none but these or intimate ones are given), the Empress appeared in a black dress, fitting tight up to the throat, and wholly destitute of jewels or ornaments. On being questioned if she were indisposed, the Emperor, who overheard the query, replied that "The Empress did well to put on mourning for the loss of so many brave subjects." The example of the Court is generally followed, and as yet no *Mi-carêmes*, and hardly any private houses, are opened for other than merely friendly receptions. An immense number of our compatriots are, however, daily arriving; and only the final intelligence of the success of our united arms is wanted to give the signal for a series of entertainments, public and private.

A most painful sensation has been produced in the higher ranks of society here, by the death of the son of the widowed Comtesse de la Bourdonnaye—*an aspirant de Marine*—killed before Sebastopol. The family of La Bourdonnaye—long known for its Legitimist principles—ranks high among the old nobility of France.

A melancholy accident has thrown one of the wealthiest families of the Chasse d'Antin into the deepest affliction. At a shooting-party in the Forest of Vierzon, M. Lupin, *fils*, received in his chest the contents of a gun which one of his cousins accidentally discharged. The shot, which entered just below the heart, and came out at the loins, was supposed at first not to be mortal; but, notwithstanding all the efforts of the surgeons called in to attend the sufferer, death ensued the following day.

The Emperor, learning the difficulty experienced by the troops in procuring not only the luxuries, but the necessaries of life, before Sebastopol, has despatched a supply of wine for two months, the expense to be defrayed from his private purse.

Active preparations are going on at Lyons for the establishment of the new camp on the Plain of Sathonay, near the town. This corps, to be commanded by General Castellane, is to receive at least 6000 men, in addition to the troops already stationed at Lyons; and it is supposed, will later, contain as many as 24,000. As a better protection from the rigours of winter, the men, instead of being lodged in tents, will have wooden barracks constructed for their accommodation.

An apparently trifling, but yet significant, incident, has been remarked by our armies at Sebastopol—namely, the constant arrival, within a few days, of numbers of dogs from the town, driven out by want of food and water.

The reception of M. Dupanloup, Bishop of Orleans, at the Academy, and his speech on the occasion, have excited unusual interest here. The new member was assisted on the occasion by MM. Montalembert, Molé, and de Fallour. After an interview at St. Cloud, where, according to custom, the new Academician was received with certain marks of ceremony, M. Dupanloup has proceeded to Rome, where he proposes passing a portion of the winter. The Archbishops of Paris, Lyons, Besançon, Rheims, and Avignon, and the Bishops of Arras, Blois, Grenoble, Mons, Marseilles, Montauban, and St. Flour, have already started, or propose starting, for the same destination, to be present at the *Concile* about to be held on the subject of the Immaculate Conception of the Virgin.

Prince Jerôme, who has some time since returned from the Eaux-Bonnes, whither his health had compelled him to retire for a part of the season, has put the finishing touches to a grand opera, in four acts, which is intended for the Académie Impériale. The work is about to be put in rehearsal, and will before very long be produced.

The direction of the Opera has definitively fallen on M. Crosnier, who so successfully managed the Porte St. Martin, in 1830; and later, gave no less satisfaction in his direction of the Opéra Comique. M. Crosnier is also President of the General Council and Deputy of Cher, and, it is said, intends still to retain his Legislative functions.

We have to signalise an invention, the importance of which it is really difficult fully to estimate to the musical world. This is the discovery of a tuning instrument for the piano, which combines every element of success. It is perfectly simple, certain, and rapid in its action; is equally efficacious for a piano wholly out of tune, or for one where there is but a single false note; and can be used by every amateur. The inventor—M. Delsarte, whose talents as an instructor of singing have already given him a European reputation—has just taken out a patent for his invention in England; and we cannot too strongly recommend to our readers' attention this very remarkable and interesting discovery.

On Thursday last a heavy snow-storm gave the first positive indication we have yet had of the arrival of winter. The flakes—which were large, and continued falling for some hours without intermission—did not, however, lie long; and a return of damp and milder weather seems to have again deferred its setting in.

AMERICA.

The mail-steamer *Africa* arrived at Liverpool on Sunday afternoon, with advices from New York to the 1st November; and, by telegraph, from New Orleans to the 31st October.

By the arrival of the British brig *Margaret*, at Boston, from St. John's Newfoundland, with advices to the 20th October, we learn that all the vessels sent in search of the steamer *Arctic's* boats had returned, bringing no tidings whatever.

A Washington correspondent of the *New York Tribune* states that the British Government has agreed to abandon all claims of sovereignty over the so-called Mosquito kingdom. At the same time the *bona fide* claims of British subjects will be enforced under any governmental organisation that may arise.

An order has been issued by the Governor-General of Canada, stating that, during the settlement of details of the Reciprocity Treaty, goods may be imported without payment of duty into the British provinces from the United States, on giving guarantees bonds for the nominal amount of duty. The Ministry of New Brunswick had been defeated; but it is thought, will not resign.

At Cleveland, Ohio, a fire, on 28th ult., destroyed property to the value of a million of dollars.

An Abolition riot had occurred at Worcester, Mass., on its being discovered that Mr. A. O. Batman, who had been very active on the occasion of the arrest of Sims and Burns, fugitive slaves, was stopping at one of the hotels. An attempt of violence upon the person of Mr. Batman was made, but the courage of the mob vanished at the sight of his fire-arms. A warrant, on a charge of carrying concealed arms, was then got out against him. When he reached the railway depôt, a gang of negroes, who set upon him, pelted, kicked, and beat him unmercifully.

INDIA AND CHINA.

The arrival of the Overland Mail at Marseilles has been telegraphed, with the following dates:—Calcutta, Oct. 6; Shanghae, Sept 4; Hong-Kong, Sept. 27; Singapore, Oct. 7; Penang, Oct. 8; and Bombay, Oct. 14. India is tranquil. The harvests are fine.

Shanghae is still in the hands of the insurgents. Fighting is also still going on in the neighbourhood of Canton, and no tea has arrived there. The British, French, and American Plenipotentiaries were to proceed to a revision of the treaties with China. Nothing was doing in imports; the shipments of silk are diminished.

It is not yet decided whether the King of Prussia will open the Chambers in person on the 27th inst. or not.

THE WAR IN THE CRIMEA.

THE BATTLE ON THE 5TH NOVEMBER.

The sudden attack and repulse of the Russians on the 25th October, with its brilliant episodes, of which we have given an account elsewhere in this week's publication, have been completely thrown into the back-ground by the subsequent arrival of several telegraphic despatches relating to an obstinate engagement between the Russian army and the Allies, on the 5th inst. The first announcement of the affair was a despatch from Prince Menschikoff, sent to Berlin, in orpher, and forwarded to Paris on Monday morning. It was dated Nov. 4th, at sunset, and stated that "on November 4th, the Allied armies having shown an usual signs of activity, General Liprandi, reinforced by a corps under Menschikoff, had attacked and routed them, killing more than 800 men." The falsehood of this despatch was very soon exposed, by the publication of the following authentic report of the battle of the 5th inst., from General Canrobert, addressed to the French Minister of War:—

"BEFORE SEBASTOPOL, Nov. 6

"The Russian army increased by reinforcements from the Danube and from the southern provinces, and animated by the presence of the Grand Dukes Michael and Nicholas, attacked yesterday the right of the English position before the place.

"The English army maintained the battle with the most remarkable solidity, supported by a portion of General Bosquet's Division.

"The enemy, much more numerous than us, was driven back with enormous loss—estimated at 8000 to 9000 men.

"This obstinate struggle lasted throughout the whole of the day.

"At the same time, on my left wing, General Forey had to drive back a sortie of the garrison. The troops led by him drove back the enemy into the town, with a loss of 1000.

"This brilliant feat of arms—which was not achieved without some loss to the Allies—reflects the highest honour upon our armies.

"The siege continues regularly."

Since the arrival of this encouraging account of a great victory gained by the Allies, several other despatches have been published, chiefly from Russian sources, which profess to give an account of the battle. In one of them Prince Menschikoff reports that "he made two sorties against the enemies, right and left, on the 5th November." His object in speaking of it is evidently thus to make it seem that the affair was not a very serious one. He adds that "he took one battery and spiked fifteen guns of the left French division," and that "the loss on both sides was considerable."

On Thursday morning a *London Gazette* Extraordinary was published with the following translation of a despatch from Lord Raglan to the Duke of Newcastle, containing an account of the attack and defeat of the Russian army, on the 5th November, but saying nothing of the sortie of the garrison to which both General Canrobert and Prince Menschikoff refer—

"November 6.

"The enemy, with immense forces, attacked yesterday, in the dawn of morning, the right of the English position before Sebastopol, which was defended by the Second Division, and the Brigade of Guards of the First Light Division, the Fourth Division, and part of the Third, and subsequently by the division of General Bosquet, and other corps of the French army, which, by their gallant conduct, contributed immatially to the decided success of the day. General Canrobert immediately came to the spot, and gave me the support of his assistance and of his excellent counsel. The battle was extremely obstinate, and it was not till past noon that the enemy was definitively repulsed and forced to retreat, leaving the field of battle covered with his dead and several hundreds of prisoners. The number of the enemy much exceeded that which was opposed to us at Alma, and the losses of the Russians have been enormous. Our losses have also been very great. General Sir George Brown, Major-General Bentinck, Brigadier-Generals Adams, Buller, and Torrens, have been wounded. They are all doing well.

"The conduct of the troops in the face of an enemy so superior in numbers has been excellent.

(Signed) "RAGLAN."

As it appears from the letters brought by the *Sinai* steamer, which arrived at Marseilles on Wednesday, with news from Sebastopol to the 3rd inst., that the intention of the Allies was to make the assault on the 5th, the Russians may have made their grand attack on the French and English in the hope of thereby damaging them, so as to postpone the capture of the city.

The latest accounts from Sebastopol, previous to the battle, represent the town as being in a frightful condition. There was no water, and typhus was committing terrible ravages among the Russian troops. Four of the ships-of-war had been sunk by our batteries. The French lines were said to have been opened, with 150 embrasures (about 1200 guns) of the town. If that was actually the case the French must have been almost ready for the assault.

A Russian despatch brings news from Sebastopol to the 8th of November, three days after the battle. It affirms that the siege operations are continued, and that the damage done is quickly repaired. The French are intrenching their left. Nothing important had taken place since the 5th.

ENGLISH AND FRENCH REINFORCEMENTS FOR THE CRIMEA.

The following Infantry battalions will constitute the reinforcements to be dispatched immediately to the Crimea:—The 1st Battalion of the Grenadier Guards; the 34th Regiment, now at Corfu; the 62nd Regiment, from Malta; the 71st Highland Light Infantry, from Corfu; the 90th Light Infantry from Dublin; the 97th Regiment, from Athens.

The battalion of the Guards will be attached to Major General Bentinck's Brigade, which will then consist of four battalions; but, in point of number, it will not differ much from the other infantry brigades. There will thus be left on home service the 2nd battalion of each of the three regiments of Foot Guards, which may be looked upon as so many strong depôts to keep up the war battalions to their effective strength. The five battalions of the line mentioned above will be joined by the 68th Light Infantry, which is now in the Crimea, but is not attached permanently to any division. These six battalions will be formed into the Fifth Division of the British army; and, as three of the regiments are light, the 68th, 71st, and 90th will probably constitute a Light Infantry Brigade. We believe no arrangement has been yet made as to the command of this division, but it is not unlikely that Colonel Lookyer, of the 97th (who held a command at Chobham), and Colonel Denny, of the 71st, will be the Brigadier-Generals.

As regards the Cavalry, an arrangement has been come to, different from what was originally intended. Instead of sending out the cavalry regiments on home service as regiments, the effective men of those corps will be incorporated with the regiments now in the Crimea, so as to bring them up to such a strength as a cavalry regiment in time of war should possess. With the exception of the King's Dragoon Guards, our cavalry regiments of the line consist of six troops of forty-five men each, the regimental staff and officers making up the entire number to something over 300. Each cavalry regiment in the Crimea will be made up to eight troops of seventy-five men each, or 600 in the whole, besides the regimental staff. The officers of the cavalry regiments at home will not be transferred to those abroad, but will remain with their own corps, and will be usefully employed in keeping up an effective supply of trained men and horses to the regiments abroad. Owing to recent losses, the ten cavalry regiments now in the Crimea cannot be said to muster 1000 men. When the new arrangements are carried into effect they will be increased by 5000 men, and from the regiments at home there will be no difficulty in at once supplying 2000 of this number.

From a report made by General Canrobert to the Minister of War, it appears that on the 15th of October the whole French army in the Crimea consisted of 48,000, including 8360 horse. Of the additional reinforcements from Varna and Gallipoli, 9000 had already arrived at the date of General Canrobert's last despatch at the bay of the 30th; which, with other reinforcements before Sebastopol, gave the French General 68,000 troops. The effective number is, of course less. General Levaillant had arrived; and the *Sinai* steamer, in coming from Constantinople met the brigade of General Mayran, on its way from Athens to the Crimea, together with 2000 Zouaves, who had been embarked at Algeria. The total number of the late reinforcements from France amount to 14,000, nearly the whole of which must have landed by this time. In addition to these, however, a second French army, it is confidently reported, will be immediately dispatched to the Crimea, our Government supplying steam transports for the purpose.

Accounts vary as to the number of Russian troops in the Crimea. The highest estimates give them 74,000 infantry, 15,000 cavalry 6000 gunners and drivers, 4000 sappers and train; making a grand total of 99,000 men, with 264 guns. The loss of the Russians since the bombardment began is said to be about 500 daily. That of the English, irrespective of the loss sustained during the two engagements, did not amount to one tenth of that number; although the *Times* rates it at 1000 per day

THE BATTLE OF BALACLAVA.

GENERAL CANROBERT'S DESPATCH.

The Maréchal Minister of War has received the following report from General Canrobert, Commander-in-Chief of the Army in the East:—

Head-Quarters, before Sebastopol, Oct. 27, 1854.

Monsieur le Maréchal,—We continue the construction of new batteries which are to bear upon the east side of the *enceinte*, which we are attacking. They are placed upon the rock, and it is only by blasting, sacks of earth, and other difficult and fatiguing means, that we can proceed. Nevertheless, we shall shortly be able to mu tiply our fire against the defences, at the repairing of which our adversaries work with remarkable perseverance.

Evidently this siege will mark a most laborious epoch.

The town has much suffered by our fire; and we know that the losses of its defenders are enormous.

The English guard Balaclava, which is the centre of their landing point, with mutual caring the siege. The enemy occupies the hills above allided to; its masses covered the woody heights which form the background on the side of the Tchernaya. Some 20 000 men were visible, and the remainder lay concealed in the ravine and brushwood. Their evident intention, the one they seem to have in view, was to entice us down from our excellent positions. I contented myself, at the request of Lord Raglan, with ordering my cavalry to join the Engl sh cavalry drawn up in the plain before Balaclava, and which had already executed a very brilliant charge against the Russian cavalry.

Moreover, whilst Lord Raglan was advancing two divisions of infantry in front of the fort, I ordered all the men of the First Division that I could dispose of to descend the hill-side.

Matters were at this point, and the day was already advanced, when the Eng ish L ght Cavalry, about 700 strong, carried away by too much ardour, vigorously charged the main body of the Russian army.

This impetuous charge, made under a cross fire of musketry and artillery, produced at first very great disorder among the enemy's ranks. But this troop, carried away too far from us, suffered severely. After sabring the gunners of two batteries, they returned, after a loss of 150 men.

During this time my brigade of the Chasseurs d'Afrique, on the left of the English army in the plain, endeavoured to come to its assistance, which it succeeded in doing by a bold and much-remarked manœuvre, which consisted in attacking on the left a battery of artillery and some which it drove back, and who had been keeping up a murderous fire on the English battalions. We lost about twenty men killed and wounded, and two officers. The loss of the enemy on this point was considerable, and our Chasseurs were allowed to retreat in good order, without being annoyed. Night put an end to this combat.

On the following day the Russians made a sortie from the town, and attacked, in the direction of Inkerman, the English division under Sir De Lacy Evans, which protects the siege-works. Received by a murderous fire, with that solidity which characterises our Allies, the Russians left more than 800 dead upon the field, and were pursued to the very outworks of the place, leaving about 100 prisoners. This short and sharp affair was very brilliant, and certainly compensated for the disasters of the preceding day. CANROBERT.

THE MISSING DESPATCHES.

(From the *London Gazette* Extraordinary.)

War Department, 11.55 a.m., Nov. 11, 1854.

His Grace the Duke of Newcastle has this day received a Despatch, of which the following is a copy, addressed to his Grace by General the Lord Raglan, G.C.B.:

(This despatch was lost in its passage through France, and was received at the above hour by his Grace, to whom it was transmitted by his Excellency the Lord Cowley, G.C.B.)

Before Sebastopol, Oct. 18, 1854.

My Lord Duke,—It was arranged between General Canrobert and myself that the batteries of the two armies should open immediately after daybreak on the morning of the 17th; and we invited Admiral Dundas and Admiral Hamelin to attack the enemy's works at the mouth of the harbour with the combined fleets, as nearly simultaneously as circumstances might permit.

Accordingly, upon a signal being given from the centre of the French lines, the batteries of the two armies commenced their fire about a quarter before seven yesterday morning.

On this occasion we employed about 60 guns of different calibres, the lightest being 24-pounders.

It may here be proper to observe that the character of the position which the enemy occupy on the south side of Sebastopol is not that of a fortress, but rather of an army in an intrenched camp on very strong ground, where an apparently unlimited number of heavy guns, amply provided with gunners, and ammunition, are mounted.

The guns having opened, as above stated, a continuous and well-directed fire was carried on from the works of the two armies until about ten o'clock a.m., when, unfortunately, a magazine in the midst of one of the French batteries exploded, and occasioned considerable damage to the works, and I fear many casualties, and almost paralyzed the efforts of the French artillery for the day.

The British batteries, however, manned by sailors from the fleet, under the command of Captain Lushington and Captain Peel, and by the Royal Artillery, under the superintendence of Lieutant-Colone. Gamb.er, kept up their fire with unremitting energy throughout the day to my own and the general satisfaction, as well as to the admiration of the French army, who were witnesses of their gallant and persevering exertions, materially injuring the enemy's works, and silencing the heavy guns on the top of the loopholed tower, to which I adverted in my despatch of the 14th inst., and many of the guns of 8 and 10 inch, opening an extensive explosion in the rear of a strong redoubt in our immediate front; the enemy, notwithstanding, answered to the last from a number of guns along their more extended line.

The fire was resumed this morning, at daylight, by the British sailors and artillery, and responded to, though in somewhat less degree, by the Russians; but the French troops, being occupied in the repair of their batteries, and in the formation of others, have not continued to the renewal of the attack, except from a work on their extreme left; they expect, however, to be able to do so to-morrow morning.

I beg to lay before your Grace a return of the losses sustained by the Royal Navy, and the Army under my command, between the 13th and the 17th inst., and to that I am deeply concerned to add that of Col. the Hon. Francis Hood, commanding the 3rd battalion Grenadier Guards, an excellent officer, whose death in the trenches this morning has just been reported to me.

The English, French, and Turkish fleets moved towards the mouth of the harbour about noon, and kept up a heavy fire upon the enem 's forts for several hou s

I am not fully acquainted with the details of the attack, or its result, but I understand that Rear-Admiral Sir Edmund Lyons, with the *Agamemnon* and *Sanspareil*, assisted occasionally by the *London*, *Queen*, and *Albion*, gallantly approached to within six hundred yards of Fort Constantine, the great work at the northern entrance, where he maintained himself till late in the afternoon, and succeeded in exploding a ma.azine and causing considerable injury to the face of the fort.

Since I wrote to your Grace on the 18th, six battalions of Tu k sh infantry and 500 Turkish artillery have been added to the force in f ont of Balaclava

These troops have been sent from Constantinople, and placed under my command by the Government of the Porte, and I feel greatly indebted to her Majesty's Ambassador, Viscount Stratford de Redcliffe, for the ability and energy with which he brought under the notice of the sultan the importance I attached to an immediate reinforcement of the imperial troops. I have, &c.,

His Grace the Duke of Newcastle, &c. RAGLAN.

RETURN OF KILLED AND WOUNDED, FROM THE 13TH TO THE 17TH OCTOBER, 1854, INCLUSIVE.

Artillery—2 rank and file killed; 1 sergeant, 25 rank and file wounded.
2nd Battalion Grenadier Guards—1 officer, Captain Rowley, killed; 10 rank and file wounded.
47th Regiment—1 sergeant, 1 rank and file wounded.
49th Regiment—1 rank and file wounded.
1st Regiment of Foot—1 rank and file killed; 8 rank and file wounded.
30th Regiment—1 rank and file killed; 1 sergeant, 9 rank and file wounded.
50th Regiment—1 officer, Lieutenant-Colonel Waddy (slightly), 1 sergeant, 7 rank and file, wounded.
44th Regiment—3 rank and file killed; 1 officer, Lieutenant Wood (slightly), 1 sergeant, 4 rank and file, wounded.
93th Regiment—3 rank and file killed; 8 rank and file wounded.
Sir Colin Campbell's Highland Brigade—1 rank and file killed; 1 drummer, 7 rank and file wounded.
1st Battalion Rifle Brigade—3 rank and file killed; 1 drummer, 7 rank and file wounded.
Total—2 officers killed, 2 wounded; 21 rank and file, killed; 3 officers, 6 sergeants, 2 drummers, 124 rank and file wounded.

(Signed) J. B. BUCKNALL ESTCOURT, Adjutant-General.

NOMINAL RETURN OF CASUALTIES, FROM THE 13TH TO THE 17TH OCTOBER, 1854, INCLUSIVE.

3RD BATTALION GRENADIER GUARDS—Privates George East, James Fordham, Henry Griber, William Bridgman, Thomas Wheatman, John Newton, John Steel, Elijah Rabits, William Tarry, Benjamin Tibbitt, wounded.
42ND REGIMENT—Sergeant William Hawkin, Private Patrick Salmon, wounded.
47TH REGIMENT—Private Michael Murphy Robert McFarlane, wounded.
49TH REGIMENT—Private James Dore William Gwyer, Patrick Carroll, killed; Private James Wilson, Patrick Holden, George Brown, wounded.
1ST BATTALION RIFLE BRIGADE—Private John Mead, killed; Colour-Sergeant James Powell; Private Joseph Lowe, Robert Goodfellow, James Wood, wounded.
77TH REGIMENT—Private James Henry, wounded.
93RD REGIMENT—Corporal J. Dawson, Private William Corfield, David Devine, James Murphy, George Rushton, James Gurney, wounded.
2ND REGIMENT Sergeant John Woodcock, Privates Patrick Tarleston, Patrick Brady, William Ward Patrick Doherty, William Greenwood, wounded.
19TH REGIMENT—Colour-sergeant Patrick Campbon; Corporals John Austin, Thomas Cushshank; Drummer Barry Hanlon; Privates James Maher, John Corbett, Thomas Dorson, Michael Loughlin, wounded
57TH REGIMENT—Privates Edward Gollifford, Gilbert Monaghan, wounded.
90TH REGIMENT—Sergeant John Matthewman; Privates Robert M'Donald, Peter Leonard, Michael Hynes, Michale Farryman, Daniel Griffin, killed; Sergeant Michael M'Donagh, Privates Timothy Doherty, Thomas Foley Morris Savage, Patrick Leonard, Patrick Burns, Martin Purcle, Edward Englan, Patrick Cullen, John Bush, Daniel Mooarey, Patrick Mullaney, James Kenny, John Daly, wounded
93RD BATTALION HIGHLAND BRIGADE—Corporal W. Campbell, Privates John Bishop, John Farrow, killed. Regier Daniel McCarthy, Privs as William Hagan, George Cann, Alfred Green, and Gerrey, James Berry, Charles Taylor, Thomas Pinfold, wounded.

(Signed) J. B. BUCKNALL ESTCOURT, Adjutant-General.

THE FOLLOWING IS ALSO THE NOMINAL RETURN OF THE CASUALTIES IN THE ROYAL ARTILLERY SINCE THE 13TH INSTANT.

Head-Quarters before Sebastopol, Oct. 18, 1854

KILLED—Pocock, acting bombardier. Name not reported, gunner and driver.
WOUNDED—Sergeant Robert Gaviard, sergeant J Walker, corp. Ali James M Fadlyn, bombardiers Solomon, R Sake, Henry Webber, acting bom ardiers; J Gummie, R. Maskell, T. Taggett, James Murphy, J Welsh, John Lyons, Samuel Nicholls, J Hawkins, D M'Cauley, John Orr J Wilson, J Carson, J Hughes, J Orton, J. M'Kaffery, Patrick Devlin, gunners and drivers.

Four other men were wounded, their names not yet reported.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

THE RUSSIAN FLEET IN THE BALTIC.

Private letters from St. Petersburg state that the Grand Duke Constantine, finding that all the large British ships are at the west end of the Baltic, and that he has nothing to fear but the squadron left up in the Gulf, under Captain Watson, has received permission to run out with the two divisions at Cronstadt to join that at Sveaborg, and to make a short cruise. This will be hazardous work with sailing ships at this season of the year indeed, there is every chance of his being iced in before, and iced out if he should make the attempt. The same advices state that Riga and St. Petersburg houses have written to their Memel agents not to ship goods in English vessels, as it is believed the Russian fleet, as all events all the steamers, will endeavour to make a run down to the coast to see if they cannot intercept some English merchant vessels.

THE FRENCH MEDICAL SERVICE.—They have now eight vast hospitals, at Constantinople, all comfortably fitted up, and all in delightful situations. To each hospital are attached a Chaplain and several Sisters of Charity, who continue to be models of activity and devotedness. They pay the most delicate attention to the sick as they could find in their own families. The physicians display incredible activity, and their zeal is almost always recompensed by the greatest success. After the French Embassy the house was installed in the buildings of the Russian Consulate (the keys of which, M. de Bruck, the Austrian Minister, would only give up on the written demand of the Porte), the French demanded the Palace of the Embassy itself to be turned into a hospital; but the Sultan did not think it right to accede to this wish. "When my palaces are not sufficient," said he to the person who spoke to him on the subject, "you may find empty that of Russia." It is known that he has already given up to the French an immense building, one of the dependencies of the Seraglio, and that it has been turned into a magnificent hospital.

RUSSIAN GUNNERY.—The Russians have now so completely the habit of our guns that they are able to do much mischief in the batteries. Yesterday they made no less than nine holes with their shot in the Union Jack which the sailors put up in the morning, and two of the poles that broke the flag-staff into two pieces; the sailors managed to put it up again, fixing the broken part of the staff by means of four trucks placed round it; they had not been so long when another round-shot came, and scattered the trucks, flag-staff, and Union Jack about in all directions. The tars were greatly enraged, and, as seems to be usual when their ire is excited, fired several broadsides in succession at the Russian battery opposite.—*Letter from the Camp*, Oct. 23rd.

THE WESTMINSTER IMPROVEMENTS.

VICTORIA-STREET.

In Vol. 19 of the ILLUSTRATED LONDON NEWS, pp. 275-276, we described and illustrated the line of the magnificent street now in course of construction, from the Broad Sanctuary, Westminster, to Shaftesbury-terrace, Pimlico; and, by a diagram of that line (Albert-street), to Buckingham-gate. Other edifices are fast rising. In Victoria-street is building the Training College of the National Society; and, adjoining, a Church for the same locality. These we engrave in our present Number; and the group of Gothic houses, nearly completed, at the entrance to Dean's-yard, was illustrated in our Journal of September 23. In Francis-street a large building has been erected, for the better lodgment of married soldiers. Upon the next page, we have engraved the noble street in progress, which may be said to have given rise to the new edifice we have mentioned in the same locality. The main street, is very properly named after the sovereign in whose reign this truly Royal feature of the Westminster Improvements has been commenced; and curious will it be to see these lines of palatial mansions stretching eastward, where, a few years since, the most benighted part of the metropolis, both as respects its godliness and cleanliness.

We have already sketched the plan upon which these noble houses in Victoria-street are being built; namely, to enable families of all sizes to have apartments suited to their number, and their fortunes and distinct; a system of arrangement common to Paris and most other Continental cities, and which is known in Edinburg and Glasgow, as the "flat system" flats."

The houses in Victoria-street are being built in blocks, each on one story *en suite*, varying in accommodation to the requirements of every family, generally from eight to fifteen rooms; each block containing only six or eight sets of apartments. These houses are built as fireproof as possible sound-proof; each has a back stairs and a lift for raising heavy articles, when there is a ball parlor to each, whose duty it is to overlook every one who enters in or leaves the house, and under his care any sets of apartments may be left under lock and key, on the family leaving town for any length of time.

The best proof that these dwellings meet the want of the class of tenants for which they have been arranged, is found in the fact of their being tenanted, as fast as they are ready, by families of great re-

VICTORIA-STREET, WESTMINSTER.

spectability, including leading members of the Legislature

The domestic arrangements are so complete, and so under control, that there results great economy in servants, as well as in all other domestic expenses. In one house all the apartments are heated by hot water, dispensing with the use of open fires, with their necessary cost, and dirt, as well as the labour of attendance. Throughout the whole the cooking is done by an apparatus heated by gas, which is found admirably to answer every culinary purpose.

The adaptation of this description of dwelling to the metropolis is due to the enterprise of Mr. Mackenzie, who has built them, and shown great ingenuity and skill in fitting them up.

The architect, Mr. Henry Ashton, who designed the houses in Victoria-street and the adjoining streets, has aimed at giving them, externally, as much as possible the appearance of being what they are; no expense appears to have been lavished on them with a view to deceive, by raising the outside appearance beyond the character of the interior. They are built (as will be seen) in the Italian style. some of the houses, especially those in Ashley place, are perfectly novel in arrangement, and are pleasing applications of Venetian arrangements and effects. H. R. H. Prince Albert inspected some of these houses a few months since, and was pleased to express his approbation of them architecturally, as well as being a great improvement upon the universal Lodging-houses of London.

ST. ANDREW'S CHURCH, ASHLEY-PLACE, WESTMINSTER.

THIS Church takes the place of the temporary church which has existed for some time in Palmer's Village, Westminster, and which circumstances have rendered it necessary to transfer to a new site near Victoria-street. It was at first hoped that it might be erected on a scale more worthy of its position; but, though munificently supported in several quarters, the general subscriptions have been so scanty as to necessitate the adoption of a comparatively humble design

The architect has, however endeavoured, while sacrificing richness and magnificence, to attain a certain degree of novelty and boldness. Instead of low aisles and a clerestory, the aisles are carried up to almost the height of the nave; and the side windows rendered still more lofty by being surmounted by gables over each bay. By this arrangement, the internal columns are of unusual height, giving a very striking effect to the interior; and the side windows are of a height equal to the lofty arches of the nave. The chancel has an apsidal termination, and is of nearly equal height with the nave. There is no tower, that having been cut off from want of funds; but over the chancel arch is placed a bell turret, of a lofty spire-like form, such as is usual in Belgium and Germany. The whole is carried out with scrupulous simplicity, ornament being sacrificed in every instance to height and boldness of effect.

The accommodation is for 1100 persons. The cost is £7000; of which, we believe, £2000 is contributed by the Church Commissioners, £1000 by the Bishop's fund, £400 by the Incorporated Society; and we hear that the munificent sum of £2000 (since increased by several hundreds) has been given by the Vice-Chancellor Sir W. Page Wood (by whom the first stone was laid some months since), and a handsome subscription by the Dean and Chapter; so that the sum supplied by the public has been but moderate in amount.

"THE BARRAGE OF THE NILE."

THE BARRAGE OF THE NILE

Some centuries ago the Arabian engineers at Rosetta, Cairo, and other towns on the Nile erected what they called "The Barrage," in a forward state. What may ultimately be the result of this work, remains to be proved. To Napoleon I. is generally awarded the credit of having originated the idea of a Barrage on this mighty river. Since his time, several Frenchmen of eminence have given attention to the subject. Among others, Linant Bey entertained the practicability of the design. At one time it was proposed to construct a Barrage on both branches of the Nile. The design was submitted to the Polytechnic School of Paris, but did not then meet with approval, chiefly, however, the idea was removed by Mongel Bey (at that time M. Mongel), and approved of by the Parisian engineers.

The works have already considerably advanced, and a very large sum has been expended upon them. A large passage is kept clear on the eastern shore, for steamers, to be closed by gates when the Nile rises. Four other passages, added to, are reserved for the passage of river boats, and each of the locks can be closed separately.

Various opinions are held by engineers as to the result of closing the Barrage; some think the waters of the Nile would be diverted in a new direction, that is, the "Bahr Yousef," a watercourse which runs parallel to the Nile for a great distance on its western side, in which case the valuable land would be inundated and the navigation of the river very much injured.

Others suppose that the present waters of the Nile would percolate the land to a level of the present river banks, and forming springs in the cultivated grounds, when in many parts lower than the water level of the "Barrage" Nile, would carry off to the surface quantities of saline matter in which the lower strata abound, and would render the land unsuitable. Besides ruining the valuable land, they would render salt the navigation of the river.

The inspection of the great work enables all to form the relative correctness of these conflicting opinions.

LAUNCH OF THE SHIP "NAPOLEON III."

This fine ship was launched on the 2nd inst. from the building yard of Messrs. Barr and Shearer, of Ardrossan. The ceremony of naming the Ar[illegible] was [illegible]ly performed by the Lady Emily Montgomerie, the only daughter of the Right Hon. the Earl of Eglinton and Winton.

To say this ship is a fine model is but to say what will may be said of almost every ship that has lately been launched on the banks of the Clyde, but to one could look at the present vessel without being struck with the extreme beauty of her proportions, and the substantial manner in which she is constructed and finished. All her planking and fastenings are fully one fourth larger than required by Lloyd's regulations so as not only to meet the necessity of extra strength for so long a ship, but also, probably, to enable it to go through hard work to meet the competition our ships now require to contend against. The length of keel and fore rake is 187 feet, the breadth 31½ feet, and depth 20½ feet; registering 800 tons, and capable of carrying 1,500 tons cargo. She is classed thirteen years A 1 at Lloyd's, and from the recent alterations in the law by being launched after 1st mst., will class as built in 1854. There is a topgallant forecastle for the ship's company, and a commodious house aft, 50 feet in length, neither of which compartments is included in the register tonnage; so that, while the ship has great sailing powers, she has also large carrying qualities, and has been fitted out under the superintendence of her experienced commander, Captain Crawford, with every recent improvement, after being fully eighteen months in building. The figure-head is an excellent representation of the Emperor Napoleon III., beautifully designed and executed by Mr. Robertson, of Liverpool, the owners are Messrs. Peter and Thomas Wilson, of Glasgow, and the vessel is intended for the India trade.

The interest consequent upon the launch was very great. The inhabitants of the district turned out en masse, and a number of noblemen and influential gentlemen were present from a distance. The ships in the harbour displayed their colours, and when the vessel glided gracefully into the water, the air resounded with the plaudits of the assembled multitude and the firing of cannon.

After the launch, a luncheon was served to upwards of one hundred guests, the only regret being the unavoidable absence of the Earl of Eglinton. In the course of the afternoon Provost Barr stated that he had reason to believe that the Earl of Eglinton was on that very day dining with the real Napoleon III.; adding, that through the same channel the Emperor was already aware of the honour conferred on him.

LAUNCH OF THE "NAPOLEON III." AT ARDROSSAN

CALENDAR FOR THE WEEK.

SUNDAY, Nov. 19. 23rd Sunday after Trinity. Charles I. born, 1600.
MONDAY, 20.—St. Edmund Cap. of Good Hope first doubled, 1497.
TUESDAY, 21.—Princess Royal born, 1840.
WEDNESDAY, 22.—St. Cecilia.
THURSDAY, 23.—St. Clement. Old Martinmas Day.
FRIDAY, 24.—Archbishop Tillotson died, 1649. John Knox died, 1572.
SATURDAY, 25. Michaelmas Term ends. Dr. Watts died, 1748.

HIGH WATER AT LONDON-BRIDGE,

The LARGE PRINT of the NAVAL ATTACK ON SEBASTOPOL, will be given next week.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, NOVEMBER 18, 1854.

THE VICTORY BEFORE SEBASTOPOL.

AFTER an interval of ten days—of which the history is as yet a blank—the Russians made an attack on the Allied armies, far more desperate than those which were so signally and heroically foiled on the 25th and 26th of October. This great battle was fought before Sebastopol, on the 5th of November. Three separate accounts of it have been given to the world. First in the order of time, and of fulness, came a telegraphic despatch from General Canrobert to the French Government, received on Sunday last; secondly, a telegraphic despatch, viâ St. Petersburg, from Prince Menschikoff to the Czar, and published in the German papers; and, last of all, a telegraphic despatch from Lord Raglan to the Duke of Newcastle, received half an hour after midnight on Wednesday last, and published in an *Extraordinary Gazette*, and in all the morning journals of Thursday. Lord Raglan's despatch was delayed for nearly three days between Bucharest and Vienna, in consequence of the rupture of the telegraphic wires during a violent storm. Up to the hour at which we go to press, no other information than that conveyed by the Electric Telegraph has been received; and the public will have to wait until the arrival of the mails and letters for fuller particulars.

The reports of General Canrobert and Lord Raglan are in perfect accordance with each other. Both claim a great and important victory, both state the losses of the Russians to have been enormous, and both admit their own to have been severe. Prince Menschikoff does not admit that he was defeated; but expressions have escaped him in his despatch which are quite inconsistent with any supposition that he could have been victorious. Animated, it appears, by the presence of the Grand Dukes Michael and Nicholas—who suddenly and unexpectedly made their appearance at the Russian head quarters—a grand attack upon the Allies, with the same object as the attacks of Liprandi on the 25th and 26th, was resolved upon, and carried into effect. The attack commenced in the dawn of the morning of the 5th. The force of the Russians is not stated in any of the three despatches; nor is that of the British and French. According to General Canrobert, the Russians far outnumbered the Allies; and, according to Lord Raglan, their force very much exceeded that which was opposed to us at the Alma. The battle raged with extreme obstinacy until past noon, when the Russians were definitively repulsed, and forced to retreat, leaving the field of battle covered with the dead, and several hundreds of prisoners. General Canrobert states that the struggle lasted the whole day, and estimates the Russian loss at from 8000 to 9000. Lord Raglan forms no estimate on the subject. Prince Menschikoff admits that the Allies were "prepared" to receive him; and does not go the length of claiming the honours of the day. He alleges the damage he did to one of our batteries, and that he spiked eight English and fifteen French guns, and penetrated into the English camp. He adds, "that the Russians retired to their previous position;" and that "the enemy did not pursue;" from which it might not unreasonably be inferred—even if the world had not the despatches of General Canrobert and Lord Raglan to enlighten it upon the true state of the case—that the Russians were beaten. There can be no pursuer, unless there be a fugitive; and the "retirement" of the Russians on their previous position, is probably the emphasism by which Prince Menschikoff designates his repulse. A document, obviously of Russian origin—if not entirely a fabrication—and which is stated to be a letter, and not a telegraphic despatch from Prince Menschikoff to the veteran Prince Paskiewitch, alleges that the Russians lost 4000 men, and the Allies nearly as many. In his authentic report to the Czar, the Prince mentions nothing of this; but simply admits "a considerable loss" on his own side, without making any allusion to the loss of the enemy. He states, however, that one Russian General (Soimonoff) was killed. On the side of the British, Lord Raglan admits that no less than five general officers were wounded; namely, General Sir George Brown, Major-General Bentinck, and Brigadier Generals Adams, Butler, and Torrens. The French Commander pays the tribute of his admiration to the remarkable firmness and solidity displayed by the English army; while Lord Raglan eulogises in simple and straightforward language the gallant conduct of the French, which contributed essentially to the decided success of the day.

Thus was defeated the second attempt of the Russians to raise the siege of Sebastopol. A statement has been published that a third attempt, attended with similar discomfiture to the Russians and with even a greater victory to the Allies, was made on the 11th instant, but if not a mistake as to the date, and bearing reference to the battle of the 5th, it rests upon no better authority than a private telegraphic communication from Vienna. It will not unnaturally be asked how the operations of the siege of Sebastopol are proceeding amid these pertinacious and desperate attempts to interrupt them? From all that can be learned, they have suffered no material delays; and General Canrobert expressly states that up to the 6th, the day after the battle, when his despatch was dated, they had "continued with regularity." Lord Raglan says nothing upon the subject; and from his silence, no less than from General Canrobert's positive information, we draw the conclusion, that all is well in that respect; and that the skill and energy of such portions of the French and British armies, as are intrusted with these tedious but indispensable operations, are zealously and ably employed in preparation for the final onslaught upon the fortress. The magnitude of the issue, and its immense importance to the cause of the Czar will no doubt induce the Russians to make other attempts to raise the siege. But we have every reliance that our brave soldiers, already accustomed to victory, will be equal to their work. They will meet the foe, either with solidity, when solidity will best answer the purpose, or with dashing energy and personal daring that fears and thinks of no obstacle, when these qualities are more likely to win the day.

We do not hear that any demand for reinforcements is made by the Allied Generals, but it is known that large reinforcements are on their way, and it is to be hoped that many thousands, both of British and French troops have already landed in safety at Balaclava. It has been asserted that our forces are not sufficient; and that there is a danger that all the heroic valour of the Allies may be rendered of no ultimate avail, in consequence of the overwhelming masses of Russians which keep pouring in by the isthmus of Perekop. It would be most culpable on the part of the Governments of Great Britain and France if they relied exclusively on such almost superhuman courage as the troops of both nations have already exhibited. But there is no evidence to show that this is the case. On the contrary, there is much evidence to prove that it is quite unnecessary to make any outcry for reinforcements, inasmuch as reinforcements were actually on the way before the outcry commenced. A force of 6600 men have already embarked to join Lord Raglan's gallant army; and 5000 more are under orders, and may be expected at Balaclava within two or three weeks. General Canrobert received large reinforcements in October, which he notified to his Government in despatches of the 7th and 22nd of that month; and since that time it has been determined by the Emperor Napoleon to send from 20,000 to 30,000 additional troops to the seat of war, many of which have already taken their departure in British transports from the ports of the Mediterranean. Were there any reasonable ground for the belief that our Government had been remiss in this matter, a burst of indignation would arise from every part of the country, which would speedily scare it into wholesome energy; but we do not believe that this is the case, although it may suit the purposes of a particular journal so to represent it, in order that it may appear to be clearer-sighted and better-informed than other people. It is scarcely honest, however, when a man knows that a thing has either been done, or determined upon, to urge it upon attention, as if he was the first who thought of it, or the only one who had found a voice to recommend it. The public will await with confidence the result of the measures which were taken before any outcry was raised, or which would have been taken, if no voice had been uttered upon the subject. In this just war the people have determined to conquer; and they *will* conquer, let the cost be what it may. If 100,000 British soldiers, or double the number, are wanted, there are spirit enough, and energy enough in the country to make it certain that they will be forthcoming.

WE were very much surprised to read the following sentences in the *Times* of Wednesday:—

"But the people—the many-handed, many-mouthed people—will apparently have to pay this year some 30s. a quarter, or thirty-seven per cent, more for their bread than they did last year. Perhaps the *most striking way* of putting it is to remind the *working-classes* that every man, woman, and child is supposed to consume, one with another, a quarter of wheat a year; so that the head of a family of five persons will find his year's bread will cost £7 10s. more than last year." . . . . "Now, there can be no doubt we owe *a great part of this rise to the war*." . . . . "There is no deficiency which the Black Sea could not easily supply." . . . . "War interposes between the British artisan and vast granaries."

There can be no mistake as to the meaning of these phrases, nor as to the design with which they were written. They are intended to bring home to the working-classes, and especially to the British artisans, in the most striking way, the evils which the war inflicts upon them, by interposing between them and "vast granaries," and so raising the price of bread, as to impose a "poll-tax" equivalent to £7 10s. a year on every head of a family of five persons. It would scarcely be patriotic or laudable, while the nation is engaged in a war, which even the *Times* in the same article admits to be "just and heroic," thus to address a particular and very numerous class of the community, and labour to excite in them dissatisfaction and discontent, on account of the sum they will be compelled by the war to pay, even if that sum were not exaggerated by one single farthing. What name then will it deserve—thus to address the "many-handed" and "many-mouthed people," and thus to bring home to "the British artisans" the sense of a great injury—when it is proved that the whole statement in the *Times* is a pure fiction, or such a gross exaggeration, as to deserve the name of a fiction? This is what we now propose, in the cause of patriotism and national honour, to perform; and we will leave our readers to apply to the design we shall endeavour to make apparent, the epithets it deserves.

It will be noticed that the whole statement applies to the future. The head of a family "*will*, apparently, have to pay"—"*will find* his year's bread cost £7 10s. more than last year." The representation of loss is therefore altogether a supposition of the *Times*; but it is not a supposition that "the Black Sea could supply the deficiency of food," and that war interposes between the "British artisan and vast granaries." These are positive assertions. Thus, on a pure assumption of its own, that the war will occasion a great expense to the workman, the *Times* asserts that the war keeps food from them. To bring the assumption to the test of facts—as the *Times* speaks of the price of this year's bread, we suppose it means the year which is to expire on Dec. 31st next in comparison with the year 1853. Now, whatever may be the difference of average price between these two years, the war did not begin till February; and, therefore, two months of peace must be struck off; but war had threatened for some time, and great exertions were made in consequence to import all the articles which its positive outbreak might stop. To the end of the month of June there were accordingly imported 503,579 quarters more wheat, 512,157 cwts. of flour, or 642,729 quarters of corn of all kinds, and flour estimated as corn, more in 1854 than in the corresponding six months of 1853. The war, therefore, did not diminish the supplies of food in the first six months of the year, when prices ranged above 70s.; on the contrary, the supplies were so large that from the end of June the price of wheat began to fall, and fell so low towards the middle of September (52s. 5d.), that importation ceased. In spite of the war and of our being cut off from the "vast granaries" on the Black Sea, the price of wheat was actually lower in England from July to October than in the neighbouring countries. The low price, not the war, prevented importation in September and October.

The average price of the whole year 1853 was 53s. 3d.; and the average price of the year 1854, as far as it has gone, is 71s. 6d.; so that, instead of the people paying 30s. a quarter more for wheat this year than last year, they have paid only 18s. 3d., or, hitherto, not two-thirds of the sum the *Times* says they will have to pay. Instead of the £7 10s. which the head of a family of five persons will have to pay, supposing the high average stated to continue to the end of the year, he will have to pay less than £5. Should the *Times* by "this year" mean the harvest year beginning on the 1st of September, not the year beginning on the 1st of January, we can state that the average price of wheat of the last harvest year, ending on August the 31st, was 72s. 8d., and that the average price of the present harvest year, as far as it has gone, has been 58s. 8d.; the price hitherto having been 14s. less, instead of 30s. more, than the average of last year. If we confine our attention to the ten weeks of 1853, subsequent to September 1st, we shall find the average price of that period was 63s. 11d., or 5s. 3d. less. Thus, for the assumption that the price of wheat will be, 30s. more per quarter than the price of last harvest year, or 102s. 8d., very near double the actual price to the present time, there is no foundation whatever. The assumption of the *Times* that the "many-handed people" will have to pay 30s. a quarter more for their bread, than they paid last year, is then, as we have stated, "a pure fiction, or such a gross exaggeration as to be worthy the name of a fiction."

Supposing the assumption of 30s. increase of price justified, the *Times* even then grossly exaggerates in supposing that each person consumes a quarter of wheat a year. A few days ago it published, in large type and with all its authority, an estimate of the yearly consumption of wheat in the United Kingdom, which was put down at 18,000,000 qrs. Now, as the population of the Kingdom is 28,000,000, this gives for the consumption of each person something less than 5½ bushels per annum, or 2½ bushels less than the quarter stated by the *Times*. Taking 5½ bushels to be nearer the truth than 8 bushels, we must deduct another third from the £7 10s. stated by the *Times*. Or, assuming that the war causes the actual rise of price which has taken place, it will really cost the head of a family only £2 10s. more in the year, instead of £7 10s. An increase enlarged threefold is a gross exaggeration.

But is it true that the war is the cause of the present or past rise in the price of wheat? The past rise took place before the war could affect it. The highest average weekly price—72s. 11d.—was reached in April; and long after that period the supplies continued to be larger than in the preceding year. Everyone knows that the harvest of 1853 was a comparative failure throughout Europe; and the failure, not the war, was the cause of the high price. In September, after war had been declared six months, the average price of wheat was 52s. 5d. In fact, the war has never stopped the supplies from the "vast granaries" of the Black Sea. By the Russian usurpation of the Principalities, and by our blockade of the mouths of the Danube, the supplies from those regions, which, on the average of a whole year, may amount to 600,000 quarters of all kinds of grain, were stopped. But the chief port of the Black Sea is Odessa, from which the corn of Podolia, Volhynia, and the Ukraine, is shipped to the western part of Europe. Odessa and its neighbourhood grow none. Now, it is well known that the late extension of railways in Germany to the north has made it almost as cheap to bring this corn to the west of Europe through Prussia as by Odessa. In fact, as soon as there was a probability of war—before the end of 1853—measures were adopted at Berlin for importing this corn into the west of Europe through Prussia. But the price in England, from the short crop and high price on the Continent, was not sufficient to pay for importing wheat in this manner; and Prussia, instead of sending us more wheat in the portion of 1854 which has elapsed—as she would have done had war cut us off from the vast granaries of the Black Sea—actually sent us in the first ten months of 1854 259,557 quarters less wheat than in the corresponding ten months of 1853.

As to the present rapid rise of price, it is notorious that it is caused by the almost total cessation of imports from all quarters, since the beginning of September, which was the natural and inevitable consequence of the low and falling price which prevailed betwixt June and September. The war had no effect whatever in stopping supplies from America, Prussia, Egypt, Spain, &c.; but none came, simply because no merchants ordered a single cargo of flour or wheat to be purchased abroad, where the price was as high as, or higher than, in England. It is, therefore, altogether a false assumption that the war has, as yet, materially impeded our supplies, or enhanced the price of grain to any noticeable extent, whatever it may do. The rise of price was the consequence of great consumption, of deficient stocks, and a short harvest. But, supposing the war was the cause of the rise in price, the actual rise by no means warrants the assumption of the *Times*, which has, in the most "striking way," designedly endeavoured, by a gross exaggeration, to make the "many-mouthed people" discontented with the "just and heroic" war.

COMPULSORY PRE-PAYMENT OF LETTERS AND NEWSPAPERS TO THE EAST.—Much difficulty having been experienced in the delivery of letters to the East, and in the collection of the postage thereupon, are Baltic, no letters addressed to the army or navy in Turkey or the Black Sea will hereafter be sent from this country, unless the postage be paid in advance. Letters posted unpaid will be opened and returned to the writers.

LATEST INTELLIGENCE.

THE QUEEN'S APPROBATION OF THE ARMY.

A General Order, conveying the Queen's approbation of the conduct of the British Army, on the memorable occasion of the Battle of the Alma, has been issued to the troops.

THE WAR IN THE CRIMEA.

Letters to the 3rd of November have been received via Marseilles, at which date the assault was daily expected to take place. The Russian batteries are described as being nearly destroyed. Long intervals occur between the firing of any shots from them, even when the Allies open fire early in the morning.

The French have made a large breach in front of their left battery, where the enemy are continually planting fresh guns. The besieged in this quarter have been compelled to mount some guns on the roofs of the adjoining houses.

The French are carrying a mine under the main fortifications in their front. If they are able to do this effectually, the town will be entered with ease. The Russians in the rear continue to annoy the Allied Forces. They have retired as far back as the River Chernaya, but retain possession of the redoubt captured from the Turks on the 25th ult. The rear of, the Allied Forces has been greatly strengthened, and no apprehensions from this quarter are entertained. The Allied batteries opened on the 3rd instant, with a tremendous fire on all sides, which was proceeding when the mail left. It was expected that the town would be stormed within forty-eight hours.

Three thousand Zouaves had arrived from Algiers, and a thousand Tirailleurs had disembarked at Balaclava. On the 11th, 2000 English horses reached Malta, together with munitions of war.

A large covered way has been constructed, which extends from Gordon's battery towards the Russian Redan Fort, and, turning off at a right angle, faces the latter formidable defensive work. This will serve to cover our storming party when the decisive day occurs.

MARSEILLES, Nov. 15.—Letters from Sebastopol state that 6000 French and English troops, and 1600 seamen from the fleets, were to make the assault on the place about the 8th. Several fresh fires had been seen in Sebastopol, particularly at a large provision warehouse. On the 26th ult. the English, with their Lancaster guns, sank two Russian frigates, and damaged several other vessels. The *Twelve Apostles* line-of-battle ship was set fire to. General Kiriatoff is said to have been killed by a shell.

Letters from Marseilles represent the determination of the French Government to increase the force in the East to 80,000 men.

FRENCH REINFORCEMENTS FOR THE CRIMEA.

The 6th Battalion of Chasseurs de Vincennes and two batteries of artillery were to embark on the 16th, to join in the Crimea the Sixth Division, commanded by General Paté. By the adjunction of that division the effective forces of the French army before Sebastopol will be increased to 70,000 men. The Government has besides ordered the immediate departure of two other divisions for the East, commanded by Generals Dulac and De Salles. The division of General Dulac, which will form the 7th of the army of the East, will consist of two brigades. The first, under the orders of General Bonsinger, is to be composed of the 17th Battalion of Chasseurs de Vincennes, the 10th Regiment of Light Infantry, and the 57th of the line; the second, under General Bisson, of the 10th and 61st regiments of the line, two batteries of artillery, and a company of Engineers. The First Brigade was to embark this week at Toulon, and the other troops are to leave in succession, according as the transports are ready to receive them. That division, the eighth of the army, is to consist of two brigades—the first commanded by General Faucheux, formed of the 10th Battalion of Chasseurs de Vincennes, the 4th Regiment of Light Infantry, and the 16th of the line; the second, under General Duval, of the 14th and 43rd Regiments of the line, two batteries of artillery, and a company of the 3rd Regiment of Engineers. All these troops will have sailed before the end of the month.

THE COURT.

The Queen held a Privy Council on Tuesday, at Windsor Castle, when Parliament was ordered to be further prorogued, from the 16th inst., to the 14th December. At the Council, the new Spanish Minister was introduced to her Majesty, by the Earl of Clarendon; and the Hon. Charles Augustus Murray, C.B., Envoy Extraordinary and Minister Plenipotentiary to the Schah of Persia, had an audience to take leave. Sir Benjamin Hall was sworn of her Majesty's Most Hon. Privy Council; and Dr. Logan, in attendance on the Maharajah Dhuleep Singh, was honoured with knighthood.

The Queen has received a succession of visitors during the week. The Earl of Aberdeen and the Duke of Newcastle have been frequent guests at the Royal table; and both of these noblemen were summoned from Windsor Castle on Sunday last in consequence of the receipt of important despatches from the seat of war.

On Sunday the Queen and Prince, with the four elder Royal children, the ladies and gentlemen of the Court, and the domestic household, attended Divine service in the private chapel of the Castle. The Hon. and Very Rev. the Dean of Windsor officiated. The Duke of Newcastle, the Duke of Wellington, and the Earl of Aberdeen were present at the service. In the afternoon the Queen and Prince, accompanied by the Royal children, walked on the East Terrace.

On Monday her Majesty drove out in an open carriage, attended by the Countess of Gainsborough. In the afternoon his Highness the Maharajah Dhuleep Singh, the Hon. Charles A. Murray, Sir Hamilton and Lady Seymour, Sir William Molesworth, Lieut.-General Sir Hew D. Ross, and Dr. Logan, arrived on a visit to her Majesty.

After the Privy Council, on Tuesday, her Majesty gave a dinner-party, at which there were present—Her Royal Highness the Duchess of Kent, the Maharajah Dhuleep Singh, Sir James Graham, Sir Hamilton and Lady Seymour, Sir William Molesworth, Lieut.-General Sir H. D. Ross, the Hon. P. Talbot, and Sir John Logan.

On Wednesday morning the Queen and the Prince, accompanied by the Maharajah Dhuleep Singh, walked in the Home-park. In the afternoon the Maharajah left the Castle for his residence at Wimbledon.

Her Royal Highness the Duchess of Kent has had no return of her indisposition, and, during the week, has made frequent visits to Windsor Castle, from Frogmore.

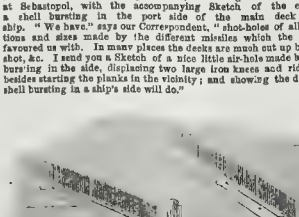
The Duke and Duchess of Sutherland and family remain at Dunrobin, in comparative retirement, since the lamented death of the youthful Lord Frederick Leveson Gower, off the Crimea.

TESTIMONIAL.—On Thursday evening, a handsome silver tea and coffee service, with a purse of gold, were presented to Mr. Thomas Stubbs, Station-master at Watford, on the London and North-Western Railway, by subscription, chiefly residents in the neighbourhood, in testimony of Mr. Stubbs's uniform civility and obliging attention, during the period he has filled the above office.

EXTRAORDINARY METEORIC PHENOMENON.—On Monday morning last about three minutes before five o'clock, a tremendous glare of phosphoric or electric flame burst from the clouds, and illuminated for an instant the surrounding scene. A rent or fissure in the clouds was observable (apparently about three yards in length), from the serrated edges of which there appeared to fall numerous sparks, similar to those emitted by a spent rocket, but which disappeared almost as suddenly as the parent flash. The rent or fissure, however, remained, exhibiting the reflection of an immense light of surpassing brilliancy; this gradually closed, and in about the space of fifteen or twenty seconds, the heavens had assumed the appearance they maintained previous to this wonderful and magnificent display.—*From a Correspondent.*

H.M.S. "AGAMEMNON."

WE have been favoured by a Correspondent, who was engaged on October 17 in the *Agamemnon*, attacking Fort Constantine, at Sebastopol, with the accompanying Sketch of the effects of a shell bursting in the port side of the main deck of the ship. "We have," says our Correspondent, "shot-holes of all descriptions and sizes made by the different missiles which the Russians favoured us with. In many places the decks are much cut up by raking shot, &c. I send you a Sketch of a nice little air-hole made by a shell having come in the side, displacing two large iron knees and rider-head, besides starting the planks in the vicinity; and showing the damage a shell bursting in a ship's side will do."



EFFECTS OF A SHELL BURSTING IN THE SIDE OF H.M.S. "AGAMEMNON," WHILST ATTACKING FORT CONSTANTINE, SEBASTOPOL.

The following is an extract from our Correspondent's letter:—

When the *Agamemnon* was engaging the formidable Fort Constantine on the 17th the place appropriated for the wounded being the gunners' store room, in the fore part of the ship, some distance below water, to ensure their safety; the surgeon was in the act of amputating the right arm of the Admiral's valet, who had unfortunately been struck by a shot under the poop, when a very heavy blow appeared to have struck the ship under water in the fore part, the concussion causing the displacement of a number of stores, &c., in the store-room, at the same time uncasting the clergyman of the ship, who was assisting in the operation. At the moment, it was thought a shot or shell had pierced through under water but on the ship being careened on the following day to stop the shot holes on and under the water line, no mark could be traced in that particular place; but, five days afterwards, the diver was sent down with Siebes' apparatus, to examine the ship's bottom further under water, and, to his astonishment, found in the port bow, about twelve feet under water, a large rocket sticking in the bottom of the ship, which had there exploded, doing much damage, and which must have caused the concussion felt in the gunners' store-room by the surgeon and his assistants. The rocket was so firmly fixed, that the diver could not extricate it, and was compelled to break it short off. A similar one burst also on the quarter-deck of the *Agamemnon*.

NAVAL AND MILITARY INTELLIGENCE.

THE *Snake*, screw steam despatch gun-boat, was paid in advance at Woolwich on Tuesday, and left the same afternoon for Portsmouth, to have her compasses adjusted, and will proceed with all dispatch to Sebastopol. The *Snake*, now ready for active service, completes the six despatch gun-boats, each mounting two of Lancaster's 65-pounder oval guns, and all for service in the Black Sea.

THE Peninsular and Oriental Company's steamer *Candia* left Southampton on Wednesday afternoon for Toulon, to take in French troops for the Crimea. The same company's steamer *Ripon* left Southampton also on Wednesday afternoon, for Portsmouth, on her way to Constantinople. She had on board Government stores, chiefly addressed to the care of Admiral Dundas—consisting of medical comforts, chloride of zinc, medicines of all descriptions, camp equipage, pearl barley, bedsteads, invalids' chairs, preserved potatoes, &c.; the whole amounting to nearly forty tons. The *Royals* will take in other Government stores at Portsmouth. The *Indiana* will start for Toulon on Monday. The mail packets which are gone and are about to go to Toulon, will carry in the whole 6000 French troops to the Crimea. Southampton Docks look like one vast workshop. The servants of the great steam-packet companies labour with the utmost zeal to get the steamers off to France as soon as possible. Everyone seems to work with a will.

FOUR large first-class steamers are expected at Portsmouth, to embark reinforcements of troops for the Crimea. They are to arrive by the 20th inst., and will be some of those belonging to the commercial steam companies; but their names have not yet been notified officially, nor have the troops that they are to convey out.

THE pressure of business has been so great at Portsmouth Dockyard, owing to the repairs and alterations necessary for the coming spring, that ere long the numbers will be increased to the original war establishment. There will be required upwards of 1000 additional shipwrights and joiners. The immediate increase in the establishment at Devonport will be nearly 400 men, and a proportionate number of officers. Of the 400 about 150 are to be shipwrights.

CLOTHING FOR THE TROOPS IN THE EAST.—80,000 fur caps are to be at once sent out for the general use of the troops. The cap to be worn by the officers is composed of fine brown fur, helmet-shaped, and lined with brown silk. A large flap falls under the back of the neck and under the chin, so that very little of the face is exposed. The cap to be worn by the privates is of the same shape, and less fine, though as strong in texture. The cap has been pronounced by several officers and non-commissioned officers to be an article which affords warmth with ease. The cavalry officers and men are to have each a pea-jacket, thickly lined, of dark blue in colour. This will cover the uniform. The trousers will be lined as far as the knee by thick leather overalls. The scarlet cloak for heavy cavalry, and blue for light cavalry, will be continued. It is also intended to supply each man with a scarf, but no final decision has as yet been come to on this point. The infantry are to have a large quantity of under-clothing supplied to them, and an additional great coat to each man.

THE FRENCH SKILLED RIFLEMEN.—There are two companies of these men, composed of 150 men, chosen from amongst the best marksmen of the Chasseurs de Vincennes. In the night they creep in front of the intrenchments, dig holes, and place themselves in them as well as they can. Then they fire at the Russian artillerymen. They have already killed so many that the Russians now close their embrasures with a sort of double door, which is ball proof. But they are obliged to open it to point their guns and fire, and no sooner is this done than twenty balls whistle through it. The Russians have sustained such losses that they are at times seized with despair—raising their guns from behind, they fired volleys of grape-shot at their dangerous visitors. Nevertheless, the latter have succeeded in extinguishing all the first line of their batteries

THE RUSSIAN LANCERS.—Our men were principally slain with lance thrusts; I saw one body with thirteen such wounds through the chest and stomach. Another man had six, which were all mere flesh wounds, and not dangerous. The same man (in the 17th Lancers) extraordinary and incredible as it may appear, had two horses killed under him, one or two sabre cuts and bullet holes in his cap, his sword bent double in its sheath by a Minié bullet, five bullets in his saddle, one in his lance-staff, and sword-cuts innumerable.—*Letter from the Camp, Oct. 27.*

IMPORTANT SANITARY INQUIRY AT MANCHESTER.—At a meeting of the Manchester City Council, held on Monday, a letter was read from Mr. Samuel Brooks, offering to place at the disposal of the Corporation the sum of £1000, to be expended in preliminary inquiries and experiments, with the view of ascertaining the practicability of applying the night-soil and sewage of the city to agricultural purposes. Mr Brooks, in his letter, states that £100,000 is annually lost to Manchester by the present mode of dealing with the refuse of the city, and he suggests that a committee of inquiry shall be appointed by the council, who shall secure the services of Mr. William Fairbairn and Mr. Bateman for the engineering department, and Mr. Grace Calvert and Dr. Angus Smith for the chemical department.

Note.—The sign — denotes below the average, and the sign + above the average. The numbers in the seventh column are calculated on the supposition that the saturation of the air is represented by 100

The reading of the barometer decreased from 30.17 inches at the beginning of the week, to 30.00 inches by the 11th; increased to 30 20 inches by the 12th; decreased to 28.97 inches by the morning of the 16th; and increased to 29.16 inches by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 29.718 inches.

The mean temperature of the week was 40·8°; being 2·6° *below* the average of the corresponding week during thirty-eight years.

The range of temperature during the week was 34°, being the difference between the lowest reading of the thermometer on the 10th, and the highest on the 15th.

The mean daily range of temperature during the week was 15·2°.

Rain fell during the week to the depth of six-tenths of an inch.

The weather throughout the week (with the exception of the 12th, which was fine, and the sky almost cloudless) was dull and damp, and the sky almost wholly overcast.

JAMES GLAISHER.

Lewisham, November 17, 1854.

HEALTH OF LONDON.—During the week ending Saturday, Nov. 11, the births of 1805 children were registered within the metropolitan districts—exceeding the average of the nine corresponding weeks of the nine preceding years by 118: of these, 8·9 were boys, and 727 were girls; being 8 and 15 above the averages respectively. The number of deaths during the week was 1150; the average of the ten corresponding weeks of the ten preceding years, corrected for increase of population, being 1112; therefore, from a comparison of the results, it appears that the mortality is not much in excess of the usual amount; but it exceeds in a more important degree the point to which the usual mortality, in an improved condition of London, might be reduced. Cholera, which was fatal in the two preceding weeks in 66 and 31 cases, was this week fatal in 29. In the same weeks diarrhœa numbered 46, 33, and 55 deaths. Nine of the deaths from cholera occurred on the north side of the river, and the remaining 14 on the south side. Scarlatina has for some time predominated among zymotic diseases—the number of deaths from it this week being 101, and the average number 60; in the first week of October the deaths rose to upwards of 100; since which time it has fluctuated near the same point, but its tendency has not been to decrease. To tubercular diseases 168 deaths are attributed. To diseases of the lungs, &c., 267—exceeding the average by 37. And to violence, privation, cold, and intemperance, 20.

SOCIETY OF ARTS.—The Society of Arts held its first meeting of the ensuing winter session at its rooms, John-street, Adelphi, on Wednesday night, when an interesting and able opening address was delivered by Viscount Ebrington, the President of the Council of the Institution for the present year. There was a good attendance of members and visitors on the occasion, a goodly number of ladies being comprised in the latter category.

THE NEW SEWERS COMMISSION.—The following has been published as a list of the gentlemen who are to constitute the new Commission of Sewers for the metropolis:—Richard Jebb, Esq. (chairman); Sir John Villiers Shelley, Bart.; Thomas Hawes, Esq.; Lawrence Redland, Esq.; G. Spencer Smith, Esq.; Augustin Sayer, Esq., M.D.; James Pascall, Esq.; George Offer, Esq.; Francis Chalmers, Esq.; John Thwaites, Esq.; William Evans, Esq.; John Wade, Esq.; Cuthbert William Johnson, Esq.; Joseph Hodgson, Esq.; Frederick Oldfield Ward, Esq.; Walter Augustus Lewis, M.D. Mr. Jebb, the chairman, with Mr. Hawes, Mr. Redland, and Mr. Spencer Smith, were members of the late commission; Sir John Shelley, Dr. Sayer, and Messrs. Pascall, Offer, Chalmers, Thwaites, Evans, and Wade, have been nominated by the representation of the metropolitan constituencies; while Messrs. Johnson, Hodgson, Wade, and Dr. Lewis are selected by the Home-office.

THE PANOPTICON.—We are requested to state that the Luminous and Chromatic Fountain, at the Royal Panopticon, Leicester-square (incorrectly called the ILLUSTRATED LONDON NEWS), is now exhibited three and eight o'clock, instead of a quarter past four and a quarter to eight, as stated in our last

THE CONSERVATIVE LAND SOCIETY.—The twenty-third public drawing of rights of choice on the society's estates, took place in the offices, in Norfolk-street, on Saturday, the 11th inst., in the presence of the Rev. Dr. Worthington and Mr. Cribb, members of the executive committee, the Rev. Mr. Goodchild, and other shareholders. The Rev. Mr. Goodchild and Mr. Troughton were nominated scrutineers. The rev. chairman, at the conclusion of the drawing, stated that the East Retford estate, in Nottinghamshire, would be distributed amongst the members on the 13th of January, and that allotment of other estates would speedily follow. The twenty-fourth public drawing would be held at Exeter-hall, on Tuesday, the 12th of December, at the annual general meeting of the shareholders, on which occasion 100 rights of choice would be drawn, and fifty shares added by seniority. The holders of shares who had been placed on the order of rights for the last four months would have the opportunity of selecting the remaining lots on estates in various counties, on the 29th inst., without any increase of the prices marked on it's plans.

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—*Rectory:* The Rev. J. Jackson, to Fulletby, near Horncastle, Lincolnshire. *Vicarages:* The Rev. G. A. Langdale, to Compton, with Upper Mardle, near Petersfield; Rev. R. B. Earle, to Edinsley, Notinghamshire; Rev. E. Griffith, to St. Reverne, Cornwall. *Incumbencies:* The Rev. A. Munro, to Woolley-moor, Derbyshire; Rev. B. Pearson, to Browne Edge, in the parish of Norton-in-the-Moors, Staffordshire; Rev. H. J. Graham, to Pudsey, Yorkshire; Rev. G. Rimmer, Mount Pellew, Yorkshire.

A RAILWAY CHURCH.—The Great Northern Railway Company have given notice of their intention to apply to Parliament in the ensuing session for powers to erect and endow a church in or near the town of Doncaster, together with schoolhouse, for the benefit of the inhabitants, natives and servants of the company employed at the plantation at that town.

A TESTIMONIAL to the Rev. F. G. Crossman—consisting of an elegant silver inkstand, with a purse of one hundred and twenty-five sovereigns—was presented to him, on the 7th instant at a parting token of grateful esteem, by his congregation, on his relinquishing, through ill-health, his much-valued ministration at Holland Chapel, Brixton, Surrey.

GLASGOW UNIVERSITY.—The election of Lord Rector of Glasgow University took place on Wednesday, the retiring Rector being the Earl of Eglinton. Three candidates were proposed—viz., Mr. Disraeli, M.P., by the Conservatives; Mr. Thomas Carlyle, by the Liberals; and the Duke of Argyll, by the Presbyterian section of both parties. Mr. Carlyle was withdrawn at a late hour, when the students went to the vote on the two other candidates; and the result was, that the Duke of Argyll was elected by a majority in all the nations; the votes being—Argyll, 250; Disraeli, 147. A protest was taken against the validity of the Duke's election, on the ground that his Grace is Chancellor of the University of St. Andrew's; and that it is, therefore, illegal to hold office in two Colleges.

MEMORABLE SEPTEMBER 14.—The Duke of Wellington died, 1852. The Allied army landed in the Crimea, 1854. Moscow entered by the French, and set on fire by the Russians, 1812. The festival, in the Popish Church, of the Holy Cross; which, by the commemoration of the appearance, to Constantine the Great, of a fiery cross, at mid-day.

THE President of Liberia, Mr. Spencer P. Plumer, and Mr. W. H. Fisher, had an interview with Lord Clarendon, at the Foreign Office, on Wednesday last, on business connected with the Republic of Liberia.

PROROGATION OF PARLIAMENT.—Thursday being the day to which Parliament stood prorogued, but which, in pursuance of an Order in Council is ordered to be further prorogued until Thursday, the 14th day of December next, the House of Lords met at half-past three o'clock for the purpose of the Lords Commissioners by virtue of her Majesty's Commission formally continuing the prorogation.

THE CHARTERHOUSE.—At a meeting of the GOVERNORS of the Charterhouse on Friday, November 10, the Earl of Aberdeen was elected. The Governors present were the Archbishop of Canterbury, the Duke of Buccleuch, Lord John Russell, the Bishop of London, and the Master.

THE SIEGE OF SEBASTOPOL—PART OF CAPTAIN WODEHOUSE'S BATTERY.

THE SIEGE OF SEBASTOPOL.

(From our Special Correspondent.)

BEFORE SEBASTOPOL, Oct. 24, 1854.

THE siege of Sebastopol is slowly progressing, and the Allies are doing all in their power to bring it to a speedy termination; but the Russians, in the meanwhile, are receiving large reinforcements and we have now to combat, not only the enemy within the walls, but a powerful army encamped outside. Since the 23rd the French have been busily engaged in erecting breaching batteries. They have proceeded according to the old approved plan, and pushed their parallels regularly. Their loss has, therefore, been much greater than ours—their men being much less securely covered than ours, and being also much nearer the enemy. The attack which was made upon them on the 21st, was productive of extreme annoyance. The Governor of Sebastopol offered a free pardon to all the convicts in the place who would consent to enter the French lines, and spike the guns. Two hundred men presented themselves, and were led on by four officers, who also volunteered for this hazardous service. The party moved out in the dead of the night. They encountered an advanced French picket, which failed to stand its ground; and, pursuing their advantage, they entered the French battery, where they proceeded to spike a number of mortars. They had succeeded in performing this operation upon two pieces, when they were resolutely attacked by a relief, which drove them out, killing several, and taking prisoners two of the officers. Since that time the French have been gradually advancing, but their breaching batteries are not yet complete. Their works, however, do a great deal of damage to Sebastopol, and the town in front of them has begun to assume a ruinous aspect. A fire was kindled by French shells in a provision magazine on the 23rd, and the storehouses burned the whole day. The buildings of Sebastopol continue, however, to remain fire-proof; and they stand even when gutted by fire. The French have placed a ship under the land close in to Sebastopol, from which they fire every half hour a gigantic mortar. The Russians have made every attempt to reach this ship without success. It is so safely ensconced as to defy all their efforts. This so annoys the enemy that they fire a general volley when the mortar goes off; and this amusement never ceases, day or night. In our lines, there seems, on the contrary, to be a tacit arrangement that the fire shall cease at dusk, to be resumed at daybreak. Our batteries are, therefore, replenished at night with ammunition, and the embrasures repaired without any considerable risk. At times our working parties are disturbed by skirmishers from Sebastopol; but these invariably retire before the fire of our covering parties. The English have not, however, been slow in making advances towards the place. They have not proceeded by parallels, like the French; but they have availed themselves of the sinuosities of the ground to erect batteries nearer the town. On the 23rd a new battery, consisting of three 32-pounders and one mortar, was opened on the extreme left of our lines, and poured a destructive fire into the Garden Battery, which has not been served with its former vigour since. The enemy, on the other hand, did not permit the Lancaster battery on our right to play on the shipping for which it was specially intended; for they moved away their vessels out of its range. The Lancaster gun, however, makes very good practice at the circular tower and the batteries at its base. The former, indeed, can no longer be said to be circular, as its shape is so strangely altered. It has a vast breach yawning in one side of it, and threatens to fall completely to the ground. As for the shipping, the past history of the siege will have served to show that it is the greatest difficulty we have had to contend with. Whenever guns were brought to bear upon them, they were moved out of range; and it was always possible to anchor them in a place from whence they could open a new and destructive fire, without being subject to any return. The Russian fleet has been in truth of the greatest use to the defenders of Sebastopol, and possibly it may yet be put to excellent service after we have stormed the town on the land side, and are forced to commence operations for forcing the works on the other side. It is impossible to say when the assault will be given, although we are certainly making active preparations for it. Wide and convenient trenches have been erected 400 yards in front of Gordon's battery, to cover the storming parties as they advance. The grand and decisive blow cannot now, however, be long delayed. Every day which passes adds to the force of the enemy, whose troops are pouring in from Bessarabia and from Asia. The advance guards of Dannenberg and Liiders' corps arrived two days ago, as well as a large portion of the garrison of Anapa. All these troops have permanently established themselves in our rear, near Balaclava, and are assuming a most threatening appearance.

THE ATTACK ON BALACLAVA.

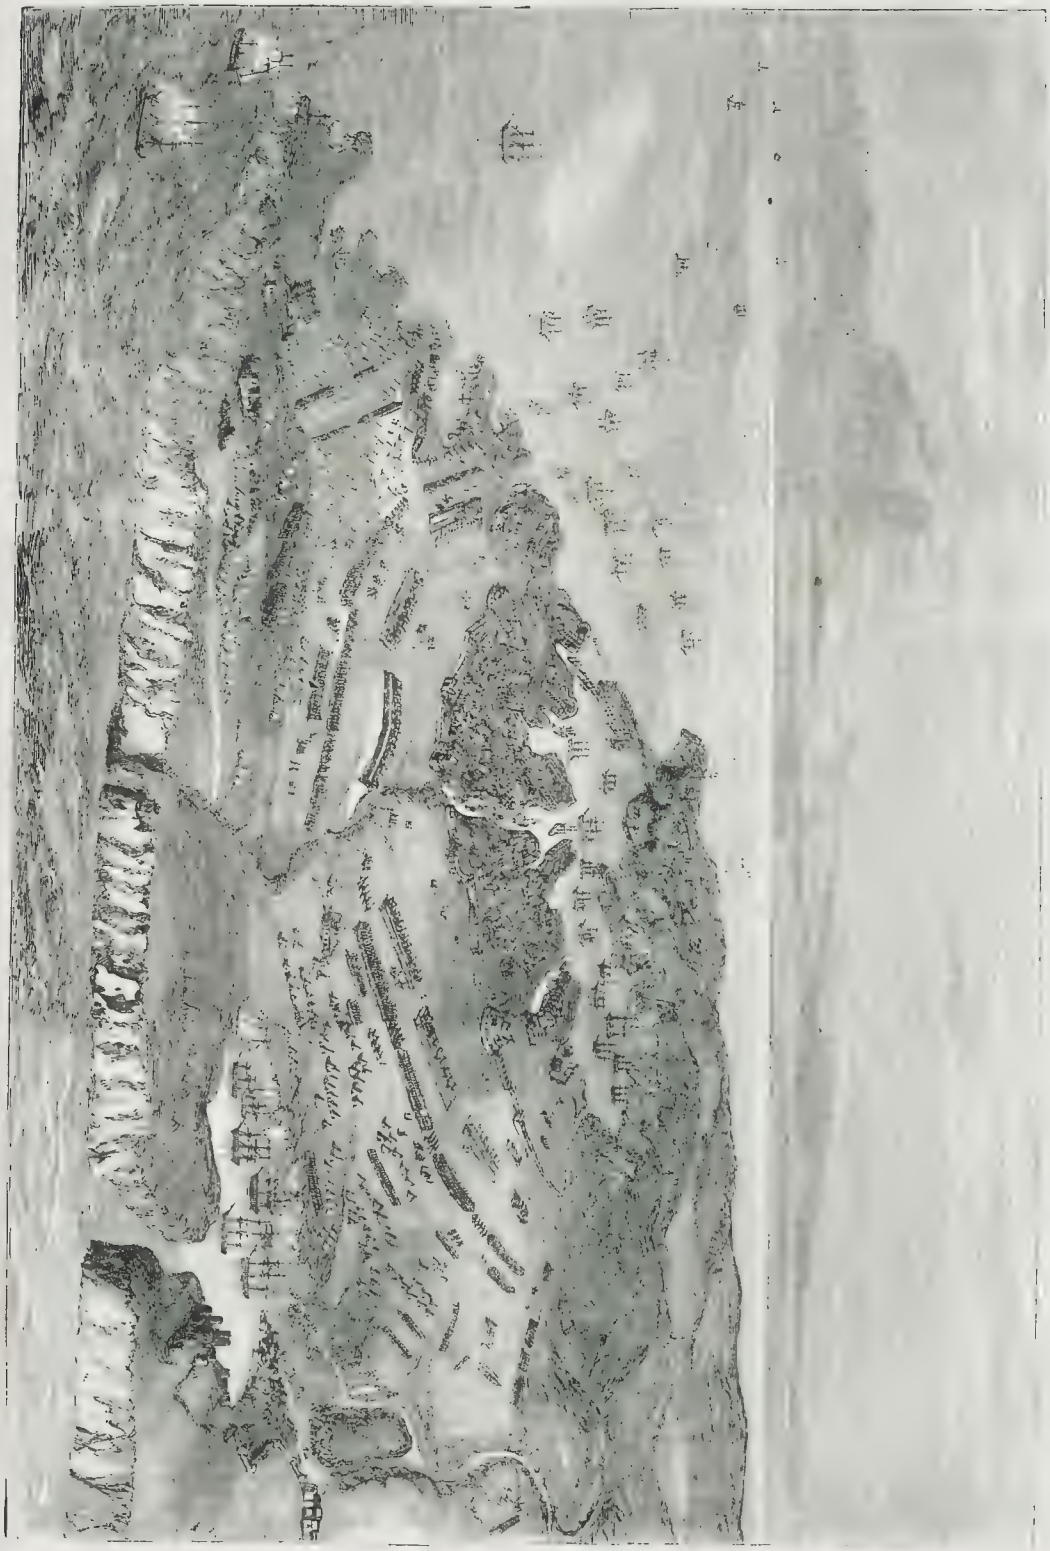
Before Sebastopol, Oct. 25, 1854.

The Russians made their long-expected attack on our rear this day, at ten o'clock, with a large force, consisting of 3000 cavalry, under General Velitchka, eight regiments of infantry, and forty guns, under General Prince Gortschakoff. I regret to say that the result of the day was disastrous to us, though our troops more than sustained their well-earned reputation for undaunted courage and unflinching firmness.

I informed you in a previous letter of the manner in which Balaclava was defended by a line of earthen redoubts covering the crests of the hills in its front; the right resting on high cliffs, covered by our Marines, and the left on the elevated plain, held and fortified by two French divisions. The redoubts before Balaclava were armed with heavy guns—32-pound howitzers and 18-pounders, belonging to the English artillery train. The guns were manned by our artillerymen, supported by companies of Turks. At ten o'clock in the morning, the Russians having mustered in force in the vale leading up towards the extreme right of our position, advanced at considerable speed to the redoubt on their extreme left, and charged the Turks with the bayonet. Our artillery had barely time to fire one round, when the Turks were seized with a sudden panic, and, throwing away their pieces and packs, ran down the declivity to Balaclava.

(Continued in Supplement, page 518.)

THE SIEGE OF SEBASTOPOL—PORTION OF REDOUBT, OCCUPIED AND EVACUATED BY THE RUSSIANS.



THE SIEGE OF SEBASTOPOL—GENERAL VIEW

ENGLISH JOURNALISM AND THE WAR.

The following letter from an Assistant-Surgeon in the — Regiment of Foot conveys a well-merited reproof to those London Journalists who have done so much to mislead the public mind with reference to the war:—

Before Sebastopol, Oct. 24.

Dear ——,—We are not yet in Sebastopol, though your papers tell us we walked straight from Alma to this splendid conquest. Have you "got heaven of England," neither reason nor sense left amongst you? It is quite plain that you are prepared to regard impossibilities as mere trifles. For three weeks our brave soldiers, with the blue-jackets from the fleet, have worked harder than galley-slaves. Over rocks and hills and through deep defiles have the big guns been dragged day and night, and night and day; an hour or two's sleep on the grass, sodden with heavy dew—no camp, no shelter, scarce a blanket—and then up again to the same incessant toil—the dragging guns and tumbrils of ammunition to the heights which look over Sebastopol—all this had to be done after Alma was over. So fearful was the work, that horses, and even men, died in harness. Yet the, to you, is a mere bagatelle. You, perhaps, had the idea that the forts of Sebastopol, like the walls of Jericho, were afraid of music, and would fall down when the pibroch of the bagpipe and the cheers of the Highlanders gave them a salute from the trenches. I wish some of your scribblers to the papers who direct the military evolutions of the Crimea from their secure firesides, or perhaps from some garret redolent of beer and *harmless* smoke, could be condemned to a twenty-four hours' campaign in the siege batteries, and made to stand in their guns! The chances are, that, not being accustomed to look out for the compliments which accompany the enemy's fire, they would pretty quickly be knocked over, and it is tolerably certain that if they knew no more about a siege *in actu* than they do on paper, neither Raglan nor Menschikoff would ever miss them. We had a hearty laugh last night, at the commencement of a leading article in one of your cotemporaries' papers, something in this way: "If our readers will refer to the very admirable map of the Seat of War, published by Mr. Wyld, Geographer to the Queen, they will observe, &c.; —" The editor then proceeds to describe "reinforcements from Persia so-to be cut off" with prodigious celerity, and how Sebastopol is "entirely unprotected to the south-east, and completely at the mercy of the Allies," if they attack it with vigour. What is the spirit which is to be excited from them?" But the *Times* has given us the "unkindest cut of all." I have not the paper now, but believe it was dated September 21st or 22nd. The editor praises that our young commanding officers are a prey to nervousness and apprehension; that they wander about the camps uttering melancholy forebodings, and that they are infecting the common soldiers with their fears! And then the sapient writer informs the world "It was not by *such* officers that he great victories were won in former days!" Good God! even whilst that many pen was tracing the slander on the paper the Battle of the Alma was either being fought, or had just been won! These "nervous" young officers had charged at the head of their regiments, cheering on their men, pushing up the hill to meet that death, which in the face of such a fire appeared to be inevitable. When that paragraph was read at your English breakfast-tables, many of the brave fellows had taken a long farewell to "melancholy forebodings," and were lying cold and bloody on the field that matchless bravery had won. Yet it was "not by *such* men that great victories were formerly accomplished!" What does the writer mean? What does he call a great victory? Raglan has declared many a time since the fight on the Alma, that (for the time it lasted) Waterloo at the hottest was never so severe. You may be sure that such articles as those I have alluded to, are very disheartening. There is not an officer or a man who is not supported through incredible privation and danger by the thought that in England his countrymen will appreciate his bravery, and honour him for having nobly done his duty. The least your English journalists can do, seeing that they cannot be competent judges of our conduct and necessities, the least they can do is to let us alone. The work is terrible enough, and we need no discouragement.

Faithfully yours,

J. W. E.

THE STEAM BATTERIES.—The fleet of steam floating batteries building in England and France, as an auxiliary force to the Allied fleets in the Baltic, amount to no fewer than forty, and the whole of them are ordered to be launched and equipped by March next. The French Government, it appears, first suggested to the Admiralty the construction of the batteries, which are to be armed with twelve of the largest Lancaster guns. They are nearly 2000 tons burden, flat bottomed, with round stern and stern, 180 feet extreme length, 56 in width, and 20 in depth; each being propelled by horizontal engines, of 300-horse power. They have two decks, the upper being bomb-proof, eight inches thick; and the lower the fighting deck. The batteries are perfectly encased with nearly 700 tons of wrought-iron slabs, each slab four inches and a half twelve inches broad, and fourteen feet in length. The tests these wrought iron slabs have undergone show that they are capable of resisting the heaviest shot in use. The new flat bottom gun boats which are to accompany the expedition are in a very forward condition; and, no doubt, will be completed by the time ordered by the Government.

PRINCE ADAM CZARTORYSKI AND THE POLES IN LONDON.—A funeral service was celebrated on Sunday in the German Catholic Chapel, Great St. Thomas Apostle, for her late Highness the Duchess of Wurtemberg, sister of his Royal Highness Prince Adam Czartoryski, who died in Paris on the 21st ult., at the advanced age of eighty-nine. The Rev. Clemens Podolski officiated, in presence of a numerous attendance of Polish refugees, and, after the mass, in a touching discourse, expatiated on the many virtues and the patriotism of the deceased, a descendant of the illustrious race in Poland. The Prince has also forwarded to Prince Adam Czartoryski, their chief and representative abroad, an address of condolence expressive of their deep sympathy with the bereavement which his Highness has sustained, and with this truly national loss.

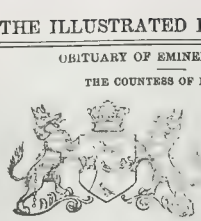
FRIGHTFUL RAILWAY ACCIDENT, AND LOSS OF FIFTY-SEVEN LIVES.—A terrible accident occurred on the 26th ult., on the Great Western Railroad of Canada, near the bursting of the tender of the cylinder, which threw the train out of time. After a delay of two hours, the train proceeded at the rate of twenty miles an hour; and, when near Chatham, in a dense fog, came in collision with a gravel-train. The locomotive of the express-train was overturned, and crushed two cars (first and second-class) into splinters. Almost every one in the second-class car was either killed or wounded. The deaths were mainly amongst the emigrants. There were, however, a number of first-class passengers among the killed and wounded. The locomotive and tender were thrown quite clear from the line by the collision. A heavy baggage-car was thrown up into the air, falling on the top of the first car, driving it in, and crushing down numbers beneath its ponderous weight. It was four hours before the mangled remains could be extricated. The latest accounts from the scene of the collision state that forty-eight persons were killed instantly; and that the total number of those who have perished, including those who subsequently died, amounted to fifty-seven; while thirty-nine others were injured, and some of these would probably die.

TURKISH DESPOTISM.—The Government of the Turkish Empire has been greatly misrepresented. The shocking stories about its despotism have misled many, and the religious zeal of others to abhorrence and detestation; while many, not under the influence of religious passions, have felt their nature shudder at the frightful idea conveyed by these stories of the unrestrained and regular system of that haughty Court, people have been induced to annex the idea of barbarism to it; have supposed it to be without order or plan, entirely subject to the caprice, cruelty, and avarice of a tyrant, and a slave merely at his oppression of his subjects, and, as far as his power extends, at the destruction of mankind. Surely these men did not, or would not, look nearer home: it was, perhaps, because near; for, as one can say about us, and in partially examine the Governments by which we are surrounded, and we shall then, in all probability, find that the Sultan is not more despotic than many Christian Governments—perhaps not so much as some of them. It is certain that, whatever defects may be in the political system of the Turks, their empire is so solidly founded on the basis of religion, combined with laws, general customs, and the interest as well as vanity of Turkish individuals, that, as it has lasted now for many centuries, it bids fair for a stability of ages.—*Turkey. By Sir George Larpent.*

THE POST-OFFICE LONDON DIRECTORY FOR 1855.—This colossal volume has just appeared, considerably increased in size, as well owing to the constant increase of the population in the area previously comprised, and to the fact that as the suburbs are gradually becoming the places of residence of those engaged in business in the metropolis, it becomes necessary to continually enlarge the area chronicled in the "Directory." In the present volume Messrs. Schlesinger's index has been adopted to the Map, and also the use of the coloured edges, with the names of the different divisions, enables every one to determine not only the beginning, but also the termination of each division of the work. The Official Index has been greatly enlarged by adding to each name, not only the office, but the department. All the information has been brought down to the latest period; we would instance the Royal Commission of the Patriotic Fund, which was first appointed October 15th, and will be found here, with a list of the officers. We trust that the many years of toil which the proprietor has devoted to the completeness of the "Post-office London Directory," will be fully appreciated by the mercantile and general public; in which case the commercial success of the work is safe. To possess a "Directory" that shall increase in correctness as in bulk has been the constant aim of the proprietor; and the passale of his work proves that he has attained this great object. Its production this year has been a Herculean labour: each copy consists of 176 sheets, or 2650 pages; each volume took a quick hand an hour and a half to sew, but the whole number (7000), weighing, when ready for delivery, upwards of thirty tons, was bound in ten days.

OBITUARY OF EMINENT PERSONS.

THE COUNTESS OF KENMARE.

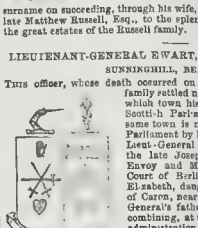


THE death of this Peeress occurred on the 2nd instant, at Farrance's Hotel, Upper Belgrave-street. Her Ladyship was daughter and heir of the late Edmund O'Callaghan, Esq., of Kilgorey, county Clare. Her marriage to the present Earl of Kenmare, then the Hon. Thomas Browne, took place on the 26th November, 1832; and its issue consists of one son—Valentine Augustus Viscount Castlerosse, M.P.; and of two daughters—Lady Ellen Browne and Lady Catherine Berkeley, the wife of Robert Berkeley, Esq., jun., of Spetchley-park, Worcestershire.

HARRIET, VISCOUNTESS BOYNE.

LADY BOYNE died on the 1st inst., at Belgrave square, after a lingering illness. She was the only daughter of Benjamin Haugh, Esq., of Burcaston House, co. Salop; was married, 4th Aug., 1796, to Gustavus, present Viscount Boyne, and leaves issue an only son, the Hon Gustavus Frederick John James Hamilton-Russell, of Brancepeth Castle, co. Durham, who adopted his second surname on succeeding, through his wife, Emma-Maria, daughter of the late Matthew Russell, Esq., to the splendid Castle of Brancepeth, and the great estates of the Russell family.

LIEUTENANT-GENERAL EWART, C.B., OF BEECHGROVE, SUNNINGHILL, BERKSHIRE.

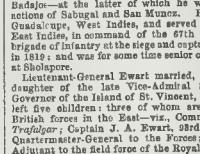


THIS officer, whose death occurred on the 23rd ult., was of an old family settled near Kirkcudbright, in Scotland, which town his ancestors represented in the Scotch Parliament before the Union. The same town is now represented in the British Parliament by his son-in, Mr. W. Ewart, M.P. Lieut.-General Ewart was the eldest son of the late Joseph Ewart, Esq., his Majesty's Envoy and Minister Plenipotentiary at the Court of Berlin, from 1782 to 1790, and Elizabeth, daughter of Count Wartensleben, of Carow, near Magdeburg. Mr. Ewart (the General's father) was zealously engaged in combining, at the Court of Berlin, during the administration of Mr. Pitt in England, a system of general opposition among the European Powers to the aggressive designs of Russia, more especially advocating with great ability a common resistance to the final partition of Poland—a policy of which the wisdom has been proved in modern times; but which was probably prevented from taking effect by the breaking out of the French Revolution.

Lieutenant-General Ewart was born at Berlin, July 28th, 1786, and entered the British Army as an Ensign, in the 52nd Light Infantry, in 1803. He accompanied the expedition to Copenhagen in 1807, and was present at the action near Kenge. He served in the Peninsula in 1808 and 1809, under Sir John Moore, and was wounded at Vimeira. He accompanied the expedition to the Scheldt; and served with the Light Division in the Peninsula in 1811 and 1812, including the battles of Fuentes d'Onor and Salamanca, the sieges of Ciudad Rodrigo and Badajos—at the latter of which he was severely wounded; and the actions of Sabugal and San Munoz. He was present at the capture of Guadalupe, West Indies, and served with Sir John Keane in the East Indies, in command of the 67th Regiment; and commanded a brigade of infantry at the siege and capture of the Fortress of Asseerghur in 1819; and was for some time senior officer in charge of the field force at Sholapore.

Lieutenant-General Ewart married, in 1816, Lavinia Isabella, eldest daughter of the late Vice-Admiral Sir Charles Brisbane, K.C.B., Governor of the Island of St. Vincent, West Indies, by whom he has left five children: three of whom are present employed with the British forces in the East—viz., Commander Ewart, R.N., of H.M.S. *Trafalgar*; Captain J. A. Ewart, 93rd Highlanders, Deputy-Assistant Quartermaster-General to the Forces; and Lieutenant C. B. Ewart, Adjutant to the field force of the Royal Engineers.

THE REV. JAMES HUME SPRY, D.D., RECTOR OF MARYLEBONE, AND PREBENDARY OF CANTERBURY.



THIS aged and respected clergyman—who held for a period of twenty-nine years the Rectory of the important parish of Marylebone—expired on the 12th inst., at his residence, 18, Devonshire-place. By his death, a vacancy is created not only in Marylebone (which is the gift of the Crown), but also in the Prebendal Stalls of Canterbury, and in another valuable living in the country. Dr. Spry was only son and heir of the late Rev. Benjamin Spry, M.A., Prebendary of Canterbury; who was brother of William Spry, LL.D., Governor of Barbadoes, Judge of the Admiralty over all America; and fourth son of the Venerable John Spry, D.D., Archdeacon of Berks, by Jane, his wife, sister of John Hume, D.D., Bishop of Salisbury.

THOMAS CHRISTOPHER BANKS.

THE death on the 30th September, at Greenwich, in the ninetieth year of his age, of "Thomas Christopher Banks, Baronet of Nova Scotia, and Knight of the Order of St. John, of Jerusalem, Law Genealogist and Antiquarian," is just announced. This gentleman was the well known author of "The Extinct and Dormant Peerage"—a work of considerable ability and research. His designation of "Baronet of Nova Scotia" he derived, we believe, from the *sol-disant* Earl of Stirling, who claimed the ancient title of the Alexander family, and asserted a right to create Nova Scotia Baronets.

COUNT DE SAINTE-AULAIRE.

THE death of Count de Sainte-Aulaire, in his 77th year, took place on Monday morning, at his hotel, 61, Rue Saint-Dominique-Saint-Germain, in Paris. The deceased was a member of the Institute, and Grand Officer of the Legion of Honour. Under King Louis Philippe, he was successively member of the Chamber of Deputies, Peer of France and Ambassador at Rome, Vienna, and London. His diplomatic talents were of a very high order; and his literary attainments made him one of the most distinguished members of the Institute. As Ambassador at London, he constantly laboured to promote a good understanding between England and France. In his private capacity the Count was respected by all who knew him. Three months back the mother of the Count died, at the advanced age of nearly 100; and, not a month ago, he had the misfortune to lose his daughter, the Baroness de Langsdorff. *Gallignani.*

*** The Obituary in continuation of the recent deaths in the Crimea, will appear next week.

WILLS.—The will of the late Lord Eldon has been sworn to under £180,000 personalty, and will cover upwards of thirty skins of parchment.—Lieut.-General Douglas Mercer Henderson, who died at Naples on 21st March last, has left personalty amounting to £35,000.—Dr. Roupell, M.D., who death was sudden, on 29th September, had made a will, disposing of his personalty, amounting to £10,000.—Lieutenant Arthur William Saltmarshe, 11th Hussars, who died at Varna, 3rd September, personalty £35,000.——John Hamlin Borrer, Esq., Banker, Brighton, £40,000.—Thomas Lewin, Esq., of Raymondbuildings, and Hollies, Kent, died 17th September last, intestate, leaving personalty amounting to £60,000, which has been administered to.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The Right Hon. the Earl of Shaftesbury has accepted the office of President of the Weekly Tract Society.

The Emperor of Russia has conferred the Order of St. Anne, first class, upon the Prussian Minister for Commerce and Public Works.

A public meeting of the working-classes was held in the Corn Exchange, Preston, on Tuesday evening last, for the purpose of considering the best means of establishing a public free library and museum in that town.

Bossuet's coffin and tomb, which had long been lost, have just been discovered in the Cathedral of Meaux. The tomb was to be reinstated on the 12th inst. with a grand funeral service.

The Duchess of Sutherland received an autograph letter of condolence from the Queen on the melancholy and premature death of her Grace's second son, Lord Frederick Leveson Gower.

The *Madrid Gazette* of the 11th publishes a general amnesty, granted by the Queen on the occasion of the opening of the Cortes.

The men here of the Irish Roman Catholic hierarchy, including Drs. Dixon and Cullen, on their way to the "Eternal City," had a narrow escape from shipwreck on their passage from Marseilles to Civita Vecchia. A storm arose, which entirely disabled the steamer; and as they were getting into a boat, a wave came over and rescued them.

The ship-carpenters at the port of St. Helier, Jersey, have struck for wages. They have been receiving 3s. 6d. a day, and have struck for 4d. a day more.

The solemn obsequies of all the deceased sovereign Pontiffs was celebrated with the customary pomp in the Sistine Chapel, at Rome, on the 3rd.

The Very Rev. Dr. Newman, Rector of the Roman Catholic University of Ireland, delivered his inaugural address at the University-house, Stephen's-green, Dublin, on Thursday week.

The Viceroy of Egypt has determined to adjudicate the railway from Cairo to Suez to a French company. This line, joining the English one from Alexandria to Cairo, will complete the communication between the Mediterranean and the Red Sea.

The demand for cavalry horses has caused a rise in the price. In leading districts horses have risen from thirty to forty per cent, and for those of a superior class still more, in consequence of the decided scarcity of supply in comparison to the demand.

A new company is about to be established at Bielfield, with a capital of one million thalers in shares, for the purpose of establishing spinning-mills on the most improved mechanical principles.

Three of the Chambers of which the Swedish Diet is composed have voted the credit of 2,500,000 rix-dollars demanded by the King, for a fund to maintain the neutrality of Sweden in the actual war.

The chaplain of the Leeds Borough Gaol, in his annual report, states that the commitments amount to 1366, against 1278 last year, thus presenting an increase of 88. The cases, though larger in number, are more trivial in character.

The Emperor of Austria, in consideration of the services rendered to Austrian seamen by the Seamen's Hospital for All Nations, has been pleased to present to the society, through the Consul-General in London, a donation of £100.

The new Canadian Parliament passed a bill, by the enormous majority of 70 to 5, for prohibiting the manufacture and sale of intoxicating liquors.

A committee is at work in Prussia, under the direction of the Minister of Justice, for the revision and amendment of the marriage law, especially as regards the facilities now accorded for, and the abuses of, the means of, separation and divorce. There is, perhaps, no country, not even excepting Ireland, where married persons avail themselves so largely of these facilities.

The restorations at Llandaff Cathedral, the shrine of St. Teilo, are proceeding apace. Six thousand pounds has been already spent in restoring the fine Norman work, and removing the Italian ceiling and Renaissance trumpery from the beautiful Lady Chapel and nave.

A new theatre is now building at Genoa. It is to bear the name of Teatro Verdi, and will be exclusively devoted to the performances of that maestro's compositions.

The Hon. Charles Murray, C.B., the new Minister to the Shah of Persia, is expected to leave town this week, via the Overland route, to assume the diplomatic duties of his mission. The hon. Envoy has had several conferences with Lord Aberdeen and Lord Clarendon during the last few days.

A fatal accident occurred on Saturday morning last, by which seven persons met their deaths, at Thistleyfield Colliery, near Rochdale.

The noble family of La Bourdonnaye has suffered severely by the war in the Crimea—one son of Madame de la Bourdonnaye having been killed at the battle of the Alma, and the other before Sebastopol on the 17th ult.

The Duke and Duchess of Brabant intended to leave home for Italy about the 15th. The Duke will travel incognito, under the title of the Vicomte de Ardenne.

There are now enlisted in Spain about 200 000 National Guards. The regular troops scarcely exceed at the present moment one-fourth of that number.

Count de Goltz left Berlin on the 4th, for his post as Prussian Ambassador at Athens. It is said that he is charged expressly with the task of doing all he can to maintain a good accord between the Western Powers and the Greek Government.

King Frederick VII.'s visit to the Duchies is everywhere being turned into a Schleswig-Holstein demonstration against the Kingdom of Denmark, that monarchy of which Schleswig has always formed a part.

General Narvaez is to remain at Vichy as long as the weather shall permit. He has not yet chosen the place of his future residence; he fears to go to Paris, lest his presence should give rise to conjectures about pretended schemes of reaction with the Queen Mother of Spain.

The Austrian Government has given orders for blowing up the rocks and clearing away the shoals which impede the navigation of the Danube near Orsova; and some officers of the Engineers and 300 men have gone there from Semlin for that purpose.

In consequence of the calamitous fire at Memel having destroyed almost all the warehouses, and caused a dead uninsured loss of about £1,000,000 sterling to merchants, the Russian trade has greatly fallen off, and is now principally directed on Konigsberg.

The plan adopted by M. de Hinckeldey, Director-General of Police, for the employment of convicts of certain classes upon divers manual labours outside of, and at a distance from, their places of confinement, having succeeded at Berlin, it has also been adopted with similar success at Leipsic and Wittenberg.

A point of forensic etiquette has arisen among the members of the bar. Some "leaders" have addressed the jury twice—first, in stating the case, and secondly, in reply on the evidence. This practice is disapproved of in some quarters, as unfair to the junior bar. The Judges generally recommend that the bar should make a general rule on the subject.

The reduction in fares on the Caledonian and Edinburgh and Glasgow Railway has increased the number of passengers to an extent which the managers of these lines never contemplated. The number conveyed by the Caledonian last week was 30 567, and by the Edinburgh and Glasgow, 26,646; making a total of 57,213.

A photographic artist of Bourg, named Daviel, has fallen into the hands of the Russians whilst taking a sketch of an engagement not far from Kars. The Russians, being repulsed by the Turks, retreated close to the spot where the artist had posted himself, and carried him off, together with his photographic apparatus.

The telegraphic line from Konigsberg to the Russian frontier having been completed, it is the intention of the Prussian Government to establish branch lines to Pillau and to Memel, which latter half-Russian port will be placed in direct communication with St. Petersburg, as well as with Berlin; so that the Prussian Government will be enabled to obtain instant intelligence of the movement of our cruisers.

Baron de Pinva, the Portuguese Minister Plenipotentiary, had the honour of being received on Sunday last, at the Palace of St. Cloud, by the Emperor, and to present to her Majesty, in the name of his Sovereign, the Grand Cordon of the Order of St. Isabella.

The Baron de Geer, who for a long period has filled the office of Secretary of the Swedish Legation at the Court of St. James's, is about to leave London for the Hague, having been appointed provisional Chargé d'Affaires at the Court of the Netherlands. The Baron will be succeeded as Secretary of Legation in this country by Baron de Wrede, whose arrival from Sweden is shortly expected.

The German papers speak of a contemplated emigration in masses to Palestine, the former "Land of Promise." The plan has already been so far matured, that it has been resolved to petition the German Diet for its intercession with the Sublime Porte to grant a tract of land for the above purpose.

The children of two quarters of Lille, a few days ago, engaged in a contest with stones—one party crying out "A bas Saint Sebastopol!" and the other, "Aux Cossaques!" Neither party would represent the Russians. The police were obliged to interfere and make some prisoners.

There were even wagers on Tuesday at the Jockey Club, Paris, that the south side of Sebastopol would be in possession of the Allies on or before the 15th.

A piece is in preparation at the Gaité, in which the "Lower Empire" will be more than adequately represented—as far at least as can be judged from its title—"Les Cinq Cents Diables!"

TOWN AND TABLE-TALK ON LITERATURE, ART, &c.

Charles Kemble is no more!

Few will be surprised to learn that this great actor has been removed from among us. He had outlived the scriptural three-score and ten—had seen brothers sink into their graves—and had become a living monument of what had been. Few men have passed through life with more rational enjoyment than Charles Kemble. He had lived in the world's eye for upwards of sixty years; and, in addition to the reputation he had attained from his own position, borrowed, in early life, additional lustre from the fame of a brother and a sister, as in his latter years he had lustre reflected on him from a daughter and a son. Happy old man!

This great actor was the last of the Kembles. When "Waverley" appeared, Scott was thought to have thrown his story too far back. "Waverley, or Sixty Years Since," was almost beyond the memory of man; yet it is as many years since Charles Kemble made his first appearance as an actor on a London stage. Who (of English birth) does not know Drury-lane Theatre? Well, it was not in the theatre we now see—commemorated in "The Rejected Addresses"—that Charles Kemble made his first bow to a London audience. It was in the theatre which preceded that—the house which opened for the first time on the 21st of April, 1794 (more than sixty years since), with John Philip as *Macbeth*, and his illustrious sister as *Lady Macbeth*. On that occasion, a boy, scarcely twenty years of age, appeared as *Malcolm*. That boy was Charles Kemble. But his *Malcolm* was not a bit. Too much, perhaps, was expected of him—critics had been led to look for something beyond Sarah and John Philip. His reception was somewhat cool; in fact, it was thought that Charles never would be an actor. But Charles was not disheartened. He knew (no one better) that to become a great actor study was all-in-all. He had heard traditions of actors achieving excellence (or something equal to it) in a night. His sister had forced herself into reputation made by and at once. His elder brother had broken out (as was said of Waller) like the Irish rebellion, thirty thousand strong, and when nobody expected a new star of such magnitude in the theatrical heaven. Failure had not disheartened him; he determined to be an actor; to be what he became. He, therefore, dedicated his days and nights to the study of his profession, and was soon a favourite.

A popular writer is said to be engaged on a work entitled "The Decline and Fall of the English Stage." Charles Kemble delighted in the not on of such a work. It coincided with his views. Yet he was no narrow-minded or tongue-tied admirer of excellence in others. He, of course, did not think Edmund Kean a very great actor—nor did he think his acting based on a good school. Yet he admired him; and would, after disparaging the style, allow him every excellence in that style. He liked Charles Young—he approved Macready. His heart was in his calling. There was no place in London he loved better than the Garrick Club. There he could sit—a large Romanlike figure—a Rossus or a Betterton—deaf (unfortunately) to what was said around him, but exquisitely alive to the memories of the past—perpetuated before him, and on canvas, by Zoffany and Clint. We have heard of his favourite chair and table at the Garrick Club, and of his falling asleep, not many months ago, before a picture (and an admirable one it is) which represents him in one of his best characters, and in the prime of life. We can conceive few more suggestive situations than that of an old and eminent man unconsciously falling asleep before a picture which represents him in the vigour of youth and the gaiety of a mimic scene—both never to be recalled.

Charles Kemble was a great actor. We will not, indeed, go so far as to say that certain parts died with him; but it must be admitted that the last half-century has not produced an actor to compete with him in the characters of *Romeo, Laertes, Falconbridge, Cassio, Mercutio*, and *Charles Oakley*. To have seen Charles Kemble play those parts, was to comprehend Shakspeare almost beyond his book. Who, that has ever seen him, has forgotten his vivacity, his dry humour, his inimitable picture of gentlemanly intoxication—so natural, yet never disgusting; his frequent awfulness of frown—in a word, his thorough comprehension of the part he undertook to set before his audience. He is to be buried this day at Kensal-green.

There is a vacancy in the ranks of the Royal Academy of Arts. Mr. John James Chalon died on the 14th instant, at Kensington. As an artist, he is no loss to art; but the vacancy in the ranks of the *forty* created by his death affords an opportunity to the Academy of supplying the place of an indifferent artist by the election of some one really eminent. Mr. Chalon got elected into the Academy solely by the indomitable perseverance of his surviving brother, the present Royal Academician, Mr Alfred Edward Chalon. From 1816 to 1841 the elder Chalon invariably voted for the younger Chalon. We are betraying no secret: the story is let out in "Wilkie's Letters." Fraternal fondness overcame, on every occasion, the love for art. Such pertinacity of purpose was at last successful. In 1838 he was made an Associate, and in 1841 a Royal Academician. He had, however, many disappointments to put up with before he obtained his full rank as a Royal Academician. He was an Associate long before Newton, Eastlake, Witherington, Hart, Cockerell, Gibson, and Stanfield; and yet all seven were elected Royal Academicians before him. The vacancy will be filled up in February next. The Academy must choose well. The public has now an interest in every election. Mr. Chalon's death, and the present condition of the Academy, have, of course, been fruitful subjects of conversation in artistic circles. Artists are asking who is the father of the Academy? We can answer the question. The father of the Academy is Sir Richard Westmacott; and the next in point of period of election are Sir Robert Smirke, Mr. A. E. Chalon, and Mr. Mulready.

We have yet another death to record, that of James Hall, son of Sir James Hall, of Dunglass (no common man), and the brother of the late Captain Basil Hall. He was an author—he was a painter—yet comparatively unknown as both. He had a warm heart, and spent his little independence in works of charity. He befriended the late Mr Jo eph, the sculptor; and, chiefly through his agency, the statue of Wilkie, now in the National Gallery was entrusted to that sculptor. The two men of his unbounded admiration were Sir Walter Scott and Sir David Wilkie. He bought the original MS. of Scott's "Waverley," and gave it (he was no narrow-minded man) to the Advocates' Library at Edinburgh; he bought Wilkie's palette, and had it inserted in the pedestal of the statue in the National Gallery. His soul was with Art. Pope said of Ambrose Philips that when he first set foot in London his highest ambition was

To wear red stockings, and to dine with Steele.

So poor James Hall's highest ambition was to become a painter, and to sit to Wilkie. He never was a painter, but Wilkie painted his portrait. He has left some choice things behind him, which will of course be sold.

In reference to a statement in our last, we have much pleasure in inserting the following:—

I regret to occupy your space; but permit me to pray the insertion of these few lines in your next Number of the ILLUSTRATED LONDON NEWS, to contradict a statement in your last week's publication, of my mother not being alive. I am glad to say she is well, and acknowledges with gratitude the grant of Lord Aberdeen to each of her daughters. I suppose you were led into the mistake from her having been civilly dead these last fifty years.

Thanking you for your help in supporting my family's claim upon the nation, and these excellent gentlemen who have achieved so much for us in fulfilling the immortal hero's dying wishes. I am, &c.,

NELSON WARD.

The Registrar office, Chancery-lane, 16th November, 1854.

CHESS.

TO CORRESPONDENTS.

M. B.—The opening you refer to is called "The Sicilian." It will be found at p. 371 of the work you name.

R. M., Kidsdale.—There is a small Chess club recently established in connection with the Mechanics' Institution at Leigh, in Lancashire. Apply to the Secretary.

SUBSCRIBER, Brighton.—1. Your Solution of No. 505 will not do: Mate can be effected only by playing Q. 6 per 3rd in the first move. 2. In the Diagram you have sent, a Black Pawn should stand at Black's Q R 2nd.

CANTERBURY Bells.—There is no truth in the reports which you allude.

CIVIS.—The Relation Chess-club is on the Pier Esplanade. You must apply for admission to J. Verner, Esq., the Honorary Secretary, 20, Regent-square.

GERMANICUS.—J. of Farnworth.—The Variation in the Solution of Problem No. 507, depending on Black's playing for his first move K to K 7th, was not overlooked, but omitted from lack of room.

F. H. S., Twickenham.—The Richmond Chess-club now meets every Monday and Friday evenings at Buckingham's Rooms.

AMBE HADLEY, A. Z., and A. B. C.—The "Chess-player's Handbook," published by Bohn, price 5s.

W. B.—It is somewhat too slight for publication

STOCKAERT, M. C., and Others.—*Chess Problems*, as conceived in modern times *never admit of more in less than the number of moves stipulated, except by an oversight on the part of the composer*, who, instead of the some ingenious and subtle combination, consists only and s mate, obvious to the mere beginner

A. B. C., Limerick.—Its was not beaten at those odds. Seven games only were played, of which each party won three, and the seventh was a drawn game.

T. T. S.—A King can Castle either on to a own or to Queen's side.

J. M., of Sherburn.—You are right in your Solution of Cobb's Red-game. What do you make of the by Greco to the same number of our journal?

S. J. U., H. D'A., H. J. MAYER.—Last week's Problem cannot be solved by playing R to Q 5th on the first m ve

J. M.—You must look at No 507 once more.

HOOKWORM.—The passage is not in Hobbes; it occurs in Lord Bacon's "Essay on Boldness" and is as follows:—"For a bashfulness for spirits do commonly betray them and put but with bold men upon this advantage, they stand at a stay; like a stage at chess, where it is no mate but yet the game cannot stir."

F. R., of Norwich.—The best authorities are not agreed upon the point. Some hold that if a player have no other move left, he is bound to take an adverse Pawn en passing; while others are of opinion that the taking a pawn en passant is optional

SOLUTIONS OF PROBLEM No. 505, by Argus, unscanned; W. J., George Kidson, Fred. R., Norwich, B. A., angby-bay, Stupby, Cantab, R. T. M., Phil's Chess Pla, Clement Neeley, Perseus, F. W., J. J., of Farnworth, Rob Roy, Alberts, T. L. Harley, Salisbury, Whist, Omar Pacha, Mercutio, W. St. G., G. F., Sigma, F. R. S., T. W. L., Rev. J. W., J. P. C.—Nine are correct

SOLUTIONS OF PROBLEM by M. W. B., Campden, Perseus, Fox, Mercury, W. T. T., Otho, M. F., Pendragon, Phil's Chess, Rebel ero, B. T. F., George, Albert, D. D., Gregorius, Phi Kappa, Samson, F. P., Rhuno, J. C. R., J. P., Dunbar, Bridget, Verona are correct. All others are wrong.

SOLUTION OF PROBLEM No. 506.

WHITE.	BLACK.	WHITE.	BLACK.
1. B to Q R 7th	K to B 5th, or (a)	3. R to K Kt sq	R moves
2. K to Q 8th	P to R 8th	4. R mates	

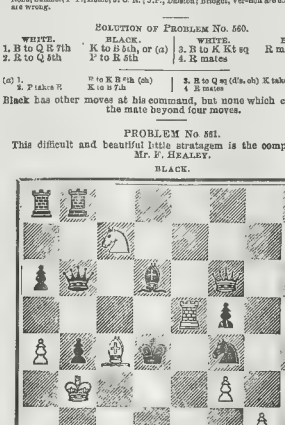
(a) 1. P takes R | P to K R 8th (ch) | 2. K to Q sq (dis. ch) K takes P
K to B 7th | 3. R mates

Black has other moves at his command, but none which can postpone the mate beyond four moves.

PROBLEM No 511.

This difficult and beautiful little stratagem is the composition of Mr. F. HEALEY.

BLACK.



WHITE.

White, playing first, is to give mate in three moves.

CHESS IN THE PROVINCES.

The following well-contested Game was played at the Caistor Chess Gathering, between Mr. STAUNTON, on one side, against Messrs. A. B. SHIPWORTH, T. C. ODDHAM, and other amateurs, in consultation together: Mr. Staunton giving to the Allies five odds of the Pawn and two moves.

(Remove White's K B Pawn from the board.)

BLACK (Allies.)	WHITE (Mr. S.)	BLACK (Allies.)	WHITE (Mr. S.)
1. P to K 4th		23. P takes Kt	Q takes P
2. P to Q 4th	Q Kt to Q B 3rd	24. Q takes Q	K takes Q
3. K B to Q Rrd	P to K 4th	25. R to Kt 2nd	R to K B 3rd
4. P to Q 5th	Q Kt to K 2nd	26. R to K sq	P to Q B 3rd
5. P to Q B 4th	Q Kt to K Kt 3rd	27. R to K 2nd	P to K R 4th
6. Q B to K 3rd	K B to Q Kt 5th (ch)	28. R to K B 2nd	R to K Kt 3rd (ch)
7. Q Kt to Q 2nd	K Kt to K B 3rd	29. R to R 2nd	P to K R 5th
8. K Kt to K 2nd	Castles	30. R to K B 3rd	P takes Q P
9. Castles	K Kt to Kt 5th	31. K P takes P	P to Q R 3rd
10. P to K R 3rd	Kt takes R	32. Kt to Q 2nd	K to K 2nd (c)
11. P takes Kt	K B to Q B 4th	33. Kt to K 4th	P to Q Kt 3rd
12. R takes R (ch)	Kt takes R	34. Kt takes B	Q K P takes Kt
13. Q Kt to K B sq	P to Q 3rd	35. P to K 4th	P to Q R 4th (d)
14. Q to her 2nd	Kt to K Kt 3rd	36. P to Q R 3rd (e)	P to Q R 5th (f)
15. K to R 2nd	Q to K Kt 4th		R to K Kt 6th
16. K Kt to Kt sq	Kt to K R 5th	37. P to Q Kt 4th	(g)
17. Q to K Kt 2nd	R to Q 2nd	38. P takes P (ch)	K to Kt sq (h)
18. Q to K Kt 4th	Q to K R 3rd	39. P takes P (i)	R takes R
19. B to K 2nd	Kt to K B sq	39. P takes Q P	K to Kt sq
20. Kt to K Kt 4th	B takes B	40. P to Q 7th	K to K B sq
21. Q takes B	Q to K B 3rd (a)	41. P to Q 8th	K to B 2nd
22. K Kt to K B 3rd	Kt takes Kt (ch) (b)	42. P to Q 6th	K to his 3rd
		And the Allies surrendered.	

(a) A very important move for White, who now threatens, *could* not *could*, to occupy the K 5th square, when, either, to better the Pawn or both wings.

(b) The Bishop preferred—and perhaps rightly—the immediate loss of a Pawn, rather than permit the adverse Queen or Rook to penetrate within their lines.

(c) That move was no heavy reason. It was well considered; and, as we shall find, it had some decisive influence upon the subsequent play.

(d) The advance of P does not lead to bringing the Q R Pawn for attack, formed anew as per s e Wh e a considerable.

(e) The importance of White a moving his King to R 2nd, now becomes apparent. If Black had been tempted to capture the Q R Pawn, they must infallibly have lost the game, we believe, and in a very few moves; for, let us suppose—

36. R to Q R 3rd	K to K R 3rd
37. R takes P	K to Kt 4th
38. P to Q R 3rd	

(If the Rook returns to Q R 3rd, White still plays King to K B 5th, and wins.)

39.	K to B 5th	40. P takes P, or	R to Kt 7th (ch)
39. P to Q Kt 4th	K to B 5th	P to Q Kt 5th	
		41. K to R sq	K to Kt 6th
	and Black cannot avert the mate.		

(f) This, which appears to throw the game at once into the enemy's hand, by suffering him to march forward the infantry on the Q's side, without let or hindrance, was expedient if not to tempt or compel that advance, by which White trusted to be enabled to accomplish his long meditated and decisive manœuvre of stalemating an exchange of Rooks

(g) P to Q Kt 3rd would have involved more speedy ruin to their game.

(h) Confessedly for very safe defeat. If there is no fallacy in the combination upon which this depends, White must win; but if he have overlooked one link in the long chain, as certainly after this step must be he vanquished—only Kibitzers is passed, and all rest at a loss.

(i) Instead of so playing, it will be obse ved that they might have taken the Rook, and the consequences of that capture it may be improving to examine. Suppose then—

39. R takes R	P takes R (ch)
40. K takes P	P takes Q R P
41. P to Q B 6th	

(Obviously their best move.)

41.	P takes Q R P
42. P takes Q P (best)	P to Q R 7th
43. P to Q 7th	P to Q R 8th, becoming a Queen
44. P to Q 8th, becoming a Queen	Q to K 8th (ch)
45. K to K B 3rd	

(If to K R 4th, White can checkmate in three moves.)

	Q to K B 8th (ch)
46. K to Kt 3rd	

(If to K 3rd, White has only to take the K R P, checking, and then push on to Queen with the Q R Pawn.)

46.	Q to K R 8th (ch)
47. K to Kt 2nd	Q takes K P (ch)
And must win easily.	

MUSIC.

BOOSEY'S OPERA JOURNAL. Boosey and Sons.

This is a new serial publication, set on foot and already carried a considerable length by the above eminent house. It consists of a series—or, rather, of two separate series—of the most celebrated foreign operas, arranged for the pianoforte, either as a set of duets: the one series being for a single performer, and the other being for two performers, or (to use the more technical phrase) for "four hands." In both these ways arrangements of twelve of the most favourite operas of the day have already appeared: "La Sonnambula" and "Norma," of Bellini; "La Fille du Regiment," "Lucrezia Borgia," "L'Elisir d'Amore," "Linda di Chamouni," and "Anna Bolena," of Donizetti; "Ernani," "Rigoletto," "Nino" (or "Nabuodonosor,") "Lombardi," and "Il Trovatore," of Verdi; and "Les Huguenots," of Meyerbeer.

This publication has great claims on the attention of our fair musical readers. In the first place, though it has never been surpassed in elegance of form, in correctness of text, or in beauty of paper and printing, it is published at only half the prices of other editions. The "Sonnambula," for example (the largest of the series, which occupies three books or numbers) costs, as arranged for one performer, six shillings, and, as arranged for four hands, half-a-guinea; and the other operas are at corresponding prices. And in the next place the arrangement are made by musicians of great eminence, especially skilled in this branch of their art. It is sufficient to mention the well-known names of Nordmann, Dabelli and Calicott.

Every musician knows how delicate and difficult a task it is to arrange vocal music for performance without singing, on the pianoforte. Everything depends on the manner in which the task is executed; and we often find two arrangements of the same vocal piece so different, that we scarcely recognise them as the same music. An inexperienced arranger either buries the vocal melody under a load of crowded and awkward accompanying notes; or, wishing to avoid this fault, falls into the opposite extreme, and makes the harmony meagre and insipid. The skilful musician knows how to bring under the fingers both the air and the accompaniments; preserving the flow of the melody, enriching it with the most beautiful combination of the instrumental orchestra; and, at the same time, giving the whole piece the character and effect of pianoforte music. In the operas before us, these objects have been ably and successfully accomplished. We have heard many parts of them played in both forms of arrangement—both by one performer and by two; and we have found that the spirit and effect of the music are happily preserved, while so much attention is paid to facility of execution, and every passage is so careful y accommodated to the pianoforte, that these pieces are as agreeable to the players themselves as to the hearers.

We wish to call especial attention to the admirable manner in which the arrangements for four hands have been executed. This is the most effective manner in which vocal music, accompanied by a full orchestra, can be adopted for performance on the pianoforte. It is in this manner that the richness and variety of the original score can be most successfully preserved; that the vocal parts can be kept most free and distinct from the orchestral accompaniments; and that the richness and variety of the instrumental combinations can be most happily imitated.

MR. HULLAH'S CHORAL CONCERTS.—Mr. Hullah has resumed his excellent oratorio performances at St. Martin's Hall. The first concert took place on Wednesday evening, when "Judas Maccabæus" was performed to a crowded and most attentive audience. Of the performance of an oratorio so familiarly known to the public it is sufficient to say that it was highly satisfactory in every respect. Mr. Hullah's choristers maintained their own and their instructor's reputation by singing with admirable precision, clearness, and effect; and the principal solo parts were exceedingly well supported by Mrs. Sims Reeves, Miss Bleaden, Mr. Augustus Braham, and Mr. Weiss.

THE THEATRES, &c.

MARYLEBONE.—Mr. William Wallack has produced another new five act drama, and with a fair amount of success. This is proceeding in the right direction, and we hope that the public patronage will enable him to persevere in the path of honourable enterprise. In these days of discouragement, he well deserves the support of every true lover of the dramatic and the acting art. The title of the new play is "Love and Loyalty," and it is the production of a young man, Mr. Robson, the son of the "Old Playgoer," whose worthy aspirations are embodied in it. As the title implies, there is a contest in the drama between two strong and dominant sentiments. *Morston*, the hero of the play, is devoted to the Royal interest, and has to reconcile this state of feeling with his love for a Puritan's daughter, whose father is engaged in a conspiracy against Charles II. The manner in which the author has worked out this reconciliation is full of ingenuity, and evinces a comprehensive circle of characters, displaying much skill in their creation. But the head and front of these is the hero, who, for his daring and noble motive, must grow into a dramatic favourite, so soon as the play becomes sufficiently known. The style of Mr. Wallack playing it also was admirable; commencing with his reflections on trout-fishing, proceeding with his sudden conversion to the love of a fair lady, his obliquity in her defence, his wooing, and his defiance of a lordly scoundrel, and embracing his personal fearlessness, his independence, his vigilance and prompt tude in defeating the plans of his nefarious enemy; and, indeed, all the elements which compose a human character of rare excellence, yet perfectly natural. Mr. Robson, however, will do well to purify his diction from an excess of metaphor, and to restrain his tendency to classical allusion. When he shall have accomplished these important points, he will write a still more successful play. Meanwhile, we congratulate him on the hold which the present must needs give him on the national stage.

OLYMPIC.—Mr. Dance's farce of "Beulah Spa" has been revived, to introduce Miss St. George to the boards of this theatre, and a new debutante, Mrs. Fitzallan. The reception of both was highly favourable; and the revival is, besides, likely to answer the purpose of the management.

ADELPHI.—A very fast farce, called "The Step-man," the handiwork of Mr. Mark Lemon, was produced on Thursday. It is occupied with one situation. *Mr. Mustapha Watts*, an epic poet (Mr. Keeley) takes an apartment for the night; and on retiring he had been previously occupied by festival, *Mr Hector Rattle*, and consequently intruded on by a number of strange and unnoticed guests—revelling, bowing, escaping from the police, and other various states of dilemma. The annoyances suffered by the slow but understanding irruptions of opposite natures gives to Mr. Keeley many humourous opportunities, and the curtain descended to great applause.

NICE MARITIME.

NICE MARITIME, now forming part of the Sardinian States, anciently appertained to the Counts of Provence. It is situated in lat. 43 deg. 41 min., long. 7 deg. 16 min. east of London, on the border of the Mediterranean, and near the south-east frontier of France; from which latter it is only three miles distant, and separated by the river Var. Nice is a free port, of which privilege, however, it is much in the discontent of the inhabitants, about to be deprived by the Government. The population, rapidly on the increase, now numbers about 40,000. Numerous visitors, from all parts of Europe, but particularly from France and England, resort here for the winter season—viz. from the end of October till the middle of February, after which time pleasing winds visit it from the south-east. The town lies in a bay, and is sheltered from the north by three ranges of hills and mountains. The nearest, termed Cimies, is some 500 feet high, and covered with a luxuriant and varied vegetation, comprising large groves of the olive, which here arrives at perfection; the orange, fig, vine, the picturesque Mediterranean pines, and other trees. Lovely little valleys run among these hills, and in sheltered situations the palm of Palestine (*Phœnix dactylifera*), aloe, cactus, castor-oil plant, and many other inhabitants of a more southern climate flourish. Numerous plants abound also in the vicinity, and afford much pleasing occupation to the botanist. Beyond this first range rises a second of about 2000 or 4000 feet in height, for the most part barren or scantily covered with pines; and still farther are the Maritime Alps, whose snow-capped summits attain to 10,000 or 12,000 feet. These lie between Nice and Turin. The road to the latter, about 140 miles long, passes over them by the Col de Feude. Marseilles is nearly 160 miles distant. The diligence performs this in twenty-five hours; there are also steamers which make the voyage during fine weather in less time. The scenery on this road is not very striking, passing through a vine and olive country, except while crossing the Estrelle

mountains near Caunes, which are extremely beautiful and well wooded with pines and cork-trees. Genoa is 150 miles from Nice: the road which traverses the famed Riviera, is celebrated for its magnificent views. This route to Italy is the only one practicable for invalids throughout the year; by it the passage of the Alps is avoided. The old town of Nice has the narrow streets which distinguish all Italian cities; but the new portion is clean, handsome, and well built—reminding the English traveller of one of his own watering-places.

The port admits vessels of from 200 to 300 tons. Near it is an isolated rocky hill, formerly crowned by an ancient castle, once closely besieged by the combined forces of the French and Turks. Female heroism alone saved it from capture—the Janissaries had driven back its defenders, stormed the ramparts, and planted the crescent on their summit, when the standard-bearer was cut down by a woman, who rallying her countrymen, drove back the besiegers. Doria relieved the garrison, and the grateful inhabitants erected a statue of their intrepid heroine. A yearly fête is held in commemoration of this event. Crowning the high hill on the east of the town (shown in our illustration), is the Fort Montalbano. From it is a superb view. Corsica may be discerned on a clear day; below is the beautifully-situated village of Villa Franca, with its little harbour and dockyard. Here the climate is even milder than at Nice. Invalids can find accommodation.

The Paglione, a mountain torrent, sometimes nearly dry, but after heavy rain in the mountains, a furious stream, runs through Nice, and is crossed by two bridges—one a handsome stone structure of three arches. On the west bank is the Croix de Marbre, a suburb so named from a cross erected to commemorate the conference of Charles V., Francis I., and Pope Paul III., in 1538. Here is the English Protestant church, a neat edifice, capable of containing a congregation of several hundred persons. The clergyman is the Rev. Charles Childers. Many English reside in this quarter, but it is not considered the healthiest part of the town. In this respect the Cimiez is much to be preferred for invalids, as it is drier and more sheltered, and also less noisy and dusty. There are many good hotels: among the best are the Hôtels des Etrangers, Chauvain, des Empereurs, de France, de l'Europe, Victoria, &c. Furnished houses and lodgings are numerous and excellent. The former, if in the country, and containing about ten rooms, let for about 1000 to 1500 francs for the season; and if taken for the whole year, the expense is much the same. Town houses bring a much higher rent. Apartments are let in floors, as in France: two rooms, with a kitchen, are generally to be hired for from 300 to 500 francs for the season.

Superior medical advice can be obtained; there being, besides native and French practitioners, several able English physicians in Nice, viz., Drs. Gurney, Crothers, and Travis. Turner, near the Pont Neuf, is an excellent chemist.

Good instructors in languages, &c., are not wanting. The Cercle is the principal reading-room; but there is also another very good one at Visconti's—where, in addition to the French, Italian, and other papers, the *Times*, *Galignani*, ILLUSTRATED LONDON News, and English Reviews are taken in. There is a theatre, with concerts, balls, and other public amusements.

The language of Nice and the vicinity is a dialect of the Provençal—a barbarous tongue, equally unintelligible to French and Italians. French, however, both in the shops and hotels, is in very general use; in the environs are several beautiful walks and drives; but the roads are infested with beggars, whom it is to be regretted, the police does not remove.

The Romans resorted to Nice in search of health: the climate is, perhaps, milder than that of any other town of Europe in the same latitude. It is cool, though, adapted for the cure of lung complaints; for these diseases the Spanish Eastern coast is preferable as a winter place of residence. Valuable information on this and will be found in a little work by Dr. Farr, entitled "A Medical Guide to Nice," published by Churchill, Princes-street, Soho.

Besides the English church, there are two French Protestant churches. A Protestant church—thanks to the enlightened liberality of the Sardinian Government, forming so grateful a contrast to Austrian bigotry—as also a building at Turin, where there is a native Protestant community from the Vaudois valleys, whose inhabitants were once the object of such violent persecution, and whom Cromwell, to his honour, protected with his far reaching and all-powerful hand!

The Nizzards are very keen at a bargain. John Bull, as elsewhere on the Continent, is looked upon as a fit victim to be sacrificed on the altar of Avarice. The honest Nizzard, if unsuccessful in fleecing him, thinks himself an injured man, and is certainly a discontented one. Nice servants, when sent to market, add so much per cent. to the cost of their purchases, and also often receive a percentage from the shopkeepers. Cooks are very ingenious in filling grease-pots, in the manufacture of potash, and many other methods of saving at their employer's expense. Provisions, groceries, and wines are much cheaper than in London, or even in Paris.

PAINTED WINDOW PRESENTED TO THE KING OF DENMARK, BY MR. PETO, M.P.

PAINTED WINDOW, PRESENTED TO THE KING OF DENMARK.

In the narrative of the opening of the Royal Danish Railway, in our Journal of last week, we omitted to record the recent presentation of a magnificent Painted Window to the King of Denmark, by Mr. Peto, M.P. The superb gift has been placed in the Chapel Royal, in Frederickshorg—one of the King's country palaces, which is pleasantly situated on a lake midway between Copenhagen and Elsinore. It is a very extensive and highly picturesque building, in the Renaissance style of architecture; and was erected by Christian IV. This Chapel is about 250 feet long, the breadth and width being well proportioned; the whole is most profusely decorated—the walls being covered with ornamental panels and sculpture, and the ceiling elaborately groined, having rich bosses and scroll-work gorgeously gilded and effectively picked out with colour. The King's pew is of ebony and other dark and costly woods, relieved with exquisitely elaborate ivory carvings. The stalls and other seats in the Chapel are of oak, tastefully carved. Immediately over the Chapel is a dining-hall of the same length, the ceiling of which is a perfect marvel of cleverly arranged paneling, exquisite carving, and chromatic colouring. The execution of this ceiling occupied the time and talent of a great number of artists for twenty-five years. There are many other parts of the palace deserving attention; indeed, it is, on the whole, of such an interesting character, that it would of itself well repay a visit from England.

The window we have illustrated is placed on the south side of the Chapel—it consists of twenty-five lights, divided into two compartments. The fifteen upper lights are devoted to sacred subjects. The central one contains a life-size figure of our Saviour, as the Good Shepherd. His head seems radiant with holiness, and His garments denote the spotless purity of his nature; the position, too, in the centre of the Window is a clever conception as indicating the position which he occupies as the focus of God's love and "the brightness of His glory." Above, below, and on each side are circular lights—the one immediately above the Saviour containing a representation of the descending Dove, which is most admirably treated: it seems to be darting straight down from its heavenly dwelling-place with such rapidity, that it draws down with it some of heaven's golden glory, the effulgence of which is intensely bright and dazzling, but becomes gradually dimmed and obscured as it approaches the misty regions of earth. Beneath our Saviour is John the Baptist, pointing upwards, as though in the act of saying, "Behold the Lamb of God!" On each side are the Evangelists Mark and Luke, surmounted with their respective emblems. Six of the lights contain the Apostles—two in each: these figures are exceedingly well drawn, and characterised by perfect repose. The colouring of the drapery is strikingly harmonious; and, indeed, the masses of colour in the whole Window are so judiciously distributed as entirely to obviate that monotony which is frequently observed in windows treated as this is, without any pretensions to pictorial effect, but in pure mosaic style.

The four corner lights contain angels holding ribbons upon which are inscribed some of the sacred precepts of our Saviour; the borders surrounding the angels have the appearance of niches, and, being composed of the lily, are both emblematically and artistically beautiful.

The ten lights composing the lower compartment of the window are appropriated to the heraldic devices and Royal insignia of earthly sovereignty. A medallion portrait of the present King of Denmark occupies the centre: it is a correct likeness, and very effectively executed. Immediately under are the Royal arms; and the other lights contain the various insignia of the State of Denmark, ingeniously and gracefully treated, and the colouring rich and sparkling. The whole of the grounds are covered with minute but beautiful tempering, so highly finished as to bear close inspection. This, together with the scrolls, shields, &c., give evidence of a vast power of ornamental design in the artist, as well as a correct acquaintance with the principles of harmonious colouring.

This beautiful Window was designed by Mr. John Thomas, of Paddington; and executed by Mr. James Ballantyne, of Edinburgh.

NICE, FROM THE WEST.

CHRYSANTHEMUMS IN THE INNER TEMPLE GARDENS.

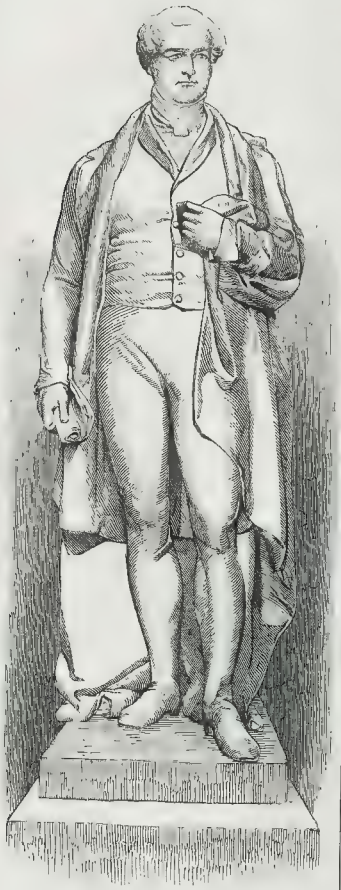
THE floral celebrity of the Inner Temple Garden is of Shakspearean commemoration; but the London atmosphere of our day no longer allows the red and white rose to bloom in this garden as they did when they became the badges of York and of Lancaster. A very pleasing substitute for these delicate flowers has of late years been introduced into the garden, namely, the Chrysanthemum, which, in its gay profusion, cheers the proverbial gloom of London November. The collection this year consists of above 200 varieties of Chrysanthemums of every hue—of which some forty are new. Accordingly, this year's display is one of the best shows of the kind, and much credit is due to Mr. Broome, the gardener to the Hon. Society of the Inner Temple, for the care and attention he has bestowed upon rearing this beautiful flower, which is a great ornament to the Gardens, at a season when most other flowers have disappeared. It is curious, also, to witness such a display of delicate colour in the heart of the metropolis, in defiance of the "smoke nuisance."

A short time since, the *Horticultural Journal*, speaking of what may be done towards rendering London gardens more sightly than they usually are, remarked:—"Look at the Temple Gardens, in the midst of waterside factory chimneys vomiting black smoke, yet always kept as clean and as bright as a new pin. Nursery maids and children can walk about there as free from dirt as if they were in the country, and all this for the difference of a few pounds a year to the gardener."

CHRYSANTHEMUMS, IN THE INNER TEMPLE GARDEN.

MARBLE STATUE OF THE LATE SIR ROBERT PEEL.

THIS fine statue, from the chisel of Mr. Noble, of Bruton-street, has been executed by public subscription in Liverpool, and has recently been placed in St. George's Hall. The statue is of white Carrara marble, six feet six inches in height. The dress is modern, the sculptor having judiciously eschewed the anomalous custom of robing English worthies in Roman costume. The attitude of the statue is dignified and easy; and it is at the same time a highly finished work of art, and a successful portrait of the lamented statesman.



MARBLE STATUE OF THE LATE SIR ROBERT PEEL (NOBLE, SCULPTOR), RECENTLY PLACED IN ST. GEORGE'S HALL, LIVERPOOL.

Mr. Noble was also the successful competitor for the £7000 testimonial to the late Duke of Wellington, at Manchester. The same tasteful sculptor executed the monument over Hood's grave at Kensal-green.

HARD FARE.—I was amused at a letter from an "Old Indian," on the manufacture of campaign bread *more Indico*, in which he advises us out here to use salt! milk! and butter! in the preparation of what must be most delicious food. Salt is a luxury which is rarely to be had unless in conjunction with porky fibre; and as to milk and butter, the very taste of them is forgotten. Lord Raglan was very glad to get a little cold pig and ration rum and water one night on our march here. However, the hardest lot of all is reserved for our poor horses. All hay rations for baggagers are rigidly refused; they only receive a few pounds of indifferent barley. There is not a blade of grass to be had—the whole of these plateaux and hills are covered with thistles only, and where the other covering of the earth goes I know not. The hay ration for a charger is restricted to six lb. daily. Under these circumstances horse-flesh is cheap, and friendly presents are being continually offered by one man to another of "a deuced good pony," which are seldom accepted.—*Letter from the Crimea.*

THE BACON CUP.

THIS elegant and interesting relic of bygone times was made from the Great Seal of England from Sir Nicholas Bacon, Knight, Lord Keeper, father of the great Lord Bacon. Sir Nicholas left this Cup, as an heirloom, to his second son, Sir Nathaniel Bacon, of Stiffkey, (or, as it was anciently called, Stewkey), county Norfolk, K.B., one of the most distinguished painters of his time. It is silver gilt; its dimensions are eleven inches in height, and diameter of the bowl seven inches, and on it are engraved the arms of the Bacon family, and the following inscription:—

THE BACON CUP.

A thyrde bowle made of the Greate Seale of Englande, and left by Sr Nycholas Bacon, Knyght, Lorde Keeper, as an heyrelome to his howse at Stewkey, 1574.

The motto of the Bacon family, "Mediocri Firma," is on the cover, which is surmounted by the crest, a boar passant ermine.

This cup came into the possession of the Townshend family, in which it has remained ever since, by the marriage of Anne, the eldest daughter and co-heir of the above-mentioned Sir Nathaniel Bacon, with Sir John Townshend, of Raynham, county Norfolk, Knight. From him it descended to the late Lord Charles Vere Ferrars Townshend, who bequeathed it to his cousin, John Vilhers Stuart Townshend, Esq., its present possessor, son of Captain Townshend, R.N., M.P., who has recently succeeded to the Stiffkey estate.

LONDON AND WESTMINSTER BANK.—HOLBORN BRANCH.

IT is gratifying to notice, from time to time, in the metropolis the exemplary proceedings of many of our wealthy London firms in improving their premises, so as to conduct their business both systematically and sanitarily. In the new building which has just been completed for the London and Westminster Bank (the parent of all the joint-stock banks), in Holborn, we are happy to recognise the vigour of the Directors, and the prudence which has dictated so judicious an outlay.

Those who kept their accounts at this branch a year or two ago will remember the stifling air which met them on opening the shop door of the old place—ceiling about ten feet high—gas burning all day—dirt, darkness, and discomfort everywhere—unfit even for the passing visit of a customer, and most obnoxious to the health of the employés doomed to inhale the foetid atmosphere daily for eight or nine hours. A healthful change has, however, been made. We now enter, through doors of British oak, one of the handsomest and most convenient offices in London; giving immediately an impression of ample space, abundant light, and proper ventilation; the temperature being so even, without draught, that the thermometer varies but three degrees in the course of the day. In the general arrangement of the business department, Mr. Henry Baker, the architect, availed himself of various useful hints in Mr. Gilbart's "Prize Essay on Banking," and carried out the work under the superintendence of a Local Committee of Directors, and with the assistance of the able Manager, Mr. William Ewings. The counters, desks, and fittings are all of the finest oak and Spanish mahogany. The basement story is fireproof, and almost wholly occupied by seven large strong rooms, classed and arranged, to contain money and securities, plate-chests, title-deeds, &c. In one room are about thirty strong iron lockers, of beautiful workmanship, each with a patent lock, adapted for the use of customers who may choose to retain their own key. The several apartments are warmed by hot water, lighted by gas, thoroughly free from damp, and well ventilated. One apartment, with open fireplace and external light, is set apart for the use of the legal profession, who may avail themselves of the opportunity of keeping their clients' papers and deeds in a place of perfect security; and of examining such documents when occasion requires without further trouble than merely removing the box containing them from the strong room to the apartment referred to. This is a great convenience, and well worthy the attention of those prudent attorneys who dread a fire for which no policy of insurance can compensate.

In conclusion, we cannot but express our satisfaction at this artistic improvement of our street architecture. The elevation is entirely of Portland stone, and in the Italian style, not fine or redundant in ornament, but with a high effect produced by good proportion and well studied detail. The upper part is the private residence of the manager.

Mr. Henry Baker is the architect of this handsome pile, and Mr. Myers the contractor.

THE LONDON AND WESTMINSTER BANK. HOLBORN BRANCH.

The opening of this building affords an opportunity of presenting to our readers a sketch of the recent improvements that have taken place in the system of London banking. At the renewal of the Bank Charter, in 1833, the Legislature enacted that banks with an unlimited number of partners might be established in London: accordingly, the London and Westminster Bank, with a subscribed capital of £5,000,000 sterling, of which £1,050,000 has been paid up, was formed in the year 1834. This new establishment adopted several new principles in dealing with the public. Parties were allowed to lodge money upon interest even for short periods, so as to suit the convenience of those who had large sums of money waiting for investment. The sums previously lodged at distance from their usual residence, or those who have money to spare, but send it to the bank, where it is safe from fire or thieves. Those who have large sums they wish to render productive, take them to the bank, and lodge them upon interest. They who wish for temporary advances, apply to the bank. They who are out of business, find that the banker's pass-book furnishes them with a perfect register of their domestic expenditure. They who have valuable documents, as leases or life policies, can put them in a box and commit them to the care of the banker; while the more wealthy, who have chests of plate which they wish to place in security, when they take their summer rambles on the Continent, have only to send them to the bank. At the same time, all classes have, in the person of their banker, a friend readily accessible, who will give them the best information as to the right way of conducting all their pecuniary transactions.

These advantages were supplied to the inhabitants of the district of Bloomsbury in January, 1849; when a Branch Bank, upon the new system, was opened at No. 218, High Holborn.

Although this establishment is called "the Bloomsbury Branch," it has in its relation to the public the attributes of an independent bank. All the arrangements of the London and Westminster Bank tend to localize their branches so as to give them as much as possible the character of independent institutions, combined with the additional security and accommodation to be obtained from a more extended and wealthy establishment.

NATIONAL SPORTS.

It says not a little for Mr. Frail, that he has been able to keep so many horses in training till the middle of November; and Charlton, Wells, and Ashwood will hardly be ready to start for their nine months' labour in the sand. Hoylake has a sweepstakes fixed to meeting on Wednesday, with five-race, two of them at racing weights, to be succeeded by a steeplechase on it for Monday. Wirral Park has also got a four steeplechases on it for Monday. The Worcestershire Autumn Meeting is fixed for early in December; and, as three of its events also are flat racing, we may witness the strange phenomenon of a racing season protracted till within three weeks of Christmas! The Coursing Meetings take up for the retirement of at least 1700 racers to their straw beds, and come "fast and furious" during the next week. Ashdown Park (Champion) is fixed for Monday, Sco.; Whitehaven, for Monday and Tuesday; Leyburn (Wensleydale), for Tuesday; Brough and Coquetdale (so famed for its fishing songs), for Tuesday and Wednesday; and Chatsworth (open), for Wednesday and Thursday. Limerick holds its meeting on the latter days; and those at Sandgrove (Salop) and Singleton (Lancashire) close Wednesday and Friday.

Among boating men, the match between Cole and Messenger, which takes place for £200 a side from Putney to Mortlake next Monday, is looked forward to with the deepest interest. It is difficult to say which has the call on the betting: age they are nearly equal; but Messenger has rather the advantage in weight. The start will, we hear, be made about a quarter before two; and the Goldsmith's barge will be moored as the winning post off the Ship at Mortlake. On the following day, two other matches will be rowed on the Thames; one for £20 aside, between Cannon and Corpe; and the other for £5 aside, between Isaac and Woode. The Lady Margaret (Oclquhoun) Sculls are also to be pulled for on Tuesday at Cambridge. These little silver trophies have long been objects of the most earnest competition among the Johnians. In fact a poem, which lately appeared in a University Magazine, tells how that distinguished scholar, Bishop Selwyn, lately made his visitation to many of the sea-beat parts of his distant diocese, in a boat with an old college friend, thus recalling, at the Antipodes, many a fond recollection of the days when "they read, and pulled together in the Lady Margarette," nearly a quarter of a century before. A skiff match is also arranged at Oxford, for the 27th, for £20 aside, between Beesley and Brown, from Jeffey to Oxford. They have rowed the distance before, but some fouling took place.

No sales of the slightest importance are, as yet, announced for Tattersall's next week. On Wednesday the Doncaster Corporation meet in council, to vote the usual race grant; but, although their £1000 Church subscription instalment, and the £681 they have laid out on a new stand, have made them debtors to the sum of nearly £2000 to their treasurer, for the year ending Sept. 1st, 1854, they have now far too much "quiet good sense" to go and cripple their race receipts, and get to loggerheads with the racing men, by refusing to vote the £1200. Their entries this Martinmas have been most excellent as a whole, while those at Goodwood have been a painful failure; which cannot be wondered at, seeing that the head of the house has quite abjured racing, while the added money is also on the most niggardly scale. Of late years, Doncaster and York have been most admirably managed, and they bid fair to throw their great rivals, Ascot and Goodwood—completely into the shade. Newmarket has good entries for her 2000 Guineas and 1000 Guineas Stakes, in 1856; and, among the 36 in the former, are Mario, Voivode, and Yellow Jack—all of which are 1000 guinea yearlings; the two first of which also figure in the Doncaster Champagne. With regard to Newmarket, a contemporary states that its past season may be summed up thus:—27 days, 101 races, 949 starters, and £43,415 stakes.

As regards general news, we may state that Andover's brother is christened Anton, and that Virago heads the winning list with her brace of 300-Sov. Cups and £9645. Her veteran trainer was present last week at the ceremony which introduced their keepsake to his son Alfred's smug "Pyrrhus Cottage," near Longstock: and Charlton, it is also whispered, intends to follow his brother jockey's example. The great better, Mr. Davis, has subscribed 110 sovereigns to the Patriotic Fund.

Tattersall's was decorated for the Westminster-hall when the Alleyne writ of error was discussed last week; and after nearly eight years has been expended in endeavouring to elude justice, the three brothers are at last fairly fixed.

The law has been less fortunate on the foray it made this week on some betting-house patrons. General news is very scarce; but we may add that Hermitage has beaten Border Chief in his 2000 gs. match.

SHREWSBURY AUTUMN RACES.—TUESDAY.

Abbey Stakes.—Rosaline, 1. Romeo, 2.
Astley House Stakes.—Bolton, 1. Plausible, 2.
Match, £100.—Go-away, 1. Syren, 2.
Shrewsbury Cup.—La Belle, 1. Boddicot, 2
Copeland Nursery Handicap.—Bolton, 1. Plausible, 2.
Racing Plate.—Voucher, 1. Liberty, 2.

WEDNESDAY.

Hurdle-race Sweepstakes of 10 sovs. each.—Jerrywheat, 1. Kiteflyer, 2.
Two-year-old Selling Race.—Priestcraft, 1. The Baronet, 2.
Welter Cup.—Little Tom, 1. Castlehurst, 2.
Seven Stakes.—Voucher, 1. Jack Leeming, 2.
Column Handicap.—Isaiah, 1. Middlebrough, 2.
Sweepstakes of 10 sovs. each.—Nell Gwynne, 1. Professor Airy, 2.
Monkmoor Handicap.—Kennyside Hero, 1. Black Pepper, 2.

THURSDAY.

Handicap.—Priestcraft, 1. Baronet, 2.
Annual Steeplechase.—Peter, 1. Escape, 2. Peter objected to, and the race given to Eclipse.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

There has been a fair demand for money this week the supply of which continues good, and the rates of discount have been firmly supported Dollars have sold at 4s6d, and bar silver at 5s4d. per ounce.

In the early part of Monday Consols were firm, at an advance of ¼ per cent; but the Market subsequently became dull and heavy. The Three per Cents reduced marked 92¾ ¾ ; the Three per Cent Consols, 93¾ ¼ ; Consols for Account, 93¾ ½ to 93½; and the New Three per Cents, 92¾ ¼. India Stock was 258 to 260; India Bonds, 11s.; Exchequer Bills, 4s. 5s. 6d. prem. Exchequer Bonds were done at par. On Tuesday very little business was transacted:—Bank Stock, 211 to 213½; Three per Cents Reduced, 92¾ ¾ ; Three per Cent Consols, 93¾ ¼ ¾ ; Ditto for Account, 93¾ ½ ; New Three per Cents, 92¾ ¾ ; Consols for Account, 93¾ to 90⅜ 93½; Long Annuities, 4 5-16. India Stock, 259. India Bonds, 10s. to 12s.; Exchequer Bills, 4s. to 7s. prem. Exchequer Bonds, 100. There was much weakness in prices on the following day. The Three per Cents Reduced marked 90⅜ 91¾ 89⅞; the Three per Cent Consols, 92 ¾ ¼ ; Consols for Account, 92 ¾ ¼ ; New Three per Cents, 91 ¾ 90. Long Annuities, 1859, 4 5-16. India Bonds, 9s. to 12s.; Exchequer Bills, 4s. to 7s. prem. Exchequer Bonds, 99½ 99⅝. On Thursday Consols were dull in the early part of the day, owing to the continued heavy Bonds, 11s.; Exchequer Bills, 4s. 5s. 6d. prem. Exchequer Bonds were done at par. On Tuesday very little business was transacted:—Bank Stock, 211 to 213½; Three per Cents Reduced, 92¾ ¾ ; Three per Cent Consols, 93¾ ¼ ¾ ; Ditto for Account, 93¾ ½ ; New Three per Cents, 92¾ ¾ ; Consols for Account, 93¾ to 90⅜ 93½; Long Annuities, 4 5-16. India Stock, 259. India Bonds, 10

AMUSEMENTS, &c.

Pipe. Wine Cellars, Bride-lane. P.S. Fifty Cases of excellent light Champagne, at 36s. per dozen; or 6s. per Gallon in the cask.

FLOWERS, EVERGREENS, Fruit Trees, &c.—The following PRICED Descriptive CATALOGUES may be obtained Free by Post in return for One Postage Stamp each:—A. ROSES, Dwarf Evergreens and Trees; B. Fruit Trees; C. Herbaceous Plants; D. Greenhouse Plants, &c.; G. Seeds, H. Heiffers, Bulbs. All packages free of carriage to London. R. and J. PARKER, Nurseries Chessmont, Herts

EARLY FLOWERS, adapted for blooming in doors and out of doors, in pots, in the open border, in the shrubbery, &c., &c., &c.,

(Continued from page 514.)

field, in the year 1792, in the character of *Orlando*: and occupied himself for a year in playing various characters at Sheffield, Newcastle, and Edinburgh. His first appearance upon the London stage was in the character of *Malcolm*, in "Macbeth," which he performed at Drury-lane, in the winter of 1794, continuing for two years to assume parts equally subordinate. On account of the illness of his brother John, during the run of the opera of "Mahmoud," Charles was called upon to supply his place at so short a notice, that he was obliged to take the book with him upon the stage; when feeling his confidence strengthened, and his emulation awakened, he threw aside the book, and performed the character with spirit and extraordinary success. He soon afterwards appeared as *George Barnwell*: Mrs Siddons on the occasion performed the part of *Milwood*. The next step which he made was in *Alonzo*: then followed *Campley*, in "The Funeral," and *Young Mirabel*. In 1800 he adapted to the English stage the "Deserteur" of Mercier, performing the principal character with singular applause at the Haymarket Theatre. In the following year illness obliged him to relinquish his engagement at the Haymarket, and he spent the summer in Germany, for the re-establishment of his health, and for the study of the language. From that period Mr. Charles Kemble's career is identified with that of his brother John, until the death of the latter. He did not, indeed, attain the high estimation which he so long enjoyed previous to that event. The station which he subsequently achieved was the reward of slow and steady progress, of continual labour, and unwearied self-examination—the result, indeed, of earnest study, pursued for many years, and under circumstances of peculiar difficulty. During a long period the excellences of his elder brother and sister had an adverse influence on his fortunes: he might, as it has been said, "have had a larger portion of the sky to himself but for the brightness of their twin-constellation." The press, too, for some unaccountable reason, was adverse to him. This circumstance, however, interfered less with his success than may be now imagined. For, to adopt the language of his artist biographer, Mr. Lane, "at the time when John Kemble and Mrs. Siddons were in the zenith of their fame, when the theatre was mostly looked upon as a school of manners and the most intellectual of all entertainments, the public both attended it, and formed their own opinion of the plays and players; the discovery of the compendious method of judging unseen performances through the medium of a newspaper critique being reserved for an age which steam-engines should propel along at a pace too rapid either for judgment or reflection. In those days, too, when the great men in literary and public life were to be seen in the front ranks of the pit, forming a tribunal whose verdict none could venture to disregard—an actor could not hope for success on easy terms. Around him were eager rivals, emulous, industrious, and early drilled in the exercise of their profession—for any company, at that period, presented a compact mass of talent, which it would now be difficult to equal, were all the provinces and the metropolis to combine their favourites for the purpose; before him were the master-minds of the time—the orators and artists, the wits, and men about town—accustomed to severe rules of judging, intolerant of error, highly educated themselves, and demanding high qualifications in the candidates for their favour. To pass through this ordeal with success was to deserve it."

Under such influences Mr. Charles Kemble gradually matured as an artist, and continued the number of mighty actors, that swayed the destiny of theatres. The system lasted long; and, on its exhaustion, they also showed symptoms of decay. To sustain the fortunes of Covent-garden, Mr. Charles Kemble was willing to make any sacrifice, and to that end successively devoted two of his highly-accomplished daughters—Fanny and Adelaide: the former, a fine poet and actress; the latter an unrivalled singer. Their mother, in the early days of their father's career, had trod the boards with him. Miss De Camp was a comic actress of great excellence. The Old Playgoer says of her that "she played *Lucy Lockit*, *Audrey*, and many other characters, requiring a spice of comic humour as well as spirit: she was by far the best *Lucy* I ever saw." The genius of dramatic representation, therefore, was in the veins of these young ladies, and they justified it fully in their success.

It was not alone by force of art that Charles Kemble won the crown after which he had so long aspired; Nature, also, had done much for him, in the dignity of his form, the beauty of his person, and the buoyancy of his disposition. She had bestowed on him various attributes that qualified him for the highest and lowest range of characters, but made him supreme in those of the middle class. His *Mark Antony Cassio*, *Faulconbridge*, *Romeo*, *Mercutio*, *Don Felix*, *Charles Surface*, *Petruchio*, *Benedick*—all these have never been equalled. He had also performed *Falstaff*, *Octavian*, *Lovelace*, *Macbeth*, *Oberon*, *Lear*, and *Hamlet*. The last-named character formed the crowning effort of his life: and, to our mind, was the most elaborate and princely delineation of the Shaksperian ideal ever attempted. The finish of it was exquisite—wonderful. It was in finish, indeed—that indescribable "last touch," which places a work of art on the pedestal of admiration beyond the reach of censure—that the Kemble family delighted. Charles Kemble carry it to the highest pitch; and this he did by the refinement of his taste and the cultivation of his mind. He demonstrated, at last, the close distinctions that exist between [illegible] and natural beauty of a part: he exhibited how delicately [illegible] mind, who emerges to the stage only an artist of routine. He often frequently associate vulgar, even ugly, but beauty is the polestar of the [illegible], and he never could thereby be moved the Truth and the Familiar with the [illegible] that please and [illegible]

THE LATE MR. CHARLES KEMBLE, FROM A MARBLE BUST BY TIMOTHY BUTLER.

We have already [illegible] to the testimony rendered to the excellences of Mr Charles Kemble by the presentation to him of the Chantrey vase. It was the thought that his acceptance of the office of Examiner of Plays had precluded any further exercise of his profession. At the command of her Majesty, however, he consented for a while to rehearse the scenes of his former triumphs. The stage of Covent-garden was the chosen arena. Again he played *Don Felix*, *Mercutio*, *Benedict*, and *Hamlet*. With this fine and great assumption, Mr. Charles Kemble's career as an actor finally closed on April 10th, 1840. As a reader of Shakspeare, he sometimes appeared in public subsequently; but the occasions were few; and, however gratifying and instructive, it was not desirable that they should have been more numerous. In such cases, rareness is a quality essential to the impression.

We have already implied our opinion of Mr. Charles Kemble's style of acting, both in regard to the school to which he belonged, and the peculiar disposition to which he was prefigured by the great hand of Nature herself. We cannot do better than extract from the sentence of one of his critics some of the details involved in the more general statement. It "embodied simplicity, propriety, and extreme grace; his elocution was perspicuous and flowing; in action and deportment he ranked the master confessed; in him it was neither effort nor merit to play the gentleman in every motion and under every circumstance—the scene making the requirement. High deportment, and that certain demeanour which is the property and attribute of gentlemen, seemed in him the result of a physical and mental necessity rather than the artificial or accidental accomplishment of a profession." That they were really such result, they who knew him well can honestly vouch. In the relations of private life, in the library, and the drawing-room, Mr Charles Kemble was what he seemed on the stage. It was delightful to be acquainted with him. Not only were his manners always courteous, but his motives were uniformly honourable. All felt that they could confide in him, for he was generous and noble; gave with liberality, and forgave with heroism. He was as a man what he was as an artist—an example of finished excellence produced by labour and study, working on an original nature, admirably predisposed to "fine issues."

The accompanying Engraving is from a very [illegible] executed from a marble by Timothy Butler, for Mr Kemble, and now in the possession of [illegible]. Many of our readers will recollect Mr. R. J. Lane's series of graceful studies of Mr. C. Kemble, in his leading characters.

NEW BRIDGE OVER THE SEVERN, AT UPTON

The town of Upton-on-Severn suffered a serious loss by the destruction of its ancient bridge, during a heavy flood, in the early part of 1852: and it was not until July of the same year that the New Bridge (of which the annexed is a view) was commenced. The autumn of 1852 was, however, particularly wet and unfavourable for the progress of such works; and the laying of the foundations was thereby delayed until the ensuing summer. The New Bridge has been for some time partially opened for traffic, but it is now completed. The design was selected from competition drawings; and there are some peculiarities in the construction of the work which deserve notice. The length of the Bridge is about 250 feet, in two spans of 60 and two of 45 feet. The piers and abutments are of Forest of Dean stone, built on piles; the tubes and girders being of wrought iron with cast road plates. The opening span of 45 feet, is in one leaf, which, with the necessary counterbalance, is about 100 feet long; and, being on Large's plan, the entire leaf is run back horizontally under the approach-road or platform, which it lifts in its progress; and, as the leaf is run out again, the platform falls into its original position. The moveable portion of the Bridge, with the platform, weighs nearly 100 tons, and it is run in and out by two men. This method of working an opening Bridge is the invention of the engineer, Mr. Alfred Giles; and it has the advantage of being adapted to sites where, from want of quay room, swing-bridges would be inadmissible.

The contract for the masonry were Messrs. Nowell, of Birmingham; and for the iron-work, Messrs Butler and [illegible], Stratford-by: and the total cost of the work, including approaches, &c., was about £10,000.

NEW BRIDGE OVER THE SEVERN, AT UPTON.

THE ACTION AT BALACLAVA, OCTOBER 25.—FIRST CHARGE OF HEAVY CAVALRY.

THE SIEGE OF SEBASTOPOL.

(Continued from Number, page 508.)

As the Russians advanced, the panic increased; and, when it came to close quarters, there was a general run. The wretched Turks swarmed down the hill like bees; and our artillerymen, seeing the rout, spiked the guns and retired. The Turks in the other redoubts, finding that their comrades on the right had fled, took the alarm, and the whole of them were, in a few minutes, running out of the redoubts, abandoning our guns and artillerymen to their fate. This disgraceful flight took place when no enemy was threatening, except cavalry, which, witnessing the rout of our allies, instantly followed in pursuit, and were observed, in a few moments, crowning the height and occupying the whole line of our forts. Happily, the guns in all the works had been spiked, and the enemy were not able to fire into us with our own artillery. The Russians lined the crests in time to see the 93rd Highlanders deployed in line on our right, and the Heavy and Light Brigades drawing up in order to the left, on the very ground where they had struck their tents. Their astonishment must have been considerable to see the 93rd pour in a volley at the flying Turks, to prevent them from running. Elated by their success, and seeing our cavalry and the 93rd below, immovable, two regiments of Hussars, the Woimarski and Louchtenbergski, charged down the slope, at the Highlanders, with a tremendous cheer. On they came, at the top of their speed, as if to annihilate everything. The Highlanders, however, headed by their gallant Colonel (Ainslie), disdained to form into square to receive them, but poured in a sharp fire at fifty yards, which made them sheer off to their right. As they turned they found themselves in front of our Heavy Cavalry Brigade, which, after a pause, they charged with considerable vigour. They were met by a squadron of Scots Greys, headed by Colonel Griffith, and by a squadron of the Enniskillings, headed by Colonel White. A tremendous hand-to-hand conflict was the instant result. The thick woollen cloaks of the Russians, being admirably calculated to ward off steel, deadened at first the effect of our blows. But our men attacked the head instead of the limbs, and several of the enemy were laid in the dust. Colonel White, in the first shock, received a tremendous blow, which cut through his helmet, but did him no injury. The number of the enemy being greater than ours, they had by this time considerably outflanked us. The Hussars, who had been followed by numerous Cossacks, were beginning to attack us on both flanks, as well as in front, when Major Shute gave the word to his squadron of Enniskillingers; the Royals moved at the same moment; and the enemy, being overlapped in his turn, began to flag, and commenced a retreat. This they did under cover of some field-pieces moved up by the Russians to the crest, but not without damage from our artillery, which now advanced to the front, and from our guns in position before Katichioi. The last charge of British cavalry in the battles of Europe was called the charge of the National Brigade, because it was furnished by the Royals, Enniskillings, and Scots Greys. The first charge of our cavalry in the Crimea was made by the National Brigade, and resulted in considerable loss to the enemy. Upwards of thirty men and horses remained killed or wounded on the field; but the numbers who retired wounded cannot be counted, the Russians having the habit of strapping themselves to their saddles, that their horses may carry them out of action when they are wounded. All the men who fell with their horses were found to have been thus buckled. As the cavalry moved on in pursuit of the enemy, the ground had the strangest aspect imaginable. The tents had been struck at the signal of alarm, but no time was given to pack them. They lay on the ground with the kits of the men and baggage of the officers, and in the midst of these lay dead men and wounded, whilst a skulking Turk or Greek might be seen here and there turning up the effects with a view to plunder. Many valuables were unfortunately lost in this way. Would that this had been the only disaster to record during the day.

As our cavalry moved on, supported by our artillery, the enemy retired from the redoubts on our left, and held their ground in two of those on our extreme right. The 93rd remained in line before Katichioi, and the infantry from the divisions in front of Sebastopol, were observed coming down. Several companies from the 1st battalion of the Rifle Brigade moved up, and having taken possession of the centre redoubt, abandoned by the enemy, advanced beyond in skirmishing order. The Third Division, under Sir G. Cathcart, followed; and whilst a wing of the 20th occupied the ditch of the redoubt, the other wing lay down behind, with the 63rd, 57th, and 68th behind them, and the rest of the division in the rear. The Guards, under the Duke of Cambridge, were placed so as to cover the road to Balaclava. Whilst these movements were going on, two regiments of French Chasseurs d'Afrique moved down from the heights and took up a position on our left, amidst tremendous cheers. The position of the Russians and Allies at this time formed almost a parallelogram. Our infantry and guns occupied one side; and at right angles with them were the French Chasseurs and our Heavy Brigade of Cavalry. The Russians occupied with artillery and infantry a line of heights parallel to that which we occupied, whilst their masses of infantry and cavalry fronted the French Chasseurs. The Russians, however had the additional advantage of holding two of our intrenched redoubts. They were thus enabled to pour in a destructive fire upon us from right, left, front.

At the moment when the contending parties occupied these positions, Captain Nolan was observed galloping up to Lord Lucan, who headed the Light Brigade of Cavalry. He was the bearer of an order from Lord Raglan to charge the enemy. I am not aware whether any discretion was left to Lord Lucan to obey or disobey, nor is it even certainly known what was the exact wording of the order; but, at the signal of command, the Light Brigade, which was posted on the left of the redoubt occupied by General Cathcart's division, was observed to move. The 17th Lancers led with 150 sabres, the 11th followed with 150, the 4th with 140, the 13th with 100, and the 8th with 110 sabres. Right at the enemy's guns the devoted column started, with Lord Cardigan at its head. Trot, canter, gallop—on they rushed in the midst of a most dreadful fire. A field-battery, on the heights of the Russian right, decimated them; whilst another fire, equally terrific, spread destruction through them, from the guns on the Russian left; and a third mowed them down in front. It was a fearful sight to behold our brave fellows falling in fifties to the ground, most of them to rise no more; others, dismounted, rushing to the horses of their dead comrades, and following up; whilst others, again, endeavoured to limp back through the fire of the enemy. On, however, the Light Brigade proceeded, like lightning; Lord Cardigan was the first man at the enemy's guns. Down went the gunners at their sides as our men rushed at them: not one, save those who fled at the onset, remained alive. Fourteen guns were, for a moment, in our possession. But the Russian cavalry was on them; they cut in between the guns and the Light Brigade, and it became time to retreat. The 11th and 4th covered the 17th, the 8th, and the 13th. Lord Cardigan charged back through the Russian Lancers with his two regiments, and the enemy, opened to let them pass; but a file fire from numerous Russian squares kept up a quick and deadly discharge of Minié balls; whilst the triple fire of the enemy's cannon continued to overwhelm them with showers of shell and shrapnell. Fortunately for the shattered remnant of this brigade, the French Chasseurs d'Afrique had charged up the heights on the Russian right, and caused the artillery there to retire. One squadron advanced right up, and into a Russian square, which had not entirely formed: the Adjutant-Major was killed in the centre of the square; and another officer, with fifteen men, were laid low. The Light Brigade rallied behind the Scots Greys, Enniskillings, Royals, and the rest of the Heavy Brigade. It was fearfully diminished in numbers. Of the 11th, there were hardly 40 men safe; of the 17th, barely the same number; of the 13th, 34; of the 4th, 39; and of the 8th, but a handful. Captain Nolan, who brought the fearful order, was the first man who fell; he had not gone 200 yards before he was shot through the heart. A ball ripped off the top of Lord W. Paulett's cap, and took the head off Charteris, Lord Lucan's Aide-de-Camp. Of the 13th, Captains Goade and Oldham, and Lieut. Montgomery, were killed. Of the 17th, Captain Winter was killed, Morris and Webb severely wounded, Chadwick and Thompson missing, Captain White shot through the leg. Cornet Wombwell, who had been taken prisoner after being dismounted, was rescued, as well as Morris, by the home charge of the 11th. Of this, Lord Cardigan's own regiment, Houghton and Trevelyan were wounded, the latter through the leg; Lockwood missing; and Colonel Douglas was only saved from a rifle shot by the revolver at his side. The lead alighted on one of the nipples, which exploded the barrel of the pistol, which did no harm. Captain Maxse, Lord Cardigan's Aide-de-Camp, was wounded slightly in the foot by the bursting of a shell in the beginning of the charge. There was a grim pause as the shattered Light Brigade re-appeared. The firing ceased, and was not resumed during the rest of the day. Both sides remained observing each other till evening, when Lord Raglan ordered the whole of the redoubts still in our possession to be evacuated. The Russians maintained themselves in the position they had taken, having gained possession of seven guns. Such is the faithful description of the attack on Balaclava and its losses. The Russians may have suffered to the extent of 200 men; on our side, no less than 500 men, killed, wounded, or taken prisoners, filled the list of casualties. There was a rumour in the evening that Balaclava would be evacuated; and it appeared that, during the day, several ships had moved out of harbour, the *Diamond* remaining with her broadside across to prevent the enemy from advancing.

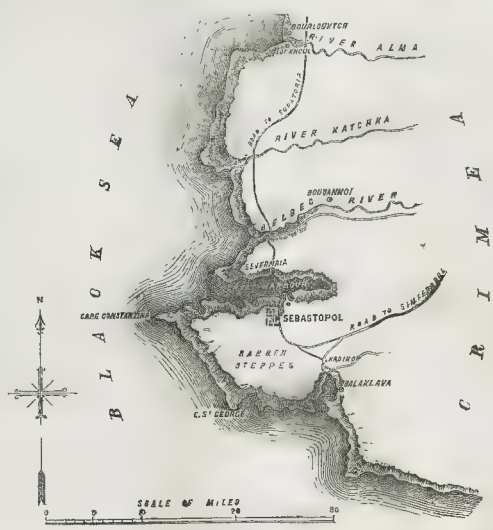
I know not whether the causes of the disaster of the day will ever be explained. Captain Nolan, the bearer of the order, gallantly fell in the performance of his duty. Whatever may be the reasons assigned, or excuses given, it will still remain on record that 650 British charged 20 guns in front of a Russian position held by upwards of 20,000 men, and under a cross fire from three directions. That a single man of this brigade lived to tell the tale is a miracle; and it is not too much to say that no other cavalry in the world would have reached the enemy under similar circumstances. The Russians have to answer for much wanton cruelty during the day. After the charge of our Light Brigade, the Cossacks were observed to overrun the field and drive their lances into the bodies of the wounded. Such barbarity is no more in accord with the usages of civilised warfare than the atrocities asserted by the Russians to have been committed on themselves by the Turkish Bashi-bozouks. The contrast between the atrocities of the Cossacks and the charity of our men is indeed striking; for the Russians were supplied with water and covered with their cloaks until they could be attended to; and when they were removed they were treated with the same kindness as our own soldiers.

I had forgotten to say that Lord Fitzgibbon, of the 8th Hussars, and only son of the Earl of Clare, was missing. It is hoped that he is safe, though a prisoner.

ATTACK ON THE HEIGHTS OF SEBASTOPOL.

Before Sebastopol, October 27th, 1854.

Yesterday, at two o'clock in the afternoon, the Russians advanced to the attack of our positions in front of Sebastopol, and were repulsed with loss. The boldness of the enemy in advancing to force our right—which they did with 8000 men and 32 guns—is explained by the following circumstance:—On the 25th (after the affair at Balaclava) special messengers were sent into Sebastopol with the exaggerated tidings of a great victory gained over the English. Our troops in the trenches heard the tremendous cheer which was sent forth by the garrison of Sebastopol when it received the intelligence. Yesterday the troops were all drawn out to hear a general order read, detailing the losses of the enemy, the capture of its positions and guns, and the annihilation of its cavalry. A prayer of thanksgiving and "Te Deum" were then solemnly chanted in the great church; and, after a distribution of extra grog to the troops, they became so enthusiastic, that General Gortschakoff took advantage of the moment to make an attack upon the right of our positions.



The Russians moved up on our right along the road which leads towards the Inkerman ruins; and, turning off to their right, they ascended the heights near which was encamped the Second Division, under Sir de Lacy Evans. The hill which they ascended is called Shell-hill by our men, who have always met with a warm reception there whenever they showed themselves above a small rain on its summit, which serves as protection to our pickets. To our left of the ruin, a strong force is usually in observation. To our right an equally strong party lines a stone intrenchment, erected across the road, which winds down towards Sebastopol; and further on, a fourth picket covers a spur overhanging the road on the other side. The Russians advanced in three columns of 1500 men each, and drove in the small picket in the ruins. They deployed to the right and left; and, whilst their right moved down into the dip on our side of Shell-hill, their left stretched down, crossed the Sebastopol road, and endeavoured to turn our position by getting round the spur which covers the camp of Sir de Lacy Evans' division. Their advance was made with great confidence, and in good order; but our pickets behaved admirably; they retired in complete order, firing through their intervals with such regularity and precision that the Russians were loth to advance any but skirmishers; and two hours were spent before the grand attack came on. There is no record, I believe, of pickets, amounting in all to five companies, keeping an enemy of such force at bay for so long a time; and it is therefore with a feeling of pride that I record the admirable conduct of Captain Conolly of the 49th, the clever resistance of Captain Atcherley of the 30th, at the ruins, and that of Major Champion of the 95th, on our right. Captain Conolly had fought manfully for a considerable time, when a few of the enemy closed in upon him, and he defended himself with his sword in one hand and his telescope in the other, until he was rescued; unfortunately at that moment he was shot through the side by a conical ball, and fell badly wounded. In the meanwhile the division had been speedily moved out and covered its pickets. The 30th marched out to the right with the 95th, whilst Captains Turner and York's batteries moved to a position above the enemy on our right, and the 55th supported them. General Adams's brigade moved forward on the left, towards the ruins; the 41st, 47th, 49th, taking commanding positions. The Russians advanced with considerable vigour, and in good order, to the attack, under cover of their guns. They seemed, however, to have had considerable difficulty in moving their artillery, for they could only get five of their guns into play, and these were so mauled in a few minutes, by our batteries, that they ceased firing, and were withdrawn. This was the moment when the Russians began to waver; they quailed before the fire of our men, and as we advanced upon them, they gave way, retiring in disorder over the scrubby ground which they had taken up. Their masses at the moment offered a deadly aim to our Artillery, which poured in volleys of grape and shells into them, and committed tremendous havoc. Their disorder increased, and then a general pursuit commenced. General Pennefather's brigade followed them over the hills, in their headlong flight, almost down to the trenches of Sebastopol, from whence it made its way back under the old familiar fire of Inkerman Lighthouse, and a stream with which every man in Sir de Lacy Evans' division is well acquainted. The Lancaster

gun on the right of Gordon's attack, could not miss so fine an opportunity, but sent shell right into the retreating Russians with immense execution. The loss of the Russians in this affair was 500 killed and wounded; and I may say, without exaggeration, that we had all our own way during the time the affair lasted. Our loss only amounted to seventy men killed and wounded. We took sixty-nine prisoners, amongst whom were four officers, and one of them was the identical man who had a few days previously captured Lord Dunkellin. It may afford Lord Cianricarde pleasure to know that his son is well, and cared for, in Prince Gortschakoff's own house. The Prince himself, however, is said to have been seriously wounded during this affair, and there is even a rumour of his death. I regret to say that in this encounter Captains Atcherley and Bailey, of the 30th, were badly wounded; Captain Cahill of the 49th also badly hit, as well as Captain Harriott of the 40th. Captain Conolly has spent a good night, and is doing well. Captain Harriott has a ball lodged under his shoulder-blade, and will, in all probability, recover; and the rest of the wounded are in a fair way of recovery. Though none but the Second Division was engaged in this affair, it was supported by detachments from the Light, the First, and Third Divisions, and by three regiments, sent up by General Bosquet. So that, had the enemy been three times as numerous as they were, they would have been overmatched. Besides prisoners, several trophies were taken—such as drums, colours, trumpets, and quantities of muskets and ammunition.

As regards the siege, it has been proceeding much as usual; but the guns of the Russians are daily decreasing in number. To-day not more than 38 were open against us, which is an essential diminut on from the original number of 158.

Although the Russian force near Balaclava has been considerably increased, and the enemy have moved large guns to the heights nearest to the position on the cliffs occupied by our Marines, it is at present decided that the harbour will not be abandoned. Cavalry have taken up a position nearer to Sebastopol than before.

October 28th, Ten a.m.

Between ten o'clock and midnight last night, an alarm appears to have aroused the Russian camp, which rose all at once to arms, and threw forth a tremendous hurrah. The noise roused all the camps of our division on Sebastopol Heights as well as in Balaclava. No enemy appearing, however, the regiments turned in again to rest, and the pickets ceased firing at imaginary enemies. Two hours elapsed, when the alarm was again given, and heavy firing was heard from the whole French line, which lasted several minutes. It appears that the Zouaves heard the noise of approaching squadrons of cavalry coming on towards them at full speed. They fired in the direction of what they considered to be the enemy, and the guns on the heights poured in at the same moment a discharge of shells. The sudden illumination allowed the Zouaves to see that what they considered cavalry was a troop of dismounted horses, who had been alarmed by the Russian hurrah two hours before, and were running to and fro without riders. A push was made on all sides for the prize, and about sixty horses were captured during the course of the night.

P.S.—I am sorry to be obliged to send you so little in the shape of Sketches this week; but I have been in two actions, which are two days lost for writing or drawing; and to-day I have spent in giving you an account of the battles.

I shall endeavour to make up for this by next mail, if I am not hit; for I can say, without exaggeration, that I occupy, at present, a post of no ordinary danger, being in the tents of Sir De Lacy Evans' division, on the right and exposed flank of the Allied armies.

THE HEAVY CAVALRY BRIGADE CHARGE.

After the repulse of the Russian cavalry by the 93rd Highlanders, the next notable incident in the affair at Balaclava, on the 25th ult., was the charge made by the Heavy Cavalry Brigade, of which our Artist, who watched the proceedings from a neighbouring hill, has given a spirited Sketch. The Russian cavalry, about 4000 in number, cantered down the hill with the evident intention to attack our cavalry. No sooner was this perceived, than the bugle sounded the advance for our men, who instantly moved forward at a canter. As they approached the enemy and began to ascend the hill, the canter merged into a charge, and the pace was terrific. The Scots Greys and 6th Enniskillings went right at the Russian centre. For a moment it was a glorious sight. The glittering helmets and weapons and varied uniforms of our fellows as they pressed forward to the charge, with sabres raised and lances level'd, made the mere spectacle beautiful; but, accompanied with all its terrors, it was one of the most awful grandeur. The solid earth shook and reverberated with a sound like thunder, as a thousand horses spurred to their utmost speed, went tearing up the hill, scattering the turf and grass like a cloud of sand behind them. The enemy were nothing loth to accept the challenge, and, indeed, they had little reason, for their numbers were nearly three to one. In a line of two-thirds of a mile they swept down from the hill upon our men, meeting them about half-way up. The dull heavy noise with which they closed could be heard at a mile, and made the listener's blood run cold.

With the first shock about a hundred men and horses instantly fell; and both sides seemed to recoil and clutch their weapons closer for a deadly hand-to-hand combat. In another moment there was nothing to be seen but a confused crowd of Hussars, Cossacks, Scots Greys, and Lancers, who were shooting, cutting, and stabbing at one another in all directions. It was impossible to say which did best, for the dust, smoke, and confusion were too great to permit anything like accuracy of observation; but it was quite evident both fought well, for neither gave way, though the bodies of men and horses cumbered the ground. After a minute's contest part of the Greys drew off for a few yards, and turning at a gallop made a desperate attempt to break the Russian line; they were almost successful at the first onset, and the 17th, imitating the example, levelled their lances, and charging for a few yards, made an awful gap in the enemy's ranks. To crush these attempts before they had time to be successful, the Russian line, which, from their immense superiority of number, completely outmasked ours on both sides, tried, by wheeling round, to enclose our gallant Greys; but before the manœuvre could be effected, the supporting regiments of the Heavy Brigade, the First Dragoon Guards and Sixth Enniskillings, came down like a thunderbolt upon the Russian flanks. The charge was well timed and well executed, and attended with complete success. The light wheeling Cossacks disappeared like snow before the charge of our Dragoons; the Hussars broke up in disorder, and in another instant the Dragoon Guards, Greys, and Enniskillings were among them, sabring and passing right and left. Unlike our regiments, the Russians, while disordered, made no attempt to rally. The instant their line was broken they sauntered and fled like hares to the top of the hill and across the high road, closely harassed in the rear by our men. Unfortunately, they were unable to continue the pursuit, from the proximity of the Russian batteries, and the instant our cavalry halted, the Russians halted also, and commenced re-forming their line (still twice as numerous as ours), in order to renew the contest; our men in the meantime were compelled to withdraw under cover of the hill, as, while exposed on the heights and high road, the cannonade of the enemy told severely among them. After an interval of ten minutes, during which the Russians poured a perfect shower of shot and shell into our lines, and during which also the long-wished-for reinforcements from our intrenched camp were discerned coming up to our assistance, the enemy's cavalry again advanced to the attack. This time they came in with a battery of Horse Artillery; and, after a severe cannonade of a few minutes upon our men, again descended the valley, and advanced to the charge. The whole of our Heavy Cavalry in readiness line met them on this occasion. There was the same desperate charge, the same shock, but not the same fighting. After a minute's resistance, the enemy's whole line gave way, and retired in confusion towards the heights. On this, the Russian cavalry General—who, to do him but bare justice, reconducted himself with undoubted skill and bravery throughout the day—halted the flying squadrons, and persuaded them to stand again and face our men, who were within ten yards of hot pursuit. The contest was, therefore, for a moment, renewed on the heights. But the struggle lasted only for a few minutes: the remnants of the Light Cavalry came up in proper time; and the ferocity with which they dashed into the enemy's flanks carried all before them. The Russians again broke and fled; but, this time, our men were among them strewing the plain with carcases. To save themselves from the slaughterous attack, the Russians sought shelter under the batteries in that fatal valley where our Light Cavalry have suffered so severely. Two or three troops of our horse imprudently followed in pursuit close up, and were terribly mauled by the batteries as they retired.

OFFICIAL DESPATCHES.

(From the *London Gazette* Extraordinary of November 12.)

LORD RAGLAN'S DESPATCHES.

War Department, Nov. 12, 1854, Four o'clock p.m.

His Grace the Duke of Newcastle has this day received two despatches, with enclosures, of which the following are copies, addressed to his Grace by General the Lord Raglan, G.C.B.

Before Sebastopol, Oct. 28, 1854.

My Lord Duke—I have the honour to acquaint your Grace that the enemy attacked the position in the front of Balaclava at an early hour on the morning of the 25th instant.

The low range of heights that runs across the plain at the bottom of which the town is placed was protected by five small redoubts hastily constructed. Three of these had guns in them; and on a higher hill in front of the village of Camara, in advance of our right flank, was established a work of somewhat more importance.

These several redoubts were garrisoned by Turkish troops, no other force being at my disposal for their occupation.

The 93rd Highlanders was the only British regiment in the plain, with the exception of a part of a battalion of detachments composed of weakly men, and a battery of artillery belonging to the Third Division; and on the heights behind our right were placed the marines, obligingly landed from the fleet by Vice Admiral Dundas. All these, including the Turkish troops, were under the immediate orders of Major-General Sir Colin Campbell, whom I had taken from the First Division with the 93rd.

As soon as I was apprised of this movement of the enemy, I felt compelled to withdraw from before Sebastopol the First and Fourth Divisions, commanded by Lieutenant-Generals his Royal Highness the Duke of Cambridge and the Hon. Sir George Cathcart, and bring them down into the plain; and General Canrobert subsequently reinforced these troops with the First Division of French Infantry and the Chasseurs d'Afrique.

The enemy commenced their operation by attacking the work on our side of the village of Camara; and, after very little resistance, carried it.

They likewise got possession of the three others in contiguity to it; being opposed only in one, and that but for a very short space of time.

The farthest of the three they did not retain, but the immediate abandonment of the others enabled them to take possession of the guns in them—amounting, in the whole, to seven. Those in the three lesser forts were spiked by the one English artilleryman who was in each.

The Russian cavalry at once advanced, supported by artillery, in very great strength. One portion of them assailed the front and right flank of the 93rd and were instantly driven back by the vigorous and steady fire of that distinguished regiment, under Lieutenant-Colonel Ainslie.

The other and larger mass turned towards her Majesty's Heavy Cavalry, and afforded Brigadier-General Scarlett, under the guidance of Major-General the Earl of Lucan, the opportunity of inflicting upon them a most signal defeat. The ground was very unfavourable for the attack of our Dragoons, but no obstacle was sufficient to check their advance, and they charged into the Russian column, which soon sought safety in flight, although far superior in numbers.

The charge of this brigade was one of the most successful I ever witnessed, was never for a moment doubtful, and is in the highest degree creditable to Brigadier-General Scarlett and the officers and men engaged in it.

As the enemy withdrew from the ground which they had momentarily occupied, I directed the cavalry, supported by the Fourth Division, under Lieut.-General Sir George Cathcart, to move forward, and take advantage of any opportunity to regain the heights; and, not having been able to accomplish this immediately, and it appearing that an attempt was making to remove the captured guns, the Earl of Lucan was desired to advance rapidly, follow the enemy in their retreat, and try to prevent them from effecting their objects.

In the meanwhile the Russians had time to re-form on their own ground, with artillery in front and upon their flanks.

From some misconception of the order to advance, the Lieutenant-General considered that he was bound to attack at all hazards, and he accordingly ordered Major-General the Earl of Cardigan to move forward with the Light Brigade.

This order was obeyed in the most spirited and gallant manner. Lord Cardigan charged with the utmost vigour; attacked a battery which was firing upon the advanced squadrons; and, having passed beyond it, engaged the Russian cavalry in its rear; but these his troops were assailed by artillery and infantry, as well as cavalry, and necessarily retired, after having committed much havoc upon the enemy.

They effected this movement without haste or confusion; but the loss they have sustained has, I deeply lament, been very severe in officers, men, and horses, only counterbalanced by the brilliancy of the attack, and the gallantry, order, and discipline which distinguished it—forming a striking contrast to the conduct of the enemy's cavalry, which had previously been engaged with the Heavy Brigade.

The Chasseurs d'Afrique advanced on our left, and gallantly charged a Russian battery, which checked its fire for a time, and thus rendered the British cavalry an essential service.

I have the honour to enclose copies of Sir Colin Campbell's and the Earl of Lucan's reports.

I beg to draw your Grace's attention to the terms in which Sir Colin Campbell speaks of Lieutenant-Colonel Ainslie, of the 93rd, and Captain Barker, of the Royal Artillery; and also to the praise bestowed by the Earl of Lucan on Major-General the Earl of Cardigan and Brigadier-General Scarlett, which they most fully deserve.

The Earl of Lucan not having sent me the names of the other officers who distinguished themselves, I propose to forward them by the next opportunity.

The enemy made no further movement in advance, and at the close of the day the brigade of Guards of the First Division, and the Fourth Division returned to their original encampment, as did the French troops, with the exception of one brigade of the First Division, which General Canrobert was so good as to leave in support of Sir Colin Campbell.

The remaining regiments of the Highland Brigade also remained in the valley.

The Fourth Division had advanced close to the heights, and Sir George Cathcart caused one of the redoubts to be reoccupied by the Turks, offering them the support, and he availed himself of the opportunity to assist with his riflemen in silencing two of the enemy's guns.

The means of defending the extensive position which had been occupied by the Turkish troops in the morning having proved wholly inadequate, I deemed it necessary, in concurrence with General Canrobert, to withdraw from the lower range of heights, and to concentrate our force, which will be increased by a considerable body of seamen, to be landed from the ships under the authority of Admiral Dundas, immediately in front of the narrow valley leading into Balaclava, and upon the precipitous heights on our right, thus affording a narrower line of defence.

I have, &c., RAGLAN.

His Grace the Duke of Newcastle, &c., &c., &c.

ENCLOSURES.

Balaclava, Oct. 27, 1854.

My Lord,—I have the honour to report that the Cavalry Division under my command was seriously engaged with the enemy on the 25th inst., during the greater part of which day it was under a heavy fire; that it made a most triumphant charge against a very superior number of the enemy's cavalry, and an attack upon batteries which, for daring and gallantry, could not be exceeded. The loss, however, in officers, men, and horses, has been most severe.

From half-past six in the morning, when the Horse Artillery first opened fire, till the enemy had possessed itself of all the different forts, the cavalry, constantly changing their positions, continued giving all the support they could to the Turkish troops, though much exposed to the fire of heavy guns and riflemen, when they took post on the left of the second line of redoubts, by an order from your Lordship.

The Heavy Brigade had soon to return to the support of the troops defending Balaclava, and was fortunate enough in being at hand when a large force of Russian cavalry was descending the hill. I immediately ordered Brigadier-General Scarlett to attack with the Scots Greys and Enniskilling Dragoons, and had his attack supported in second line by the 5th Dragoon Guards, and by a flank attack of the 4th Dragoon Guards.

Under every disadvantage of ground, these eight small squadrons succeeded in defeating and dispersing a body of cavalry estimated at three times their number and more.

The Heavy Brigade having now joined the Light Brigade, the division took up a position with a view of supporting an attack upon the heights, when, being instructed to make a rapid advance to our front, to prevent the enemy carrying the guns lost by the Turkish troops in the morning, I ordered the Light Brigade to advance in two lines, and supported them with the Heavy Brigade. This attack of the Light Cavalry was very brilliant and daring; exposed to a fire from heavy batteries on their front and two flanks, they advanced unchecked until they reached the batteries of the enemy, and cleared them of their gunners, and only retired when they found themselves engaged with a very superior force of cavalry in the rear. Major-General the Earl of Cardigan led this attack in the most gallant and intrepid manner; and his Lordship has expressed himself to me as admiring in the highest degree the courage and zeal of every officer, non-commissioned officer, and man that assisted.

The Heavy Brigade advanced to the support of the attack under a very galling fire from the batteries and infantry in a redoubt, and acted with most perfect steadiness, and in a manner to deserve all praise.

The losses, my Lord, it grieves me to state, have been very great indeed, and, I fear, will be much felt by your Lordship.

I cannot too strongly recommend to your Lordship the two General Officers commanding the brigades, all the officers in command of regiments, as also the Divisional and Brigade staffs: indeed, the conduct of every individual, of every rank, I feel to be deserving of my entire praise, and I hope of your Lordship's approbation.

The conduct of the Royal Horse Artillery troop—first under the command of Captain Maude, and, after that officer was severely wounded, of Captain Shakespear—was most meritorious and praiseworthy. I received from those officers every possible assistance during the time they respectively commanded.

I have, &c., LUCAN,
Lieutenant-General, Commanding Cavalry Division.

His Excellency the Commander of the Forces, &c.

Camp Battery, No. 4, Balaclava, October 27, 1854.

Sir,—I have the honour to inform you that on the morning of the 25th inst., the Russian force which has been, as I already reported, for some time amongst the hills on our right flank, debouched into the open ground in front of the redoubt Nos. 1, 2, 3, which were occupied by the Turkish infantry and artillery, and armed with seven 12-pounders (iron). The enemy's force consisting of eighteen or nineteen battalions of infantry, from thirty to forty guns, and a large body of cavalry. The attack was made against No. 1 redoubt by a cloud of skirmishers, supported by eight battalions of infantry and sixteen guns. The Turkish troops in No. 1 persisted as long as they could, and then retired, and they suffered considerable loss in their retreat. This attack was followed by the successive abandonment of Nos. 2, 3, and 4 redoubts by the Turks as well as the other posts held by them in our front. The guns, however, in Nos. 2, 3, and 4 were spiked. The garrisons of these redoubts retired, and some of them formed on the right, and some on the left of the 93rd Highlanders, which was posted in front of No. 4 battery and the village of Kadikhoi. When the enemy had taken possession of these redoubts, their artillery advanced with a large mass of cavalry, and their guns ranged to the 93rd Highlanders, which, with 180 invalids under Lieutenant-Colonel Dewaesy in support, occupied very insufficiently, from the smallness of their numbers, the slightly rising ground in front of No. 4 battery. As I foresaw that round shot and shell began to cause some casualties among the 93rd Highlanders and the Turkish battalions on their right and left flank, I made them retire a few paces behind the crest of the hill. During this period, our batteries on the hills, manned by the Royal Marine Artillery and the Royal Marines, made most excellent practice on the enemy's cavalry, which came over the hill ground in front. One body of them amounting to about 400 men—turned to their left, separating themselves from those who attacked Lord Lucan's division, and charged the 93rd Highlanders, who immediately advanced to the crest of the hill and opened their fire, which forced the Russian cavalry to give way and turn to their left; after which they made an attempt to turn the right flank of the 93rd, having observed the flight of the Turks who were placed there; upon which the Grenadiers of the 93rd, under Captain Ross, were wheeled up to their right and fired on the enemy—which manœuvre completely discomfited them.

During the rest of the day the troops under my command received no further molestation from the Russians. I beg to call Lord Raglan's attention to the gallantry and eagerness of the 93rd Highlanders, under Lieut.-Colonel Ainslie, of which, probably, his Lordship was an eyewitness; as well as the admirable conduct of Captain Barker, and the officers of the field battery under his orders, who made most excellent practice against the Russian cavalry and artillery while within range.

I have, &c., COLIN CAMPBELL, Major-General.

To Brigadier-General Estcourt, Adjutant-General.

Before Sebastopol, Oct 28, 1854.

My Lord Duke,—I have nothing particular to report to your Grace respecting the operations of the siege, since I wrote to you on the 23rd inst. The fire has been somewhat less constant, and our casualties have been fewer, though I regret to say that Captain Child'ra, a very promising officer of the Royal Artillery, was killed on the evening of the 23rd; and I have just heard that Major Dalton, of the 49th, of whom Lieutenant-General Sir De Lacy Evans entertained a very high opinion, was killed in the trenches last night.

The enemy moved out of Sebastopol on the 26th with a large force of infantry, cavalry, and artillery—amounting, it is said, to 40,000 or 50,000—and attacked the left of the Second Division, commanded by Lieutenant-General Sir De Lacy Evans, who speedily and energetically repulsed them, assisted by one of the batteries of the First Division, and some guns of the Light Division, and supported by the brigade of Guards and by several regiments of the Fourth Division, and in rear by the French Division commanded by General Bosquet, who was most eager in his desire to give him every aid.

I have the honour to transmit a copy of Sir De Lacy Evans's report, which I am sure your Grace will read with the highest satisfaction; and I beg to recommend the officers who are particularly mentions to your protection.

Captain Bayley, of the 30th, and Captain Atcherley, of the same regiment; and Lieutenant Cox, of the 49th, all of whom are severely wounded, appear to have greatly distinguished themselves.

I cannot speak in too high terms of the manner in which Lieutenant-General Sir De Lacy Evans conducted his various attack. I had not the good fortune to witness it myself, being occupied in front of Balaclava at the time it commenced and having only reached his position as the affair ceased; but I am certain I speak the sentiments of all who witnessed the operation, in saying that nothing could have been better managed, and that the highest credit is due to the Lieutenant-General, whose services and conduct I have before had to bring under your Grace's notice.

I enclose the return of the losses the army has sustained since the 22nd.—I have, &c., RAGLAN.

His Grace the Duke of Newcastle, &c.

ENCLOSURE.

Second Division, Heights of the Tchernaya.
October 27, 1854.

My Lord,—Yesterday the enemy attacked this division with several columns of infantry supported by artillery. Their cavalry did not come to the front. Their masses, covered by large bodies of skirmishers, ad-

(Continued on page 522.)

H.M. SCREW LINE-OF-BATTLE SHIP "CÆSAR," 90, AT PORTSMOUTH.

FITTING OUT A WAR-STEAMER.

If anything were wanting to prove the vast amount of energy stored up in the hearts and hands of Englishmen, ever ready to meet any exigency, the sceptic as to this superiority had only to proceed to Portsmouth in the spring of the present year. There he might have beheld such a picture as few artists could do justice to. There might be heard the fleet for the North Sea practising morning and afternoon in gunnery, when the firing was magnificent; the victualling was going on with surprising activity; and the taking in stores demanded a continuance of exertions which were almost superhuman.

Foremost among these mighty preparations for the coming struggle was the fitting of the *Cæsar* (Capt. Robb), 90, new screw-ship, at our great naval arsenal, Portsmouth.

This noble screw line-of-battle ship was launched at Pembroke Dockyard early in the year. Her hull is of wood, and she is fitted with Messrs. John Penn and Son's patent engines, upon the horizontal trunk principle. Diameter of cylinder, No. 2, 64½ inches; with a trunk 28 inches diameter—an effective diameter of cylinder, 56 inches; length of stroke, 3 ft. 6 in. She has four tubular boilers, which are five feet under the load water line. The safety-valves loaded to 20 lbs. pressure. The screw is the common two-bladed kind, with a mean pitch of 18 ft. 10 in.; diameter, 17 feet. Her speed at the measured mile was 10½ knots; having a draught of water—forward, 19 feet 2 inches; aft, 22 feet 5 inches. Her engines make sixty revolutions, and develop by indicator upwards of 1400 horse power, the nominal being only 400.

The following are the remaining details:—

Lower masts, top-masts, yards, sables, &c.	..	110 tons.	
Rigging.—Standing	..	38	,,
,, Running	..	46	,,

All the available force of the Dockyard was put upon this great labour. The time occupied in the fitting was five weeks; the greatest number of men at work, at any one time, was 300, working from seven in the morning until nine at night. This remarkably speedy equipment reflects the highest credit upon everybody engaged upon her, the engineer department especially. Upon her trial trip, she steamed out to Stokes Bay, and made two runs along the measured mile; after which she ran through the fleet, and down to the Nab Light, and thence into harbour again. She had a large party on board. Her machinery worked splendidly; not a rivet or crew displaced. She was tried ahead and astern, and answered perfectly. She realised a mean speed of 10½ knots per hour, and came into harbour at four p.m. to complete for sea.

She was provisioned for thirteen weeks, as follows:—

Water.—Tanks, 141	..	300 tons.

THE HULK "BLAKE," AT SPITHEAD.

The busy scene towards the close of February was thus described by an eye witness:—"All the available force of the dockyard is put upon the *Cæsar*, 91, Captain Robb, to expedite her fittings; her lower rigging has been got over the mastheads; while hundreds of workmen are employed within, others are popping her bottom and otherwise fitting her without; and arrangements are made to ship her provisions and sea stores while yet in dock."

On the morning of March 26, this fine new heavily-armed ship left Portsmouth, to augment the fleet under Admiral Napier. She weighed about seven o'clock under all plain sail, and left with a fine breeze from the westward. Her crew was completed by a draught of about eighty from the number (215) of coastguard-men, and others brought by the steam-frigate *Magicienne*, 16, Captain Fisher, from the North of Ireland.

The reaction, after the greater portion of the Fleet had left Portsmouth, is thus described:—"No one would think this the chief naval arsenal in the country on the eve of war, to look upon the placid inanimation which appears everywhere to reign. We have no continual booming of great guns from Spithead, no van loads of seamen pouring into the town by every train, or brought in by steam-tenders, no continual stream of victualling lighters, powder, and gun boys, watering vessels, and such like now, keeping up a night and day traffic between the harbour and the roadstead—all is quiet, not to say dull, after our late excitement."

Our Artist has portrayed the *Cæsar*, and the labour of fitting he

FITTING OUT "THE CÆSAR," BETWEEN DECKS, AT PORTSMOUTH.

between decks by candle-light. Accompanying is the hulk *Blake*, where the crew were kept while the ship was fitting. The receiving hulks only keep on board water, not provisions; and the different crews that are hulked draw all from the victualling stores.

MOVING ARTILLERY.

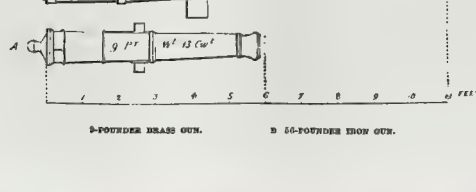
THE non-military public can have very little notion of the enormous labour that has been expended in bringing up the siege guns from the shore of Balaclava Bay to our lines before Sebastopol, and placing them in position to breach the walls by their fire.

The two accompanying Sketches A and B will, perhaps, convey a clear idea on the subject.

The heaviest guns used in our service, for manœuvring with troops in the field, are brass 12-pounders; but the 8-pounder brass gun is the more usual metal, as the former are too weighty to be moved with quickness, without additional horses, not always convenient. Fig A is a 8-pounder brass gun, weighing 13 cwt.; such a gun, with its carriage, limbers, ammunition (32 rounds), side-arms, and stores, weighs 38½ cwt., and six horses can, without distress, gallop with it a few hundred yards into position; march with it about four miles in an hour and a half, eight miles in four hours, and sixteen miles in ten hours providing that the road is a tolerable one; but, since artillery must march in many instances where no roads exist, eight horses are the service complement to each gun. Six horses would draw 38½ cwt. along the hilly and bad road from Balaclava to Sebastopol, at the rate of not more than 1½ miles per hour

Fig. B is a 56-pounder iron gun, weighing from 97 cwt. to 98 cwt.; its carriage (without ammunition, &c.) weighs about 18½ cwt.; making the total weight to be moved 116 cwt. It would require 18 stout artillery horses to march with such a gun at the rate of 1½ miles per hour; and, when we consider the inferior cattle, the miserable roads, their steepness, and the distance, the wonder is, not that such guns were so long in being brought up, but that they were ever brought up at all.

The 56-pounder guns was not, however, the heaviest metal employed; the 10-inch and 68-pounder guns weigh 112 cwt., and the 13-inch mortars, of four calibres in length, weigh 100 cwt.



A 9-POUNDER BRASS GUN. B 56-POUNDER IRON GUN.

Probably, the following few particulars relating to Field Artillery may in these times be interesting to your readers:—A troop of Horse Artillery, consisting of four 6-pounder brass guns, and two 12-pounder howitzers, has in attendance 14 other carriages, and requires 5 officers, 18 non-commissioned officers, 168 gunners, drivers, &c., and no less than 195 horses.

A field battery, consisting of four 9-pounder brass guns, and two 24-pounder howitzers, has in attendance 14 other carriages; and requires the same number of officers and men as the former, but only 170 horses; since the gunners are on foot during a march.

An army taking the field with 60 guns, therefore, has the following important additions to its numbers; viz., 50 officers, 150 non-commissioned officers, 1080 gunners, drivers, &c., and at least 1700 horses.—H. A.

PROVISIONS FOR THE FORCES IN THE EAST.—Orders have been received at the Royal William Victualling-yard, Plymouth, for the shipment of 150,000 lb. of salt pork and 300,000 lb. of salt beef on board transports for the forces in the East. In order to expedite the work, a party of Royal Marines from the flag-ship *Impregnable* attend daily. On Sunday the labourers and others were actively employed in shipping bread on board the transport *Chapman*, bound for the Black Sea. The rye-flour ground at that establishment cannot conveniently be converted into bread there; but will be sent to Milbay, where the Russian prisoners, for whom it was ground, will bake it in the ovens attached to the prisons.

(Continued from page 519.)

vanced with much apparent confidence. The division immediately formed line in advance of our camp—the left under Major-General Pennefather, the right under Brigadier-General Adams, Lieutenant-Colonel Fitzmayer and the Captains of Batteries (Turner and Yates) promptly posted their guns and opened fire upon the enemy.

Immediately on the cannonade being heard, the Duke of Cambridge brought up to our support the brigade of Guards under Major-General Bentinck, with a battery under Lieut.-Col. Dacres. His Royal Highness took post in advance of our right to secure that flank, and rendered me throughout the most effective and important assistance. General Bosquet, with similar promptitude and from a greater distance, approached our position with five French battalions. Sir G. Cathcart hastened to us with a regiment of rifles, and Sir G. Brown pushed forward two guns in co-operation by our left.

The enemy came on at first rapidly, assisted by their guns on the Mound-hill. Our pickets, then chiefly of the 49th and 30th Regiments, resisted them with very remarkable determination and firmness. Lieutenant Conolly, of the 49th, greatly distinguished himself, as did Captain Bagley, of the 30th, and Captain Atcherley; all of whom, I regret to say, were severely wounded. Sergeant Sullivan also displayed at this point great bravery.

In the meantime, our eighteen guns in position, including those of the First Division, were served with the utmost energy. In half an hour they forced the enemy's artillery to abandon the field. Our batteries were then directed with equal accuracy and vigour upon the enemy's columns, which (exposed also to the close fire of our advanced infantry) soon fell into complete disorder and flight. They were then literally chased by the 30th and 95th Regiments over the ridges and down towards the head of the bay. So eager was the pursuit, that it was with difficulty Major-General Pennefather eventually effected the recall of our men. These regiments and the pickets were led gallantly by Major Maulverer, Major Champion, Major Evans, and Major Hume. They were similarly pursued, further towards our right, by four companies of the 41st, led gallantly by Lieutenant-Colonel the Hon. P. Herbert, A.Q.M.G. The 47th also contributed. The 55th were held in reserve.

Above 38 prisoners fell into our hands, and about 130 of the enemy's dead were left within or near our position. It is computed that their total loss could scarcely be less than 600.

Our loss, I am sorry to say, has been above 80, of whom 12 killed, 5 wounded, were officers. I am happy to say hopes are entertained that Lieut. Conolly will recover; but his wound is dangerous.

I will have the honour of transmitting to your Lordship a list of the officers, non-commissioned officers, and privates, whose conduct attracted special notice. That of the pickets excited general admiration.

To Major-General Pennefather and Brigadier-General Adams I was, as usual, greatly indebted. Of Lieutenant-Colonel Dacres, Lieutenant-Colonel Fitzmayer, Captains Turner, Yates, Woodham, and Hamlin, and the whole of the Royal Artillery, we are under the greatest obligation.

Lieutenant-Colonel Herbert, A.Q.M.G., rendered the division, as he always does, highly distinguished and energetic services. Lieutenant-Colonel Wilbraham, A.A.G., while serving most actively, I regret to say, had a very severe fall from his horse. I beg leave also to recommend to your Lordship's favourable consideration, the excellent services of Captain Glasbrook and Thompson, of the Quartermaster-General's department; the Brigade-Majors Captains Armstrong and Hackwell; and my personal staff, Captains Allix, Gubbins, and the Hon. W. Boyle.

I have, &c.,
DE LACY EVANS, Lieut.-Gen.

To General the Right Hon. Lord Raglan, G.C.B., &c.

RETURN OF CASUALTIES FROM 22ND TO 26TH OCTOBER, BOTH DAYS INCLUSIVE.

CAVALRY.

Staff—8 officers killed, 4 officers wounded
4th Light Dragoons—2 officers, 3 sergeants, 3 drummers, 34 rank and file, 50 horses, killed; 2 officers, 1 sergeant, 21 rank and file, wounded.
8th Hussars—2 officers, 2 sergeants, 33 rank and file, 36 horses, killed; 2 officers, 2 sergeants, 1 drummer, 14 rank and file, wounded.
11th Hussars—2 sergeants, 11 rank and file, 22 horses, killed; 3 officers, 3 sergeants, 30 rank and file, wounded.
13th Light Dragoons—officers, 3 sergeants, 1 drummer, 30 rank and file, 76 horses, killed; 2 sergeants, 12 rank and file, wounded.
17th Lancers—3 officers, 1 sergeant, 32 rank and file, 99 horses, killed; 4 officers, 1 sergeant, 2 drummers, 31 rank and file, wounded.
4th Dragoon Guards—1 rank and file, 1 horse, killed; 2 sergeants, 7 rank and file, wounded
1st Royal Dragoons—3 rank and file, 10 horses, killed; 4 officers, 1 sergeant, 1 drummer, 5 rank and file, wounded.
2nd Royal North British Dragoons—2 rank and file, 14 horses, killed; 4 officers, 5 sergeants, 48 rank and file, wounded.
6th Dragoons—2 rank and file, 2 horses, killed; 3 sergeants, 10 rank and file, wounded
5th Dragoon Guards—3 rank and file, 19 horses, killed; 1 officer, 3 rank and file wounded.
Royal Artillery—1 officer, 2 sergeants, 4 rank and file, killed; 3 officers, 1 sergeant, 23 rank and file, wounded.
Royal Engineers and Sappers and Miners—3 rank and file, wounded

Total, 13 officers, 16 sergeants, 4 drummers, 142 rank and file, 261 horses, killed; 27 officers, 21 sergeants, 4 drummers, 169 rank and file, wounded.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

INFANTRY.

Staff—1 officer, killed
Red Battalion Grenadier Guards—1 rank and file, wounded
1st Regiment of Foot—1 officer wounded; 4 rank and file, wounded.
7th Regiment—1 rank and file wounded.
19th Regiment—4 rank and file, wounded.
23rd Regiment—1 rank and file, wounded.
33rd Regiment—1 rank and file, wounded.
39th Regiment—1 rank and file, wounded.
54th Regiment—2 officers, wounded; 1 sergeant, wounded; 6 rank and file, killed; 22 rank and file, wounded.
41st Regiment—1 officer, wounded; 1 rank and file, killed; 3 rank and file wounded.
44th Regiment—1 rank and file, wounded
47th Regiment—2 rank and file, killed; 7 rank and file, wounded.
49th Regiment—2 officers, wounded; 1 sergeant, wounded; 1 drummer, wounded, 1 rank and file, killed; 17 rank and file, wounded.
50th Regiment—1 officer, wounded; 1 rank and file, wounded.
57th Regiment—1 officer, wounded.
63rd Regiment—1 rank and file, wounded.
77th Regiment—2 rank and file, killed.
88th Regiment—1 officer, wounded; 1 rank and file, killed; 5 rank and file, wounded
93rd Regiment—1 sergeant, wounded; 1 rank and file, killed; 8 rank and file, wounded
1st Battalion Rifle Brigade—1 rank and file, wounded.
2nd Battalion Rifle Brigade—5 rank and file, wounded.
79th Regiment—1 rank and file, wounded

Total: 1 officer, killed; 9 officers, wounded; 3 sergeants, wounded; 1 drummer, wounded; 14 rank and file, killed; 101 rank and file, wounded

J. B. BUCKNALL ESTCOURT, Adjutant-General.

RETURN OF CASUALTIES AMONG OFFICERS FROM 22ND TO 26TH OCT., BOTH DAYS INCLUSIVE.

STAFF.—Lieutenant-General the Earl of Lucan, wounded slightly; Brigadier-General the Hon. J. Y. Scarlett, wounded slightly; Captain the Hon. W. Charteris, killed; Captain George Lockwood, killed or missing; Lieutenant H. F. Maxse, wounded slightly; Lieutenant A. I. Elliot, wounded slightly.

4TH DRAGOON GUARDS.—Lieutenant F. H. Newnham, wounded slightly; Cornet the Hon. G. Neville, wounded severely.

1ST ROYAL DRAGOONS.—Lieutenant-Colonel John Yorke, wounded severely; Captain W. de Rinzi, wounded severely; Captain George Campbell, wounded severely; Cornet W. W. Harington, wounded severely

2ND DRAGOONS.—Lieutenant-Colonel H. D. Griffith, wounded slightly; Captain G. C. Clarke, wounded severely; Cornet Lenox Prendergast, wounded severely, Cornet H. M. Handley, wounded slightly.

4TH LIGHT DRAGOONS.—Major J. T. D. Hankey, killed; Lieutenant H. A. Starke, killed; Captain G. J. Brown, wounded severely; Captain Thomas Hutton, wounded severely

8TH HUSSARS.—Lieutenant J. C. Viscount Templetown, killed (doubtful); Cornet G. Clowes, killed (despatch.); Lieutenant B. Clutterbuck, wounded slightly; Lieutenant and Adjutant Edward Seager, wounded slightly.

11TH HUSSARS.—Captain E. A. Cook, wounded slightly; Lieutenant H. Trevelyan, wounded slightly; Cornet G. P. Monkton, wounded severely

13TH LIGHT DRAGOONS.—Captains J. A. Oulton, killed; Captain T. H. Goad, missing; Cornet H. Montgomery, missing.

17TH LANCERS.—Captain J. F. Winter, killed or missing; Lieutenant J. H. Thompson, killed or missing; Cornet and Adjutant J. Chadwick, killed or missing, Captain W. Morris, wounded severely, Captain Robert White, wounded severely, Captain A. F. C. Webb, wounded severely; Lieutenant Sir W. Gordon, wounded severely.

ARTILLERY.—Captain S. Childers, killed; Captain E. Mowbray, wounded slightly; Lieut. J. E. Hope, wounded slightly.

1ST ROYAL.—Lieut.-Colonel J. M. Brown, wounded slightly.

30TH REGIMENT.—Captain F. T. Atcherley, wounded slightly; Captain F. Bayley, wounded slightly.

47TH REGIMENT.—Lieutenant H. C. Harriott, wounded severely.

49TH REGIMENT.—Lieutenant J. A. Conolly, wounded dangerously; Ensign P. Cahill wounded severely

50TH REGIMENT.—Brevet-Major Hon. J. P. Maxwell, wounded slightly.

57TH REGIMENT.—Lieutenant H. J. Butler, wounded severely.

88TH REGIMENT.—Lieutenant and Adjutant A. D. Maule, wounded severely; Aide-de-Camp to Brigadier-General Airey, Captain L. E. W. Ian killed

J. B. BUCKNALL ESTCOURT, Adjutant-General.

A RETURN OF THE KILLED AND WOUNDED IN THE NAVAL BRIGADE, FROM THE 23RD TO THE 25TH OCTOBER, 1854, INCLUSIVE.

KILLED.—James Coleman, coxswain's barge, *Trafalgar*

WOUNDED.—Lieutenant Roads, Royal Marine Artillery, *Britannia*; William Revell, A.B., *Trafalgar*; Robert Hellybone, A.B., *Rodney*; Charles Aberde n, A.B., *Queen*; George Wilkinson, caterer's steward, *Vengeance*; Trevor Dunning, *Diamond*; James Bevan, ordinary, *Queen*; James Simmons, captain's scrw, *Queen* (died three hours afterwards); William Bailey, A.B., *Rodney*; Richard Lawrence, ordinary, *Queen*; Joseph Day, A.B., *Trafalgar*; Thomas Beste, ordinary, *Trafalgar*.

STEPHEN LUSHINGTON, Captain Commanding Naval Brigade.

The Military Secretary to H. E. Lord Raglan, Commander-in-Chief of the Army.

WRECK OF "THE FOREBUNNER" AFRICAN MAIL-STEAMER, AT POINT ST. LORENZO.

WRECK OF THE "FOREBUNNER" AFRICAN MAIL STEAMER.

We have been favoured by a Correspondent with the accompanying Sketch and account of the loss of the above vessel, by an eye-witness:—

After having bumped three times on the Bonig Bar, and narrowly escaped being wrecked on the Argum Bank, we left Madeira on the 26th ult., about four p.m.; and at dusk the ship was on the only rock to be found, about two hundred yards off the east end of the island of Fora, going about nine knots an hour. I was below at the time she struck, with Lieutenant Child, of the Gold Coast Corps. The shock was very severe. We both ran on deck; and I was just in time to hear a report—from the engineer, I think—that the engine-room was filling. The Master gave the order to look to the boats, and I saw no more of him until I picked him up, after the ship went down. The nearest boat to me was the gig, on the port quarter; and, well knowing there was no time to be lost, I commenced clearing away it; when in the act of lowering, a heavy surf struck the port quarter of the ship, and the boat's foremost tackle either unhooked or was let go, and the boat, nearly full of water, with four people in her, drifted astern. I was left hanging to the fall, but succeeded in getting on board the ship again. I then saw that nobody was attempting to lower the other boat on the port side, forward, and I went to her and cleared her away, at the same time endeavouring to keep the people cool. I ought here to mention the good and steady conduct of a seaman called Antonio—a West Indian, I think—who assisted me in getting the boat down safe: he begged the people to listen to my directions and keep quiet, and proved himself a good and steady man in the hour of danger. I succeeded in getting the boat down safe, and immediately got her round on the weather side; we

I found the life-boat nearly full of people. Governor Kennedy was standing aft endeavouring to prevent them from rushing in. Lieutenant Child, of the Gold Coast Corps, was in the act of handing a rope round Mrs. English, to lower her in: her daughter had been safely placed in the boat. The life-boat only waited for the lady; and she was then to have gone to a small coasting-vessel that had hove to leeward. Mr. Gregory, master in the merchant service, took charge of her, and she was to have returned. Governor Kennedy assured the people he would not leave the ship until every body was out of her. At this moment the ship's stern suddenly rose nearly perpendicular, and in an instant she, with everybody on board, disappeared. The boats with difficulty got clear. As soon as possible I took Mrs. English, and picked up as many as we could; and Mr. Evans, Governor Kennedy, the Master of the ship, and two others, were all we could save out of nineteen who were in the ship when she sunk. We waited about half an hour in certain there were no others floating, and then, with our crowded boat half full of water, pulled in the direction of the coasting vessel, where we found the crews of the gig and life-boat had both arrived safe. Upon calling over names, fourteen were missing; amongst them poor Child, of the Gold Coast Corps, who, it is to be feared, the unfortunate lady clung to, on the vessel sinking; he was a good swimmer, but he never came to the surface; his loss was deeply felt by us all: he behaved nobly; his only thought was for the one female on board, and he had to get her from her cabin. Had she not, in her frightened state, resisted his efforts to put her in the boat, both might have been saved. We got ashore at the little town of Santa Cruz between ten and eleven, nearly dead with cold. We were most hospitably received by a Portuguese family. Early on the following morning I got the ship's life-boat and four hands, and pulled out to the place of the wreck. Nothing was to be seen, with the exception of a double bulkhead, and the surface of the water covered with palm oil. I observed that the surf broke heavily over the rock about every six or seven minutes. On returning to Santa Cruz, I found we were to start for Funchal immediately. To the kindness and hospitality of H.M.S. Conrad and some of the English at Funchal, we are all of us much indebted. I myself am deeply thankful to a good Samaritan of the 52nd, Lieut. Erskine (quite a stranger to me), for a complete fit out, and offers of assistance of every kind as soon as I landed; while Mr. Peters, staying at the same hotel, did the like good office for Mr. Evans. From the agents of the Company we got no assistance whatever.

The Sketch is taken just at the time the vessel's stern began to rise. Her fore part, filled and over balanced by her on the rock; she went down perpendicular, and consequently her stern receding from the boats, they escaped being drawn down with her. As the life-boat backed out our oars got foul of each other, but as soon as clear I pulled in, and was taken out of sight of the life-boat, whose crew thought I had gone down after the vessel.

I have no doubt the conduct of the Master will be inquired into, I have not mentioned anything about him, but shall be ready to give my evidence when called upon.

NORMAN B. BEDINGFELD, Lieut., R.N.

15, Surrey-street, Strand, 13th Nov., 1854.

FALL OF THE ROUND TOWER AT SEBASTOPOL.—On the afternoon of the 24th the roof of the Round Tower fell in, carrying with it all the four guns on its summit. The tower is quite opened by a deep breach in the side which is most exposed to the guns of the 21-gun battery, and the whole structure is now a complete ruin. This fort is said to have been built at the voluntary expense of one man, who received the especial thanks of the Emperor for his enterprise and devotion: he would scarcely derive satisfaction from looking at his work now

NEW MUSIC, &c.

SEBASTOPOL. Quadrille. By D'ALBERT. Just published, price 3s. CHAPPELL, 50, New Bond-street.

BOMARSUND. Quadrille. By D'ALBERT. Just published, Illustrated in Colours, price 3s. CHAPPELL, 50, New Bond-street.

EDWARD WRENCH, Manager.

SCRIPTURE READERS to the SEAT of WAR.—SOLDIERS' FRIEND and ARMY SCRIPTURE READERS' SOCIETY.

Patron—His Right Hon. the Lord R GROSVENOR, M.P.

President—The Rev DR MARSH.

Offices, 7, Exeter Hall, Strand, London

The Committee of this Society have now thirteen Scripture Readers engaged with the ARMY. Through the Divine blessing which God has graciously vouchsafed their labours, but a large increase to their numbers is needed, and which is confidently expected will be speedily afforded.

The need for this kind of agency must be self-evident, it being physically impossible for the military chaplains to accompany all the duty specially imposed upon them, besides the ordinary casualties of a military life, will necessarily induce. The unobtrusive character of the Scripture Reader being to aid, and to interfere with, the various duties of the chaplains, commend it to the sympathy and liberal support of the Christian public.

The Committee have much pleasure in stating that it is their intention to appoint Readers to the Russian prisoners of war now in England. They have already, by son of the Agents, distributed a large number of tracts in the Russian language, and hope at early to report the appointment of an agent who will exclusively devote himself to that department of labour.

The Rev. Alexander Isavil is appointed to labour among the Protestants in the French army in the East. The Committee hope shortly to increase this department of agency, as they have received earnest solicitations as to the case of the Protestants in France, as well as Christians in the Turkish dominions.

The Committee, through the untiring zeal of the widow of a Russian Christian Officer whose kind contribution of £50 per annum for three years has not a little contributed to the accomplishment of this Society's object, have in hand a Russian lady who speaks the English, and who will in a few days be on her way to the scene of her labours.

The Committee desire to express their gratitude to the Lord for sending them in addition a number to the wives and families of that part of the army now engaged on foreign service, and that this part of their work is likewise progressing.

Thus encouraged to sow the seed of truth beside all waters, the Committee would, in humble reliance on Divine aid, and in the confidence of His blessing, and with the truest confidence ask the continuance of the kind liberality made aid of their mission, that they may yet more extend the work of the Lord.

The following sums of £10 and upwards are thankfully acknowledged:—

GLENNY'S BALBRIGGAN STOCKINGS and SOCKS, the most comfortable that can be worn.—Sold at BALBRIGGAN HOUSE, 23, Lombard-street; and 152, Strand.

LADIES are invited to inspect SPARKES HALL'S STOCK of SATIN and KID SHOES, which will be found well assorted and in good taste. He begs to announce a very great reduction in the prices, which has been effected by improvements in the cutting out and manufacture of boots and shoes, of which he commands him of the highest order at less than half the price of two. The quality of his boots and shoes has always been the best, and he pledges himself that it shall continue to be so. In future, his French morocco, kid, bronze, and satin shoes will be of one uniform price—viz. 6s. 6d. per pair, of any size or colour. Ladies' Prunella Black and colour, for the present season. Lace Boots of improved make, with kid facings, at prices equally low. Gentlemen's Dress Boots, 20s., 24s., and 7s. 6d. Action of scotch and Parisian Shawls, Traveling Wrappers, &c. All goods marked in plain figures.—The Great Shawl and Cloak Emporium, 171, 173, 175, Regent-street.

FASHIONABLE PARISIAN MILLINERY. The CASPIATO, or FOLDING BONNET, a new invention, for which J. and E. SMITH have been Honoured by Royal Letters Patent, combines convenience with elegance. It is packed in a case like a hat-box, thus dispensing with a bonnet-box. It is made or trimmed in the highest fashion From one hundred Also every kind of bonnets, in the best Paris taste. Whiter Bonnets, at 2s., 3s., 4s., 5s., 6s., 7s., 8s., 9s., 10s., 11s., 12s., 13s., 14s., 15s., 16s., 17s., 18s., 19s., 20s., 21s., 22s., 23s., 24s., 25s., 26s., 27s., 28s., 29s., 30s., 31s., 32s., 33s., 34s., 35s., 36s., 37s., 38s., 39s., 40s., 41s., 42s., 43s., 44s., 45s., 46s., 47s., 48s., 49s., 50s., 51s., 52s., 53s., 54s., 55s., 56s., 57s., 58s., 59s., 60s., 61s., 62s., 63s., 64s., 65s., 66s., 67s., 68s., 69s., 70s., 71s., 72s., 73s., 74s., 75s., 76s., 77s., 78s., 79s., 80s., 81s., 82s., 83s., 84s., 85s., 86s., 87s., 88s., 89s., 90s., 91s., 92s., 93s., 94s., 95s., 96s., 97s., 98s., 99s., 100s., 101s., 102s., 103s., 104s., 105s., 106s., 107s., 108s., 109s., 110s., 111s., 112s., 113s., 114s., 115s., 116s., 117s., 118s., 119s., 120s., 121s., 122s., 123s., 124s., 125s., 126s., 127s., 128s., 129s., 130s., 131s., 132s., 133s., 134s., 135s., 136s., 137s., 138s., 139s., 140s., 141s., 142s., 143s., 144s., 145s., 146s., 147s., 148s., 149s., 150s., 151s., 152s., 153s., 154s., 155s., 156s., 157s., 158s., 159s., 160s., 161s., 162s., 163s., 164s., 165s., 166s., 167s., 168s., 169s., 170s., 171s., 172s., 173s., 174s., 175s., 176s., 177s., 178s., 179s., 180s., 181s., 182s., 183s., 184s., 185s., 186s., 187s., 188s., 189s., 190s., 191s., 192s., 193s., 194s., 195s., 196s., 197s., 198s., 199s., 200s., 201s., 202s., 203s., 204s., 205s., 206s., 207s., 208s., 209s., 210s., 211s., 212s., 213s., 214s., 215s., 216s., 217s., 218s., 219s., 220s., 221s., 222s., 223s., 224s., 225s., 226s., 227s., 228s., 229s., 230s., 231s., 232s., 233s., 234s., 235s., 236s., 237s., 238s., 239s., 240s., 241s., 242s., 243s., 244s., 245s., 246s., 247s., 248s., 249s., 250s., 251s., 252s., 253s., 254s., 255s., 256s., 257s., 258s., 259s., 260s., 261s., 262s., 263s., 264s., 265s., 266s., 267s., 268s., 269s., 270s., 271s., 272s.,

PURE LITERATURE FOR THE PEOPLE.

RE-ISSUE of THE HOME CIRCLE.—The most sincere friend of the family is the publication which stands at its hearth, and amuses its members, without debasing them; this, by the disinterested testimony of two opinions, judges—the public great, and a very large number of private and valuable—is pronounced to be the peculiar characteristic of the HOME CIRCLE In pages, contributed to by the best writers of the day, eminent Historians, including Tales by Hood and Dennis, Essays, Tales, Notes and Queries, Needlework and Household Recipes, Original Translations, Chess, Music, &c., presented with Wood Engravings Everything calculated to improve, and nothing to offend Order this Work of your Bookseller No. 1, price 1½d.; Part I 6d.; and Vol 3, as, or 4s. 6d; to be had of all Booksellers. The HOME CIRCLE, being a standard Work, is never dear or cheap; no excuse for its not being supplied to order can be sustained as it may always be had at the office

London: W. S. JOHNSON, 46, St. Martin's-lane, Charing-cross.

BLUNDERS.—WATKINS'S DIRECTORY for 1855. In eight pages, imperial octavo, a Review of the March Number of Watkins's London Directory for 1855, exposing a large number of blunders, by far the greater part of which appeared in the first edition of Watkins's Directory published in December, 1853; and which have since been rectified with every assistance which could be rendered with the information which has been already published, and all the localities, blunders exposed in the Review have been again reinspected into

Persons who have purchased the work should without delay obtain the Review, which may be had here gratis, or will be forwarded on receipt of one postage stamp

*** The projector of "Watkins's Directory" is now engaged in advertising a garbled extract from a review of the "Post-office Alley for 1855," which appeared in the Globe newspaper on the 30th inst. The writer, not fortunately reading to an error and two omissions, passes to the remark, character of the work, which he sums up as—"Upon the whole, as perfect as human industry and human logic can make it" eulogy than which it is obvious none can be higher.

The projector not merely conceals this, but omits all notice of the editor having in the very same article, made a number of the thousands of blunders which we have exposed in "Watkins's Directory"

There is another matter of importance to "Subscribers" —in a recent extensive circular, in which its projector solicited "supporters" between the two books, we rejected proposing, in order to make the comparison effectual, that those persons who have been induced to subscribe for "Watkins's Directory" should also be supplied with copies of the "Post Office Directory," and allowed a month to decide which they will retain

This was the "comparison" we desired, and on first perusing the last advertisement of the projector of "Watkins's Directory," stating its willingness to enable parties to make the "desired comparison," we supposed that our properties had been agreed to

On a re-perusal, we find, however, it is, that parties "forwarding a request to the Office will immediately receive a copy of "Watkins's Directory." So that, as it now seems, it is intended that persons who have refused to subscribe are to be allowed an opportunity to know who have subscribed for the book for 1855 in ignorance that it would contain a large number of the identical blunders which have appeared in every edition from its commencement, in December, 1851, to that for next year inclusive

This is certainly an unusual—and, it appears to us, an unjust—mode of treating "regular subscribers" who would probably prefer a full and frank explanation of the blunders reported in "Watkins's Directory for 1855," to a garbled extract from a highly-eulogistic notice of the "Post-office Directory"

KELLY and Co., 19, 20, and 21, Old Boswell-court, Temple-bar, London.

PHRENOLOGICAL EXAMINATIONS, by C. MACKENZIE DICK, 66, MARGARET-STREET, CAVENDISH-SQUARE. Chart by post, 1s. French, German, and Spanish spoken.

Norris that parties with favour him with an early visit. Orders will be received as usual. Designs forwarded on receipt of six stamps for postage.—N.B. There will be no extra charge from the prices marked for delivery and fixing within five miles of London. Packing and packages will not be charge for.

London: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LITTLER, 199, Strand, aforesaid.—SATURDAY, NOVEMBER 18, 1854.

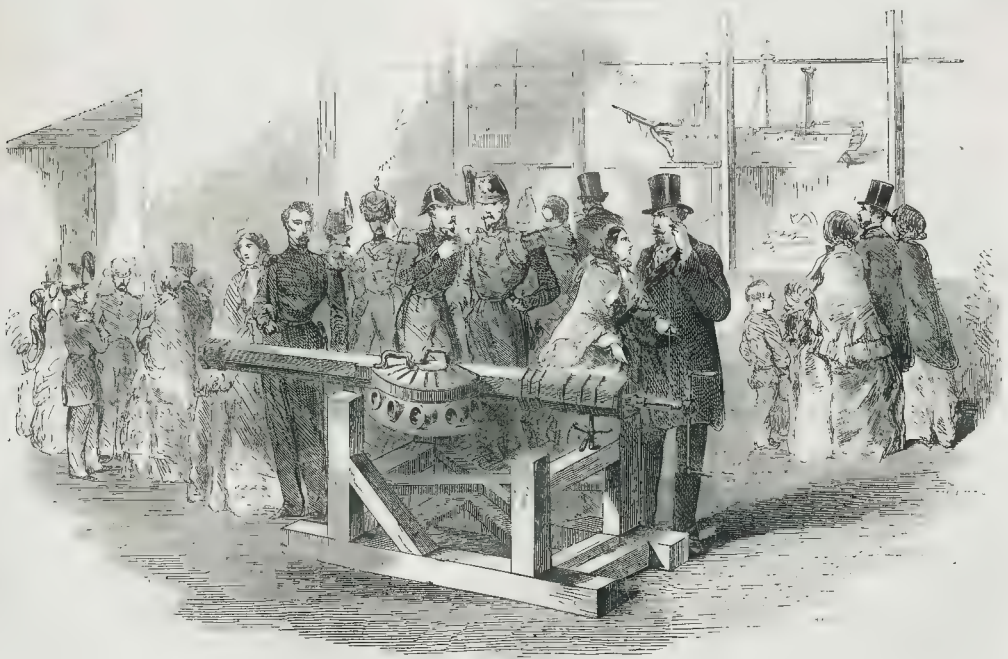
THE ILLUSTRATED LONDON NEWS

No. 714.—VOL. XXV. SATURDAY, NOVEMBER 25, 1854. [WITH A SUPPLEMENT, SIXPENCE.

THE DUTIES OF THE ALLIES TO THEMSELVES AND TO EUROPE.

In declaring war against Russia, Great Britain and France acted with full knowledge. They felt the grandeur of their object, and were aware of the mighty efforts which were necessary to accomplish it. History, in all its illustrious annals, shows no brighter example of disinterested virtue. Whether, in the long and patient negotiations that preceded the struggle, or in the actual conduct of the war, the same high principle and unflinching courage have been displayed by both. It is no self-laudation for the people of France and England to say that their cause represents truth, justice, and the common interests of all civilised nations; neither is it a calumny to say that Russia does battle in defence of a lie, of an injustice, and of an attempt, which, if it succeeded, would lay civilisation prostrate, and throw Europe back for a couple of centuries. The world knows on which side is the right; and there is not a Christian or civilised people on the face of the earth, whatever may be the dynastic interests of its rulers, which does not pray for the success of our arms, and thirst for an opportunity of taking part in the encounter. It is in vain that the Czar represents to his ignorant people that he is fighting for Christianity. Even the Russian serfs are aware that a large portion of their fellow-soldiers have the Koran in their knapsacks; and that cupidity to possess the Turkish soil, and the Turkish waters, and not hostility to Mahomedanism, is the mainspring of his actions. It is equally in vain that Nicholas attempts to cajole the slow-minded but honest people, and the timid Sovereigns, of Germany, into the belief that he is fighting for the cause of Conservatism against a revolutionary propaganda. The fiction is transparent, and comes from the mouth of one who is himself the arch-revolutionist of our time. Compared with him, all previous revolutionists were small and of no account. All Europe knows that he is the Disturber and the Anarchist, while he pretends to be the Conservator.

Such are the merits of the war. Having entered upon it, the Allies have duties to perform, not only to themselves, but to all the States of Europe—whose champions and representatives they are, whatever may be the present policy or backwardness of the several Governments not yet involved in the struggle. Of the duties they owe to themselves, the first and most important is self-reliance and a determination to conquer. They must have no dilettantism, no hanging back, no half measures, no postponement till to-morrow of efforts that should be made to-day, no blinking of the question at issue, no niggardliness or parsimony, no self-deception as to the desperate nature of the struggle, and the sacrifices which will be necessary both to punish the aggressor now, and to restrain him for the future. The Czar must feel that to him it is a death struggle. His throne, his life, and the position of his empire are staked on the result. He knows that if he be defeated in the Crimea the ambitious projects of nearly two hundred years o. stealthy, patient, and successful aggression will be crushed. He knows that if Sebastopol be taken, and his armies dispersed, that the Crimea will be lost to him for ever; and that, with the loss of that great and greedy tentaculum, stretching out from the confines of his barbarous Steppes, and grasping the Black Sea and the fairest regions of Asia and of Europe, will be added the loss of a thousand other ill-gotten gains—the aggregate of which will reduce great Russia into little Muscovy. Human life is nothing to such a Sovereign, combating for such a purpose. France and England may be well assured that he will strain every nerve to protract the war. He will fight or he will intrigue, as circumstances may dictate. Wherever one of the Allies has a friend, he will strive to convert the friend into an enemy. Wherever there is jealousy or fear of Great Britain or France he will blow, if he can, the embers into a flame. If truth will serve him, he will tell the truth. If a lie will answer his purpose, he will lie, and lie again; heaping the Pelion of falsehood upon the Ossa of mendacity. He will pour to the scene of warfare his barbarous hordes by hundreds of thousands at a time, to harass, if they cannot destroy, the enemy. He will excite fanaticism, and revenge, and lust of plunder. He will let loose his soldiers to pillage and murder. He will disregard all the laws of civilised warfare, if by so doing he can inflict a damage on his foe. He will appeal to every passion, however base and ignoble, to bring his slaves to the field; and he will lash them up to fury when they get there; by persuasion, if he can; and by the knout, if other means be unavailing. In proportion to the magnitude of the issue will be the efforts he will make to overbear all opposition by the overwhelming torrent of multitudinous savages that he will unmanacle to do his bidding. If he cannot conquer by strategic skill, or military courage, he will try to conquer by ferocity. The Allies owe it to themselves to make efforts commensurate with the desperation and the strength of their enemy. The gallant British and French soldiers in the East never dream that they can be defeated. Mowed down as they have been by the grape-shot of an enemy with numbers greatly superior to their own, they have never once doubted of victory. Courage has not failed when they were exposed to such fearful odds as those which beset them on that glorious fifth of November, when the redoubts were thrice taken and re-taken; and when the Russians, reinforced and re-invigorated, were driven, with enormous slaughter, from the field. And, while these matchless soldiers have been acting thus, never reckoning as a contingency within the limits o. probability or possibility that victory would not reward them in the end, it would be indeed a scandal and a disgrace if we at home should be discouraged, or that we should think any sacrifice too great, that should reinforce their thinned battalions—not by thousands merely, but by hundreds of thousands of men. Rather



CANNON REVOLVER, EXHIBITED IN THE MARINE MUSEUM, AT PARIS.—(SEE NEXT PAGE.)

than be defeated in such a struggle, every man within our realms capable of bearing arms would turn out in the defence of his country. And to be defeated for mere lack of energy would indeed prove us to be degenerate—a nation of vain boasters and craven-hearts, ripe be blotted out of the map of Europe;—

> Come the Eleventh Plague, rather than this should be—
> Come, rather, sink us in the sea—
> Come Pestilence, and mow us down—
> Come God's sword, rather than our own!

As yet the Allies have put forth only a portion of their strength. The burdens of the war have been scarcely felt, except by the widows and orphans of the slain. But the time has come when we must go to work in more terrible earnest. There must no longer be any talk of paying for each campaign out of the taxation of the year. We cannot pay as we go with such a mighty undertaking on our hands. We must put forth all our energies, and spare no money that our credit can raise. The honour of Great Britain is at stake. If we do not conquer, we fall back, and are no longer the great nation that we were. We are no longer the foremost in Europe: without whose consent no hostile gun could be fired, or an inch of territory appropriated by one State from another. We must not only have men enough, but money more than enough, and if the year will not afford it, we must borrow of the future. and mortgage the resources of our sons and successors to pay the cost of a conflict, in which, if we were beaten, we should have neither resources, nor character, nor standing as a nation, or sons that would not blush for the names of their fathers. Hitherto our principal fault has been to show too much mercy and consideration for the enemy. In the earlier stages of the conflict we made war, as if rose-water, and not blood, were to be spilled. We played the magnaminous, and showed false mercy, where stern justice would have been wiser and better policy. Why, for instance, have we spared Revel and Odessa? Has Russia spared the blood of our bravest soldiers and noblest Generals? Has not Russian ambition brought misery and desolation into thousands of British homes? And is it just to living men who are still fighting our battles, to go shilly-shallying, instead of meting out to the Czar the full measure of retribution and vengeance which he deserves? Had we utterly destroyed Odessa, as we ought to have done when we first bombarded it, we should not have been unjust, or even vindictive to the Czar, but merciful to our own blood. Even now it should be our business, while our fleet has a few ships to spare, to send them to batter to the earth the emporiums and arsenals of a city that supplies the Russians with food, with ammunition, and with reinforcements. The talk of philanthropy, and of the necessity of sparing a commercial city, is out of place. Nicholas, we may be certain, would burn down London, or the city misrepresented by his friend, John Bright, if he had the chance; and shall we be squeamish in weakening Russia when Russian strength is a European calamity? In the war which Nicholas has provoked, we must deal with him and his hordes as with public nuisances. In a vigorous course of action like this, the people will support the Government, even were the sacrifices which they render necessary fifty times more onerous than any which have yet been consummated. Other nations must take their sides. Those Governments who are not with us, must be held to be against us. If we cannot move the Swedes out of Central Europe, we must try what we can do with their subjects. If the Austrian Emperor and the Prussian King will not move, we must try what force there is in their people. If we are fighting for a principle, we must test the principle wherever it has a friend. If Russia appeals to Cossackism, we must appeal to Humanity; and the war must expand to its proper dimensions, with Liberty and Civilisation on the one side, and Barbarism and Barbarity upon the other.

In the meantime, all honour and gratitude to the brave besiegers of Sebastopol! Reinforcements are daily reaching them; and, if need be, they shall have twenty, or a hundred men for every one which we have sent them. They have been no niggards of their blood; and their country would be unworthy of them, if parsimony on this command, or intimidation on the other, left them unsupported in the most momentous contest that was ever waged since Britain was a nation.

THE CANNON REVOLVER.

The present war shows the importance of bringing the arms of the soldier to perfection; not that in itself it be desirable to increase the efficacy of destructive weapons, but because that efficacy tends to shorten the duration of armed conflict, and thus to prevent those continually recurring skirmishes and collisions which cost more in blood, in materials, and in direct pecuniary outlay than does the most murderous general battle, such as even sometimes terminates hostilities. It is a maxim of State that peace should be a preparation for war. But which of the States now engaged has profited in this respect by the long peace? Not one to any great extent. In short, none of the numerous inventions and discoveries which have recently proceeded from the labours of technical science can be said to tend to abridge the period of war. In so deeply supine a sense of false security had the long calm steeped the minds of men, that even several such inventions have been despised without examination or rejected after the most superficial analysis. But circumstances are changed, and the public attention is now sufficiently alive to every improvement by which science can propose to render war shorter, by rendering it more decisive. Among these improvements is that of the Revolver, an instance of which we noticed some time ago. M. Fruniet-Delvigny claims to have invented it, in 1828; and he found much difficulty in getting it accepted or recognised by the French Government. Not for nine years afterwards was the first model cast, which is now exhibited in Paris. The experiments then made did not procure its adoption. This first specimen of a barrel formed on the revolver principle consists of a cylinder communicating with the chamber by a spherical part. The barrel is two inches and a half in diameter, and about three feet long. The side of the barrel is formed of two hollows from the point of junction, and is pierced in the middle by the pippie, or rather charging hole; this is constructed in the metal itself, which is cast iron. The chamber exposed on is like a drawer, and contains a circular plate, supporting twelve chambers, which are hung or pivoted on an axis: these chambers are alternately presented to the loading aperture, and are tightly forced against it by means of a screw pressing vice-wise through the breech. An indented lever, furnished with handles, imparts to the breech the required turn or inclination. The description—which we could not make more minute without rendering it obscure—is sufficient to explain the method.

It is easy to see at once the numberless inconveniences of the revolving barrel: they are the same as those of all fire-arms loaded at the breech. In the first place, the weapon becomes foul more quickly; and this defect, after a certain number of discharges, clogs and arrests all the movements of the machinery. Then, to give to such a machine sufficient solidity is no slight difficulty—the most delicate parts of it being the most exposed to suffer from the chemical action consequent on repeated incandescence. Finally, there is the risk of explosion from several chambers going off together. These inconveniences are not removable by any improvement of the mechanical or instrumental details, but belong to the revolver-principle itself. The very metal it elf must lose much of its consistency, not to speak of the structural delicacy, so easily disordered. All these reasons militate against the general adoption of the revolver in warlike operations; though, in individual contingencies, it may be an invaluable defence. In the open field, for masses of men, it must always be feeble, however much improved. Perhaps on a rampart its utility would be greater. Sieges, however, are but episode in war, as a rule; even though a siege happens to be now our own epic. The most plausible idea is that it would be a fine naval weapon for a boarding party. Yet a division of the French Government has consigned it to the naval museum, among bygone objects of curiosity, the relics of infructuous invention.

FOREIGN AND COLONIAL INTELLIGENCE.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

The care which the French press takes to publish constant statements and explanations of the necessary and natural delays which occur in the prosecution of the siege of Sebastopol—assurances that these delays were, and are, inevitable, and ought to have been anticipated—and accounts of other sieges, where, with much fewer difficulties to encounter, the result has been longer deferred, seems to have, in some degree, allayed the impatience and restless anxiety with which the news of the termination of the affair was looked for. The alternations of feeling, however, which a nation so impressionable as the French cannot but experience on a question which comes so home to the public and personal interests of all, are, as may be supposed, difficult to follow and chronicle; and the remark that holds good for to-day ceases to apply on the morrow. Meanwhile, the actual situation remains as it was last week—a total absence of anything in the way of fêtes or receptions at the Court, or in official circles; and a similar abstinence in private ones; —everything is *en attendant*, and will remain so till something decisive occurs in the position.

The fête of the Empress, and the seventy-fourth birthday of the Prince Jerome Napoleon, were celebrated at St. Cloud merely by the Imperial family, and without any external demonstrations.

The cannons taken at Bomarsund have been finally placed in the Museum of Artillery, in the Place St. Thomas d'Aquin.

The new system of police, established on the plan of our English one, has begun to work in the first and tenth *arrondissemens* of Paris. The Monnaie is striking a medal in honour of the Marshal St. Arnaud.

The difficulties which have hitherto prevented the election of M. Berryer at the Académie Francaise have been finally raised, and the séance for his reception is announced to take place on the 9th December. It is expected that an immense concourse will attend this meeting, and already tickets are being eagerly sought for admittance. The death of M. Ste Aulaire leaves another vacancy in the ranks of the Academy.

Some of the Russians who yet remained here—among others, Mdme Kalergi, and Mdme. Seebuch, wife of the Saxon Minister here, and daughter of M. de Nesselrode—have quitted Paris to return to St Petersburg. On the other hand, the Princess Ypsilanti, and one or two other Russian ladies of distinction, have obtained permission to pass the winter here.

A singular and interesting discovery has been made, in pursuing the labours necessary to complete the new works of the Louvre. In digging at the foundations of the old entrance of the Musée, the remains of a subterranean gallery have been found, which tradition affirms to have been constructed by the orders of Henri IV., and to have led from thence to the hotel of Gabrielle d'Estree, formerly situated in the Rue de la Monnaie.

Another discovery, however, of much more serious interest, consists in that of the remains of Bossuet, in the Cathedral of Meaux. The coffin having, many years since, been removed in some repairs which the church then underwent, and its precise position not stated, it was only after a somewhat long and minute search that it was brought to light, and recognised by the epitaph, the terms of which history has recorded. The lid being removed, in the presence of the Bishop and the local authorities, the body of the illustrious Pontiff was discovered, still in tolerable preservation. The moustache and imperial—worn in those days even by the clergy—still remained, as well as the front teeth, and a portion of white hair. The length of the corpse measured only five feet two inches (French)—an unusually low stature, which does not seem to be recorded in any memoir of Bossuet with which we are acquainted. Bossuet died in 1704. On the occasion of this discovery, a funeral mass was celebrated in honour of the illustrious Prelate and the other Bishops of Meaux. The coffin is not yet closed, but merely glazed, to preserve the body from the contact of the air. There is a question of performing a grand funeral ceremony at the Cathedral of Meaux before finally consigning the remains to the tomb preparing for them, and inviting to the ceremony the high clergy, the Academy, and the chief officers of the State.

The obituary of last week announces the death of another member of the Las Cases family—M. Auguste de Las Cases, cousin of the Comte Emmanuel, whom a disease of the heart a few weeks since carried off suddenly immediately after his marriage. M. Auguste de Las Cases has fallen a victim to a malady brought on by his services in the present war.

Despite the occupations of the moment with respect to the state of affairs abroad, the preparations for the opening of the Great Industrial Exhibition continue to be carried on with undiminished activity; and there seems to be no doubt that all will be ready for the month of May. We lately gave an account of some of the works of art in progress for this great occasion. We have now to add to the list two statues (life-size)—Tragedy and Comedy—by M. Duret, a sculptor of considerable and well-merited reputation: on the closing of the Exhibition they are to take their places in the vestibule of the Théâtre Français, near the statue of Voltaire.

The Government is also occupied with the question of the theatres. The Minister of State has applied to Mdme. George Sand, and to Alexandre Dumas, for two new pieces for the Comédie Française, to be written in readiness for the grand campaign. A piece of M. Scribe, the subject drawn from the history of Russia, has been received at the National Theatre. The title is "La Czarine;" the part of the heroine is to be played by Mdlle. Rachel, *Pierre le Grand* by Beauvallet, and the *Menschikoff* of the day by Geffroy. It is said that the part intended for Bressant so little satisfies him, that it is probable he will not accept it.

AMERICA.

The *Niagara* steam-ship, which left Boston on the 8th inst., arrived at Liverpool on Sunday. Telegraphic despatches from Washington state that the United States Government was about to issue a treaty circular providing for the admission of the produce of Canada, New Brunswick, and Prince Edward Island, on the same terms as recently established respecting colonial fish. The provinces of Nova Scotia and Prince Edward Island would shortly adopt measures for carrying out the treaty.

An official proclamation had been issued confirming the convention entered into between the United States and Russia, establishing the rights of neutrals at sea. The convention provides that free ships make free goods, and that the property of neutrals on board enemy's vessels is exempt from confiscation, unless contraband of war.

It was expected that Sir Edmund Head would leave Boston for Canada on the 7th, to assume the post of Governor-General, and that Lord Elgin would shortly sail for England, first visiting New York and Washington.

The Political Crisis in Denmark.—On Friday week a meeting of Danish residents in London was held at the Freemasons' Tavern—Mr. C. Möller in the chair—to take into consideration the present political crisis in Denmark. After several of the members had addressed the meeting, showing in firm, but moderate, language how the late occurrences in Denmark threatened the entire overthrow of the free constitution of the country, and calling upon every one of their countrymen to assist in preventing Russo-friendly encroachment upon the rights which the small but steady Danish people, through the triumphant issue of the unequal and most sanguinary war in 1848-50 had so well acquired, a resolution to form a society in support of the present constitution of Denmark was carried. The most patriotic and loyal spirit manifested throughout the evening; and toasts were drunk with enthusiasm to Majesty the King of Denmark, her Majesty the Queen, and for the Army in the Crimea. "We cannot separate," said one of the speakers, "without expressing our sympathy with the Allied forces at present doing such glorious deeds in the Crimea; it was not the battle of England and France alone they were fighting, it was that of civilisation against barbarism: although that little country, Denmark, was not engaged, they must not forget that her independence, her position as a nation depended upon this struggle. The Danes were akin to the English, whatever the feelings of the Danish Ministry might be, this he could say, that the free-hearted, free-spoken Danes were with the people of England in this mighty struggle of liberty against despotism."

THE BATTLE OF INKERMAN.

(From our Special Correspondent.)

Before Sebastopol, Nov. 8, 1854.

The 5th of November will be memorable, in future, as the anniversary of the hardest-fought action that has taken place for many years. It commenced at daybreak on Sunday—a favourite day with the Russians, who pretend that Divine right is on their side, and who persuade their soldiers that the Sabbath is propitious—experience not having taught the latter the vanity of the pretence. Oltenitza, it is true, might have been borne in mind, as a proof that victory is not always attendant on those who, for the satisfaction of one man's pride, break through Divine command, which makes that day a day of rest; but Russian soldiers are not supposed to reason, and so the pretence goes down. The dawn broke in upon a damp and misty morning, when the action commenced. A heavy gloom covered the spurs on the right and front of our position—the mist rolling slowly down their sides into the vales, and up again upon the hills which overlook Sebastopol and the ruins of Inkerman. During the night a heavy noise, as of carts moving into the besieged town, met the ears of some of the advanced pickets; but our officers were unable to conjecture, from the noise, that danger threatened them so nearly. The noise was that of 50,000 Russians moving up with guns and ammunition—carts to a position in front of our right. Heavy 24 and 32-pounders were in the train, and the masses of the evening moved so silently that they caused us no alarm. The attack commenced as the light appeared. On our left, skirting a ravine which leads to Sebastopol, were pickets of the 47th, under Major Fordyce; and of the 41st, under Capt. Rowlands and Lieut. Fitzroy. The first announcement to them of the enemy's approach was a sharp fire from the sentries along the front. The companies, on moving out, found themselves instantly opposed by columns, when they expected to meet but skirmishers; and, though they maintained a bold attitude, they were forced to retire before the heavy masses of the enemy advancing with irresistible force. Our pickets whilst retiring charged repeatedly with the bayonet, causing the Russians in the front to fall back. Captain Rowlands and Lieut. Fitzroy were both wounded in their efforts to hold their ground against the enemy. The position which the Russians had assumed was the same as that from which they were expelled in the affair of the 26th October. Their columns moved simultaneously — their right extending to the ravine already mentioned, their centre on "Shell Hill," and their left up the main Sebastopol road. Whilst our pickets were driven in by the Russian right, those of the centre were forced back upon the barrier on the Sebastopol road, and a strong Russian force doubled down the quarry ravine, to turn the right flank of our position. The heavy guns, which had taken up a position during the night on the extreme right of the Russians, poured in almost immediately a hot fire of shot and shell upon the camp of the Second Division. The troops had barely had time to form when the fire commenced. The greater part of the tents were struck with great speed, and the various regiments of the division moved up in haste to support its pickets. The enemy had made great progress at this time, however. Their guns had moved to the brow of "Shell Hill," and were pouring in a destructive fire upon the advance of our men; whilst our artillery, which had hastily taken a position opposite to them, were unable to cope, either in weight of metal or in number, with the large and numerous train of the Russians. The enemy, therefore, gradually drove us back from the barrier on the Sebastopol road, from the spur on our right, and from that on our left. They did not do so, however, without heavy loss. As fast as the various regiments came up from the First, Fourth, and Light Divisions to reinforce the Second, companies were detached to the divers points where they were required, and this caused considerable confusion, by separating the different portions of regiments from each other. It is impossible, for that reason, to define with any accuracy the position of any detailed portion of our force. They maintained a determined front everywhere. The 88th, part of the 49th, and companies from some other regiments, were commissioned to hold the enemy in check on the left; whilst, on the right, three companies of the 49th, part of the 41st and 30th, and two companies of the Grenadier Guards, advanced from the two-gun battery against the enemy, and charged at them down the hill. The Russians swerved from them, but continued their flank movement towards our right. As they did so, General Sir George Cathcart was observed advancing with the 46th, the 68th, and Grenadier Guards, who, joining the men already in hot action with the Russians, rushed with an irresistible impulse against them. As they moved down the hill, Sir George Cathcart, conspicuous by his dress, and the Guards by their bearskins, became a sure mark for the enemy. The Russians, however, gave way in front, but gradually closed in upon our right and in a few minutes outflanked us. Our men, by this time, had most of them expended their ammunition, and they found themselves in the dreadful position of charging back up the hill to cut through the enemy who had outflanked them and obtained possession of the two-gun battery behind. Luckily for us the work had been disarmed a few days previously. Sir George Cathcart and many other brave officers fell at this unlucky time, but our men used the cold steel with vigour, and they were cutting their way up when they caught sight of General Bosquet moving with a regiment of Turcos and one of Zouaves upon the battery which the Russians then held. The assistance of the French had not been timely only here, but had been of the utmost consequence in other parts of the field. Whilst Sir George Cathcart charged upon our right, the long line of English infantry which formed our centre had been strengthened and was beating back the Russians along the whole front. Our artillery, which had been reinforced from the other divisions, kept up a heavier fire, and the enemy quailed everywhere at our advance. But when our right flank was turned, the effect was instantly felt at the centre. Fresh columns of Russians poured in to fill the space left by those which had been beaten back, and on all sides our line began to retire. Notwithstanding repeated charges at them, by which they were but partially and momentarily checked, the Russians poured an enormous

column up the Sebastopol road, and reached the crest of the hill above the camp of the Second Division. They formed a dense and compact mass, irresistible in weight wherever it struck, but slow and inert enough in motion. Our retreating companies retiring before this column, were formed up in line amongst the struck tents of the 30th Regiment, and not thirty yards from the enemy. At the word of command they moved with left shoulders forward, and took the advancing Russians in flank; whilst opportunely, at the same instant the French Light Infantry furiously attacked their front. The French had just come up running. They were in the act of formation, and it required all the energy of their Colonel, and the efforts of Captain Glazbrook and Gubbins, of General Evans's staff, to bring them up in time. They charged, in spite of their confusion, in gallant style, pouring in a deadly file fire in front, whilst our line poured in an equally deadly one in flank, and our artillery threw a volley of grape into the midst of them. The Russians withered away before the shower, and fairly ran, leaving the ground strewed with the dead and dying. French artillery came up to our assistance at the same moment, and the 6th Regiment of Infantry joined the 7th Light, the Zouaves, and Turcos in the onslaught, headed by General Bosquet, who had by this time cleared the two-gun battery on the right of the enemy. This grand effort of the Russians was beaten back at half past nine in the morning, up to which time the British had thus been keeping in check with their comparatively small force, no less than 50,000 men, with sixty heavy field-pieces. But, though they had received a severe check, the enemy retired very slowly from the field; and they even succeeded in a second flanking movement against General Bosquet's Division. This bold officer, after having re-taken the two-gun battery, and thus saved the remnants of the troops which charged with Sir George Cathcart, fell into the same mistake as that which had cost that General officer his life: he charged the enemy furiously in front, and drove them before him headlong down the hill. But the Russians again gave way in front, and rallied on the flank; and, before General Bosquet could recover himself, he found he had to retire up hill, through the enemy, which pressed him on the right and rear. The Russians, however, were no longer in spirit to make use of their advantage: they allowed themselves again to be cut through, and then were gradually beaten back towards their centre. There our Riflemen, thrown forward in advance, had been steadily playing on the Russian artillery in front of "Shell Hill." Two heavy 18-pounders, from our siege-train, had been brought up, and played with great effect on the enemy's guns. Several of them were dismounted, and dragged away by ropes with men and horses harnessed to them, and our line gradually advancing as the enemy withdrew, the artillery in our front was finally silenced, and the guns retired. Still, however, the heavy pieces on the Russian left kept up a destructive fire upon the crest where the French and English were firing, and on the camp of the Second Division. Not a spot of ground occupied by six regiments remained untold by a shell from those guns. The enemy probably supposed our reserves to have been there, but they were, fortunately, in error. Their fire, however, was extremely dangerous to the ammunition carts and horses as they passed through to the front, and many men and horses were killed there. Captain Allix, of the Royals, was leaving General Pennefather with an order, when, as he reached that part of the ground, he was struck in the stomach by a round shot, and killed. Gen. Pennefather himself, who had been in the thick of the fight, had two horses killed under him; and, though bruised by a fall, was otherwise unhurt. But death had been busy with many other general officers. General Strangways had been carried off the field, having a leg shot off. He died almost instantly. Brigadier-General Torrens and Brigadier-General Goldie were mortally wounded. Sir George Brown retired early from the field, with a wound through the fleshy part of his arm; and Brigadier-general Buller was contused. Brigadier-General Bentinck was severely wounded, and General Adams bayoneted in the instep. The Duke of Cambridge was slightly contused. Our loss in General officers led the French to say that they exposed their persons too much, and in this they are not far wrong.

The enemy only kept up the cannonade at last to cover the retreat of their men; and by three in the afternoon, the crests of the hills in front of Sebastopol were clear of the enemy, who was observed shortly after debouching on the plain below, crossing the valley of the Tchernaya, and entering the hills on the other side. As they wound along the road, and formed columns to cover the retreat, they were distinctly visible from the heights, and they still appeared to muster about 30,000 strong. The French dragged up some guns to the tops of the hills, and threw shells into the retreating columns, which hastened away as fast as possible. The battle-field thus remained in possession of the Allies. It was frightful to behold: upwards of 2000 Russians lay dead upon the road, amongst the bushes, and around the two-gun battery. Of our own men the loss had also been great. Upwards of 600 men had fallen, and 2000 were wounded or missing. The Second Division alone lost 728 men; of whom 147 were killed, and 581 wounded. Of the 41st Regiment, besides Captain Rowland and Lieut. Fitzroy, who were wounded early in the day, four officers fell—Captain Richards, and Lieuts. Taylor, Swaby, and Sirling. Lieutenant-Colonel Carpenter, attacking in the morning with part of his regiment on our right, was mortally struck in three places, and only lived twenty-four hours. Lieutenant Bush, Captains Bligh and Johnson, were likewise hit—the latter slightly. Of the 49th, Major Dallas was severely wounded whilst supporting a charge on the left flank. Lieutenant-Adjutant A. S. Armstrong had his arm and shoulder taken off by a round shot almost as the regiment formed in front of its tents. Of the 47th, Lieutenant-Colonel Haly and Ensign Waddelove were hit—the first severely, the second slightly. Of the 55th, Colonel Warren, Lieutenant-Colonel Daubeney, Lieutenant R. Hume, Lieutenant Barstow, and Ensign Morgan were wounded. Of the 30th, Captain Conolly was mortally wounded, and Ensign Gibson fell instantly. Major Mauleverer; Captains Rose, Dixon, and Bayley, and Lieutenant Ross Lewin were wounded. Of the 95th, Major Champion was wounded. Of the Staff, Captain Allix was killed; Captain Gubbins hit in the shoulder, Captain Hardinge also in the shoulder, and Captain Adams was wounded in the left arm.

The severest loss, however, was that which was suffered by the Coldstream Guards. They were conspicuous by their dress; and as they behaved admirably in the defence of the 2-gun battery, and the subsequent charge under General Cathcart, they were almost marked for destruction. Out of the entire regiment, which left England in February 850 strong, only 300 can now be mustered in the field. In the battle of Inkerman the regiment lost no less than eight officers killed and four wounded. Hon. Colonel Dawson was shot through the heart; Colonel Mackinnon was wounded in the face, and bayoneted in six places. His leg was amputated at the hip-joint, but he died shortly after. Hon. Granville Elliot was shot through the head. Captain Ramsden, who was hit in the chest, was bayoneted in six places by the relentless enemy, who refused to listen to his cries for mercy. Colonel Cowell, Captains Disboro' and Bouverie were likewise killed. The wounded were Colonel Upton, Captain Fielding, Hon. Captain Amherst, Lieutenant-Colonel Fitzroy, and Colonel Halkett.

The loss in the numerous regiments engaged I have not been able to ascertain. I have heard of the following:—1st Battalion of the Rifle Brigade: Captain Cartwright, killed; Captain Butler, shot through the thigh—these two officers were hit whilst making an admirable charge to the front, at the first repulse of the enemy. Major Roper, of the same regiment, was hit in the shoulder. It may not be amiss to note that the 1st Battalion of the Rifles went in 300 strong, and lost 110 men. 68th. Colonel Harry Smith was badly wounded; Major Wynne, killed. The Fourth Division lost, in all, about 345 men—killed, wounded, and missing. Of the Light Division, the 88th had Colonel Jeffreys, contused; Captain Cross, wounded. 19th. Captain Carr, died of his wounds. 27th: Captain Nicholson, head carried away by a cannon-ball. 3rd Battalion Rifle Brigade: Lieutenant Malcolm, killed; Captain Newdegate, wounded in the foot.

Lord Raglan during the day advanced several times to the crest of the hill above the Second Division's camp, and was accompanied part of the time by General Canrobert. There can scarcely be a greater contrast than that between the staid appearance of our Commander-in-Chief—his white hair and grey dress, and the dashing uniform of the French General—his cocked-hat fringed with white, his spare black hair falling over his face, and the peculiar twitch given to the mouth by a cigar in constant ignition. The sober dress of our Staff was also strangely modest compared to that of the host of officers and orderlies. French and Arab, which surrounded General Canrobert, parading at their head the brilliant tricolour. The courage and ability of both Generals is admitted; but the French had a vast deal of what they call *chic*—more, in fact, of the trick of military dress than we have.

Whilst General Canrobert was thus sharing in the battle of Inkerman—where I must not omit to say a shell contused his arm—the Russians made a false attack on the lines of Balaclava, which was treated with the contempt which it required; but they made a determined assault on the French lines in front of Sebastopol. They sallied with 4000 men, and attacked the sailors' battery by the shore. The covering parties were not re-formed with sufficient speed; and the enemy entered the battery, when they proceeded to spike the guns. This operation they performed very superficially to some of the pieces, when they were charged by General de Lourmel at the head of the 26th regiment, and repulsed to the wall of the town, with the loss of 1000 men and 100 prisoners. General de Lourmel unfortunately was shot through the lungs, and is not expected to recover. The loss of the French in this sortie is estimated at 500 men killed and wounded, and in the battle of Inkerman, at 700 killed and wounded. In this number are fifty officers, a heavy proportion. The French Chasseurs d'Afrique, and our Light Brigade were moved during the day, under fire of the enemy, and they both suffered slightly. Cornet Cleveland of the 17th Lancers was killed by a shell, or rather died of the wound, some time after he received it. The loss of gallant officers and men on this memorable day, will be felt in many a home in England. It is consoling to know that the exertions of these brave men have conduced to the attainment of a victory, and that their names will be preserved amongst those of many gallant fellows, who have fallen like them, for the honour of their country.

The 6th and the 7th has been spent in attending to the wounded, numbers of whom have been placed on board ship, after having had their wounds attended to. The Russian wounded were cared for after ours. It will take some days to finish burying the vast number of dead which encumbers the field of battle.

Yesterday, I am happy to say, a reinforcement of 5000 French troops entered Kherson Bay, the landing place of our allies.

On the 6th a grand council of war was held; but, of course, its decisions are not known.

The French and English together took about 3000 prisoners on the 5th.

I must not forget to mention that Sir De Lacy Evans came up from Balaclava, and took part in the action of the 5th. He then returned on board the *Sanspareil*.

BEFORE SEBASTOPOL, NOV. 8, A.M., 1854.

P.S. I had a hard day of it on the 5th: I had barely time to get out of my cloak, and put on my boots, when a shell burst in my tent, smashing a great number of bottles, and making various rents. I got outside in time to see a cannon-shot bowl through at the place where I was standing just before. I got on to the front, and saw the Russians advancing. The artillery fire then became too hot for me, and I walked to the rear, with shells bursting about me for at least ten minutes. I never had such narrow escapes of life as on that day. The scenes on the battle-field were awful. I sickened over them, and have been ill ever since. Sketches in my next.

GENERAL CANROBERT'S ACCOUNT OF THE BATTLE.

(From the *Moniteur*.)

The Marshal Minister of War has just received from the General Commanding-in-Chief the Army of the East the following report:—

Head-Quarters before Sebastopol, Nov. 7, 1854

Monsieur le Maréchal,—I have the honour to confirm to you my telegraphic despatch, dated November 6, and thus worded:—"The Russian army, swelled by reinforcements from the Danube, and by the reserves collected in the southern provinces, and animated by the presence of the Grand Dukes Michael and Nicholas, yesterday attacked the right of the English position before the place. The English army sustained the combat with the most remarkable firmness. I caused it to be supported by the Division of General Bosquet, which fought with admirable vigour, and by the troops nearest at hand. The enemy, far more numerous than we, beat a retreat with enormous loss, estimated at 8000 or 9000 men. This combat's struggle lasted the whole day. On my left, General Forey had to repel at the same time a sortie of the garrison. The troops, energetically conducted by him, drove the enemy back into the place, and inflicted on him a loss of a thousand men. This brilliant day, not purchased without loss by the Allies, does the greatest honour to our arms."

The action, summarily expressed by the despatch given above, was one of the hottest and most violently contested. From the very first musket shots that were fired, the deserters that came over to us revealed the true state of the Russian army with respect to its effective strength, and we were enabled to calculate the reinforcements it has successively received since the battle of the Alma. These are—1st, some contingents from the Asiatic coast, from Kertch and Kaffa; 2ndly, six battalions and some detachments of Marines from Nicolaieff; 3rdly, four battalions of the Cossacks of the Black Sea; 4thly, a great part of the army of the Danube; 10thly, 11thly, and 12thly, some divisions of infantry, forming the 4th corps, commanded by General Dannenberg. These three divisions were transported by post horses, with their artillery, from Odessa to Simpheropol in a few days. Finally arrived the Grand Dukes Michael and Nicholas, whose presence could not fail to give a noble stimulus to their troops, with the garrison of Sebastopol, a total of at least 100,000 men.

It was in this condition that 45,000 men of this army surprised the point of the heights at Inkerman, which the English army had not been able to occupy with sufficient forces. Only 8000 English took part in the action, the remainder being employed on the siege-works; they valiantly sustained the shock and at the moment when General Bosquet, arriving with a part of his division, could render them such aid as might ensure success. One hardly knows which most to praise, the energetic firmness with which our allies braved for a long time the storm, or the intelligent vigour displayed by General Bosquet, when conducting a part of the brigades hors-bataille d'Autemarre, in order to attack the enemy, who extended beyond them on their right.

The 3rd Regiment of Zouaves, under the *chefs de bataillon*, Montaudon and Dubos, there justified most signally the old reputation of the army. The Algerine Rifles (*tirailleurs*), Colonel de Wimpffen; a battalion of the 7th Light Infantry, Commander Vaissier; the 6th Regiment of the Line, Colonel de Camas, vied with them in ardour. Three times they crossed bayonets with the enemy, who only yielded ground after the third charge, upon which he left it strewed with his dead and wounded. The Russian heavy artillery and their field-pieces were very superior in number, and had a commanding position. Two horse batteries, Commander de la Mouse mère, and one battery of the Second Division of Infantry, Commander Barral the whole under the orders of Colonel Forgeot, sustained, concurrently with the English artillery, the struggle during the entire day.

The enemy decided on beating a retreat, leaving behind more than 3000 dead, a very large number of wounded, a few hundred prisoners, as well as several powder chests, in the hands of the Allies. His losses, in the gross aggregate, cannot be put down at less than from 8000 to 10,000 men.

While these events were taking place on the right, about 5000 men of the garrison made a vigorous sortie on the left of our attack; siege line, under cover of a thick fog, and along the ravine that favours the their approach. The troops on duty in the trenches, under the orders of General de la Motterouge, marched against the enemy, who had already invaded two of our batteries, and repulsed him, killing more than 200 men on the site of those batteries.

Lieut.-General Forey, commanding the siege corps, arrived by rapid and skilful evolutions with the troops of the Fourth Division to the support of the Guards in the trenches, and himself marched at the head of the 5th Battalion of the Chasseurs à pied. The Russians, repulsed along the whole line, retired precipitately on the fortification, with considerable loss; when General Lourmel, seeing them fly before him, and carried away by a chivalrous courage, flung himself headlong in their rear, with his brigade, and fell wounded under the very walls of the fortification. General Forey had much difficulty in extricating him from the very advanced position to which, yielding to the impulse of superabundant courage, he had led his brigade. The Brigade of Aurelle, which had occupied an excellent position on the left, covered in the rear, which was effected not without a certain loss under the fire of the fortification. Colonel Niol of the 26th Regiment of the Line, who lost his two *chefs de bataillon*, had taken the command of the brigade, the energetic conduct of which was beyond all praise. The enemy in this sortie lost a thousand men killed, wounded, or made prisoners; and, in addition to this, received a very considerable moral and physical check.

The battle of Inkerman, and the contest maintained by the body of besiegers has shed great glory on our forces, and has augmented the moral strength which the Allied armies have always possessed. At the same time, we have suffered losses which must be regretted. The English army has lost 240 men killed or wounded, among which are to be reckoned seven Generals, three of whom are killed. The French army has suffered to the extent of 1726 killed or wounded. We have bitterly to regret the loss of General de Lourmel, since dead from his wounds, whose brilliant qualities promised a grand career in the future. It is my painful duty also to acquaint you with the death of Colonel du Camas, of the 6th Regiment of the Line, killed at the head of his troop, at the very instant in which they came in contact with the enemy.

The vigour of the Allied troops—subject as they were to the twofold struggles of a siege of unprecedented difficulty, and of battles which recall the greatest struggles of our military history—cannot be too highly praised.

Accept, &c. The General-en-Chef, CANROBERT.

PRINCE MENSCHIKOFF'S ACCOUNT OF THE BATTLE.

(From the *Invalide Russe*.)

This morning, November 12, his Majesty the Emperor received, from the hands of the Captain of Cavalry, Count Levaschoff, the following report from General Prince Menschikoff, under date of November 8:—

Yesterday, the 5th, a sortie was made from Sebastopol, on the side of the bastion No. 1, the following troops took part in it:—Of the Tenth Division of Infantry: the regiments of Catherineburg, Tomsk, and Kolyvan. Of the Eleventh Division of Infantry: the regiments of Selenghinsk, Yakoutsk, and Okhotsk. Of the sixteenth Division of Infantry: the regiments of Vladimir, Souzdal, and Ouglitch; and of the Seventeenth Division of Infantry: the regiments of Koursk, Borodino, and Taroutino. As many guns were employed as the difficulty of the gales permitted the men to take with them."

The command of the troops was confided to General Dannenberg, the Commander-in-Chief of the Fourth Infantry corps.

Our first attack on the heights was very fortunate; the English fortifications were carried, and seven of their guns spiked. Unfortunately, in the first movement, the commanders of the troops, who were attacking the intrenchments and redoubts, were wounded. While these events were passing, the French force arrived in aid of the English. The heavy artillery of these last was placed in position on the field of battle, and it was no longer possible for our field pieces to contend with it to advantage. The numerous superiority of the enemy's infantry, armed with rifles, occasioned great losses in horses, artillery men, and infantry officers.

This circumstance made it impossible for us to remain there, except by a great sacrifice of troops, the redoubts which formed the fighting line had begun to throw upon points where the enemy's position commanded, even as far as the town of Sebastopol its fire.

The retreat was effected in good order on Sebastopol and over the bridge of Inkerman, and the dismounted guns were carried off the field of battle back into their place.

The Grand Dukes Nicholas Nicholaïdvich and Michael Nicholaïevitch were in the midst of this terrible fire, setting an example of calm courage in the fight.

Simultaneously with this sortie the infantry regiment of Minsk, with a light battery of artillery, under the command of the Major-General of Artillery Timofieff, executed another sortie against the French batteries, and spiked fifteen of their guns.

Our loss in dead is not yet exactly known, but the number of the wounded amounts to 250 men and 109 officers. Among the latter there are:—Lieutenant-General Soimonoff shot through the body, and who soon sank beneath the effects of his wound; the Major-Generals Vlodbas and Ochterlone; the Colonels Alexandroff, commanding the infantry regiment of Catherinebourg; Pomoutzeloff, commanding the infantry regiment of Tomsk; Bibikoff, commanding the Okhotsk Chasseurs; Baron Delwig, commanding the infantry regiment of Vladimir; and Wrenvikine Schouta II., commanding the regiment of Borodino Chasseurs.

Major-General Kirchinsky, Chief of the Artillery, received a contusion from the explosion of a bomb; Major General Prince Mentchikoff, in the suite of your Imperial Majesty, was hurt in the neck; Colonel Albedinsky, Aide-de-Camp of your Imperial Majesty, and the cavalry captain, Greigh, my Aide-de-Camp, were struck on the head.

General Dannenberg had two horses killed under him, and all the persons around me and him were wounded.

The loss of the enemy cannot have been less considerable either, and the sortie of General Timofieff cost the French dear, for, whilst pursuing him with dense masses, they fell under a heavy fire of grape from the bastion No. 6

While these movements were going on, the troops placed under the command of Prince Gortschakoff executed a strong demonstration against Kaffka, and thus kept the enemy's detachment at Balaclava in a state of inaction.

* A part of the troops passed over the bridge of Inkerman.

CAPTAIN LEWIS EDWARD NOLAN,

LATE OF THE 15TH HUSSARS.

THE distinguished soldier, whose premature fate in connection with the late heroic exploit of our Light Cavalry at Balaclava the Army and the country have now to deplore, was a son of the late Major Nolan, formerly of the 70th Regiment; who, after many years of arduous service in various parts of the globe, retired from military life, and became for some time resident at Milan, where he acted as Vice-Consul, in the absence of the Consul-General, and was remarkable for his public spirit and hospitality. The best English and Continental society, including military men of the highest rank, being constantly to be met at Major Nolan's house, and Milan being a large garrison, it was natural that, with such opportunities of association, his sons should imbibe a predilection for the profession; and accordingly, at an early age, Lewis (the subject of our Sketch) sought and obtained a commission in the Austrian service, under the auspices of one of the Imperial Grand Dukes, who was a friend of his father. In this position he was generally esteemed for his amiable manners and strict devotion to all the duties of military life; and it was here that he first applied himself to the acquirement of that knowledge of the *manège* and of Cavalry tactics, in which he became afterwards so proficient—he being, even at this time, recognised as one of the best horsemen in the division to which he was attached. After a short service in Hungary, and on the Polish frontier, by the advice of his friends, young Nolan sought a more distinguished career in the British Army, and he was accordingly gazetted to an Ensigncy in the 4th Foot, on the 16th March, 1839; but in the month following he was appointed to the 15th Hussars, then stationed in India; and, after a short stay at the Dépôt, joined his regiment at Madras, where, his attractive talents having soon brought him under the notice of Sir Henry Pottinger, then Governor of that Presidency, he was appointed an extra Aide-de-Camp on his Excellency's Staff. In addition to the knowledge which he already possessed of the French, German, Italian, and Hungarian languages, Captain Nolan availed himself of his residence in India to become master of several of the native dialects; and he also entered actively into all the details of the military system in the East. Apart from these engagements, however, he found time for the sports of the field, and was several times a successful competitor in some of the most severely-contested steeplechases on the Madras turf. The 15th Hussars being ordered home, and having previously obtained his troop, Captain Nolan returned to England before the Regiment, on leave, and proceeded on a tour in Russia; and having visited some of the most important military posts in that empire, as well as in other parts of Northern Europe, he returned to England, and published his justly popular book upon the Organisation, Drill, and Manœuvres of Cavalry Corps, which was reviewed at some length, with three Engravings, in the ILLUSTRATED LONDON NEWS for Jan. 7, 1854. The work having attracted the attention of the Horse Guards' authorities to its author, it is already known that he received an appointment on the Staff of the Army of the East; and, advantage being taken of his judgment in the selection of horses, he was specially commissioned to make large purchases on account of the Government, at Tunis, Syria, and elsewhere—a duty which he performed to the entire satisfaction of Lord Raglan. We are aware that in the first accounts of the disastrous charge at Balaclava, blame was hastily attached to Captain Nolan, who, it was alleged, had gone beyond the terms of an order which he was instructed to deliver to Lord Lucan; his memory has, however, we are glad to find, been subsequently vindicated from so grave an imputation, and all who knew him best in the closest relations of military life, and his punctilious character on all points of duty, assert that he would have been the last man to be guilty of the indiscretion attributed to him. In fact, the rash movement in question was so opposed to his own published theory on the subject, that he could never have willingly countenanced, much less directed it, even under an excess of zeal. So far, indeed, from this, in Captain Nolan's book, under General Rules, he says:—

Rule 3. Never attack without keeping part of your strength in reserve.

THE LATE CAPTAIN LEWIS EDWARD NOLAN, 15TH HUSSARS.

9. Charges on a large scale should seldom be attempted against *masses of troops of all arms, unless* they have previously been shaken by fire. 10. Always watch for and seize the right moment to attack.

And, again, he says prophetically:—

The most difficult position a cavalry officer can be placed in is in command of cavalry against cavalry; for the slightest fault committed may be punished on the spot.

All these errors were made, however, under some horrible delusion. The Light Cavalry galloped, open-eyed, into destruction as complete as if they had fallen into an ambuscade. Who can doubt that if they had had to charge any reasonable number of Russian Infantry or cavalry, clear of the batteries, that they would have ridden them down? As it was, they sabred the artillerymen at their guns. Captain Nolan was struck on the heart by one of the first shells, gave a loud cry, and died instantly. His horse turned and galloped back with his dead rider firm in his saddle.

At the time of his death he was in his thirty-sixth year, and had shared in the battle of the Alma, as Aide-de-Camp to Brigadier-General Airy, Deputy-Quartermaster-General. He leaves a bereaved mother, a widow, who had already lost two sons in the service, to mourn the early fall of the last, who was at once her only pride and hope.

The accompanying Portrait is from a picture painted in India.

We subjoin an extract from a letter written by a young officer, dated "Camp before Sebastopol, October 28":—

Poor Lewis Nolan has gone to his rest. In a cavalry action three days ago he bore an order from Lord Raglan to Lord Lucan to charge a battery of heavy field-pieces, and, in the act of delivering it, a piece of shell struck him on the left breast, and passed through his body. Death, by the mercy of Heaven, was instantaneous. Poor Lewis! he was a gallant soul. The day before his death, I am glad to think, I met him, and he said, "Well, Bob, is not this fun? I think it is the most glorious life a man could lead." Few men of his years promised to be such an ornament to his profession. I am sorry to say, now that he is gone, some people here say that in the heat of the moment, poor Lewis gave Lord Lucan a wrong order. Such is not the case. The order was a written one, and therefore the mistake was not on his side.

CHARGE OF THE CHASSEURS D'AFRIQUE.

THE part which this body of French cavalry took in the action at Balaclava, although every way worthy of the fame which those gallant troops had won by their conduct on former occasions, has not received so much notice as the doings of our own soldiers. It was about 10.50 on the morning of the 26th ult., immediately after the charge of our Heavy Cavalry Brigade, which had thrown the enemy into confusion, that the Chasseurs d'Afrique passed down to the plain, and took up their position in advance of the ridges on the left of the British army. About the same time General Canrobert attended, by his staff, rode up to Lord Raglan, and the staffs of the two Generals mingled together in praise of the magnificent charge which had just been made by the Scots Greys and Enniskillog Dragoons.

It was during the charge made by our Light Cavalry Brigade on the Russian army that the Chasseurs d'Afrique took part in the battle. With fearful impetuosity, they dashed down upon a battery on the left of our army, which had been telling most severely upon our men, and cut down the gunners. Unfortunately, however, they could not get the guns off without support; and had to retreat, with the loss of two Captains killed, and 20 men killed and wounded, out of their little force of 200 Chasseurs. Of course there were some very narrow escapes. "One of my friends in this squadron," says our Artist, who has forwarded the above Sketch, "had his horse killed in the very square—in the midst of the enemy; but was fortunate enough to catch an artillery horse, which he mounted, and got off safely, along with his companions."

The charge of the French cavalry is thus described by General Canrobert. After referring to what our Light Cavalry Brigade had done, he says—

During this time my brigade of the Chasseurs d'Afrique, on the left of the English army in the plain, endeavoured to come to its assistance, which it succeeded in doing by a bold and much-remarked manœuvre, which consisted in attacking on the left a battery of artillery that had been keeping up a murderous fire on the English battalions, and which it drove back. We lost about twenty men killed and wounded, and two officers. The loss of the enemy on this point was considerable, and our Chasseurs were allowed to retreat in good order, without being annoyed. Night put an end to this combat.

AN INSTALMENT OF THE GREEK DEBT.—M. Mavrocordato has informed MM. Forth Rouen and Wyse, the French and English Ministers at Athens, that the rent for the houses occupied by the Allied troops in Greece will be paid by the Greek Government, and the amount (400,000 drachmas) placed to the account of the sums due to France and England. This will be the first instalment which France will have received on the loan of sixty millions guaranteed in concurrence with England and Russia, and the interest which has been accumulating for so many years.

CHARGE OF THE CHASSEURS D'AFRIQUE, OCTOBER 25.

THE ALLIED TROOPS PREPARING TO SILENCE INKERMAN.

THE BATTLE OF INKERMAN.

OFFICIAL DESPATCHES.

(From the *London Gazette Extraordinary* of Wednesday, Nov. 22.)

WAR DEPARTMENT, Nov. 22, 1854, 9½ a.m.

His Grace the Duke of Newcastle has this day received a despatch, of which the following is a copy, addressed to his Grace by Field-Marshal the Lord Raglan, G.C.B.:—

LORD RAGLAN'S DESPATCH.

Before Sebastopol, Nov. 8, 1854.

My Lord Duke,—I have the honour to report to your Grace that the army under my command, powerfully aided by the Corps of Observation of the French army, under the command of that distinguished officer, General Bosquet, effectually repulsed and defeated a most vigorous and determined attack of the enemy on our position overlooking the ruins of Inkerman, on the morning of the 5th inst.

In my letter to your Grace, of the 3rd, I informed you that the enemy had considerably increased their force in the Valley of the Tchernaya. The following day this augmentation was still further apparent, and large masses of troops had evidently arrived from the northward, and on two several occasions persons of distinguished rank were observed to have joined the Russian camp.

I have subsequently learnt that the 4th *corps d'armée*, conveyed in carriages of the country, and in the lightest possible order, had been brought from Moldavia, and were to be immediately followed by the 3rd corps.

It was therefore to be expected that an extensive movement would not be long deferred.

Accordingly, shortly before daylight, on the 5th, strong columns of the enemy came upon the advanced pickets covering the right of the position. These pickets behaved with admirable gallantry, defending the ground foot by foot against the overwhelming numbers of the enemy, until the Second Division, under Major-General Pennefather, with its field guns, which had immediately been got under arms, was placed in position.

The Light Division, under Lieutenant-General Sir George Brown, was also brought to the front without loss of time; the First Brigade, under Major-General Codrington, occupying the long slopes to the left towards Sebastopol, and protecting our right battery, and guarding again attack on that side; and the Second Brigade, under Brigadier-General Buller, forming on the left of the Second Division, with the 88th Regiment, under Lieutenant-Colonel Jeffreys, thrown in advance.

The Brigade of Guards, under his Royal Highness the Duke of Cambridge and Major-General Bentinck, proceeded likewise to the front, and took up most important ground to the extreme right on the alignement of the Second Division, but separated from it by a deep and precipitous ravine, and posting its guns with those of the Second Division.

The Fourth Division, under Lieutenant-General Sir George Catheart having been brought from their encampment, advanced to the front and right of the attack: the First Brigade, under Brigadier-General Goldie, proceeded to the left of the Inkerman road; the Second Brigade, under Brigadier-General Torrens, to the right of it, and on the ridge overhanging the valley of the Tchernaya.

The Third Division, under Lieutenant-General Sir Richard England, occupied in part the ground vacated by the Fourth Division, and supported the Light Division by two regiments under Brigadier-General Sir John Campbell; while Brigadier-General Eyre held the command of the troops in the trenches.

The morning was extremely dark, with a drizzling rain, rendering it almost impossible to discover anything beyond the flash and smoke of artillery and heavy musketry fire.

It, however, soon became evident that the enemy, under cover of a vast cloud of skirmishers, supported by dense columns of infantry, had advanced numerous batteries of large calibre to the high ground to the

VALE LEADING TO INKERMAN.

left and front of the Second Division; while powerful columns of infantry attacked with great vigour the Brigade of Guards.

Additional batteries of heavy artillery were also placed by the enemy on the slopes to our left; the guns in the field, amounting in the whole to ninety pieces, independently, however, of the ship guns and those in the works of Sebastopol.

Protected by a tremendous fire of shot, shell, and grape, the Russian columns advanced in great force, requiring every effort of gallantry on the part of our troops to resist them.

At this time two battalions of French infantry, which had on the first notice been sent by General Bosquet, joined our right, and very materially contributed to the successful resistance to the attack, cheering with our men, and charging the enemy down the hill with great loss.

About the same time a determined assault was made on our extreme left, and for a moment the enemy possessed themselves of four of our guns; three of which were retaken by the 88th, while the fourth was speedily recaptured by the 77th Regiment, under Lieutenant-Colonel Egerton.

In the opposite direction, the Brigade of Guards, under his Royal Highness the Duke of Cambridge was engaged in a severe conflict.

The enemy, under the cover of thick brushwood, advanced in two heavy bodies, and assailed with great determination a small redoubt which had been constructed for two guns, but was not armed. The combat was most arduous; and the Brigade, after displaying the utmost steadiness and gallantry, was obliged to retire before very superior numbers, until supported by a wing of the 90th Regiment, of the Fourth Division, when they again advanced, and retook the redoubt.

The ground was afterwards occupied in gallant style by French troops, and the Guards speedily re-formed in rear of the right flank of the Second Division.

In the meanwhile, Lieut.-General the Honourable Sir George Cathcart, with a few companies of the 68th Regiment, considering that he might make a strong impression by descending into the valley, and taking the enemy in flank, moved rapidly forward; but, finding the heights above him in full occupation of the Russians, he suddenly discovered that he was entangled with a superior force; and, while attempting to withdraw his men, he received a mortal wound; shortly previously to which, Brigadier General Torrens, when leading the 68th, was likewise severely wounded.

Subsequently to this, the battle continued with unabated vigour and with no positive result, the enemy bringing upon our line not only the fire of all their field-batteries, but those in front of the works of the place, and the ship-guns, till the afternoon, when the symptoms of giving way first became apparent; and, shortly after, although the fire did not cease, the retreat became general, and heavy masses were observed retiring over the bridge of the Inkerman, and ascending the opposite heights, abandoning on the field of battle 5000 or 6000 dead and wounded, multitudes of the latter having already been carried off by them. I never before witnessed such a spectacle as the field presented; but upon this I will not dwell.

Having submitted to your Grace this imperfect description of this most severe battle, I have still two duties to discharge—the one most gratifying the last most painful to my feelings.

I have the greatest satisfaction in drawing your Grace's attention to the brilliant conduct of the Allied troops. French and English vied with each other in displaying their gallantry and manifesting their zealous devotion to duty, notwithstanding that they had to contend against an infinitely superior force, and were exposed for many hours to a most galling fire.

It should be borne in mind that they have daily for several weeks undergone the most constant labour, and that many of them passed the previous night in the trenches.

I will not attempt to enter into the detail of the movements of the French troops, lest I should not state them correctly; but I am proud of the opportunity of bearing testimony to their valour and energetic services, and of paying a tribute of admiration to the distinguished conduct of their immediate commander General Bosquet; while it is in the highest degree pleasing to me to place upon record my deep sense of the valuable assistance I received from the Commander-in-Chief, General Canrobert, who was himself on the ground and in constant communication with me, and whose cordial co-operation on all occasions, I cannot too highly extol.

Your Grace will recollect that he was wounded at the Alma. He was again wounded on the 5th, but I should hope that he will not long feel the effects of it.

I will in a subsequent despatch lay before your Grace the names of the officers whose services have been brought to my notice. I will not detain the mail for that purpose now, but I cannot delay to report the admirable behaviour of Lieutenant-General Sir George Brown, who was unfortunately shot through the arm, but is doing well; of Lieutenant-General his Royal Highness the Duke of Cambridge, who particularly distinguished himself; and of Major-General Pennefather in command of the Second Division, which received the first attack, and gallantly maintained itself under the greatest difficulties throughout this protracted conflict; of Major-General Bentinck, who is severely wounded: Major-General Codrington, Brigadier-General Adams, and Brigadier-General Torrens, who are severely wounded; and Brigadier-General Buller, who is also wounded, but not so seriously.

I must likewise express my obligations to Lieutenant-General Sir Richard England, for the excellent disposition he made of his division, and the assistance he rendered to the left of the Light Division, where Brigadier-General Sir John Campbell was judiciously placed, and effectively supported Major-General Codrington; and I have great pleasure in stating that Brigadier-General Eyre was employed in the important duty of guarding the trenches from any assault from the town.

Lieutenant-General Sir De Lacy Evans, who had been obliged by severe indisposition to go on board ship a few days previously, left his bed as soon as he received intelligence of the attack, and was promptly at his post; and though he did not feel well enough to take the command of the division out of the hands of Major-General Pennefather, he did not fail to give him his best advice and assistance.

It is deeply distressing to me to have to submit to your Grace the list of the killed, wounded, and missing on this memorable occasion. It is indeed heavy; and very many valuable officers and men have been lost to her Majesty's service.

Among the killed your Grace will find the names of Lieutenant-General the Honourable Sir G. Cathcart, Brigadier-General Strangways, and Brigadier-General Goldie. Of the services of the first it is almost unnecessary to speak: they are known throughout the British Empire; and have, within a short space of time, been brought conspicuously before the country by his achievements at the Cape of Good Hope, whence he had only just returned when he was ordered to this army. By his death her Majesty has been deprived of a most devoted servant, an officer of the highest merit, while I personally have to deplore the loss of an attached and faithful friend.

Brigadier-General Strangways was known to have distinguished himself in early life and in mature age, throughout a long service, he maintained the same character. The mode in which he conducted the command of the artillery, since it was placed in his hands by the departure of the Honourable Major-General Cator, is entitled to my entire approbation, and was equally agreeable to those who were confided to his care.

Brigadier-General Goldie was an officer of considerable promise, and gave great satisfaction to all under whom he has served.

It is difficult to arrive at any positive conclusion as to the actual numbers brought into the field by the enemy. The configuration of the ground did not admit of any great development of their force, the attack consisting of a system of repeated assaults in heavy masses of columns; but, judging from the numbers that were seen in the plains after they took the line of their retreat, I am led to suppose that they could not have been less than 60,000 men. Their loss was excessive, and it is calculated that they left on the field near 5000 dead, and that their casualties amount in the whole, in killed, wounded, and prisoners, to not less than 15,000.

Your Grace will be surprised to learn that the number of British troops actually engaged little exceeded 6000 men, whilst those of General Bosquet's division only amounted to 6000, the remaining available French troops on the spot having been kept in reserve.

I ought to mention that, while the enemy was attacking our right, they assailed the left of the French trenches, and actually got into two of their batteries; but they were quickly driven out in the most gallant manner with considerable loss, and hotly pursued to the very walls of Sebastopol.

I have, &c.,
RAGLAN.

His Grace the Duke of Newcastle, &c.

RETURN OF CASUALTIES AT THE BATTLE OF INKERMAN, ON THE 5TH NOV., 1854.

Staff—5 officers killed; 12 officers wounded.
4th Light Dragoons—3 rank and file wounded.
11th Hussars—1 rank and file wounded.
17th Lancers—1 officer killed; 1 rank and file wounded.
Artillery—3 officers, 3 sergeants, 10 rank and file, killed; 4 officers, 5 sergeants, 74 rank and file wounded.
1st Battalion of Coldstream Guards—3 officers, 3 sergeants, 1 drummer, 57 rank and file, killed; 8 officers, 8 sergeants, 1 drummer, 141 rank and file, wounded; 30 rank and file, missing.
1st Battalion of Scots Fusilier Guards—5 officers, 3 sergeants, 2 rank and file, killed; 6 officers, 10 sergeants, 1 drummer, 84 rank and file, wounded; 33 rank and file, missing.
1st Battalion Rifle Brigade—1 rank and file killed; 1 sergeant, 31 rank and file, killed; 8 officers, 8 sergeants, 1 drummer, 106 rank and file, wounded; 1 rank and file, missing.
1st Regiment—1 rank and file killed; 1 rank and file wounded.
7th Foot—2 rank and file, killed; 3 officers, 2 sergeants, 1 drummer, 46 rank and file, wounded; 6 rank and file, missing.
19th Foot—1 officer, 1 rank and file, killed; 3 rank and file, wounded.
33rd Foot—1 officer, 2 sergeants, 10 rank and file, killed, 8 officers, 17 sergeants, 1 drummer, 194 rank and file, wounded; 1 officer, 1 rank and file, missing.
41st Foot—1 officer, 13 rank and file killed; 5 officers, 11 sergeants, 79 rank and file, wounded; 21 rank and file missing.
47th Foot—2 rank and file, killed; 1 officer, 2 sergeants, 18 rank and file, wounded; 1 officer, 3 rank and file, missing.
49th Foot—1 officer, 6 rank and file, killed; 2 officers, 3 sergeants, 2 drummers, 39 rank and file, wounded; 1 officer, 1 rank and file, missing.
55th Foot—1 officer, 3 rank and file, killed; 2 officers, 3 sergeants, 65 rank and file, wounded.
57th Foot—1 officer, 2 sergeants, 53 rank and file, killed; 6 officers, 4 sergeants, 2 drummers, 98 rank and file, wounded.
63rd Foot—1 officer, 3 rank and file, killed; 2 officers, 3 sergeants, 25 rank and file, wounded.
77th Foot—1 officer, 2 sergeants, 24 rank and file, killed; 2 officers, 4 sergeants, 2 drummers, 54 rank and file, wounded; 1 officer, 1 rank and file, missing.
88th Foot—4 sergeants, 18 rank and file, killed; 2 officers, 8 sergeants, 71 rank and file, wounded.
Royal Marines—1 sergeant, 4 rank and file killed; 1 officer, 1 sergeant, 25 rank and file wounded.
Grand total—43 officers, 31 sergeants, 4 drummers, 393 rank and file killed; 101 officers, 121 sergeants, 17 drummers, 1694 rank and file wounded; 1 officer, 6 sergeants, 95 rank and file missing.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

NOMINAL RETURN OF OFFICERS KILLED AT THE BATTLE OF INKERMAN, NOV. 5, 1854.

CAVALRY DIVISION.

4TH LIGHT DRAGOONS—Cornet Archibald Cavendish.
ROYAL ARTILLERY—Brigadier-General T. Reynell Strangways; Major F. Townsend.

FIRST DIVISION.

Staff—Captain H. T. Butler, Deputy-Assistant-Adjutant-General.
1st Battalion Coldstream Guards—Lieutenant-Colonel A. W. Fremantle; Captain Sir R. L. Newton, Bart.; Captain Hon. Orlando H. A. Neville.
1st Battalion Scots Fusilier Guards—Lieutenant-Colonel Hon. T. V. Dawson; Lieutenant-Colonel J. C. Cowell; Captain Hon. G. C. Bligh; Captain F. H. Ramsbottom; Captain D. Mackinnon; Captain H. J. Monro; severely; Lieutenant-Colonel G. H. Seymour; Lieutenant A. Liddell.
2nd Battalion Scots Fusilier Guards—Lieutenant-Colonel J. H. Blair

SECOND DIVISION.

Staff—Captain W. K. Alex.
30th Foot—Captain A. Conolly; Lieutenant A. Gibson.
41st Foot—Lieutenant-Colonel G. Carpenter; Captain E. Richards, Lieutenant A. Taylor, severely; W. Bird, severely; Lieutenant A. Hill.
49th Foot—Major T. N. Dallas; Lieutenant A. S. Armitrong.

THIRD DIVISION.

30th Foot—Lieutenant W. G. Dashwood.

4TH DIVISION.

Staff—Lieutenant-General Sir George A. Brown, K.C.B.; Brigade-Major F. L. Goldie; Lieutenant C. R. C. Seymour, Assistant-Adjutant-General.
Rifle Brigade—Lieutenant W. D. Wing.
21st Foot—Lieutenant H. F. Ball.
Scots Fusilier Guards—Lieutenant R. S. T. Swyny; Lieutenant G. C. W. Curtois. Ensign J. G. Overbeck.
50th Foot—Major H. G. Wynne; Lieutenant F. C. Barker.
1st Battalion Rifle Brigade—Captain A. A. Cavanyhgh.

LIGHT DIVISION.

33rd Foot—Lieutenant Henry Thynne.
19th Foot—Captain James Kay.
77th Foot—Captain J. Nunn.
2nd Battalion Rifle Brigade—Lieutenant L. W. Malcolm.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

NOMINAL RETURN OF OFFICERS WOUNDED AT THE BATTLE OF INKERMAN, NOV 5, 1854.

ROYAL ARTILLERY—Lieutenant-Colonel G. Gamble, slightly; Captain and Adjutant J. F. L. Baddeley, severely; Captain G. Bingham, slightly; Captain C. H. Lindley, severely.

FIRST DIVISION.

Staff—Major-General H. J. W. Bentinck, slightly; Captain T. H. Clifton, A.D.C., severely.
3rd Battalion Grenadier Guards—Colonel F. W. Hamilton, slightly; Lieutenant-Colonel R. H. Dalbiac, slightly; Lieutenant-Colonel Hon. R. Percy, slightly; Captain A. Thynne severely; Lieutenant-Colonel F. Pearson, Bart., slightly; Lieutenant G. N. Starr, severely.
1st Battalion Coldstream Guards—Lord Saint Germans, Lieutenant-Colonel, severely; Lieutenant-Colonel Lord A. C. H. Paget, severely; Colonel Hon. G. Upton, slightly; Captain Hon. F. Byng, severely; Lieutenant W. A. Ambrose, severely.
2nd Battalion Scots Fusilier Guards—Colonel E. W. F. Walker, severely; Lieutenant-Colonel Francis Seymour, severely; Captain C. F. F. Shuckburgh, severely; Captain G. C. Bowles, slightly; Lieutenant T. Halsey, severely; Lieutenant R. Bulkeley, slightly; Captain and Adjutant H. Drummond, severely; Assistant-Surgeon A. G. Edlington, severely.

SECOND DIVISION.

Staff—Brigadier-General H. W. Adams, severely; Captain J. Gubbins, A.D.C., severely; Captain C. Ash, severely; slightly; Captain A. M'Donald, A.D.C., slightly; Captain F. P. Hastings, severely.
30th Foot—Major J. T. Mackerras, severely; Captain C. Tidy, severely; Captain G. Bernard, slightly; Lieutenant T. Halsey, severely; Lieutenant D. Wilson, slightly; Ensign and Adjutant H. Drummond, severely.
41st Foot—Captain H. W. Mockler, slightly; Captain Hugh Rowlands, slightly; Captain F. C. Lysaght, severely; Lieutenant and Adjutant J. Hall, severely; Lieutenant G. F. Playfair, severely; Lieutenant and Quartermaster J. Johnson, slightly.
47th Foot—Lieutenant-Colonel the Hon. Daly severely; Ensign G. W. Wood, slightly.
49th Foot—Lieutenant-Colonel C. Wyatt, C.B., severely; Brevet-Colonel C. D. Dawson, severely; Lieutenant A. Dickinson, slightly; Lieutenant H. King, severely; Lieutenant H. Wilkes, slightly; Lieutenant R. Congreve, severely.
57th Foot—Captain J. F. Elliott, dangerously (since dead); Lieutenant G. W. Hague, severely; Ensign J. Pennefather, slightly.
63rd Foot—Lieutenant-Colonel Thomas Hartley, severely; Captain C. B. Fairthorne, slightly; Lieutenant J. F. Quarry, severely; Lieutenant W. H. Newman, slightly; Ensign H. T. Tyndale, severely; Paymaster T. K. Mogan, severely; Lieutenant and Adjutant R. Bennett, severely.
77th Foot—Lieutenant-Colonel Harry Lumley, dangerously; Lieutenant J. Cator, dangerously.
88th Foot—Captain W. Hardy, severely; Ensign E. H. Deller, slightly.
1st Battalion Rifle Brigade—Major E. Hooper, severely; Lieutenant Coote Buller, slightly; Lieutenant C. S. Hume, slightly.

LIGHT DIVISION.

Staff—Lieutenant-General Sir George Brown, K.C.B., severely.
7th Foot—Major —— T. Trenchfield, Bart., severely; Captain H. Y. Shipley, severely; Lieutenant H. W. F. Butler, severely; Captain E. H. Ross, slightly; Ensign L. J. F. Jones, slightly.
23rd Foot—Lieutenant T. F. Vane, slightly; Lieutenant J. Duff, mislag.
33rd Foot—Lieutenant F. Corbett, slightly; Ensign J. Owens, dangerously.
88th Foot—Captain J. G. Crosse, slightly; Lieutenant H. J. Baynes, severely; Lieutenant-Colonel E. B. J. Hoyle, slightly.
2nd Battalion Rifle Brigade—Captain E. Newdigate, slightly.
Royal Marines—Captain W. H. Mackinnon.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

RETURN OF CASUALTIES FROM 3RD TO 8TH NOVEMBER, 1854, INCLUSIVE.

Royal Artillery—2 rank and file killed; 1 officer, Lieutenant Andrews (slightly), 2 rank and file wounded.
4th Regiment—1 rank and file wounded.
39th Regiment—1 rank and file wounded.
47th Regiment—1 rank and file wounded.
49th Regiment—1 rank and file wounded.
57th Regiment—1 rank and file wounded.
2nd Battalion Rifle Brigade—1 rank and file killed; 1 sergeant, 3 rank and file, wounded.

TOTAL CASUALTIES ON THE 5TH—SEPARATE RETURN.

Forty-three officers, 32 sergeants, 4 drummers, 389 rank and file killed; 103 officers, 121 sergeants, 17 drummers, 1694 rank and file, wounded; 1 officer, 6 sergeants, 101 rank and file, missing.

Total—43 officers, 32 sergeants, 4 drummers, 393 rank and file killed; 103 officers, 121 sergeants, 17 drummers, 1710 rank and file, wounded; 1 officer, 6 sergeants, 101 rank and file, missing.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

A RETURN OF THE WOUNDED IN THE NAVAL BRIGADE ON THE 2ND AND 3RD OF NOVEMBER, 1854.

Killed—John Wood, A.B., *Albion*.
Wounded—William Glass, master, severely; slightly, *Albion*. Mr. Philip Brock, mate, slightly; Joseph Smith, 2nd mate, slightly. Thomas Wilson, A.B., severely, *Inflexible*. Mr. Hall Dunwell, Mr. Stephen Jones, mate, slightly. Frederick Hanks, ordinary, dangerously, *London*. James Gallows, A.B., severely; James Ross, A.B., slightly, *Rodney*. James Berry, A.B., slightly; Richard Webb, ordinary, slightly, *Trafalgar*. Mr. Wilson, mate, slightly; William Tait, A.B., dangerously; John Lloyd, A.B., severely, *Vengeance*.
Total killed 1; wounded, 14.

STEPHEN LUSHINGTON, Captain Commanding Naval Brigade.

To the Military Secretary to H. R. Lord Raglan, Commander-in-Chief of the Army.

INKERMAN.

Inkerman, or *the City of Caverns*, stands on the great bay of Aktiar, and was built by the Russians about the year 1750. The bay was called Sebastopol by the Empress during the reign of Catherine II., whence the name of the strong fort at present besieged by the Allies. The great harbour of Inkerman, said to resemble that of Malta, is one of the finest in the world. It has a depth of water varying from twenty-one to seventy feet, in which the largest vessels can ride within a cable's length of the shore. The harbour is divided into three parts, and affords excellent shelter in all weather. The old town of Inkerman stood on the north of the harbour, but there are scarcely any vestiges remaining. The new town recently destroyed by the Allies contained two churches, a fine broad street, and a spacious quay; besides magazines barracks, and a few shops. It never attained, however, as much importance as it might have done, owing to a strange regulation prohibiting merchant vessels entering the harbour, to and at the harbour. The effect of this absurd law has been to crush entirely the commercial spirit of its inhabitants, and to render what would otherwise have been a flourishing town, a miserable village.

The country surrounding Inkerman is the wonder of travellers. Here is truly a city of caverns, for the white rocks that look over the bay of Aktiar (which, translated, signifies *White Rocks*) are excavations of a most extraordinary character. These consist of chambers with Gothic windows, cut out of the solid stone. Near the harbour the rocks are hewn into chapels, monasteries, and warehouses. These are considered by some authorities to have been the retreats of Christians in the early ages. There are several Grecian sculptures in the neighbourhood of the ruined town, which travellers have endeavoured to perpetuate, and antiquarians to test; but the Russians, with a strange disregard of antiquity and of the beauty of ancient architecture, have made havoc of these splendid remains. Many of the excavations have been converted by the Russians into powder magazines; the stone coffins were converted into troughs for beasts, and the altars into places for manure.

CALENDAR FOR THE WEEK.

SUNDAY, Nov. 26.—24th Sunday after Trinity.
MONDAY, 27. Princess Mary of Cambridge born, 1833.
TUESDAY, 28.—Revolution in Piedmont, 1849. Caldemah born, 1713.
WEDNESDAY, 29.—Sir Philip Sidney born, 1554.
THURSDAY, 30.—St. Andrew. Duke of Gloucester died, 1834.
FRIDAY, Dec. 1.—Emperor Alexander of Russia died, 1825.
SATURDAY, 2.—Napoleon I crowned, 1804. Battle of Austerlitz, 1805.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, NOVEMBER 25, 1854.

THE BATTLE OF INKERMAN.

A new name is added to the calendar of victory; and the fifth of November, once but too notorious in the annals of civic dissension, has been made memorable for ever by the splendours of one of the greatest victories ever achieved by this nation over a foreign foe. The field of Inkerman and the 5th of November will henceforth be linked in glory on the page of European history. Great Britain and France will find hereafter, in the bare mention either of the place or of the date, a token of mutual respect and friendship. Deeds like those of Alma, Balaclava, and Inkerman, are pledges that are destined to outlast the present contest, and to bear fruits of happy intercourse to future ages. Alliances which are cemented by the remembrance of perils overcome, by noble blood poured out like water in defence of justice and civilisation, and by a succession of signal triumphs each greater than its predecessor, are alliances that are not likely to be broken or enfeebled. Such an alliance is that which subsists between Great Britain and France; and every thing betokens that it will be as enduring as it is auspicious.

Field-Marshal Lord Raglan (long may the illustrious soldier wear his new honours, and continue to merit higher ones!) has told the history of the great day of Inkerman with a lucidity, impartiality, and vigour, which add another proof to those afforded by the Commentaries of Cæsar and the Despatches of Wellington, that great soldiers are the fit historians of their own actions. At the grey dawn of the morning of the 5th, under cover of a thick mist, the Russians, computed by Lord Raglan to be sixty thousand strong, advanced to attack the British force, amounting only to eight thousand men, stationed on the heights of Inkerman. The ground occupied by our force was similar to that occupied by the Russians at Alma; but now her of the conditions of the combat were the same. On the Alma the defenders of the position were the most numerous. At Inkerman the defenders did not number above a fourth or fifth of their foes. At Alma the assailants, small in numbers, carried the day by native energy and bravery; but at Inkerman, the assailants, mighty in numbers, reinforced by fresh troops who had never tasted British steel, and inspirited by the presence and example of two Imperial Princes sent for the avowed purpose of lashing up their enthusiasm, were kept at bay—foiled—and ultimately repulsed with terrific slaughter.

The English position, which it was the object of the Russians to overpower by the sheer superiority of numbers, was held with indomitable heroism, until a French division of 6000 men, under General Bosquet, advanced to its support. These 14,000 men are stated on the testimony of Lord Raglan—a man not to be suspected of exaggeration on the one side, or concealment of

the truth on the other—to have been the whole number of the Allies engaged in the struggle. We shall not attempt to tell in other words the story which Lord Raglan has so admirably told in his heart-stirring despatch—every word of which proves him to be, not only a hero, but a high-minded and chivalrous gentleman. Suffice it to state, that the battle raged for eight hours, and that every British and French soldier in that fierce encounter must have slain or wounded a foe. The loss of the Russians exceeded 14,000 in killed and wounded, that of the British amounted to 462 killed, 1952 wounded, and 198 missing. The loss of the French amounted to upwards of 1500 men. Thus our victory was dearly bought; the British, as on all previous occasions in the Crimea, having borne the brunt of the battle. Yet, after all—and with the sad conviction that every British death on that gory field has brought sorrow and suffering to many homes—and that this sorrow and suffering have fallen, not only among the poor and the lowly, but in the very highest places of our land—we may add—that had victory been purchased by the inevitable slaughter of twice as many men, the result would have been worth the sacrifice. The relatives of the slain will have a proud, though a mournful, satisfaction when they reflect that the noble-hearted men whom they deplore did not die in vain; but that they achieved for their country, and for mankind, a victory almost unparalleled for the gallantry with which it was earned, and for its future effects on the history of mankind.

Among the names of the glorious dead, the country may well lament to see one so ennobled by long and brilliant services, as that of Sir George Cathcart. Generals Strangways and Goldie, to whose memory the Field-Marshal pays such sincere and well-merited homage, were tried and admirable soldiers. The tears of their country will follow them to their honourable graves—and the recital of their deeds will stir the young blood of our countrymen to a generous emulation of merit so exalted. Of the surviving officers—of whom all England, Scotland and Ireland will regret to see that so many are wounded—it is hardly just to signalize any one as being brave, when all were brave—and as being peculiarly deserving of mention, when every officer, and every private soldier, merited the gratitude of a Great Britain. But the conduct of the veteran Sir de Lacy Evans was so exceptional in its heroism as to stand out in relief even from the heroism of his gallant brothers in arms. Approaching the age of sixty-eight, enfeebled by a fall from his horse and by the attacks of a prostrating disease, the old warrior—once the leader of a "Forlorn Hope"—roused himself from his sick bed when he heard the distant boom of the enemy's guns. It was no time for illness, he thought, when brave blood was about to be shed, and when the active brain might be useful, if the strong right arm were enfeebled. To think, in such a case and with such a man, was to do. Without hesitation he resolved to share the perils, if not the honours of the day. Though not strong enough to resume the command of his division—which, during his temporary absence had fallen into the worthy hands of General Pennefather—he stood at the side of that officer during the heat of the battle, and encouraged and supported him by his advice and assistance. Such are the tough old heroes of England! It is a matter both for pride and for gratitude that we have thousands of men in our service as stout-hearted as Sir De Lacy—men of the right metal, whether old or young, with spirits superior to physical weakness, and with an energy that no danger can daunt. While we have such officers and such armies, we may safely defy the hordes of Nicholas, even if they come down upon us like the Plagues of Pharaoh!

The Czar, it is stated by his friends in London—for he has one or two friends besides John Bright—has once again expressed his willingness to listen to proposals of peace, on the basis of the famous four propositions of the Vienna Conference. If he be in earnest in desiring peace, he knows how to secure it. But he is not in earnest. He is playing the old game of procrastination with Austria, so as to weaken and paralyse the efforts of that Power. But the "dodge" will not answer. We would use a more dignified word, if we could find one that expressed with sufficient exactitude the meanness and the cunning of the manœuvre. The "dodge," we repeat, will not deceive even the Austrians. Peace is not now to be purchased at the price which would have been gladly accorded in February last. France and Great Britain have lost too many brave men in the struggle to listen to the proposal, which was barely sufficient to meet the justice of the case even before innocent blood had been shed. A peace dictated at the cannon's mouth, under the penalty of further punishment, is the only form of peace that the Allies will offer to the Czar. If he will surrender without conditions—the world will rejoice; but if he will not, there is no course but vigorous and uncompromising warfare. Alma, Balaclava, Inkerman, and let us hope Sebastopol.—these will be the names and the memories that will forbid peace with the sanguinary Nicholas on any terms short of total and unqualified submission. All this is on the supposition that he really desires peace—which is a supposition by no means likely. But whether the desire be real or affected, the course of the Allied Powers is clear and unmistakeable. It is their duty to follow up their victories, to send reinforcements to their armies, to double and quadruple their strength, and to allow no proposals, great or small, well meant or the reverse, to stand between them and the vigorous action necessary to secure the utter discomfiture of the forces of Russia. When that result is attained, peace will be possible;—but not till then.

THE dreadful glories of the war have rendered the Army more popular than ever it was at any previous period of British history. Danger and difficulty, so far from affrighting the brave youth of these islands, have attractions, or fascinations, which impel them to offer their services with eager alacrity. Their blood is up, and their spirit is raised, by the recital of the great deeds of their countrymen. Every day which brings news from the gory heights of the Crimea, brings to the War-office a crowd of aspirants for the post of danger and honour. Before the war, the candidates for commissions in the Army seldom exceeded one hundred; but NOW we are informed that the names of upwards of twelve hundred young men are inscribed in the books. Most, if not all, of these, it must be presumed, move in the sphere of gentlemen, and possess means of comfortable, if not of luxurious, living; for the pay of the British officer is but a trifle, and offers no inducement to the majority of the gallant spirits who make choice of the military profession. It is native courage, activity, and patriotism; it is the love of adventure and the thirst of glory that make them so eager to take part in the service of their country, and to forsake a life of ease and comfort at home for one of hardship and peril abroad. And while our aristocracy assume this high and honourable position, and vindicate by their manhood their right to the rank in which they were born, the youth of the humbler classes run a race of honourable rivalry with their superiors in worldly station, and do their part with the equally brave and equally gallant naval service, who perform duties in the day of battle which are in the highest degree essential to the success of our arms. We allude to the Army and Navy Surgeons. For them no loud pæan is ever sung. They have no opportunity, or function, to claim the honours of the strife. They gain no battles, they storm no heights, they lead no gallant men through hostile ranks, and amid the murderous fire of cannon, to hard-won and glorious victory. Their career has no attractions for the dashing youth of the aristocracy; and they, are prepared for it by too expensive and protracted a course of studies, to render it as available a profession as that of the common soldier to the great bulk of the youth of Britain. Before the battle, the surgeon is little thought of; after the battle he becomes, unfortunately, the most important man in the regiment or the ship. It is then that he has to display courage of no ordinary kind—courage united not only with skill, but with a tender solicitude and a kindly bearing. A surgeon of brutal and rough manners, has no curative resources equal to the man who inspires by his words, his looks, and his actions, hope and comfort to the sick and the wounded man; who does his best for him, and adds to that best the priceless medicaments of encouragement and cheerfulness. We trust that during the present war the complaints of this estimable and important class will not go unredressed; and that the Government, abandoning the old system of routine, will not refuse to adopt measures for securing the services of the best men that are to be obtained as Assistant-Surgeons to our forces. It should be the duty of a Government, and of a people, who have both done so much to elevate the condition of the soldier, to do as much as can be done for the elevation of the position of medical officers in both branches of the service. Why, for instance, should the *status* of the Regimental Assistant Surgeon not be raised? And why should the Naval Assistant Surgeon be denied on board ship the decent accommodation given to every other officer who bears her Majesty's commission? And, last of all, why should not the Government offer proper inducements to the youth of the medical profession—hundreds of whom would gladly go to the Crimea, or anywhere else where their services might be required? It can scarcely be said that the pay of 6s. 6d. per *diem*, without any outfit, and on a temporary engagement of six months, is a reward sufficient to induce a properly-educated and qualified hospital assistant to forsake all the chances of his profession at home. The consequence has been, and is, that the best men are not procured; and that the lives of our wounded heroes are but too often sacrificed for the want of that surgical skill which might have been available under a better and more liberal system.

We might dilate upon the grievances which both the military and naval surgeons, in the service of this country, have urged for years upon the Government, without obtaining the least redress; but we have said enough, without entering into technical details, to draw the attention of the public to the subject. The public has its heart in the present war, and can admire and appreciate the heroism of the surgeon, as much as it extols, though differently displayed and differently constituted, the heroism of the soldier. The old routine of war has been changed in many most important particulars, thanks to the new lights that have dawned upon the men of the present day; and there is no reason, that we are aware of, why the system pursued with respect to Army and Navy Surgeons prior to the year 1815, should be maintained, *coûte qui coûte*, in 1854, merely because one or two official persons dislike change—even when change would be for the better—and who meet all arguments by a reference to history. Our battles in the last great war were won under the system which they admire, and for that reason they will not listen to a suggestion for improvement in any branch of the service. This class of officials has happily been defeated in all that pertains to the fighting department of ships and of regiments—but they are still powerful as regards the medical service. Their mode of reasoning partakes more of the Chinese than of the English character. "Why," says the Chinaman, "should I presume to be wiser than my fathers?" But Englishmen reason differently, and have become a great and a progressive nation, by acting on the dictates of common sense—each generation for itself. If we had not been wiser than our fathers, we should not have had steamships of war, Minié rifles, or Lancaster guns; and if we be not wiser than our fathers, we shall lose many valuable lives in the Crimea that might be saved by the employment of skilful surgeons, in sufficient number, and with all necessary appliances for the efficient fulfilment of their duties.

THE COURT.

The Queen, the Prince, and the Royal Family, are in the enjoyment of good health, and take their accustomed walks and drives. Her Majesty and Prince Albert continue to dispense their hospitalities to successive parties of the aristocracy.

On Tuesday, being the birthday of her Royal Highness the Princess Royal, the band of the Royal Horse Guards played several select pieces, on the south terrace, at an early hour.

On Wednesday Prince Albert left for London, and presided at a meeting of the Governors of the Wellington College, held at the Palace of Westminster.

Lieutenant John O'Reilly (R.), R.N., has had the honour of submitting to her Majesty a panoramic sketch of the combined fleets attacking Sebastopol on the 17th ult., and other drawings connected therewith, made by his son, Lieutenant Montagu O'Reilly, of the *Retribution* steam-frigate.

Madame Van de Weyer, the wife of the Belgian Minister, gave birth to a daughter on Wednesday, at the residence of the Legation, in Portland-place.

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—*Rectories*: The Rev. C. A. Lloyd to Rand, near Wragby, Lincolnshire; the Rev. R. Whitehead to All Saints in the city of York. *Vicarages*: The Rev. W. F. Chambers to North Kelsey, near Kirton-in-Lindsey. *Incumbencies*: The Rev. S. Nicholson Smith to Thurstonland, near Huddersfield; the Rev. A. Frith to the church and district of Holy Trinity, Gainsborough; the Rev. J. Colbourne to the church and district of St. Matthews, Bethnal-green; the Rev. W. Fraser Handcock to the newly-consecrated church of St. Luke, Cheltenham; the Rev. Arthur Stone to Prestwold, near Loughborough; the Rev. William Henderson to Chapel Chorlton.

A TESTIMONIAL of regard and esteem has been presented to the Rev. Godfrey Faussett, from the parishioners of Leaden Roding, Essex.

LATEST INTELLIGENCE.

SIEGE OF SEBASTOPOL.

The *Journal de St. Petersbourg*, of the 16th, contains a report from Prince Menschikoff to the Emperor, in which he states that all the damage done by the enemy's fire was speedily made good, and that the troops were animated with the most heroic courage. The Allies were fortifying their right flank very strongly. The Prince also admits that the Russian loss in killed and wounded, on the 5th inst., was very great; but adds that a number of the latter were only slightly hurt and have already returned to their ranks.

At the most urgent request of Prince Menschikoff, General Annenkoff has sent to the Crimea all the disposable cavalry from Odessa and Kamborn. There are now at Odessa but three and at Kimborn one squadron of cavalry remaining.

We have advices of the 16th and 17th from Odessa, but, as they announce nothing new from the Crimea, it may be safely sounded that, up to the 14th, nothing had occurred there. The Porte has sent 10,000 tents to Balaclava. Four vessels with ammunition have been lost.

THE WAR ON THE DANUBE.

Caligani's Messenger announces that the French Government has resolved to send two divisions into the Danubian Principalities, in addition to the two French divisions now embarking at Toulon for the Crimea.

According to accounts from Vienna, Count Coronini has been ordered not to interfere in any way whatever with the movements of the Turks in their march towards Bessarabia; and at the same time he is to avoid all collision with the troops of the Czar.

ENGLISH AND FRENCH REINFORCEMENTS FOR THE CRIMEA.

Large detachments of the Grenadier, Coldstream, and Scots Fusilier Guards, amounting in all to 720 officers and men, left town yesterday morning (Friday) at half-past seven o'clock, to embark at Portsmouth, for the Crimea. They marched from their respective barracks headed by the regimental bands; and early as was the hour, were accompanied by great crowds, who cheered them enthusiastically. They embark on board the *Royal Albert*, at Portsmouth, which also takes out 488 officers and men of the 77th, and eight Royal Engineer officers and 120 men of the Sappers and Miners. These detachments, making in all 1346 men, were to embark during the afternoon, and the ship will sail to-day or to-morrow. The 54th are to embark at Liverpool, and the 68th at Southampton, for Gibraltar, to enable the 17th and 89th Regiments to go up at once to the Crimea. These reinforcements will amount altogether to nearly 3000 effective officers and men.

Troops continue to leave Marseilles almost daily for the Crimea. On Sunday last 1600 men embarked for that destination. The *Simoi* steam-packet was to sail yesterday from Marseilles for Constantinople, with the mails and detachments of the 6th and 10th Battalions of Chasseurs, and of the 70th Infantry. By the steamer *Rose*, which left Constantinople on the 13th, we learn that reinforcements for the Crimea were continually arriving in that city.

RUSSIAN REINFORCEMENTS.

The *Frenden Blatt* has received "authentic" information from Odessa relative to the reinforcements sent to the Crimea. The effective force of Prince Menschikoff is 115,000 men, of whom 75,000 men have joined him within the last month. The reinforcements marched from Perekop in three columns, and met with no opposition on their way. The first, which was 30,000 strong, with 100 guns, under Liprandi, reached Sebastopol about the middle of October, and got into position on the 18th, the day after the first bombardment. The 30,000 men belong to Osten-Sacken's corps. The two other columns belong to Dannenberg's corps. The first of them, consisting of 25,000 men, reached Sebastopol at the end of last month; the other, 20,000 strong, was in communication with the main army at the beginning of this month. It is high probable that the force of Prince Menschikoff is greatly exaggerated, but it is here considered certain that 75,000 men had arrived at Sevas opol before the two Grand Dukes went to take a turn in the Crimea. The *Soldaten Zeitung* states that, although the Russian army is stronger than that of the Allies, it is not likely to act altogether on the offensive, as Prince Menschikoff has great difficulties in getting the necessary supplies for his army, and must be sparing of his ammunition. The 17th Russian infantry division has reinforced the garrison of Sebastopol.

THE OVERLAND MAIL.

The steamer *Bombay* arrived on the 22rd at Trieste, in 118 hours from Alexandria, with the India and Australian mails

In India general tranquility prevails, and no war is in prospect. The harvests are good, and the weather is favourable.

Canton is still besieged by the rebels. Foochow and Ningpo were quiet. Teas have fallen in price; silks have advanced.

The commercial reports from Sydney and Melbourne are unsatisfactory; both markets are overstocked with goods, and shippers have sustained losses. The gold returns shows that the produce of the mines keeps up to the average.

NAVAL AND MILITARY INTELLIGENCE.

RECRUITING for both services is progressing rapidly. At Liverpool, the number of newly-made soldiers is on the average 150 per day. On Thursday 170 recruits were "passed." The 79th Highlanders have been recruiting in Aberdeen for the last few weeks with great success. No fewer than fifty young men have entered the service since the 1st of November. The Militia Regiments in the north are picking up numbers of volunteers.

The Royal Mail steam-ship *Tamar*, recently arrived at Southampton from the West Indies, has been taken up by the Government for the conveyance of troops to the Crimea, and is to be prepared for sea with all despatch. The directors of the West India Mail Company have issued a notice that, in consequence of the requirements of the Government, no cargo can for the present be taken on the Brazil route, nor on the West India route after the 2nd of December, until further notice.

SOME changes have taken place in reference to the regiments of the line lately ordered to the Crimea. The following is a correct:—The 17th from Gibraltar, the 34th from Corfu, the 62nd from Malta, the 68th from Gallipoli, the 71st Light Infantry (1st Battalion) from Corfu, the 89th from Gibraltar, and the 97th from Athens

THE CHARGE OF THE SCOTS GREYS.

THE Sketch which our Artist has given of this brilliant episode in the action of Balaclava, represents the moment when the command was given to charge the Russian columns, which had by that time given their wheeling about, or movement of conversion, the best time for throwing them into disorder. When the word "Charge!" has been given in such a case, no attempts any longer made to maintain order. Every one dashes forward at the quickest possible pace; the bravest men and the swiftest horses going ahead as in a race. It is this sort of pell-mell onset that the Sketch represents. The result of the gallant charge is thus graphically described by one who looked down upon the exciting scene from one of the neighbouring hills:—

The numbers opposed to the Scots Greys were in the proportion of six to one; and the enemy, opening their ranks before the gallant Greys, received them in their midst, and then closed in upon them. For several minutes the heart-kins disappeared from sight, but at last the belligerent circle sprang asunder, similar to a bursting shell, and the red coats appeared, driving before them, in headlong flight, the routed enemy. The cavalry had been a fearful one, and at first the Russians, encouraged by their formidable numerical superiority fought furiously. Daunted, and at length routed by the heroic bravery of these 300 British sabres, the enemy galloped back in disorder towards the captured redoubts. The Greys were, of course, unable to pursue light cavalry; but had our light horse taken the flying Russians in the flank, as was very feasible, not only would the enemy have been cut off from the main body, and either captured or destroyed, but also the catastrophe, which occurred later, would have been avoided. As it was, the Russian cavalry joined the infantry, and an hour later took up a position in a valley dominated by the conquered redoubts. The loss sustained by the Greys was trifling in killed, but very few escaped without a wound of some kind. Colonel Darby Griffith was slightly wounded in the head by a ball. He was taken into Balaclava, when the wound was dressed, and in the afternoon he again took the command of his gallant regiment. Major Clarke, upon whom the command devolved, in the absence of Colonel Darby Griffith, received a sabre-cut in the back of the neck, which did not, however, prevent him from keeping to his horse;—the actor, by the way, received from the same sabre which had wounded his master a fearful slash across the tail-joint, which had nearly severed it. Cornet Prendergrast was struck in the foot by a ball. Never in the annals of the Scots Greys had they greater odds to encounter and to conquer.

THE ACTION AT BALACLAVA.—CHARGE OF THE SCOTS GREYS, OCTOBER 25.

SORTIE OF THE RUSSIANS FROM SEBASTOPOL, OCTOBER 26.

'L'OBLIGATOR.' VIRAGO. EURYDICE. PIQUE.

NAVAL ATTACK ON THE RUSSIAN FORT OF PETROPAULOVSKI.

NAVAL ATTACK ON THE RUSSIAN FORT OF PETROPAULOVSKI.

THE Allied squadron in the Pacific has attacked the Russian fort of Petropaulovski, in Kamschatka, destroyed two batteries, and taken three vessels—one of them the *Sitka*, a merchantman, carrying ten guns, and having on board six Russian officers, and a cargo worth 200,000 dollars. Petropaulovski is situated on the eastern coast of Kamschatka, near its southern extremity, in lat. 53° N., and long. 159° E. from Greenwich. It is a fortified town of some 2500 inhabitants, and is one of those advanced posts which, for the last half-century, it has been the policy of Russia to establish on the frontier of her dominions, in time of peace, for the convenience of her commerce; and, in time of war, as places from which operations by sea might be supported. The attack was made under great disadvantages, on the 30th and 31st of August, and again on the 4th of September. The loss of the Allies has been stated to be sixty-four; but *L'Echo du Pacifique*, of October 13, states it thus:—"The total number of men killed, wounded, and left on shore, belonging to the French squadron, 98; of the English squadron, 111: total loss of the Allies, 209." Rear-Admiral Price was accidentally killed by a shot from a pistol in his own hand; and Capt. C. A. Parker, of the Marines, on board the *President*, has fallen in battle. The French have lost Lieutenant Lefebvre, of the *Eurydice*, and Ensign Gueguel, of the *Obligado*, left on shore, and Lieutenant Bourasset, of the *Eurydice*, killed in attempting to land.

The action was a very severe one, the English vessels alone are said to have fired 3000 balls. The loss on the side of the Russians was very heavy, but is not ascertained. The Russian frigate *Aurora*, of 44 guns, and the *Divina*, of 20 guns, were moored inside, and protected by sand-banks, behind which they operated as batteries, beyond the reach of the French and English.

The object of the fleet is said to have been not to take Petropaulovski, but to ascertain where the Russian fleet was. If this is so, they have certainly succeeded, and have learned the important fact that the Russian fleet is all in harbour at the mouth of the river Amoor, which the Russians have taken possession of, and that therefore there is no immediate danger to English vessels in the Pacific. The combined fleet had no troops to disembark, and the season being so far advanced, they concluded to sail for San Francisco, where the French squadron arrived on the 3rd ult. The English vessels had gone to Vancouver's Island, but were expected to join the French in a few days.

The *San Francisco Times*, of the 11th ult., speaking of the Allied squadron, says, "It would, we say, pose, be recruited by the addition of the *Amphitrite* and *Trincomalee*, which, with the French corvette *Artemise*, now cruising on our coast, the combined fleet of five British and four French will then probably proceed to Petropaulovski and complete the work."

FRENCH ENTHUSIASM.—We shall have an assault—that is decided. General Canrobert has issued an order of the day which has excited great enthusiasm. You cannot figure to yourself the order of the troops. They are not only full of fiery enthusiasm, but are mad—nobly mad! An immense cry of joy greeted the order of the day; the soldiers threw their caps in the air; shook each other by the hand, embraced each other. The spectacle was one which I shall never forget as long as I live. The General-in-Chief invited all the men who desired to form part of the columns of assault to inscribe their names. There was a great rush, each man wishing to arrive first; and, in a short time, 8000 names were inscribed. That was too many; General Canrobert only wanted 4000. How can I describe to you the grief of those who had to be struck out of the lucky list? I wish to exaggerate nothing; but many of these iron soldiers had tears in their eyes. "*Ord nom*, Captain!" said one of my company. "I have been wounded five times in Africa, and again at the Alma, and am set down for a decoration, and yet I am not to go! *Ord nom*, I have no luck! Recommend me, I pray you, to the General!" I had great difficulty in calming the man by telling him that we should have our part to play in the great day. A deputation of those who have no luck has solicited from the General-in-Chief the honour of following the first column; they state that they have received a positive promise that they shall do so. The men are now engaged in sharpening their bayonets, cleaning their muskets, and carefully examining their gunlocks. Some, however, find time to think of their country and their family, and the *scribes* of the company have been placed in requisition by those who cannot write. How many of these poor devils will be dead before the letters reach France! I forget to state that the columns of assault have been formed and the officers designated. I do not name them to you, in order not to cause disquietude in families. The command of the column of attack has been reserved to Prince Napoleon.—*Letter of a French Officer*, Oct. 3.

THE BATTLE OF INKERMAN.—On Thursday, at half-past one, a grand *feu de-joie* was fired from the guns in St. James's-park, in honour of the success of the British arms at Inkerman.

INCIDENTS AT THE BATTLE OF INKERMAN.

THE NIGHT BEFORE THE BATTLE.

It had rained almost incessantly the night before, and the early morning gave no promise of any cessation of the heavy showers which had fallen for the previous four-and-twenty hours. Towards dawn a heavy fog settled down on the heights and on the valley of the Inkerman. The pickets and men on outlying posts were thoroughly saturated, and their arms were wet, despite their precautions, and it is scarcely to be wondered at if there were some of them who were not quite so alert as sentries should be in face of an enemy; for it must be remembered that our small army is almost worn out by its incessant labours, and that men on picket are frequently men who have had but a short respite from work in the trenches or from regimental duties. The fog and vapours of drifting rain were so thick as morning broke that one could scarcely see two yards before him. At four o'clock the bells of the churches in Sebastopol were heard ringing dreadfully through the cold night air; but the occurrence has been so usual, it excited no particular attention. During the night, however, a sharp-eared sergeant on an outlying picket of the Light Division heard the sound of wheels in the valley below, as though they were approaching the position up the hill. He reported the circumstance to Major Banbury; but it was supposed that the sound arose from some munition-carts or arabas going into Sebastopol by the Inkerman road. No one suspected for a moment that enormous masses of Russians were creeping up the rugged sides of the heights over the valley of Inkerman on the undefended flank of the Second Division.

OUR PICKETS FALL BACK.

It was a little after five o'clock this morning when Brigadier-General Codrington, in accordance with his usual habit, visited the outlying pickets of his own brigade of the Light Division. It was reported to him that "all was well," and the General entered into some conversation with Captain Fergusson, of the 33rd Regiment, who was on duty on the ground, in the course of which it was remarked that it would not be at all surprising if the Russians availed themselves of the gloom of the morning to make an attack on our position, calculating on the effects of the rain in disarming our vigilance and spoiling our weapons. The Brigadier, who has proved himself excellent, cool, and brave officer, turned his pony round at last, and retraced his steps through the brushwood towards his lines. He had not proceeded a few paces when a sharp rattle of musketry was heard down the hill, and on the left of the pickets of the Light Division. It was here that the pickets of the Second Division were stationed. General Codrington at once turned his horse's head in the direction of the firing; and in a few moments galloped back to turn out his division. The Russians were advancing in force upon us! Their grey great-coats rendered them almost invisible, even when close at hand. The pickets of the Second Division had scarcely made out the advancing lines of infantry, who were clambering up the steep sides of the hill through a drizzling shower of rain, ere they were forced to retreat by a close sharp volley of musketry, and were driven up towards the brow of the hill, contesting every step of it, and firing as long as they had a round of ammunition on the Russian advance. The pickets of the Light Division were assailed soon afterwards, and were also obliged to retreat and fall back on their main body; and it was evident that a very strong sortie had been made upon the right of the position of the Allied armies, with the object of forcing them to raise the siege, and, if possible, of driving them into the sea.

HAND-TO-HAND FIGHTING—BRITISH PLUCK.

The enemy's columns continued to push forward, trying to overwhelm the British regiments with their superior numbers. Discharges took place here at ten and fifteen paces and gradually the conflict became a hand-to-hand one. The Russians would push on, covered with their superior fire, and were met and driven back at the point of the bayonet. Concentrating their massive columns, they would in their turn bear down with the steel upon the weak British lines, and then a fearful struggle would ensue. In every ravine a separate action was going on. One British regiment was making face against a column of 4000 or 5000 Russians, sometimes surrounded and having to bayonet its way from the pressing foe, at other times driving back the enemy like a flock of sheep, and then in its turn being repulsed, from sheer want of strength. Thus did the contest continue for three hours. The loss here was necessarily great, from the personal nature of the contest. British bayonets and the Minié alone sustained this unequal struggle, where every mounted officer was either killed, or lost one or two horses. Our officers did great havoc, when surrounded in the *mêlée*, with their revolvers; and many had to cut their way out at the point of the sword. Brigadier-General Pennefather commanded here with great coolness. From the nature of the ground, no generalship could prevail. It is alone to the undying pluck of the officers and the men that we are indebted for preservation. To the survivors generally, not the slightest credit for the display of any military talent is due. It was essentially a struggle between pluck and confidence, against obstinacy backed by numbers.

THE BAYONET CHARGE.

It has been doubted by military historians if any enemy have ever stood a charge with the bayonet, but here the bayonet was often the only weapon employed in conflicts of the most obstinate and deadly character. We have been prone to believe that no foe could ever withstand the British soldier wielding his favourite weapon and that at Alma alone did the enemy ever cross bayonets with him; but at the battle of Inkerman not only did we charge in vain—not only were desperate encounters between masses of men maintained with the bayonet alone—but we were obliged to resort to bayonet to bayonet, the Russian infantry again and again, as they charged us with incredible fury and determination. The battle of Inkerman admits of no description. It was a series of dreadful deeds of daring, of sanguinary hand-to-hand fights, of despairing rallies, of desperate assaults in glens and valleys, in brushwood glades and remote dells, hidden from all human eyes, and from which the conquerors, Russian or British, issued only to engage fresh foes, till our old supremacy, so rudely assailed, was triumphantly asserted, and the battalions of the Czar gave way before our steady courage and the chivalrous fire of France.

HOW BRAVELY THE GUARDS FOUGHT.

At the right angle formed by the heights, and slanting off along the course of the Tchernaya, a small battery, having embrasures for two guns, had been constructed by our Engineers. This small work called "Sandbag Battery," had only been established when the enemy had erected some threatening work in the direction of Inkerman. Upon the Russians discontinuing these works, the two 18-pounders which had been mounted on Sandbag battery were taken away, and the battery left without guns. The Russians, in great strength, now assailed this redoubt, and the line of heights flanking the valley. The Guards advanced to repel them, and a dreadful struggle took place. Four Lines were the Guards driven from the battery, and four times did they repulse the enemy and regain their position. More than half of the Guards who entered action fell here; but around them lie heaps of the enemy. About this redoubt alone not less than 1500 Russian corpses have been counted. The killed were literally heaped one upon another, and most were shot through the head. The position of the Guards became every instant more critical. Fresh masses of the enemy had advanced between their lines and the Second Division, thus taking them in the rear. Pressed by this new foe, the Guards prepared to fall back, contesting every inch of ground, when another Russian column, which had ascended the height below their position, now attacked them on the flank. They were thus simultaneously assailed in the rear and right flank. Nothing remained but to break their way through at the point of the bayonet. The Russians evidently considered the Guards either doomed to destruction or to capture, for they gave a tremendous cheer, or rather a drunken yell, which was taken up by the whole Russian army, and sustained for full ten minutes. The Guards, undaunted by their horrible position, back to back fought their way out of the surrounding masses, and were now rejoined by part of the Fourth Division (the twenty-fourth part of the 63rd, and two companies of the 46th), under Sir George Cathcart. Another of the fearful hand-to-hand struggles which characterised this sanguinary day again took place at this spot. Opposed to these 1800 Englishmen were more than 9000 Russians, animated with great courage, and confident in their superior numbers. Our troops met the attack, and the bayonet or butt-end of the musket repelled the foe when the closeness of the quarters prevented the use of fire-arms. Sir George Cathcart was at the head of his men, encouraging them with his undaunted bravery, when a bullet struck him in the breast, it is said, a little Cross of the Bath, attached to a ribbon round his neck. Sir George continued to advance, and when at five paces from the enemy a second bullet struck him mortally, and the brave old hero fell dead from his horse. His body was recovered mutilated with bayonet wounds. Colonel Charles Seymour, Assistant-Adjutant-General to the Fourth Division, fell by the side of Sir George, shot through the heart. The Russians had the brutal joy also to transfix the body three times with the bayonet. Major Maitland, Deputy-Assistant-Adjutant-General, received at the same time a severe wound. After a rigid struggle against the superior number of the enemy, who was bringing up fresh battalions every instant, a welcome sight offered itself to our brave men. On the crest of the hill dashed the well-known red garments of the Zouaves, and before the enemy had recovered from his surprise at this timely succour to our weakened lines, these splendid soldiers were amongst them. Then, advancing at *pas de charge* along the ridge of the heights flanking the valley, appeared a strong column of French infantry (chiefly of the Foreign Legion). The Russians, wearied already at the deadly struggle they had sustained with our little band, drew back, and the musketry, which the French now poured in incessantly, took frightful effect in their confused ranks. The English and French drove them to the redoubt, and down the hill into the valley below.

DEATH OF GENERAL STRANGWAYS.

About half-past nine o'clock Lord Raglan and his Staff were assembled on a hillock, in the vain hope of getting a glimpse of the battle which was raging below them. Here General Strangways was mortally wounded, and I am told he met his death in the following way:—A shell came right in among the Staff. It exploded in Captain Somerset's horse, and killed him; it then struck down Captain Gordon's horse, and killed him; it then blew away General Strangways' leg, forcing it hang by a shred of flesh and a bit of cloth from the skin. The poor old General never moved a muscle of his face. He said merely in a gentle voice, "Will any one be kind enough to lift me off my horse?" He was taken down and laid on the ground, while his life-blood ebbed fast, and at last he was carried to the rear. But the gallant old man had not sufficient strength to undergo an operation; and ere two hours he had sunk to rest, leaving behind him a memory which will ever be held dear by every officer and man of the army.

DUTCH COURAGE OF THE RUSSIANS.

The general voice of the Allied army is one most sanguine of success; they do not believe that the men who came on on Sunday will think drunken howl, between a moan and a shout, can for a moment stand before us. Every appeal, both to their fanaticism and the passions, seems to have been made by the Russian leaders during the earlier part of the night before the battle; the whole garrison of Sebastopol were observed to be lighted, and their bells to be tolling as for a solemn service; nor was the material excitement of a large issue of spirits omitted. Their bearing was that of an army under the influence of religious and sensual frenzy.

THE RUSSIAN LOSS.

Even the *Russe Invalide* admits, in an official report, that the Russian loss on the 5th November was 42 officers and 2939 men killed, and 206 officers and 5791 men wounded; giving a total of 8098 killed and wounded. The number of prisoners taken by the Allies is not given. There seems good reason to believe that Lord Raglan's estimate of the enemy's loss—15,000 men—was not exaggerated.

WINTER IN THE CRIMEA.

It is believed that the Allied troops will winter in the Crimea. Every preparation is making for keeping them housed as comfortably as possible under the circumstances. Wooden huts are to be sent out, and everything done to enable them to keep out the cold. Stone is in such plenty on the ground occupied by the troops, that they can easily construct small huts of stone, with the tarpaulins they now use for roofs, and so constructed fires can be made, and heat kept up to any degree they may wish.

OBITUARY OF EMINENT PERSONS.

LORD DUDLEY COUTTS STUART.

The death of the popular and accomplished member for Marylebone occurred at Stockholm on the 17th inst. The immediate cause was cold caught after a severe attack of typhoid cholera.

His Lordship was the only son of John, first Marquis of Bute, by Frances, his second wife, daughter of Thomas Coutts, Esq., of the Strand, banker, and grandson of John, Earl of Bute, the favourite and Minister of King George III. He was born January 4, 1803, and married, in 1824, Christiana-Alexandrine-Egypta, daughter of Lucien Bonaparte, Prince of Canino, brother of the Emperor Napoleon I.; and by her (who died at Rome, May 13, 1847) had an only son, Paul Amadeus Francis Coutts, late an officer in the Navy.

In 1822 his Lordship graduated M.A. at Christ's College, Cambridge; and in 1830 first entered Parliament as member for Arundel, which borough he continued to represent until 1837. In 1847 he became M.P. for Marylebone.

Lord Dudley Stuart will long be remembered for his noble exertions in the cause of Poland and her exiled patriots. In all questions touching the liberty of the subject, the member for Marylebone was arrayed on the side of the people.

PROFESSOR EDWARD FORBES.

The distinguished philosopher died at his residence, at Wardie, near Edinburgh, on Saturday last, in the 40th year of his age. It is not too much to say, that science has not lost a nobler son during the present century; and there are none who enjoyed the advantages of his teaching or the honour of his friendship, but will deeply feel the calamity which has befallen them. At a very early age, as a student in the University of Edinburgh, he gave strong evidence of talents of a very superior order. The Botanical Society of Edinburgh—one of the most flourishing scientific bodies in the kingdom—owes its origin to Edward Forbes, and a few of his fellow-students, none than one of whom were his late colleagues. Though Natural History, with the adjunct sciences of Botany, Geology, and Comparative Anatomy, were Professor Forbes' leading pursuits, he was no less distinguished by all the accomplishments which become a gentleman and a man of letters. After delivering a course of extra-academical lectures of Natural History, he proceeded to the East, as Naturalist to a scientific expedition. To this journey we are not a few important contributions to science, and, we have to regret it, the early death of the Professor. Returning to London, he, with credit to himself and advantage to the University, occupied the Chair of Botany in King's College. The Geological Society acknowledged his high merit by electing him to every honorary office which it could confer; and, on the establishment of the School of Practical Geology and Designs he was at once put at the head of the Palæontological department. To admirable arrangement of British fossils in the Museum, in Jermyn-street, is a portion of the fruits of his labours in this situation. Last April, on the death of the venerable Professor Jameson, Professor Forbes, to the delight of every one who knew him, had the appointment conferred upon him. In May he commenced the usual summer course of lectures, and by his energy, his clearness, and his comprehensive views, did much to revive and strengthen in Edinburgh the taste for natural history. Though suffering from disease, he, on the 2nd of the present month, again opened his class; but could only continue for six days. He died, after nine days' illness, leaving a blank in the University of Edinburgh which it will be difficult to fill up.

Next week we shall give a Portrait of the lamented Professor; to be accompanied by a more detailed account of his invaluable services to science.

WILLS.—The will of Admiral Sir Thomas Byam Martin, G.C.B., is of considerable length, disposing of £80,000 personalty. Sir Charles Hulse, Bart., has left £20,000 in personalty. Joseph Mayor, Esq., of Dalton-lodge, Kirkheaton, Yorkshire, £60,000. The Rev. Orlevar William Kirkpatrick, formerly Vicar of Bignoll, York, but late of Hatfield, £60,000. Andrew James, Esq., of Southampton, £60,000. Major-General Charles Middleton, of Maidstone, £12,000. Lady Shadwell, widow of the late Chancellor, £12,000.

CHARITABLE BEQUESTS.—Thirteen public institutions in the metropolis are benefited £1000 each, under the will of the late John Binchliff, Esq., of Notting-hill-terrace, formerly of Kemercer, Henrietta-street, Covent-garden, who lived to the advanced age of ninety-one, and has left property estimated at £30,000. The societies are as follows:—The Benevolent Institution for the Relief of Aged and Infirm Journeymen Tailors; School for the Indigent Blind, St. George's-circus; Deaf and Dumb Asylum, Old Kent-road; Westminster Hospital; Magdalen Hospital; Lock Hospital; London Fever Hospital; City of London Truss Society; Middlesex Hospital; Charing-cross Hospital; Asylum for Idiots, Highgate; St. Mary's Hospital, Paddington; Hospital for the Cure of Cancer, Westminster; and to the following £500 each—House and Poor Society, Broad-street, and the Society for the Prevention of Cruelty to Animals.—Henry Brigge Esq., of Cheltenham, has bequeathed to the Cheltenham General Hospital, the St. Mary's Hospital, Paddington, and to the Middlesex Hospital, £500 each.—Miss Ann Baddeley, of Frederick-street, Birmingham, has left to the General Birmingham Hospital, £100; the Bluecoat School, at Birmingham, £100; and to the Deaf and Dumb Asylum, the Blind Asylum, and the General Dispensary, and other institutions at Birmingham, small bequests.

The principal telegraphic-office in Switzerland is that of Bâsle. It forwards to the interior of the country from 2000 to 3000 despatches; and to France, England, Belgium, Holland, and a great part of Germany, no less than 1000 despatches per month.

THE CONSERVATIVE LAND SOCIETY.—The first acquisition of land in Lincoln-hire for distribution amongst the members, being the twentieth estate bought for the society, has just been made at Alford, on the Great Northern Railroad, about half-way between Boston and Hull, and about seven miles from the sea.

FOUR million of Minié rifle ball cartridges were forwarded from the Royal Arsenal, Woolwich, on Friday week, for use in the Crimea.

TOWN AND TABLE TALK, ON LITERATURE, ART, &c.

THE newspaper-press has lost an able man in the death of Mr. Frederick Knight Hunt, known and respected among authors as the editor of the *Daily News*, and to whom that journal has it just paid, we are glad to observe, a high, and well deserved encomium. It has been too common a custom among editors to ignore the editorial existence of their brethren no longer alive in the flesh. Thus, if we remember rightly, the *Times* suffered the late Thomas Barnes to sink into his grave at Kensal-green without a paragraph of regret. When Gifford died, the next *Quarterly Review* had nothing to say about the loss that journal had sustained; and critics are quarrelling with the bare account in the *Times* of the late Samuel Phillips. There was a period in our literature, when connection with a newspaper was thought to be discreditable. Then it was, of course, desirable that names should be concealed. Now the newspaper-press, to use the title of Mr. Hunt's book, is a *fourth estate*, and the names of the editors of the best journals may be easily ascertained by any one at all curious on the point. We should be sorry, indeed, to endure or countenance a time when the name of the writer of every article was known within twenty four hours of its publication—but the case of a writer no longer alive is materially different;—by giving publicity to his labours, with his name to them, when he is no more, and when such labours demand to be thus noticed, we are rendering justice to a writer who deserves to be remembered. We never pass the grave of Tom Barnes in Kensall-green, without contrasting the failing condition of his marble monument with the once well known reputation of the writer whose remains it is designed to protect—an author whose articles, from day to day, were read in less than fifteen years ago with avidity throughout the whole civilised world.

Our readers will regret to learn that Mr. Lockhart is so unwell that fears have been entertained, even by the most sanguine of his friends, of his ultimate recovery. He is at Abbotsford, with his only child, Mrs. Hope Scott.

Mr. Macaulay, we are told, has made an important discovery of a mass of Stuart papers relating to a period immediately anterior to the death of Queen Anne. This discovery will, when adding to the value and importance of what he is about, delay, at the same time, the long-looked-for day when two new volumes are to appear.

The veteran Lord Brougham has, we are glad to learn, undertaken to collect and edit his works—including, we believe, his speeches and orations. They will appear in a series of monthly volumes, and will be published by the enterprising firm of Griffin and Co., publishers to the University of Glasgow.

A private subscription has been set on foot for the purpose of marking the grave, in Sydenham churchyard, of Samuel Phillips. The subscription is restricted to one hundred subscribers of a guinea each; and the treasurer is Mr. Bartley, the celebrated actor, 11, Woburn-square, by whom subscriptions will be received. The sum to which the subscription is limited will not allow of any "storied urn" or "animated bust;" but it is sufficient to mark the grave of an author too early removed from among us.

A curious literary and antiquarian controversy is waging at present about the date of publication of the first edition of the "Dunciad;" and the editor of "Notes and Queries" having undertaken to determine the question, has invited his different sub-orbers to entrust him with any early editions they may possess. The invitation has been responded to, and Mr. Thome, the editor, is almost buried under early editions, containing the celebrated plates of the Owl and the Ass. Mr. Croker has sent his early editions; Mr Cunningham has done the same; and Mr. Dilke is sending his. Not a day passes without a Parcels Delivery of Owls and Asses at the door of the publisher of "Notes and Queries," in Fleet-street. Could Pope have foreseen such an inquiry, he would have hitched editor and readers into an implacable acquaintance. But would he have been content with two lines? The whole proceedings remind us of a couplet already in the poem:—

> Silence, ye wolves! while Ralph to Cynthia howls,
> Making night hideous. Answer him, ye owls!

The news from the North of the death of Lord Dudley Coutts Stuart has been received with something more than regret by literary men. His Lordship was not, it is true, an author—not even a noble author; but he had a love for authors, and was seldom happier than when he was immediately among them. Much was expected from Lord Dudley, for his Lordship possessed all the Bute Papers, and was well versed in the history of the early part of the reign of George III. There was a chance, it was thought, that when his love of politics had so somewhat subsided, he would have found leisure to prepare the Bute Papers for publication, and to have completed an important portion of the State Papers of England between 1760 and 1785. We trust that they will yet be given to the public, with the remaining letters of Lady Mary Wortley Montagu which his Lordship is said to have possessed.

The deeds of heroic daring and endurance described in Lord Raglan's despatches, and in all the letters from the seat of war, call to mind a reply made by the great Duke of Marlborough to Queen Anne. When her Majesty at Court complimented the Duke on his great success, his Grace modestly replied, "Madam, while I have the honour to command troops that will march up close enough to the enemy to brush his whiskers without firing, I can never lose a battle." The saying is to be found in "Ben Victor's Letters," and Victor was the friend of Sir Richard Steele, who was to have written the life of the great Duke.

PRINCE LEININGEN and Captain Burgoyne, both wounded in the Crimea, arrived at Southampton, in the steam-ship *Nubia*, on Thursday morning.

The Earl and Countess of Erroll have arrived in London, from the seat of war. His Lordship's wounds are progressing satisfactorily.

The youthful Viscount Hood has been appointed to the Ensigncy in the Grenadier Guards, left vacant by the promotions consequent on the death in action of his uncle, the Hon. Francis Grosvenor Hood. Lord Hood is in his seventeenth year.

ARCHDEACON DENISON'S CASE.—Lord Campbell gave judgment yesterday morning in the case of the proceedings which have recently been adopted by the Archbishop of Canterbury against Archdeacon Denison. Sir Frederick Thesiger had moved for a rule to prohibit his Grace from proceeding further against the Archdeacon on in the Court of Arches, inasmuch as the charge that Mr. Denison had held and taught unsound doctrine, contrary to the Thirty-nine Articles, had been disposed of by his diocesan the late Bishop of Bath and Wells. His Lordship, in delivering the judgment of the Court, said that having read the affidavits, and deliberately considered the statutes which had been cited in support of them, the Court was of opinion that the rule ought not to be granted. The result of this decision will be that the whole question will be opened up in the Court of Arches; and the matter, being one of doctrine, will, in all probability, occupy public attention for many months.

TESTIMONIAL.—Mr. William Walker, Superintendent of the Constabulary Force of the Home Division of the county of Kent, has been presented with a valuable gold watch, by the magistrates, clergy, and gentry of his division, in testimony of the efficient manner in which he has discharged the duties of his office.

MR JOHN BRIGHT, M.P., BURNT IN EFFIGY.—The letter which has recently appeared in the public journals from Mr. John Bright, M.P., on the war, has caused among his constituents of Manchester an unmistakeable feeling of indignation in many circles. On Tuesday evening, an effigy representing the member for Manchester, was publicly burnt at New-cross, in that city. On the effigy were inscribed the words, "Bright, the friend of Nicholas." New-cross Ward contains a large number of Irish inhabitants, who were formerly the warmest supporters of Mr. Bright, but they appear to have as little sympathy with him now as the English electors have.

THE French Consul at Newcastle-on-Tyne has received a despatch from the Minister of Foreign Affairs, informing him that, by a decree of the 5th August last, he Imperial Majesty Napoleon III. has been graciously pleased to confer on Gilbert Ward, Esq., Vice Consul of France at Blyth, the gold medal of first class, for services rendered to the French Marine.

MUSIC.

THE performance of Handel's "Judas Maccabæus" last week, by Mr Hullah, at St. Martin's Hall, has been followed by another performance of the same oratorio by the London Sacred Harmonic Society, at Exeter-hall, on Monday evening. The martial character of the work (which was written in 1746, to celebrate the victory of Culloden) renders its production appropriate in the present state of public feeling, independently of the charm in excellence of the music—which, as scarcely necessary to say, is of the highest order. The London Sacred Harmonic Society's performance was on a much larger scale than that by Mr. Hullah, but it did not, on that account, give a more complete idea of the grandeur and beauty of the work. We have more than once endeavoured to point out the prevalent mistake of supposing that, in choral and orchestral performance, the greatness of the effect corresponds with the numbers employed. The two Sacred Harmonic Societies endeavour to attract the public by bidding against each other; when the one announces a band and chorus of seven hundred performers, the other outbids it by announcing eight hundred. Except in music as noise and simply as a pleasing tone, it is impossible for these unwieldy masses to move together with unity and precision. All the skill in the world on the part of the conductor could not make them do so, even were they all, individually, well-trained and competent performers. But this unfortunately is not the case. Such multitudes of thoroughbred professional singers and players are not to be had; and the orchestra, consequently, is filled up by inefficient amateurs, without discipline or knowledge, who either do nothing at all, or do harm instead of good. The evil, we repeat, exists in both the Sacred Societies, but it is most felt where the numbers are the greatest. Musical amateurs are like volunteer soldiers—they are not sufficiently able to do-pline—they cannot stand long and persevering drills; they get tired, and take themselves off, and are superseded by others like themselves; so that a portion of these enormous masses always consists of constantly-changing recruits. The performance on Monday evening was such as it has been before. Of those choruses where the band moved together in plain harmony, and all sang time, the effect was frequently grand and solemn; but in the more intricate movements, where responsive points had to be closely taken up, there was the usual amount of indistinctness, waverings, and feebleness. The solo parts were, on the whole, well executed—the singers being Miss Birch, Miss Dolby, Miss Wells, Mr Augustus Braham, Mr Farquharson, and Mr. Symour. Miss Birch was in excellent voice, and took to it not always the easy song in pleasant tune. She gave the beautiful airs "Pious Orgies," and "From mighty Kings," in a manner worthy of her reputation. Mr. Augustus Braham (who sang the same part last week) was again very successful. Mr Farquharson, a young gentleman, but he lacks fire, and his execution is at times very emphatic. Mr. Surman, who is most zealous and painstaking in the fulfilment of his duties as the conductor, received a gratifying testimonial of the good opinion of the society. In the course of the evening a deputation entered the orchestra, and their spokesman (one of the vice-presidents) presented him with a silver box containing 100 guineas, expressing at the same time the society's sense of his merit and service. Mr. Surman made a suitable reply, and this pleasant incident was much cheered by the crowded audience.

MUSIC IN LEIPSIC.—At the Gewandhaus Concert, in celebration of the anniversary of the death of Mendelssohn, we performed Mozart's "Requiem," a suite of pieces by Sebastian Bach (the violin solo of which was finely played by Herr F. David), the Reformation Symphony of Mendelssohn's "Christus," his "Lauda Sion," and Beethoven's grand overture to "Leonora." Miss Staabach, who is engaged for the series of concerts, sang the soprano music with much expression, showing at times considerable knowledge of sacred as well as secular music. We have no hesitation in saying that she is the best English soprano formany has heard since Clara Novello.

THE THEATRES.

HAYMARKET.—A new and original piece by Mr. Samuel Lover, who has taken the war of the Crimea for his subject, was produced on Saturday, under the title of "The Sanitoo of the Alma." The plot consists of preparations for the battle, and certain representations of it, the English camp being the chief point of exhibition, of which were finely played by Herr F. David), the Reformation Symphony of Mendelssohn's "Christus," his "Lauda Sion," and Beethoven's grand overture to "Leonora." Miss Staabach, who is engaged for the series of concerts, sang the soprano music with much expression, showing at times considerable knowledge of sacred as well as secular music. We have no hesitation in saying that she is the best English soprano formany has heard since Clara Novello.

INAUGURATION OF THE STATUE OF CHARLES XIV, AT STOCKHOLM.

ON the 4th of November the inauguration of Carl Johan's Statue took place, according to the pre-arrived form already published, the weather being most propitious for that purpose. The morning was wet, and the forenoon cloudy; but as midday approached, the sky became altogether clear.

The national banners of Sweden and Norway were planted on each side of the statue; and on each side of the base of the statue, the troops, stood the Staff of his Majesty; and again to the right of these the Councillors of the State; and to the left the Generals and other superior officers of the army. On three sides of the grand square, in which the Statue stands, were placed the different corps of the different regiments of the army—the Cadet Corps, the battalion of Grenadier Guards, and company of the Norwegian troop. The fourth side, in front of the north gallery, was occupied by the officers now present in the city, and was according to rank. The gallery was covered and ornamented with banners. Two immense military flags waved above the Royal tribune, where were seated the Queens and Princesses. The troops, with their respective colours; the numerous vessels in the harbour, with their flags displayed; the vast crowd of people who thronged all the avenues to the square and gazed from roofs and windows, produced the most fete like appearance.

The troops took their places at half-past eleven o'clock, and immediately afterwards his Royal Highness the Crown Prince made his appearance on horseback, attended by his staff; and shortly before twelve, their Majesties the Queen and the Queen Dowager, with the Crown Princess and the Princesses Eugenia and Josephine, amidst a salute of twelve his Majesty arrived on horseback, accompanied by the Princes Oscar and August; Count Gyldenstolpe, Councillor of State; the Commander-in-Chief, General Lehren; and the Grand Governor, Count Hamilton, and his staff.

His Majesty took his place immediately in front of the Statue, and spoke, in a distinct voice, the following noble and memorable words:—

Forty years are passed this day since the power and genius of Carl Johan erected a monument, the immoveable foundation of which is laid upon the affections embraced persons of the Scandinavian land, and the greatness of which knows no limits, because it constitutes the unimpeded advancement of two noble people on the path of virtue and honour.

The union of Sweden and Norway created a new era for the North, which has so far been blessed by the benefits of peace and calm industry. The events of the future are concealed from human sight; they lie in the almighty hand of God. May these kindred nations, by their guardianship of a common well-being, their sacrifices for the common honour, their courage in common danger, be always found worthy of the future, which is so affluent in promise. Thus will the free sons of Scandinavia bear rich harvests of increasing improvement and imperishable laurels.

The memories of great men are perpetuated by human advancement

PLATE PRESENTED TO THE REV. ALFRED WILLIAMS.

and obtain by that means their true, their highest homage. But gratitude behoves a noble people; and we are this day assembled for the celebration of its important festival. We cannot but raise our eyes with heartfelt emotion to the image of that King who, during his honourable and peaceful reign invariably acted up to his beautiful motto—"*The love of the people is my reward.*"

His Majesty, having spoken these words, gave the sign for the unveiling the Statue. The kingly glance and earnest familiar features of Carl Johan were then revealed. His Majesty drew his sword and bowed: all who stood round the Statue uncovered their heads; the troops presented arms; banners waved; and a salute was fired, not only from the shipping in the harbour, but from the Castle.

The singers of the Cadet Corps now came forward and sung the hymn, "Let all people bless the Lord!" in which the military bands and all present joined.

After this the troops filed off, headed by the Crown Prince, in front of the Statue and the King in the following order:—the Cadet Battalion, the battalion of Grenadier Guards, the Norwegian Division, the squadron from the collected army, the collected battalion, regiments of Guards, the Regiment of Södermanland, Life Guards on horseback, a division of the Norwegian Cavalry, and the Regiment of Swedish Artillery.

At the close of the ceremony the Royal personages retired from the scene.

Besides the great dinners at the Castle, his Majesty gave dinners also at the following places:—In the Lower Exchange-hall, to the soldiers of the private army, who had come hither for the occasion; in the barracks, to the privates of the garrison regiment, and the Royal Marines stationed here; to the officers of the Södermanland Regiment, which had come from Waxholm for the occasion, and returned thither the same evening; in the barracks, to the non-commissioned officers of the garrison of the capital; to the entire Cadet Corps at the Military Academy, at Carlsburg; to all the inmates of all the poor-houses and benevolent institutions of Stockholm, with 32 skillings banco to each person; besides refreshments at Mosebacke for all the non-commissioned officers of the private army who had come hither for the occasion; and at the Order of Neptune, to the non-commissioned officers and men of the Burgher Infantry and Cavalry, who had been called out for the day.

In the evening, the theatre being splendidly illuminated, a prologue was spoken, written by Professor Böttiger; after which the opera of "Fernando Cortez" was given. The amphitheatre and stalls were occupied by superior officials and officers; the third, fourth, and fifth tiers of boxes by the non-commissioned officers and men of the private army and in garrison—all especially invited by his Majesty. The first and second rows of seats were, for the most part, filled with ladies. When his Majesty the King and the Royal Family entered the Royal box, the "People's Song" was called for, and sung with enthusiastic acclamation.

TESTIMONIAL PRESENTED TO THE REV. A. WILLIAMS.

SEVERAL members of the congregation of Berkeley Chapel, John-street, Berkeley-square, desirous of presenting their late minister with a parting testimonial of their respect, have had this excellent feeling embodied in an elegant group of plate, which has been designed and manufactured by Messrs. Williams and Co. (late Catchpole and Williams), 223, Oxford-street. The design is taken from Isaiah xi.—"The peaceable kingdom of the Branch out of the root of Jesse"—and represents Peace, a female figure; and Truth beneath a fig-tree, with the wolf and the lamb together at her feet ("The wolf also shall dwell with the lamb"). The tree supports a glass dish, and the group is altogether a handsome centre-piece of table plate. It bears the following inscription:—

Presented, along with £300, to the Rev. Alfred Williams, by many of the members of the congregation of the Berkeley Chapel, on the occasion of his leaving; as a token of their high esteem for him personally, and of their entire satisfaction at the manner in which he had discharged his duties during a period of upwards of twenty years.—London, November, 1854.

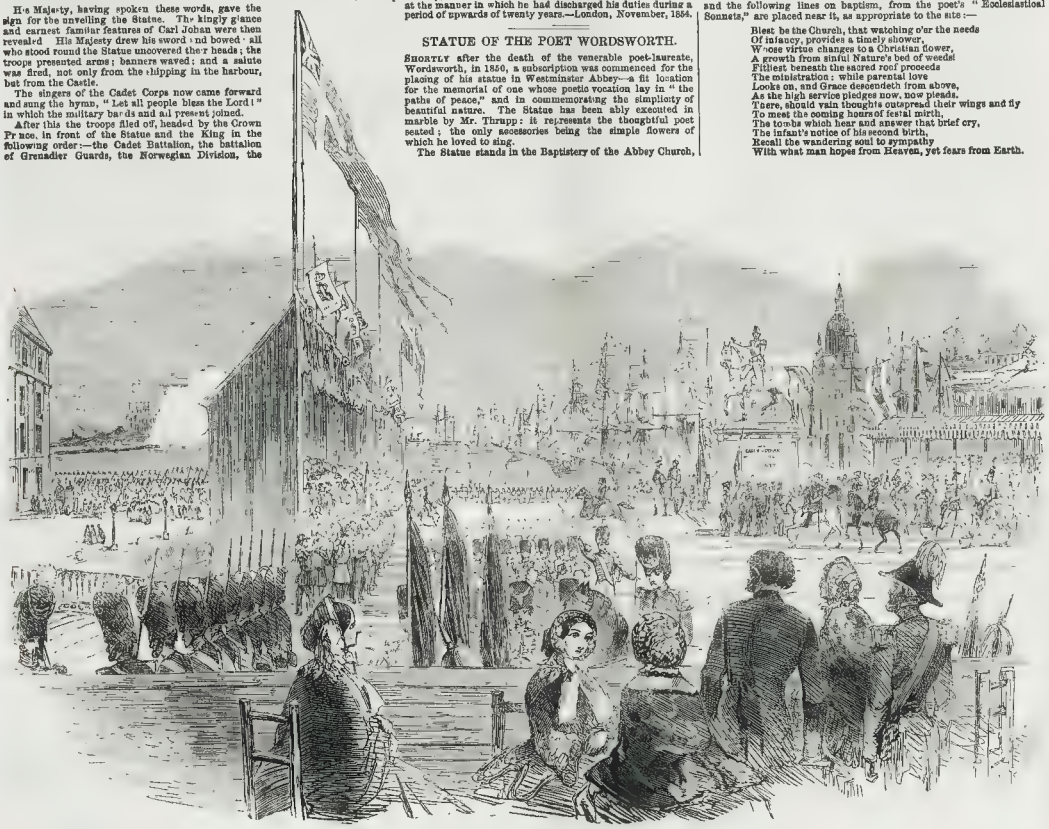
STATUE OF THE POET WORDSWORTH, JUST PLACED IN WESTMINSTER ABBEY.

STATUE OF THE POET WORDSWORTH.

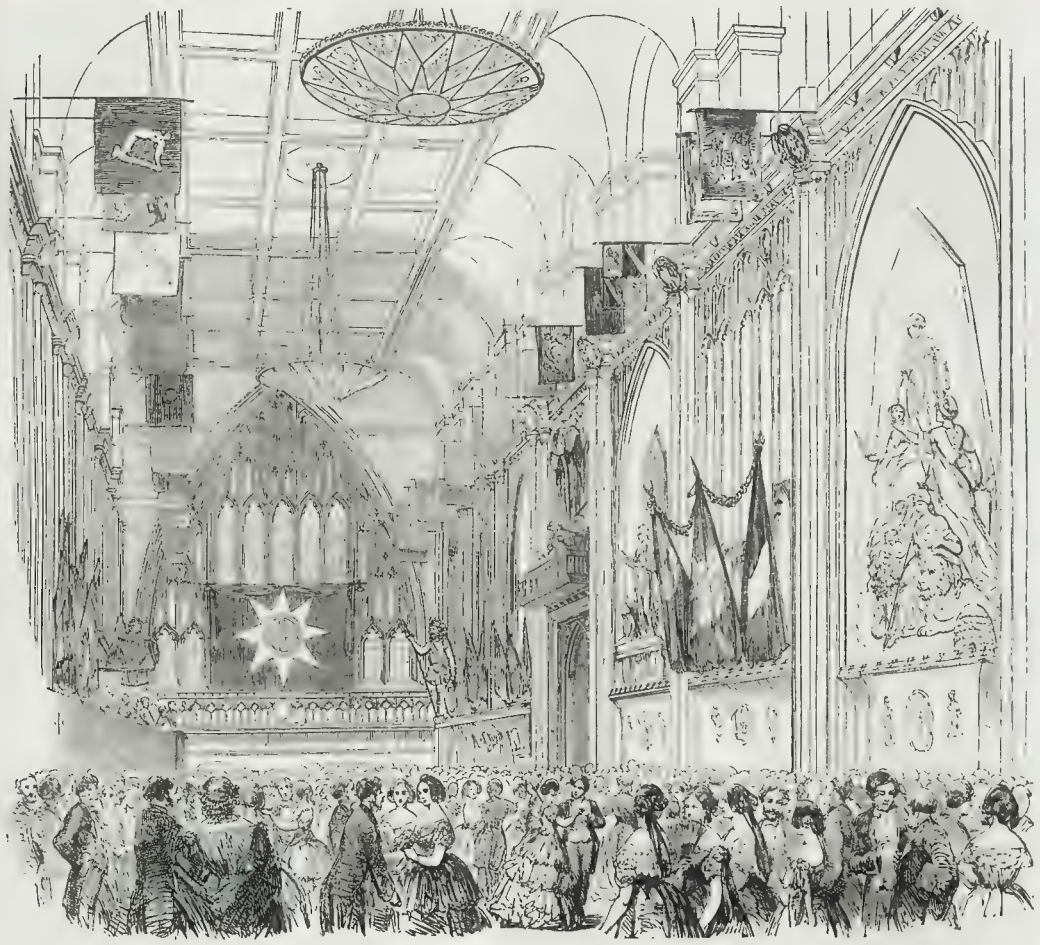
SHORTLY after the death of the venerable poet-laureate, Wordsworth, in 1850, a subscription was commenced for the placing of his statue in Westminster Abbey—a fit location for the memorial of one whose poetic vocation lay in "the paths of peace," and in commemorating the simplicity of beautiful nature. The Statue has been ably executed in marble by Mr. Thrupp: it represents the thoughtful poet seated; the only accessories being the simple flowers of which he loved to sing.

The Statue stands in the Baptistery of the Abbey Church, and the following lines on baptism, from the poet's "Ecclesiastical Sonnets," are placed near it, as appropriate to the site:—

Blest be the Church, that watching o'er the needs
Of infancy, provides a timely shower,
Whose virtue changes to a Christian flower,
A growth from sinful Nature's bed of weeds!
Fittest beneath the sacred roof proceeds
The ministration: while parental love
Looks on, and Grace descendeth from above,
As the high service pledges now, now pleads.
There, should vain thoughts outspread their wings and fly
To meet the coming hours of festal mirth,
The tombs which hear and answer that brief cry,
The infant's notice of his second birth,
Recall the wandering soul to sympathy
With what man hopes from Heaven, yet fears from Earth.



EQUESTRIAN STATUE OF CHARLES XIV. (BERNADOTTE) JUST INAUGURATED AT STOCKHOLM



BALL AT GUILDHALL, IN AID OF THE PATRIOTIC FUND.—(SEE NEXT PAGE.)

RESTORATION OF ST. NICHOLAS CHURCH, ISLIP, NORTHAMPTONSHIRE.

THIS Church, which has just been restored throughout, was re-opened for Divine service on All Saints Day (Nov. 1). The former condition of the Church was deplorable. It was disfigured, by high and inconvenient pews, of all sizes; and an ugly west gallery blocked up the tower arch. The roofs were found to be so dilapidated as to be unsafe. The Church has been reseated with low open seats of oak. The stone work to the arcades and windows has been repaired, and the walls re-plastered. The tower arch has been thrown open to the Church, and a new belfry floor constructed. A new carved oak pulpit has also been set up. The roofs of the nave, aisles, and the chancel, have been copied from the old examples, in oak from the Royal Forest of Whittlebury and farming woods in the county. A low carved screen divides the nave from the chancel, and on this screen is a brass lectern. The chancel seats are placed stall-wise, and seats are provided for the choir. The prayer-desk is placed within the chancel. At the back of the altar is a reredos, of Caen stone, formed by an enriched embattled cornice, terminated by carved angles, with scrolls, inscribed "Holy, Holy, Holy:" underneath are Minton's ornamental tiles. The brass standards for lighting the Church and the lectern are by Messrs. Hardman, of Birmingham. A stained glass window has been placed in the tower. It has been designed from old fragments found in one of the windows of the south aisle, and has been executed by Messrs. Powell, of Whitefriars.

In restoring the Church, it was designed to make a better provision for the accommodation of the parishioners, especially those of the poorer class, which has been effectually done.

The works have been carried out under the superintendence, and from the designs, of Mr. W. Slater, architect, of New Adelphi-chambers, London; and executed by Mr. Whiting, builder, of Northampton.

ISLIP CHURCH, NORTHAMPTONSHIRE, RESTORED.

DENSHANGER NEW CHURCH.

THIS picturesque Church has just been completed at Denshanger, in the parish of Passenham and diocese of Peterborough, and consecrated by the Lord Bishop with the accustomed ceremony.

The new Church is of Early English design. At the west end it has a large and unusual gable turret, carried on a recessed arch with massive buttress abutments, and containing three bells, two below, and one above. The plan consists of a nave, chancel, and one aisle, on the north, with an open timbered porch on the south side. The east window is a triple lancet, of excellent proportions. The general basis of the walls is of the stone found in the neighbourhood; and the dressings are of Bath stone.

The north aisle is separated from the nave by an arcade of four arches, with circular pillars. The interior arrangement consists entirely of open sittings; the floor is of red and black Staffordshire tiles, and there is a handsome font of stone to the north of the centre aisle, facing the south door. In the chancel, which rises by three steps, is a plain altar-rail, and an altar-table covered with rich Utrecht velvet. The vestry is to the north of the chancel: and under it is a crypt, for the bier, ladders, and other church furniture.

The design of the building is by Mr. Benjamin Ferrey; and the contractor is Mr. Hatley, of Stony Stratford. The plans and specifications were highly approved by the Architectural Society of the Archdeaconry of Northampton.

The amount of the original contract was £1777; and the money collected, including grants from the Incorporated and Diocesan Societies, nearly £2000; in addition to which there have been presents made of bells, altar-cloth, font, service-books, &c., amounting to £147. The purchase of land, law expenses, consecration fees, and extra charges, have caused the expenditure to exceed the receipts by upwards of £300. By the same liberality, however, which promoted the first undertaking, the payment of the deficiency has been guaranteed.

It may be right to mention that the mother church at Passenham, though carefully attended to, and kept in excellent repair—having been much adorned and beautified by the present Rector—is, nevertheless, too small for the accommodation of the parishioners, and too distant for convenience; affording only 200 seats, for a rapidly increasing population of more than 1000 souls, and situated between two and three miles from the hamlet of Denshanger, in which the bulk of the population resides. The new Church, therefore was much required.

Those by whom the good work was undertaken did not overlook the great duty of making proper provision for the poor, having regard to the Apostle's injunction—"My brethren, have not the faith of our Lord Jesus Christ, the Lord of Glory, with respect of persons." For this purpose a pledge has been given to the Incorporated Society for Building and Repairing Churches, that the main body of this Church shall be, and continue to be, free and unappropriated, for the benefit of the poor, for ever.

The collections, after the two sermons on the day of consecration amounted to £45 4s. 9½d.—of which the sum of £1 9s. 6½d. was in pence and farthings.

DENSHANGER CHURCH.

BALL AT THE GUILDHALL, IN AID OF THE PATRIOTIC FUND.

For several years past it has been the practice for the Corporation of London to allow their Guildhall, as decorated for the Mayoralty banquet, to be lent, at a hundred guineas appropriated to some fête, or to a charitable object. The aforesaid Fête have hitherto benefited by this commendable sympathy; which, however, has this year been devoted to a more pressing object—namely, the increase of the Patriotic Fund, for the relief of the widows, orphans, and dependents of those who may fall in the present mighty war with Russia. Accordingly a ball and concert were given at the Guildhall, the profits arising from which were to be paid over to the Patriotic Fund. The purpose was certainly a noble one; but, in arranging for the Festival, it was not expected that the details of the fiercest battle which has yet been fought in the Crimea would be received in London on the day of the Guildhall festivity. The end, however, appears to have sanctified the means; and the vast apartment was filled with company, who, doubtless, had come with the determination, in compliance with the Royal Commission, of "succouring, educing, and relieving those who, by the loss of their husbands and parents in battle, or by death in active service, in the present war, are unable to maintain or to support themselves."

The decorations of the Hall were nearly the same as upon the 9th Inst.; but were more appropriate to the occasion of Wednesday night than to that for which they were designed. In addition, there were placed in the Hall the two large transparencies of Varna and Sebastopol, which were placed in the Court of Aldermen. The view of Sebastopol shows the batteries served by sailors, and affords an excellent and accurate notion of the localities around this famous fortress. The view of Varna shows the bay, and the transports receiving the troops as they are embarking for the Crimea.

Two thousand persons were present; but the absence of the aristocracy was a noticeable fact, and one which must influence in their part to the cause of patriotism, but as showing the gloom which the arrival of Lord Raglan's despatch must have cast over great numbers of the higher classes now in London. This, however, will not explain the few of the line of seats at the east end of the Hall, which were occupied by the civic personages; although this special accommodation had been reserved for them. The Chairman of the Committee, Sir James Duke, assisted by an efficient staff of stewards—amongst whom Messrs. Cotterell and Salomons were conspicuous—was unceasing in his endeavours to accommodate the numerous company.

Jullien's quadrille band had been engaged, but neither the *maestro*, nor the principal members of his orchestra, were visible in the earlier part of the evening. M. Jullien arrived at about eleven o'clock, from which time everything went off in the most satisfactory manner. For such of the company as did not dance, the committee had arranged a select concert in the Council Chamber. The only attendee was a Mr. Herberte, and, as his place was taken by Miss Dolby, the audience bore the disappointment with commendable resignation. Madame Anna Thilon sang an English ballad with her usual grace and finish; Mr. and Madame Weiss sang a duet of Verdi's, and Giulio Regondi played a brilliant fantasia on the concertina. The other meritorious features in the concert were Mdlle. Christine's harp solo, and Miss Ransford's song, "Fortant pour la Syrie." Both ladies were loudly applauded. At the termination of the concert the audience poured into the ball-room, which soon became almost too crowded for the dancers: when M. Jullien struck up one of his most admired polkas, and the scene—what with the dancing, the crowding, the lights, the banners, and music—became very brilliant and exciting. Refreshments were provided in abundance, and the festivities were kept up to a late hour.

Our Artist has, upon the preceding page, pictured the Guildhall during the dance.

NATIONAL SPORTS.

Although the weather is remarkably fine and open, the coursing fixtures for the next week are not very thick on the ground. The Newcastle, Northumberland, and Durham, the Ancaster (Surrey), and the Tadcaster meetings are fixed for Tuesday, Wednesday, and Thursday; while Salop (one of the staunchest of our coursing counties) has a meeting at Whitchurch on Wednesday, and at Bashburn on Friday.

The boating season is quite at its fag-end, but there is a match still to be decided—from Iffley to Oxford, on Monday next, between two watermen, Bisson and Beesley: and some four-our races will take place among the University men, on the same afternoon. It is well that the heads of houses on the banks of the Isis have put down by during the past week pointed attention to the statutes which forbid undergraduates and B.A.'s to shoot at *volucres ferasve e cavels emissas*, thereby dealing a deadly blow at pigeon and rabbit-shooting, and, peradventure, rat-hunting. The future is so singularly barren this week that we must, perforce, turn to the past.

Hunting is, we hear, very good this season, and foxes, perhaps, more plentiful than they ever were; while the visitors at Taymouth Castle have been verying their deer-stalking by a little bison-shooting—a sport quite new to those northern regions.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS, TAKEN DURING THE WEEK ENDING THURSDAY, NOVEMBER 23.

Month and Day.	Corrected Reading of Barometer at 9 A.M.	Thermometer		Mean Temperature of the Day	Departure of Temperature from Average.	Degrees of Humidity.	Direction of Wind.	Rain in Inches.
		Highest.	Lowest.					
	Inches							Inches.
Nov. 17	29 393	46.8	33.8	41.2	— 1.2	93	N.W.E.	0.15
,, 18	29 676	43.2	33.1	41.0	— 1.4	76	N.E.	0.11
,, 19	29 972	43.2	34.5	38.7	— 3.6	83	N.N.E.	0.00

,, 23	29 047	37.3	30.4	33.4	— 8.3	95	S.W.	0.00

Note.—The sign — denotes below the average.

The reading of the barometer increased from 29 33 inches at the beginning of the week, to 30 116 inches by the 20th; decreased to 29.39 inches by the 22nd; and increased to 29.05 inches by the end of the week. The mean for the week, at the height of 81 feet above the level of the sea, was 29 554 inches.

The mean temperature of the week was 38°2°, being 3°8° below the average of the corresponding week during thirty-eight years. The effect of this cold weather is exhibited in the following article on the health of London.

The range of temperature during the week was 16°2°, being the difference between the highest reading of the thermometer on the 17th, and the lowest on the 22nd.

The mean daily range of temperature during the week was 8·8°.

Rain fell during the week to the depth of half an inch.

The weather, on the 18th and 19th, was fine, and the sky partially covered with cloud; the rest of the week was dull, and the sky overcast.

Lewisham, Novem er 24, 1854. JAMES GLAISHER.

HEALTH OF LONDON.—During the week ending last Saturday, the births of 1293 children were registered with the metropolitan districts, being 109 below the average of the nine corresponding weeks of the nine preceding years: of these, 668 were boys, and 625 were girls, being 48 and 60 below their respective averages. The number of deaths during the week was 1309: the average of the ten corresponding weeks of the ten preceding years, corrected for increase of population, is 1126; therefore the present returns shows a mortality considerably greater than usual, which is probably attributable to the increased cold lately experienced, the mean temperature of the last week being about 5° lower than the average. During October 13 deaths were caused by cholera.

DR. JACOB AND THE GOVERNORS OF CHRIST'S HOSPITAL.—According to the terms of a previous announcement, a meeting of the Governors of Christ's Hospi al was held on Tuesday, to take into consideration the present lately preached by the rev. the Head Master before the boys. As it is not the practice of the Governors to admi reporters to their meetings, we have no means of giving to our readers a detailed account of what transpired on the occasion; but the *Sun* that an amendment, moved by Mr. M'Geachy, to the effect, "That the thanks of the court be given to Dr. Jacob for his excellent and we l-timed sermon," was carried by a very large majority. The result of the day's proceedings, therefore, is in favour of Dr. Jacob, who is, consequently, triumphantly established in his office.

ROYAL POLYTECHNIC INSTITUTION.—The attractions here have just been increased by the addition of a new entertainment descriptive of the rise and progress of America, illustrated by a succession of dissolving views, besides a selection of national music by Tyrolese Minstrels, and a series of views of St. Petersburg, Moscow, &c.; together with the costumes of the inhabitants of Russia. The whole is very successful.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent).

Although the amount of the sales transacted in the Market for National Securities has not been extensive, prices have had an upward tendency, and there has been a better feeling generally amongst the jobbers than for some time past. The public having purchased rather more freely, and some trifling difficulties in the Exchange having been adjusted, the quantity of Stock in the Market has decreased. This change must, in some measure, be attributed to the rumours that the Emperor of Russia has shown a willingness to treat for peace, and to the steady increase in the Government balance in the Bank of England. The assertion lately made to the effect that the Commissioners for the Reduction of the National Debt were about to effect sales of Stock to the extent of £2,000,000 in order to take up that amount of Exchequer-bonds turns out to be unfounded. Already £1,000,000 of those bonds have been subscribed for, leaving only £400,000 to be dealt with.

There was a steady Market for Consols on Monday, and prices were higher. The Three per Cents Reduced marked 89⅞ to 90; the Three per Cent Consols, 91⅛ to 91⅜; Consols for Account, to the 5th, Five per Cents, 119; New Three per Cents, 90½ to 89⅝; Long Annuities, 4⅛; Exchequer-bills, 1s. to 6s. prem.; Exchequer-bonds, 99¾. Very little change took place in the quotations on Tuesday—Bank Stock, 210½ to 212¾; Three per Cents Reduced, 90½ to 89⅝, 90¾; Three per Cent Consols, 91⅜ to 91⅝; Ditto for Account, 91⅛ to 92½; New Three per Cents, 90½ to 89⅝; India Bonds, 10s. to 7s. prem.; Long Annuities, 4⅛; Exchequer-bills, 2s. to 5s. prem.; Ditto, Bonds 99⅝. On Wednesday prices were firm: Bank Stock, 210½ to 212. The Three per Cents Reduced were 89⅝ to 90⅜; the Three per Cent Consols, 91⅜ to 91⅝; Consols for Accounts, 92 to 91⅝; New Three per Cents, 90⅜ to 89⅝; Long Annuities, 4⅛ to 5-16; India Bonds, 11s. prem.; Exchequer-bills, 3s. to 6s. prem.; Exchequer-bonds, 99⅛. On Thursday the Market was steady. The Three per Cents were 91⅛ to 92 for Money, and 92 to 92⅛ for the Account. The New Three per Cents marked 90⅜ to 89⅝; and the Three per Cent Reduced, 90⅝ to 90⅜; Bank Stock, 210½ to 212; India Stock, 230; Exchequer Bills, 3s. to 6s. prem.

The Foreign House has been steady, and Turkish Scrip has realized 2½ discount. The Turkish Government has determined on the issue of the Egyptian tribute to the loan, has been deposited in the Bank of England. The stipulations contained in it are sufficient to assure the bondholders of a good return for their investment. Russian Bonds to the amount of £1,500,000, have been drawn for redemption; Brazilian Five per Cents have realized 97. Sardinian Five per Cents, 86½; Spanish Three per Cents, 38; Dutch Two-and-a-Half per Cents, 61; Five per Cents, 101; Four per Cents, 91½; Chilian, 102; Spanish New Deferred, 18½; Mexican Three per Cents, 21½; Russian Bonds, Five per Cent, 99¾; Russian Four-and-a-Half per Cents, 93; Dutch Four per Cents, 87½; Peruvian Four-and-a-Half per Cents, 66½; Ditto Three per Cents, 38.

Joint-Stock Bank Shares have been tolerably firm as to price, but the business doing has been limited. Australasian have realized 53. Chartered of Asia, 4½; English, Scottish, and Australian Chartered, 15½; Oriental, 38 ex div.; Union of Australia, 71. Miscellaneous Securities have continued dull:—Australian Agricultural, 27½; Crystal Palace, 2½; Peel River Land and Mineral, 2½; Peninsular and Oriental Steam, 61; South Australian, 11; Land, 36½; Steam Tug, 2½; Price's Patent Candle, 2½; Canal Shares dull:—Grand Junction, 154; Birmingham, 295; Kennet and Avon, 20; Derby, 80; Grand Junction, 58; Grand Surrey, 48; Leicester, 69; Loughborough, 375; Neath, 150; Oxford, 110; Peak Forest, 85; Regent's, 16½; Rochdale, 30; Stafford and Worcester, 69; Stourbridge, 285; Worcester and Birmingham, 25. Water-works Shares have realized:—East London, 32; Grand Junction, 90; Kent, 81; New River, 95; Southwark and Vauxhall, 85½; West Middlesex, 91. Ditto, New, 15. Gas-light and Coke Company's Shares have been dull:—British Provident, 21; City of London, 100; Equitable, 26; Great Central, 11½; Imperial, 91½; Ditto, New, 9⅞; London Patent, 2; Peterborough, 2; Ratcliff, 70; United General, 20; Westminster Chartered, 37⅞; Ditto, New, 6⅜. Insurance Shares have been sold as follows: Atlas, 18⅜; Argus Life, 18; City of London, 2½; County, 3; Eagle, 10½; Globe, 128; Guardian, 55; Imperial Fire, 320; Ditto Life, 18½; London, 2 ex div.; Marine, 2; Royal Exchange, 78; Victoria Life, 3⅞. Bridge Shares have been very dull. Hungerford, 12; Southwark, 9; Waterloo, 5; Ditto, Old Annuities of £8. 32; Ditto New of £7. 28½; Vauxhall, 22. Dock and West India Docks, 139; London, 106½.

Business in the Railway Share Market has been restricted; nevertheless, prices have ruled tolerably firm. The following are the official closing prices on Thursday

ORDINARY SHARES AND STOCKS.—Caledonian, 69½; East Anglian, 1⅛; Great Western, 70; Lancaster and Carlisle, thirds, 7 prem.; Lancashire and Yorkshire, 71. London and Blackwall, 8; London and Brighton, 105. London and North-Western, 98⅜; Ditto, Fifths 17; London and South-Western, 79⅜; Midland, 68; North British, 20; North-Eastern, York, 95; North Staffordshire, 14; Portsmouth, 8; South Eastern, 89½; South Wales, 89⅛; Vale of Neath, 17⅛.

LINES LEASED AT FIXED RENTALS.—Hull and Selby, 105; Midland Bradford, 94.

PREFERENCE SHARES.—Great Northern, Five per Cent, 109; Ditto, Four-and-a-Half per Cent, 100; Great Western, Four-and-a-Half per Cent, 94; Ditto, Preferential, 7 per Cent, 107; Worcester and Wolverhampton, 111.

FOREIGN RAILWAYS.—Eastern Junction, 1⅛; Eastern of France, 8⅜; Grand Trunk of Canada, 17; Ditto, Six per Cent, 91½; Great Luxembourg, Shares, 4; Six per Cent Obligations, 52; Great Western of Canada Shares, 17⅛; Namur and Liege, 7; Northern of France, 33½; Paris and Lyons, 32⅜.

Friday Evening.

In the early part of the day the Consol Market was heavy, and the Three per Cents were done at 91⅜. Subsequently, however, it improved; and the Three per Cents closed at 91⅝. The Three per Cent Reduced marked 89⅝ to 90⅜; the New Three per Cents, 89⅝ 90⅛; Bank Stock, 210 to 209½; India Bonds 7s. to 12s.; Exchequer Bills, 4s. to 7s. prem.; Exchequer Bonds 99⅛. Foreign Bonds and Railway Shares have been steady. Turkish Scrip, 2½ discount.

THE MARKETS.

CORN EXCHANGE, (Friday).—The supplies of English wheat received up to our market this week, coastwise and by land carriage have been very moderate. Fresh up to day there was small, hence the value of samples was limited. For most kinds we had a steadier legal, yet prices ab tr qu l to those obtained on Monday. Foreign wheat—the quantity which has been part of the week on increase—moved off slowly, but we have no change to notice in the quotations. Floating cargoes were held firmly, and, on the spot, the demand for barley, which sold slowly, at late rates. The malt trade was rather dull at Monday's currency. The supply of oats being large, the out trade was dull, at barely sustained prices. Beans, peas, and flour were unaltered.

ARRIVALS OF CORN BY WATER.—Barley, 3300; malt, 1510; flour, 1510. Irish oats, 4030. Foreign—wheat, 5400; oats, 6290; flour, 240 sacks.

English—Wheat, Essex and Kent, 39s. to 42s.; ditto, white, 40s. to 43s.; Norfolk and Suffolk, 37s. to 42s.; ditto, white, 40s. to 44s.; Lincolnshire and Yorkshire, 37s. to 42s.; barley, 31s. to 34s.; distilling ditto, 35s. to 37s.; malting ditto, 38s. to 40s.; malt, pale, 70s. to 76s.; brown, 68s. to 70s.; beans, old, 37s. to 39s.; new, 34s. to 36s.; harvest ditto, 36s. to 38s.; tick beans, 37s. to 39s.; grey peas, 37s. to 39s.; maple, 38s. to 40s.; white boilers, 40s. to 42s.; Essex and Suffolk oats, 23s. to 25s.; Yorkshire and Lincolnshire ditto, 22s. to 24s.; Scotch ditto, 23s. to 25s.; potato ditto, 24s. to 26s.; Irish ditto, 23s. to 25s.; rye, 32s. to 34s.; grey peas, 32s. to 40s.; maple, 41s. to 43s.; white boilers, 42s. to 44s.; Egyptian wheat, 36s. to 38s.; Spanish ditto, 40s. to 42s.; Marianopoli, 42s. to 44s.; Taganrog, 40s. to 42s.; Polish Odessa, 40s. to 42s.; Danubian, 38s. to 40s.; Marianopoli barley, 34s. to 36s.; Danish and Pomeranian oats, 22s. to 24s.; Brabant, 23s. to 25s.; Dutch, 22s. to 24s.; Egyptian beans, 32s. to 34s.; Lisbon, 36s. to 38s.; Egyptian peas, 34s. to 36s.

Seeds—Linseed and cakes are very firm and rather dearer. Clover seed is held for more money. In other articles very little is doing.

Linseed, English, per last of 10 qrs., Baltic, crushing, 58s. to 60s.; Mediterranean and Odessa, 56s. to 58s.; hempseed, 44s. to 46s. per quarter. Coriander, 20s. to 24s. per cwt. Brown mustard seed 8s. to 10s.; white ditto, 9s. to 11s. per bushel. Tares, English, per quarter, 40s. to 42s. Foreign, repacked, 36s. to 38s. per last of ten quarters. Linseed cakes, English, £11 to £11 10s.; ditto, foreign, £10 10s. to £10 15s. per ton. Rapecakes, 6s. 6d. to 6s. 9d. per cwt. Canary, 20s. to 60s. per quarter.

Spices.—The transactions have been confined to immediate wants, on rather easier terms. Pepper, 8½d. to 9d.; Cochin, 9½d. to 9¾d.; Singapore, 9d. to 9¼d.

Provisions.—The transactions in butter this week has been limited, yet prices are very firm. [illegible] Irish and Scotch very full prices. The bacon trade is very dull, at 2s. to 3s. per cwt. less money. Hams and lard command very full prices. In other descriptions of provisions no material change has occurred.

Coals (Friday).—Hetton's, 20s. 3d.; Davison's West Hartley, 20s. 3d.; Tanfield Moor, 20s. 3d.; Wylam, 19s. 9d.; Kelloe, 19s. per ton.

Hops (Friday).—This week's imports of foreign hops amount to 49 bales from Dunkirk, 34 from Rotterdam, 187 from Belgium, and 1 from Hamburgh. The duty paid is 1,000 cwt. Fine English hops are scarce, and quote as dear as last week. Low qualities are a slow sale. Mid and fine sorts produce, 74s. to 110s.; ditto, in the Wealds of Kent, 110s. to 210s.; Sussex, 74s. to 110s.

Smithfield (Friday).—To-day's market was but moderately supplied with beasts. Although the demand for all breeds was in a languish state, Monday's prices were supported. Sheep—the supply of which was rather extensive—went off slowly at full quotations. We have scarcely supplied with calves, yet the veal trade was very inactive, at full qy sta tionary prices. In pigs a fair amount of business was transacted, at full currencies. Milch cows met a dull inquiry, at from £14 to £19 each, in middling condition.

Per 8 lbs. to the offals:—Coarse and inferior beasts, 3s. 6d. to 3s. 8d.; second quality ditto, 3s. 10d. to 4s. 2d.; prime large oxen, 4s. 4d. to 4s. 6d.; prime Scots, 4s. 6d.; and extra, 4s. 10d. to 5s. 1d.; coarse and inferior sheep, 3s. 6d. to 3s. 10d.; second quality ditto, 4s. 0d. to 4s. 2d.; prime coarse-woolled sheep, 4s. 4d. to 4s. 6d.; prime Southdown ditto, 4s. 10d. to 5s. 0d.; large coarse calves, 4s. 2d. to 4s. 6d.; prime small ditto, 4s. 8d. to 5s. 4d.; large hogs, 3s. 4d. to 3s. 6d.; neat small porkers, 4s. 0d. to 4s. 2d.; middling calves, 3s. to 3s. 4d.; and quarter-old store pigs, 21s. to 28s. each. Total imports of beasts, 900; cows, 125; sheep, 3430; calves, 320; pigs, 250. Foreign—beasts, 320; sheep, 600; calves, 2 0.

Newcastle and Leadenhall (Friday).—The demand for each kind of meat was steady at full prices.

Per 8 lbs. by the carcase.—Inferior beef, 3s. 6d. to 3s. 8d.; middling ditto, 3s. 8d. to 3s. 10d.; prime large ditto, 4s. 0d. to 4s. 2d.; prime small ditto, 4s. 4d. to 4s. 6d.; large pork, 3s. 4d. to 3s.; inferior mutton, 3s. 4d. to 3s. 8d.; middling ditto, 3s. 10d. to 4s. 4d.; prime ditto, 4s. 6d. to 4s. 8d.; veal, 4s. 0d. to 4s. 8d.; small pork, 4s. 4d. to 4s. 8d.

THE LONDON GAZETTE.

TUESDAY, NOVEMBER 21.

ADMIRALTY, Nov. 17.

Royal Marines: Sec.-Lieut. A. W. Sharp to be First Lieutenant

Nov. 20.—Royal Marines: Lieut.-Cols. T. Primrose and J. Buchanan to full pay retirement, with the rank of Colonel; Brev.-Major T. Holloway to be Lieutenant-Colonel; Brev.-Major J. G. D. Courtis to be Lieutenant-Colonel, First Lieut. H. J. Tribe to be Capt. sine; First Lieut. and Quartermaster J. W. C. Williams to be Captain; Sec. Lieut. R. A. F. Scudders to be First Lieutenant; Sec. Lieut. H. B. Savage to be First Lieutenant

BANKRUPTS.

W. WESTON, Chewsell-street, Finsbury, boot and shoe agent.—P. CARSON, St. Helen's-place, Bishopsgate-street, City merchant.—H. W. PEARCE, Bayham-terrace, Camden-town, builder.—H. The principal characters by Mrs. [illegible] Mr. [illegible] Mr. [illegible] Mr

LIEUT.-GENERAL SIR JOHN FOX BURGOYNE, G.C.B., FROM A DAGUERREOTYPE BY VICTOR PLUMIER.

GENERAL CANROBERT, COMMANDER-IN-CHIEF OF THE FRENCH FORCES IN THE CRIMEA.—(SEE PAGE 533.)

LIEUT.-GENERAL SIR JOHN FOX BURGOYNE, G.C.B.

THIS distinguished officer entered the corps of Royal Engineers, as Second Lieutenant, in the year 1798. His active military career commenced at the blockade of Malta and surrender of Valetta in 1800. In 1806 he served with the army in Sicily; in the following year he proceeded to Egypt, and was present at the capture of Alexandria and the attack on Rosetta. Shortly afterwards he accompanied the expedition from Sicily under Sir John Moore, destined for Portugal, and returned with it to England. He afterwards accompanied Sir John Moore's army to Sweden and again to Portugal, and subsequently in the retreat to Corunna. In 1809 he joined the army in the Peninsula, under Sir Arthur Wellesley, and remained with it till the conclusion of the war in 1814—being present at all the sieges, and most of the general actions. He conducted, as Commanding Royal Engineer, the Sieges of Burgos; at St. Sebastian, the conduct of the siege likewise devolved upon him, after the death of Sir R. Fletcher, who was killed in the trenches. Sir John was twice wounded; and has received the gold cross and one clasp for Badajos, Salamanca, Vittoria, St. Sebastian, and Nive; the silver war medal with three clasps for Busaco, Ciudad Rodrigo, and Nivelle; and, at the recommendation of the Duke of Wellington, the Portuguese Order of the Tower and Sword was conferred upon him.

In 1814, Colonel Burgoyne accompanied the expedition to New Orleans as Commanding Engineer; and was present at the attack on that town, and capture of Fort Bowyer.

Throughout the Peninsular campaigns Sir John had been attached to the Third, or Fighting Division, at the express demand of Sir Thomas Picton. In 1815, when the army embarked for Flanders, that gallant officer again applied for Colonel Burgoyne's services. Unfortunately, the Master-General of the Ordnance was forced, by military etiquette, to refuse the application; the command of the Engineer department having been previously bestowed upon the late Sir Carmichael Smith, a junior officer to Colonel Burgoyne, and who would, consequently, have been superseded in the command. He, however, joined the army of occupation in Paris in July, and remained with it until its return to England.

In 1826 Colonel Burgoyne accompanied the army to Portugal, under Sir W. Clinton, as Commanding Engineer; he returned with it to England; and, on his attaining the rank of Major-General, in 1837, he received the order of Knight-Commander of the Bath.

But eminent as this officer is in his military capacity, his civil services have been no less distinguished. For fifteen years he held the appointment of Chairman of the Board of Public Works in Ireland; thus associating his name with those great engineering operations, which have tended so much to ameliorate the condition of that country. In this responsible position he remained until 1845, when he was recalled to his military duties, being appointed to the important post of Inspector General of Fortifications, which he still occupies. This office, which has brought Sir John into constant and confidential communication with the Ministers of the Crown, enabled him to place vividly before them the defenceless state of the country; his representations on this subject drew from the Duke of Wellington his celebrated letter, which first roused the attention of the public to a fact, which up to that time had been ineffectually urged upon the attention of successive Administrations.

At the time of the famine in Ireland in 1847, Sir John Burgoyne was selected, by Lord John Russell, as the person best fitted to organise and conduct the commission for the relief of the suffering population of that island—a task for which his intimate acquaintance with the country, general popularity, and acquirements eminently qualified him.

The Brevet of 1851 made Sir John a Lieutenant-General; and shortly

SORTIE OF THE RUSSIANS FROM SEBASTOPOL.—GENERAL SIR DE LACY EVANS AND STAFF, OCTOBER 26.

EUPATORIA.—(CUSTOM-HOUSE) QUARTERS OF CAPTAIN PAYNE'S DETACHMENT OF MARINES.

EUPATORIA. RESIDENCE OF CAPTAIN BROCK.

afterwards the highest military decoration, the Grand Cross of the Order of the Bath, was conferred upon him.

In February last, when it became evident that war was imminent, Sir John was sent by the Government to report upon the best means of defending Constantinople; the English and French Governments not having, at that time, decided upon sending to Turkey a sufficiently large force to undertake more active operations. His journey to Schumla, interview with Omer Pacha, &c. must still be fresh in the memories of our readers. He returned to England again in April; but shortly afterwards, when the expedition to Sebastopol was decided upon, Sir John was appointed Lieutenant-General on the Staff of the army in Turkey. It being considered that his great military talents and experience would prove of essential aid in those important operations of which the Crimea is at present the theatre; and, as a proof of the beneficial nature of his counsels, we may mention the march to Balaclava, which, it is generally understood, was first suggested by Sir John, and of which the Commanders of the Allied armies, with that excellent judgment which has always characterised them, immediately perceived the advantage, and carried most successfully into execution.

EUPATORIA.

(From a Correspondent.)

The public attention being directed to the more important events taking place at Sebastopol, a very small portion will, in all probability be diverted to the now insignificant place, Eupatoria. But the place will always possess a historical interest, as being the first port in the Crimea the invading force made. It was also supposed it would be the spot on which it would commence operations. As a place from whence supplies could be readily obtained, it was desirable that we should take possession of it; and, after the disembarkation of the troops in Kalamita Bay, a force consisting of 400 Royal Marines, 200 French, and 100 Turkish, was dispatched on the 13th September for the above purpose. No resistance was offered; but, under the direction of Captain Brock, R.N., an attempt was made to put the place in some state of defence against a surprise. This was the more necessary, as large parties of horse were said to be scouring the country, driving off the cattle.

After assisting at the disembarkation of the troops, re-shipping stores at Kalamita Bay, aiding in the removal of the sick and wounded at Alma, and proceeding with the fleet to the river Katscha, the *Leander* was ordered to Eupatoria for its protection. Here I found the *Jena* (French) and two Turkish line-of-battle ships.

The accompanying Sketches are representations of the principal points of occupation of the forces and places of interest: all of them, with the exception of the Jews' Synagogue, situated on the strand. The head quarters of the Marines were established in the Quarantine buildings and grounds, not seen in any of the accompanying sketches. The residence of Captain Brock was that of a private individual, and is the best in the place. Captain Payne's quarters appears to be the Custom-house. That occupied by the French is some public building, but to what purpose devoted I have not been able to ascertain.

The Promenade was, no doubt, a place much resorted to by the fashionables of Eupatoria in its palmy days. It is small in extent, and apparently but recently planted with trees. The Church is distant but a few yards, and offers nothing worthy of notice. A few gaudy pictures of no merit are to be seen, of which the frames that contain them are of the most value.

The Jews' Synagogue and Schools possess some degree of interest. Unpretending as the Synagogue appears, its interior indicates that the Jews must be comparatively wealthy body here. Within the porch is a paved passage, on one side planted with trees, leading to a tolerably large square, paved with marble, in the centre of which is a large monument of grey marble erected to the memory of the Emperor Alexander. Its height is about twenty feet, and it is surmounted by a gilt Russian eagle. The Jews pointed with some degree of pride to the fact of the monument being composed of three blocks only.

EUPATORIA.—JEWS' SYNAGOGUE AND SCHOOLS

The monument is square in form, and on two of its sides are inscriptions—one in the Russian language, the other in Hebrew. On the left side of this square is a Synagogue (the principal one), on the right a smaller one. Proceeding from this square you enter a large quadrangle paved with marble. The walls were covered with inscriptions in the Hebrew language, which I understood to be memorials of their worthies. Amongst them, surmounted by the Russian eagle, was a monument to Catherine. By the side of this quadrangle was a small garden, in the centre of which was an alcove, with seats. Here, no doubt, they assemble before and after service, to enjoy the cool shade afforded by the vines which are trained over it. There was a sort of conservatory and a shady walk which ran round two sides of the garden.

The larger Synagogue is of respectable dimensions, and the chief place highly gilded. They took great pride in showing us a very beautiful manuscript on vellum of the Old Testament Scriptures, and explained to us that it was of great antiquity. It certainly was worthy their pride, and merited all the care they took in preserving it. They showed us various copies of the Hebrew Scriptures, printed in London. The smaller Synagogue is of less pretensions, but a very neat and interesting building. In both there was a screened gallery for females. Joining this building were the schools.

Some days since, a large detachment of seamen and marines were sent on shore from the *Leander*. Her field-piece was also landed. The *Jena* and Turkish ships likewise landed large bodies of men, in expectation of an attack.

The place was further strengthened by the arrival of the *Firebrand* and *Arrow* and a detachment of 500 Turkish marines. The *Firebrand* landed four howitzers and a rocket party. Several rocket guns, in charge of Lieutenant Hood, of the *Arethusa*, have been planted on our outworks, and the works now assume a respectable appearance.

The latest intelligence from the Crimea speaks of various assaults having been made by the Russians in the neighbourhood of Eupatoria, who are said to be from 3000 to 4000 strong, and who have killed and wounded several of our Tartar allies: a deep ditch, with a strong breastwork, has been cut across the level ground, in front of the northern and southern entrances, and guns have been planted in advantageous positions. At the back of the town several strong redoubts have been erected and armed with field-pieces and rockets, and a large proportion of the force has been stationed in the immediate neighbourhood. The streets which debouch upon the steppe have been closed by strong barricades; and the general feeling of the garrison is, that they can now bid defiance to any number of cavalry who may venture an attempt to force an entrance.

TARTAR GUERILLAS IN THE CRIMEA.

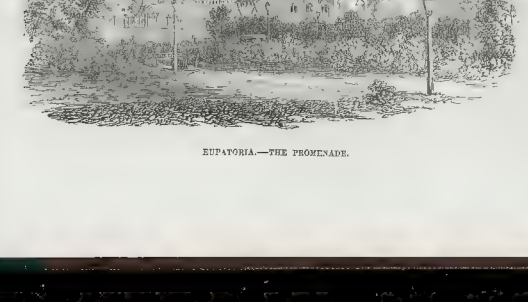
One important feature in the Crimean campaign, mentioned by the *Cologne Gazette*, which has not been much adverted to by any of the correspondents of the French and English newspapers, is the strong sympathy which continues to be manifested in favour of the Allies, by the Tartar population. According to the latest accounts in the Cologne paper, the Tartars of the Crimea have formed guerilla bands which harass the Russians very much by cutting off their supplies of ammunition and provisions.

The *Kreuz Zeitung*, which seldom gives any news unfavourable to the Russians, gave a statement on the subject, with the accompanying comment—"Mere idiotcy." The statement is, however, perfectly correct. An Austrian officer in the Crimea, unattached to any service there, has forwarded news to this effect to Vienna, and mentions in addition, that military law is being administered there with such severity and effect, that an incredible number of Tartars had been already put to death, having been captured whilst engaged in these parties.

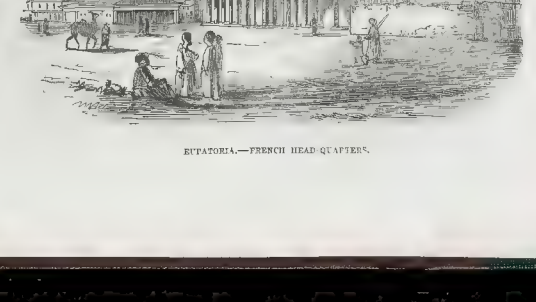
In corroboration of this opinion a long official report has been quoted from the *Invalide Russe*, accompanied by an address from the Sheiks of the Tartar population to General Pestel, governor of the Tauride, in which they profess unalterable devotion to the Emperor, and deplore that some Tartars should have been guilty of treason and rebellion by aiding and abetting the Allies at Eupatoria. They further declare that these faithless rebels are worthy of and shall meet with punishment, the same being a breach of Mahomedan laws (?). The Sheiks who sign their names are the Mufti Seid Dedhli, president; Emir Seid Khalil, Cadi of the Tauride; and Seid-Abdul-Effendi, cadi of Simferopol. Then comes a petition from the delegates of the Nogbaian Tartars, dated October 16, wherein they declare their devotion to the ruler of all the Russias, and beg, in proof thereof, to supply the armies with cattle, horses, and waggons, to a considerable amount. The Emperor, having perused these documents, has been pleased to express his satisfaction to the Mufti and his colleagues, and to accept the offers made by the Nogbaian Tartars for the use of the army. As the delegates and the administrators are nominated by the Emperor, it may be said that the Russian Government has had certificates of popularity sent to it by its own functionaries.

THE SORTIE OF THE 26TH OF OCTOBER.

The Russian prisoners relate that General Luders, thinking he had gained a victory in the battle of the 25th, sent a grandiloquent account of the affair to Sebastopol. Thereupon bells were rung, and "Te Deums" sung in all the churches; the Generals had double and triple rations of brandy given to the troops; they made speeches; they said, "You are mistaken if you think you are fighting against the English whom you saw at Alma. The troops before you are merely Turks. Our brethren attacked them yesterday in the plain of Balaclava. They beat them all, killed large numbers, and plundered the dead. If you try you can do as well as your brethren did yesterday, for the Turks are now discouraged. You can see they are Turks, for they wear grey coats; whereas, British soldiers, as you well know, have red coats." And what with the general joy, and the brandy, and the speeches when a call for volunteers was made, whole battalions volunteered, and ran to kill the Turks and be sharers in the spoil. The poor fellows walked up bravely, never once expecting that our red-coated soldiers have great coats of dark grey to keep out the keen winds of the Crimean mountains. They went rejoicing, and came back sorrowful.



EUPATORIA.—THE PROMENADE.



EUPATORIA.—FRENCH HEAD QUARTERS.

DESPATCHES FROM LORD RAGLAN.

(From a *London Gazette Extraordinary*.)

WAR DEPARTMENT, Nov. 17.

His Grace the Duke of Newcastle has this day received three despatches and enclosures, of which the following are copies, addressed to his Grace by General the Lord Raglan, G.C.B.:—

Before Sebastopol, Oct. 21.

My Lord Duke,—Adverting to that part of your Grace's despatch of the 10th instant, in which it is stated that her Majesty will be most anxious to receive such further accounts from me as may tend to relieve the affectionate anxiety of the friends of the wounded, I have the honour to acquaint your Grace that the Inspector General of Hospitals has reported, from personal observation, that the majority of the wounded are making satisfactory progress, although there is too much reason to apprehend that, among such a number of severe and dangerous injuries, a certain proportion of casualties must occur.—I have, &c.,

His Grace the Duke of Newcastle, &c. RAGLAN.

Before Sebastopol, Oct. 31, 1854.

My Lord Duke,—When I wrote to your Grace on the 28th inst., I was not in possession of the names of the officers of the Cavalry Division who had distinguished themselves in the action of the 25th.

I have now the honour to inclose a letter from Lieut.-General the Earl of Lucan, containing the list of those whose services entitle them to be specially mentioned, and I beg leave to recommend them to your Grace's notice. In the despatch to which I above refer, I had the honour to draw your Grace's attention to the conduct of Major-General the Earl of Cardigan and the Hon. Brigadier-General Scarlett.

I omitted in my despatch of the 28th September to state that when, in the battle of the Alma, Lieutenant Colonel Weiber Smith, was obliged, in consequence of a severe wound, to leave the field, Major Champion assumed the charge of the 95th, which your Grace will recollect was one of the regiments that suffered the most, and he gained great credit by the way in which he conducted the command. I am glad of the opportunity to repair this omission.

I stated to your Grace, on the 28th inst., that Major Dalton, of the 49th, had been killed in the trenches; this was an error; the officer whose loss the service has to deplore is Major Powell, of the same regiment. I deeply regret that this mistake should have occurred.

I have, &c., RAGLAN.

His Grace the Duke of Newcastle, &c.

(Enclosure.)

Before Sebastopol, October 30, 1854.

Sir,—In reference to my report of the action before Balaclava, on the 25th instant, I have now the honour to submit the names of officers who, on that occasion, well entitled themselves to the notice of the Commander of the Forces, and for whom I seek his Excellency's kind protection:—Major-General the Earl of Cardigan, Commanding Light Cavalry Brigade; Brigadier-General Scarlett, Commanding Heavy Brigade; Colonel Lord George Paget, Commanding 4th Light Dragoons; Lieutenant-Colonel Shewell, Commanding 5th Hussars; Lieutenant-Colonel Fodge, Commanding 4th Dragoon Guards; Lieutenant-Colonel Griffiths, Commanding 2nd Scots Greys; Lieutenant Colonel Yea, Commanding Royal Dragoons; Lieutenant-Colonel White, Commanding 6th Enniskilling Dragoons; Lieutenant-Colonel Douglas, Commanding 11th Hussars; Captain Jeunys, Commanding 13th Light Dragoons, Captain Morris, Commanding 17th Lancers; Captain Barton, Commanding 5th Dragoon Guards; Captain Maude, Royal Horse Artillery; Colonel Lord William Paulet, Assistant Adjutant-General Cavalry Division; Lieutenant-Colonel Mayow, Brigade Major, Light Cavalry Brigade; Major M'Mahon, Assistant Quartermaster-General, Cavalry Division; Captain Conolly, Brigade Major, Heavy Brigade; Captain B Walker, 7th Dragoon Guards, my 1st Aide de-Camp; Captain Fellowes, 12th Lancers, Deputy-Assistant Quartermaster-General, Cavalry Division.—I have, &c., (Signed) LUCAN.

Lieutenant-General Commanding Cavalry Division.

The Military Secretary, &c

Before Sebastopol, Nov. 3, 1854.

My Lord Duke,—Since I wrote to your Grace on the 28th ultimo, the enemy have considerably increased their force in the valley of the Tchernaya, both in artillery, cavalry, and infantry; and have extended to their left, not only occupying the village of Camara, but the heights beyond it, and pushing their pickets and vedettes towards the entrance of Baidar; and these yesterday fired a few shots, apparently to try the range, which fell somewhat short.

These movements have induced me to place as strong a force as I can dispose of on the left of the ridge in that direction, in order to prevent any attempt to get round to Balaclava by the sea; and the whole line is strengthened by a breastwork, which has been thrown up by the Highland Brigade, the Royal Marines and the Turkish troops, thus circumscribing that part of the position which immediately front on the ravine leading into the town a strong redoubt is in course of being completed which is to be garrisoned by the 93rd Regiment, and armed with several guns; and on high ground behind, and to the left, is a battery manned by seamen, which terminates the position to be defended by the troops under the command of Major-General Sir Colin Campbell.

Further to the left, and in a more elevated position, is the Brigade of the First French Division, commanded by General Vinois, ready to move to the assistance of any of the 3rd its force that may be assailed, and maintaining the connection between the troops in the valley and those on the ridge on which the main armies are posted.

The harbour of Balaclava is under the charge of Captain Dacres, of the *Sanspareil*; and Rear-Admiral Sir Edmund Lyons is in the roadstead, outside, and is in daily communication with me.

Thus every possible step has been taken to secure this important post; but I will not conceal from your Grace that I should be more satisfied if I could have occupied the position in considerably greater strength.

With reference to the operations of the combined armies engaged in the attack on Sebastopol, I have the honour to state that there is no material change in the enemy's fire; and yesterday morning, two hours before daylight, the cannonade from all parts of the south front was heavy in the extreme, both on the French and British lines; and it continued, I deeply regret to say, some loss, but less than might have been expected under the circumstances.

In the meanwhile the French, who have before them the town and real body of the place, have taken advantage of the more favourable ground, and are carrying on approaches systematically, on the most salient and commanding part of the enemy's lines; and they have constructed and opened batteries, the precision of the fire from which has most materially damaged the Russian works, although as yet they have not succeeded in silencing their guns.

The weather is still fine; but it has become extremely cold, and there was a severe frost last night.

I beg to submit to your Grace the nominal returns of casualties among the non-commissioned officers and rank and file from the 22nd October to the 1st November, both days inclusive; and the list of officers killed and wounded between the 27th October and 1st November.

Captain Maude, of the Horse Artillery, an excellent officer, is, I am sorry to say, severely wounded.

I likewise enclose the naval return and casualties.

I have, &c., RAGLAN.

His Grace the Duke of Newcastle, &c.

RETURN OF CASUALTIES AMONGST OFFICERS FROM 27TH OCTOBER TO 1ST NOVEMBER, BOTH DAYS INCLUSIVE.

Royal Artillery—Captain G. A. Maude, wounded (since dead).—Killed in the return from 63rd Regiment—Major C. T. Powell, killed, 28th October

J. B. BUCKNALL ESTCOURT, Adjutant-General.

RETURN OF CASUALTIES FROM 27TH OCTOBER TO 1ST NOVEMBER, 1854, BOTH DAYS INCLUSIVE.

	Killed.	Wounded.
Artillery—1 officer (Captain G. A. Maude), 1 sergeant, 5 rank and file, wounded.		
Sappers and Miners—1 rank and file wounded.		
Coldstream Guards—1 rank and file wounded.		
7th Reg iment—1 rank and file wounded		
19th Regiment—1 rank and file wounded.		
[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]

Fermidable, and the *St. Vincent*, and obtained his commission 7th Feb, 1846.

HALKETT (Major J. T. D.), of the 4th Light Dragoons, nephew of Sir Colin Halkett, Governor of Chelsea Hospital, and son of General Hugh Halkett, of the Hanoverian service, was killed on the Light Cavalry charge on the 25th. His ancestors have been, time out of mind, in the military service of their own country or that of some allied Power: for instance, Sir John Halkett, who received the honour of Knighthood from King James VI., rose to the rank of General, and had the command of a Scots regiment in the service of the States of Holland; and his grandson, Major Edward Halkett, was killed at the battle of Ramillies.

HOOD. Colonel the Hon Francis Grevenor), commanding the 3rd Battalion of the Grenadier Guards was killed on the 18th October, in the trenches before Sebastopol "This deeply-lamented officer," as he is described in Lord Raglan's despatch belonged to a race pre-eminently distinguished in the war annals of our country His father, the Hon Francis Wheler Hood, was slain at the battle of Acre, in Brave, 3rd March 1811, while acting in the execution of his duties as Assistant Adjutant-General to the forces, under the command of the Duke of Wellington His great-grandfather, Admiral Sir Samuel Hood, K.B., was created by the Prince Regent, for his victory he ne, cted in 1782 over the French fleet, under the Comte de Grasse, and his great grand uncle, Admiral Sir Alexander Hood, obtained the Sovereign's Badge for having, as second in command, contributed to the memorable victory of the 1st June 1794. Colonel Hood after the battle of the Alma, received the special thanks of Lord Raglan and the Duke of Cambridge for the gallant and heroic manner in which he brought up the Grenadier Guards to support the movement against portant to the decisive and defeat of the enemy He deeply-deplored officer was born 4th March, 1809, and married 8th Nov., 1842, Elizabeth Jane, second daughter of Admiral Sir Graham Eden Hood, Bart., G.C.B.

MADAN (CHARLES) Midshipman H.M.S. *Sanspareil* was killed in action at Sebastopol, October 17th. He had not completed his nineteenth year. He was third surviving son of the late Rev Spencer Madan, M.A., Canon Residentiary of Lichfield; and grandson of Dr. Spencer Madan, Bishop of Peterborough, and one of the executors of the late General Vyse, Colonel of the 3rd Dragoon Guards.

OLDHAM (Capt. J. A.), of the 13th Light Dragoons, fell on the 26th.

POWELL (Major), of the 49th, a most active and intelligent officer, was killed in the trenches on the 29th of October.

POWLES (Albert Evelyn), Esq., Captain Grenadier Guards, was killed, 18th October, in front of the trenches. He was the younger son of the Rev. Rowley Bold Powles, Rector of Hanwell, and daughter of John Evelyn, Esq., of Wootton, Surrey; and grandson of Admiral Sir Charles Rowley, G.C.B., by Elizabeth, his wife, daughter of Sir Richard Keats, Bart.

REDDIES (Hon Charles Brodrick) Hore, Lieutenant H.M.S. *Dowding*, youngest son of Viscount Ruthven, died October 22, on board the *Londonderry* at Balaclava, of wounds received in the trenches at Sebastopol. His brother Walter an officer in the East India Company's service was married on the 8th of December at Bangalore in the female line from the Earls Reddie, the senior heir of the house of Gowrie, the gallant officer derives paternally from the House of Harperstown, county Wexford one of the most ancient Irish families in that district having been connected with it from the Lord Lieutenant Hore's uncles previously held a naval office as in the last war

SPARKE (Lieut H. A.), 4th Light Dragoons, fell in the Light Cavalry charge of the 25th.

STRANGWAYS (Brevet-Colonel Thomas Fox), of the Royal Artillery, one of the chief officers of the distinguished corps to which he has since held, fell in the 5th Division of the Right Attack, 17th October, 1854, per captain In the 11th of Gourie and Leipsic After the death in the latter action of Major Boger, he commanded the Rocket Troop, and had the honour to receive Sir Sydney Smith and confer upon him He was also in command at the capitulation of Paris and received the order of Waterloo Colonel Fox Strangways, was eldest surviving son of the late and Rt. Hon. Charles Redgrave Fox Strangways, third son of Stephen Fox, first Earl of Ilchester, county Somerset, Sir Stephen Fox, the first founder of the great Military Hospital at Chelsea, contributed from £15,000 to the undertaking. Colonel Fox Strangways was born 28th December, 1790. He leaves a widow and one only daughter surviving.

THOMPSON (Lieut. J. H.), of the 17th Lancers, adds another to the long list of gallant soldiers who were lost in the marvellously brilliant charge of the Light Cavalry, on the 25th.

TREDALE (Lieut. Harry George), Royal Engineers, died 22nd Oct., at Scutari, from dysentery, after having severely wounded at the battle of the Alma He was eldest son of Lieut.-Col. H. G. Tredale, Royal Horse Artillery.

WILLETT (Major Saltren), 17th Lancers, died at Balaclava, after the five hours' illness, on the 22nd October

WYNNE (Captain John), 17th Lancers, who fell in the Light Cavalry charge of the 25th, was eldest son and heir-apparent of the present Sandy Pratt Wynne, of Ashley Heath, by a person native of the Hibernian family in that county, established in Ireland by Colonel Wynne, of Rathbeggan, Rector of Cottingham, county York, who married Grace, sister of Patrick Colquhoun, Esq., of Killermont, county Dumbarton, and heiress of Hugh Colquhoun, Esq., of Rossdhu, Dublin, and acquired *temp.* Cromwell large grants of land in the Kings County, Meath and Westmeath Captain Winter was, during the last season, one of the Aides-de-Camp to the Lord-Lieutenant of Ireland. His death is deeply deplored.

WOLLCOMBE (Lieutenant T. W.), 47th Regiment, died, October 7th, at Scutari, of wounds received at the Alma.

YORKE (Sir George John Pratt), Lieutenant, Royal Artillery, died on the 25th of October, of fever, before Sebastopol He was brother and heir of Sir William Norcott Yorke, K.H., of the 21st Fusiliers, who fell in gallant style at the Alma. How vividly do the deaths of the 2 two brothers recall to our cold, all the traces of youth, and manhood, the hopes and expectations of title and fortune, bring before the mind's eye the scene of war The elder not only maintained the spotless, twenty-one and had only been a few months married, when his career was cut short by the Alma. The younger whose decease we now record, and over whom a colder hand has but completed his nineteenth year The Baronetcy now devolves on their only surviving brother, the present Sir Charles Lawrence Young.

To the Index of the ILLUSTRATED LONDON NEWS.

Allow me to correct a statement which appeared in your "Oh, many of Officers who fell at the Alma," page 484. "Cardew Lieut and Adjutant, 19 Regiment," in crossing the river Alma, this brave young officer's horse was shot under him, and he was precipitated into the water. Disentangling himself from his wounded horse, he was obtaining his leg, having, with the assistance of a sergeant, bandaged this wound, he again advanced, button gaining the heights, a shot hit him in the neck, and partially fractured one jaw, and he fell. A letter, however, in his own handwriting, dated from Scutari several days after the battle, in describing the above particulars, says: "I intend having 'Alma' engraved on the bullet as a slight remembrance; and I hope to be able to join, and have a slap at Sebastopol before I return "—I am, &c., H. H.

6, Neck-enburghstreet, Nov 11, 1854.

PROGRESS OF THE FRENCH WORKS.—Sebastopol must now fall: the enemy's approaches, in the course of five or six days more, will be within rifle shot of the Malakoff and other works upon the Karabelnaia. Lord Raglan has taken the new position which the French assume up. I have been over their lines to-day carefully. As they are placed at present they are in no position for the assault and other fighting operations. In mounting the hill he was obliged to, by the assistance of a sergeant, bandaged this wound, he again advanced, button gaining the heights, a shot hit him in the neck, and partially fractured one jaw, and he fell. A letter, however, in his own handwriting, dated from Scutari several days after the battle, in describing the above particulars, says: "I intend having 'Alma' engraved on the bullet as a slight remembrance; and I hope to be able to join, and have a slap at Sebastopol before I return "—I am, &c., H. H.

NOTES ON SIEGES AND SIEGE OPERATIONS.

(Continued from page 473.)

MINING.

Mining is a most important resource, in siege operations, both for attack and defence. It was greatly practised by the ancients, but simply as a means of obtaining a subterranean entrance into the besieged city, or the camp of the besiegers, through which to make a sudden assault. It was not until near the end of the fifteenth century that gunpowder was used in mines for the purpose of blowing up the surface of the ground under the fort, or the works of a besieging force, or of making a breach in a revetment wall

Amongst the earliest instances recorded of the use of this agency are the siege of Serravalla, a town belonging to the Florentine, by the Genoese, in 1487, that of the Castle of Del Ovo in the Bay of Naples, which was taken by mining in 1496, and that of Cepsalonia about the same time, under Peter of Navarre. A Spanish gentleman The siege of Candia by the Turks, 1667 is a remarkable instance of a protracted defence, against a vastly superior force, by means of mines. One side of the city, from which sea-ward was open to the sea and was thus opened for supplies, reinforcements, &c., by the Venetians, towards the land the approaches were defended by a line of curtains three miles in extent flanked by seven bastions, and mounting 400 pieces of artillery The ditch was wide and deep, and every outwork had been diligently undermined- 1173 mines, great and small, in this town secretly in mining, like so many graves, for the countless hordes of their assailants One of the mines was said to have required 18 000 lbs of powder, and to have blown into the air 1000 victims The Turks practised mining to a similar extent so that the whole ground in the neighbourhood was honeycombed In a protracted siege of two years, the garrison commanded by the brave Bornizini, sustained fifty assaults, more than forty underground battles, and not less than 500 times blew up the mines of their assailants During the three months, the garrison was reduced from 20,000 (according to some accounts 100,000); and the town at length capitulated on honourable terms.

In the opinion of military engineers, a proper management of the characteristics of a subterranean defence may be made to protract the duration of the siege of a weak place to two months Suns was, indeed, the case of Sohweidnitz, besieged by the Russians, in 1762, and which at last capitulated sooner than it otherwise would, in consequence of the blowing up of a powder magazine.

At Saragossa, in the last Peninsular War, the long defence sustained, even after the fall of the fort. Heations themselves, was chiefly owing to the multitude of mines sprung in the very streets.

The defence of the Castle of Gibraltar, in 1781, by a small French garrison, is an instance of the reward attending patient industry and resolution, which deserves a place on the annals of the most brilliant military achievements The castle stands on a rocky plateau, about 300 feet above the river Sona. The hill being so steep on three sides as to be secure against escalade, or the ordinary work- of attack, and, on the fourth side, the ascent of which was more gradual, the approach was defended by a little outwork, which the Spaniards failed of successfully reducing The attack and defence, therefore, chiefly consisted of mining operations; the details of which, as given in the journal of a sergeant of Sappers and Miners, named St. Jacques, who was the prime mover in them, are truly romantic Before proceeding to quote from the narrative of this humble hero, we should state that the garrison of the little Gibraltar consisted of only ninety infantry, one corporal, and four gunners of artillery, commanded by a captain two lieutenants, and the governor, General Jacques. At the moment of commencing the operations, 5th Sept. 1781, was when the French were being driven out from the Peninsula by the combined armies and the intelligence had so suddenly, that the besieged already resolved were almost cut off from supplies "In the first place," writes the sergeant, "when we saw the enemy, I got four bullocks into the castle for the use of the sick and wounded, and more than a dozen sacks of wheat, which we served out, along with vinegar, to the garrison, when all the wine and brandy was expended. which was during the last fortnight of the siege. It was also necessary to kill the horses of the officers, to save water. At the opening of the siege I found in the first only the shovels, two barrows, two axes, two hatchets, and three pickaxes. I had neither candles nor buckets for the mines. I had no anvil, nor charcoal for repairing tools."

After an unsuccessful attack by artillery, the Spaniards resolved to proceed by mining, with a view of forcing down the front of the Queen's hill upon which the walls stood. Upon perceiving this intention, St. Jacques called for a volunteers to assist as miners, and one corporal of artillery, two gunners, and two infantry gave him their services. The bullocks were killed, and their fat made into candles, of which there were none; and their skins made into a smithy's bellows, for the repair of tools.

The mining operations commenced on the 15th October; and, in the course of them, it was often necessary for the whole garrison to be on duty night and day, to protect the miners; whilst the women of the garrison had to assist in removing the excavated rubbish, and also in filling up the infantry cartridges for the charges for the counter-miners On Oct. 24th St. Jacques perceiving that two galleries of mine were commenced advanced from a ravine near the walls, began a gallery to run between them, and, on the 26th, judging it sufficient to proceed, he charged the chamber, and continued to pick at the ground, to lead the Spanish miners to suppose that he was still engaged, and that the mine was not charged. Next day a false attack was made from the castle, over the spot where the counter-mine was ready to be exploded; and, upon its being fired, a great many soldiers and peasants were blown up, and the two neighbouring Spanish galleries destroyed On the 28th November St. Jacques exploded another counter mine, with equally destructive effect; and in three two first mines which he took, he found what he much needed. two pickaxes, two hammers, four shovels, and ten baskets of earth On the 3rd December, after a week's labour, having run a shaft to feet deep, he broke into a gallery in which the Spaniards had been at work for twenty five days, and drove them out, using hand grenades and musketry during a further supply of coals On the 16th December four of the Spanish galleries had reached within 9 feet, 36 feet, 30 feet, and 45 feet respectively having a common entrance These were all taken by St. Jacques and his company, who, driving the Spaniards, seizing the tools, afterwards blocking up, with a charge requiring 10 660 cartridges, such portions of them as were not likely to be of use in their defence.

On the 9th January St. Jacques and another descended from the fort at eleven at night with two shells and six hand-grenades, approached safely to the mouth of a gallery were with their shells, they killed several grenadiers who were sheltering themselves from the cold four days later S. Jacques pierced a gallery, which the Spaniards were mining under the battery of the fort, by means of two petard explosions, and destroyed eighty feet of it. The Spaniards now began to drive galleries from the side of the town, in order to undermine the magazines of powder and stores in the fort. The indefatigable St. Jacques sunk a shaft seventeen feet in depth, and ran out a gallery to meet them, and thus foiled their attempts. And so this subterranean war went on till the 5th of February, when the surrender of the Spanish forts of Lerida and Mequinenza by the French, as well as the retreat of the French army from Spain, being ascertained, the little garrison of Monzon capitulated, after one of the stoutest and most exacting defences on record. The Spaniards lost in this siege 600 men killed and wounded, and expended £4000 on works of attack. The French lost ten men killed and wounded, and only a trifling sum in the way of *matériel*.

In the subsequent sieges of Salamanca, the fortifications were extensively mined by the assailants, but the existence and extent of these works were fortunately discovered in time by the gallant Lieutenant Butler, who averted the consequences of the explosion by the operation of a strong retrenched work, beside the point where the breach was effected He had not time for countermining; but he kept the garrison in a state of moral discipline to carry out such works with energy and success.

THE QUESTION BETWEEN SHIP'S AND SHORE BATTERIES.

The question as to the supposed superiority of ordnance in ships over land batteries has been actively contested in argument as well as connected with the affair of war. Peace of Westminster, 1854 positive, and some times wrong, instead that ship has no chance against some walls, and Major Straith, with a natural prejudice in favour of his own service, says that the alleged superiority of ordnance afloat rests on no solid argument or well-established facts Guns (he goes on to say) can certainly be worked more rapidly on board ship than in shore batteries, and in tranquillity, or greater security, the prodigious concentration of fire, if properly directed, would, doubtless, overwhelm any shore battery *within certain limits of distance*, in which the gun has only to be loaded and fired to ensure the shot hitting the battery. But, on the other hand, in spite of every effort to ensure correct practice from guns afloat, their direction is noted upon, and the correct line of fire so interfered with, by the motion of the vessel, that, *at long ranges*, the fire of guns afloat is necessarily very uncertain. Meanwhile, a shore battery, effectively served, will pour in a slow but sure and certain destructive fire, which, moreover, with loaded shells and hot shot, would compromise the safety of any vessel that could be opposed to it."

With all deference due to the opinions of a gentleman of acknowledged authority in his profession, we cannot help thinking that Major Straith has in the above overrated, even theoretically, the real advantages of ship artillery. The motion of the vessel, the perpetual altered difficulty, would indeed be a disturbing cause of no mean importance, if the guns were fired at a previously fixed range, in disregard of such motion. Such, however, is not the case: the captain of the gun watching carefully the elevation, ever changing and firing the gun at the precise moment when its range is proper for the purpose The act of firing being the work of an instant, the ship, for that instant of time, is as much a fixed object as any battery on shore would be; although, in the very next instant, it, and the discharged gun which it carries, have come into an altered position So much for theory. In gunnery practice on board the *Excellent*, and, indeed, in the various ships in commission, as well as the experience of active service, all tend to prove that artillery is as manageable on board ship as on land, the a ms are true, even at long range—and that whether in proceeding, with the direction O he observed, if the motion of the ship be not a serious drawback to its efficiency as a battery, it does undoubtedly present a difficulty easily to understanding, more or less in extent, when the ship becomes a target for land batteries Ships have also the further disadvantage over land batteries, that they are moveable at pleasure, that they command the feet circle round the smaller circle of the fortifications attacked, and that two or more of them may be made to concentrate their fire upon a point widely apart upon one spot; whereas the guns of a fortress are always limited in ranges

The other circumstance, in our opinion in which, when used as an attacking force, the sea service enjoys resources inferior to armies on land, is that there are as yet no means discovered of protecting the vessels and the besieging force; but this disadvantage sinks in importance when it is considered that both sides possess the latter can take up its position, whether for breaching or bomba ding, the wide field at their choice for fixing upon such position, and the superior weight of metal it can thus pour upon the besieged.

That terrible missile red-hot shot, also, is very destructive to ships when judiciously and success fully employed, as they were in the brave defence of Gibraltar by General Elliot, against the combined land and naval forces of France and Spain. But in this celebrated case the shot were the more effective in their action from the face of their target plunged from a high elevation into all the ships, which they easily lodged, or left fixed in direct fire, in the ord nary way, would, in a majority of cases, graze off, or pass through the sides of the vessel, without necessarily setting it on fire. Finally, whatever the destructive effect of red-hot shot against shipping, the time required for their preparation is considerable, and in a sudden attack by a steam force, much damage, perhaps total destruction, may be dealt out against a land-battery before they could be brought into use Under the most favourable circumstances, with blast-furnaces, it requires from forty minutes to an hour to heat a target before shot sufficiently to set fire to timber

If we unite to speak of hollow shot, fired, in the defence of coast batteries against shipping, are, in subsidiary formidable efficacy. A great number of experiments have been made at various times, both here and abroad, to test the effect of a shell, bursting in the side of a ship, and that is precisely when turned within the material of the ship's side, when a comparatively small would be no long r expensive, that loaded shell is most destructive. The results of these experiments are to be found, quoted from the original reports in Scammon's Ideas as to the Effect of Heavy Ordnance Directed Against Ships of War," in "Straith's Treatise," and other works. A few words will suffice by way of example In 1750, at Medon, a construction of wood of the dimensions and arrangement of a ship, was set for target practice with a 36 pounder whether at a range of 600 or 800 yards is uncertain of three shots which struck and burst in the vessel two burst, having passed through 18 inches of wood, carried many splinters in the hinds, one of which was 6 feet long, the third sprung four planks, the 4 spaces between him being 3 inches, 4 inches, and as much as 30 inches; then tore away 2 feet of one of the timbers [illegible] three a part of the planking to a distance of 26 feet; started one of the stanchions, and founded on four bolts, screws, nails, &c. the third passed through 24 inches of wood, tore a couple in pieces, carried away 22 inches of lining, carried a set in chain, broke several bolts, then, changing its direction, lodged in the standard of the bits, and there burst; and, by a splinter, raised the cross-piece which passed above the standard of the bits

General Gassendi, writing to General Bonaparte, then commanding the Armée D'Angleterre, describes the result of a trial with a twenty-four pounder:—

A brass 24-pounder firing at 410 yards—24 pounder howitzer, shell weighing 26 the charge 1 the gun, 2 lbs.; charge of the shell, 1 lb.; the butt of oak, 9 the thickness of the diameter of the sides of an 88 gun ship the timbers being twelve inches and three, the 1st ball passing five inches, and the external sheathing, the gun pounds it at ten feet above the water line, having passed through the first timber, the shell penetrated and ars in the middle of the side of the ship, the fuse of the shell took effect in the main wale, a number of the timbers were torn all to splinters to the distance of five inches was torn all to splinters to the distance of five inches was torn all to splinters to the distance of five inches was

THE BATTLE OF BALACLAVA.—ATT

THE SCOTS GREYS.—(SEE PRECEDING PAGE.)

SPIKING GUNS.

THE ambiguity of Lord Stratford de Redcliffe's despatch, concerning the affair of Balaclava, in which the Russians were said to have turned the guns of the Turks upon their former owners, after they had been spiked, renders this subject one of great public interest. The two Engravings illustrate this *dernier ressort*—one representing the spring-spike, and the other the ordinary one. The process of spiking is too simple to require any lengthened description.

SPRING GUN-SPIKE.

The spikes are about four inches long, and of the dimensions of a tobacco-pipe; the head flat; a barb at the point acts as a spring, which is naturally pressed to the shaft on being forced into the touch-hole. Upon reaching the chamber of the gun it resumes its position, and it is impossible to withdraw it. It can only be got out by drilling—no easy task, as it is made of the hardest steel, and, being also somewhat loose in the touch-hole, there is much difficulty in making a drill bite as effectually as it should do. Its application is the work of a moment—a single tap on the flat head with the butt of the hand sufficing. This can be easily done, even if it is ever so dark.

ORDINARY GUN-SPIKE.

In the affair at Balaclava, we opine that Lord de Redcliffe's despatch was made unintelligible by the imperfections of the telegraph, for it is clear that the Turkish guns were either imperfectly spiked or never spiked at all. The spikes are made of the finest tempered steel, and when driven home, as represented in the accompanying Engraving, the gun may be said to be *hors de combat*.

Mr. J. Lamb Lucklay, of Alnwick, has suggested (in the *Times* of Wednesday) a simple method by which cannon might be so formed that the operation of spiking would only render them useless temporarily. If, instead of the present method of boring the touch-hole in the cannon itself, a perforation an inch or so in diameter be made in its place, and a conical plug adapted to screw tightly into it; then, by having the touch-hole in the plug, if the cannon were spiked the plug could be unscrewed, and a fresh one inserted in a minute. The cannon should be perforated all of one size, so that all the plugs would fit any of them.

ON THE ALERT AT BALACLAVA.—There are hours among the watching hours of night, when all Balaclava is up and in arms. At once, I have no doubt, it is generally thought that the foe is out against Sebastopol, is the post of danger, and that we Balaclavians in the rear of the army are removed from our cue and war's alarms. They have strange notions at home. They forget that an army of Russians has compelled us "to make front in our rear," and that one of 35,000 of Balaclava is the scene of discourse between the two armies. Also, that whenever the Russian in the field wish to assist their brethren in Sebastopol, they make a diversion against Balaclava. The consequence is, that ever since the battle of the 25th of October, when the ships were ordered out of the harbour, and the commissariat chest placed on board a steamer, the military officers at Balaclava have received orders to be ready to quit at a moment's notice. Whenever Russians appear upon our position by night, or when a raw recruit placed as sentinel in front of a picket thinks he hears a Russian in the tumbling of a leaf, and discharges his firelock, all those are as in charge the camp is supported by volleys from his picket and all the neighbouring outlying parties, then do guns open fire from the batteries, and the bugle sounds the alarm in Balaclava streets. And we, who sleep sound, and unarmed, have to get up and join the assembly at the second bugle-call, and be prepared, if not for death, at least for a fleet tour to Kiew, with our hands tied to the manes of Cossack horses, and our movements accelerated by half-a-dozen sons of the wilderness, riding howling behind us, and with their lances poking at our rear. We, who are free from danger, consider them out of danger who are allowed to go out to camp; and that this opinion is well founded is proved by the Commissary-General, justly commiserating the loss the service might sustain if he were lost, having received from a person and private good and chattels to Kalikoi, a village at some distance from Balaclava, and more towards the centre of our position. Still, if ours be the greater danger, there is no denying it that ours, too, is the greater comforts for we are indulged with all the luxuries of Russian furniture, eat the Queen's rations, with any additions that can be made at tables, while we sit in chairs; and, at this extremely cold season, we have the comfort of a roof over our heads, and a wooden flooring to lie on; while the men in camp—their luggage and camp equipage knocking about on board the transports—lie on the wet ground, with nothing but a blanket to cover them, if they took with them on landing at Kalamita Bay; and awfully cold they tell us do they find it, especially in the morning.—*Letter from the Crimea.*

THE HARDSHIPS OF THE CAMPAIGN.—Time flies, and the siege progresses slowly, but surely; operating goes hitherto cold—such weather as in England would be welcome in November, but in England there are fires and light, and houses to live in, and clubs and dances to go to, where people talk of the Crimea as a land of milk and honey. So far as we know and have seen, and have experienced, it is a bleak, barren, stony, hill country, with not a single feature to recommend it, a cold north easterly wind blowing into our canvas dwellings day and night; the great city in our front; and a Russian army of 25,000 or 26,000 men three miles in our rear, so that we are ever on the alert, and seldom indeed do our men get one whole night under their blankets. There is a great scarcity of fuel, nothing, indeed, of the kind but what the men can grub up of roots and twigs from stunted oak, to boil their kettles—and green bushes make but a sorry fire. Yet there is no complaint, excepting, indeed, that they do swear at their ration of green coffee, the raw berry, to roast and grind as best they can. Tea is always most acceptable, and they have next to their rum, which ration is liberal, and keeps up the heart and spirits in the long nights of out-post duty in the trenches. The officers are no better off; they live on their rations, and complain of nothing but "that ruddily double Income-tax," which prevents many from indulging in some few luxuries, which may be obtained at times from the ships, but at a price beyond their means. "What do you call a luxury?" I asked an old officer to-day. "Nothing," he said, quickly; "I don't consider myself justified in paying these sharks 160 per cent profit for their good things while I have my family at home, two children at school, and mourning here with a double Income-tax on my back, where a man's life is not worth a day's purchase." His remark was unanswerable.—*Letter from an Officer of The 1st Royals, Nov. 2.*

RUSSIAN TREACHERY.—I will tell you a thing I saw that afternoon (the 25th). You must know the wounded Russians fire at you, even when you are going up to help them; that is, when they are lying on the ground, and cannot move. There were a number of similar cases after the battle of Alma. Well, after I had come down the hill, after seeing the cavalry charge, I had to cross a small part of the plain where there were numbers of dead and wounded. I was leading my horse, when I saw an infantry soldier coming towards me, with a wounded cavalry soldier on his back, whom the infantry man was kindly taking to some doctor. They were about two yards from me, when I saw a man raise himself from the ground, and take deliberate aim with his pistol at these two men. I shouted out: the Russian fired, missed the men, and the bullet whistled past my ear. The infantry soldier heard the ball the man from he was carrying. I saw him go up to the Russian, take his own sword from him, and just as I reached them, he raised his arm, and cut the fellow's head clean off. The soldier told me, that previous to his departure he had given the same man a drink of water, and promised to send some one to take him to the hospital. You may think all this cruel, but you soon get accustomed to it. Only two yards from me, when I saw a man raise himself from the ground, and take deliberate aim with his pistol at these two men. I shouted out: the Russian fired, missed the men, and the bullet whistled past my ear. The infantry soldier heard the ball the man from he was carrying. I saw him go up to the Russian, take his own sword from him, and just as I reached them, he raised his arm, and cut the fellow's head clean off. The soldier told me, that previous to his departure he had given the same man a drink of water, and promised to send some one to take him to the hospital. You may think all this cruel, but you soon get accustomed to it. Only two yards from me, when I saw a man raise himself from the ground, and take deliberate aim with his pistol at these two men. I shouted out: the Russian fired, missed the men, and the bullet whistled past my ear. The infantry soldier heard the ball the man from he was carrying. I saw him go up to the Russian, take his own sword from him, and just as I reached them, he raised his arm, and cut the fellow's head clean off. The soldier told me, that previous to his departure he had given the same man a drink of water, and promised to send some one to take him to the hospital. You may think all this cruel, but you soon get accustomed to it.—*Letter from an Officer.*

THE DURATION OF IMPORTANT SIEGES.—The *Pays*, of Monday, contains an article to the effect that, when so much impatience is expressed in some quarters at the delay which has taken place in the siege operations at Sebastopol, it may not be without interest to consider what has been the duration of the most important sieges during the present century. In 1813, the city of Dantzic, defended like Sebastopol by a special system of fortifications and protected from a complete investment, supported fifty one days' attack and then capitulated before the assault was given. The city of Saragossa lasted fifty days from the opening of the trenches. The French, after having, on the 30th of December, 1808, to the 10th of February, 1810. The siege of the citadel of Antwerp commenced on November 29, 1832, and terminated on December 23 by a capitulation. Rome was taken on June 29, 1849, on the twenty-fifth day after the batteries were opened. No astonishment, consequently, ought to be felt at the non-capture of Sebastopol, particularly if the immense resources accumulated in the place be taken into consideration, as well as the diversion effected by a large army of the enemy holding the open country.

CHESS.

TO CORRESPONDENTS.

E. E.—A player can demand a Queen for every Pawn he advances to its 8th square, and have two Queens or more on the board at the same time.

CLERICUS. The solution of Dr. Forbes's article on Oriental Chess has been delayed by the all-absorbing topic to-day.

R. De Blois.—The Montpelier Chess-club meets at Redgefield every day, from one to two p.m. For particulars, address the Secretary, Mr. J. Kipping, jun.

BOOKWORM. A copy can be obtained from the Caissa set for about 30s.

C. K. Get the work you mentioned as "Amus Mahlat" on our last Number.

SATURAY.—Be our reading problem last week. The one you submit is incorrect.

W. M. The Games in question will all be found in the "Chess-Player's Companion."

SIR G. S., Gibraltar; Rarik, Gorham. Now under consideration. They shall be reported on next week.

S. W., Bath. We have requested the authors to send the Solutions.

CABALLERO. Promising, but not quite up to our standard.

F. K., of Norwich.—It shall be inserted shortly.

A. Manchester; A. B. S., Chester.—The Games shall appear.

F. CAPRAL, of Cairo is thanked for the interesting selection of Problems he has placed at our disposal.

VON B. d. L., Brussels.—A reply of all be sent speedily through a private channel.

J. L. G.—Jaenisch's very excellent translation of "Carrera's Treatise" was published by Richardson, of Cornhill, in 1822. It has long been out of print, we believe. The same writer's translation of "Greco" was published by Simpkin and Marshall in 1851; and that also if we mistake not, is out of print.

JUNIUS.—The most complete and elementary analysis of the End-game, where one side has a Rook and a Kt against a Rook alone, is in its last *brochure* by Signor Cumurini, published at Genoa lately, under the title "Del Gioco di Torre e Cavallo Contro Torre." &c

D. J.—No copy of the Poem on Chess to which you refer has reached us. By whom is it published?

A. Z. We always use the blank Chess diagrams published at the office of the *Chess Player's Chronicle*, they are larger and better than any others.

SOLUTIONS OF PROBLEM No. 560 by Sir Singo, C. B. V.; R. F., Royal Artillery; Wolsey, N. S., Emigrant; J. W. F., Cranbrook, A. P., George W., Mercury, Sonax, J. K. B., are correct.

SOLUTIONS OF PROBLEM No. 561, by A. B.; F. S., of Norwich; J. W. F., Charing Horis, are correct. All others are wrong

PROBLEM No. 562.

By Mr. H. KIDSON.

BLACK.

WHITE.

White to play, and mate in three moves.

CHESS IN SCOTLAND.

The two following games were played between Mr. STAUNTON and the Rev T. GORDON ("Graham"), of the Edinburgh Chess-club, Mr. S. giving the odds of the Pawn and two moves

(Remove Black's K B Pawn from the board.)

WHITE ("Gamma.")	BLACK (Mr. S.)	WHITE ("Gamma.")	BLACK (Mr. S.)
1 P to K 4th		23. P to R 4th	B to Q sq
2 P to Q 4th	Q Kt to Q B 3rd	24 Q takes Q R P	B to Q Kt 3rd
3. P to Q 5th	Q Kt to K 4th	25 Q takes Q	R takes Q
4. P to K B 4th	Q Kt to B 3rd	26 Q R to K Kt 2nd	Q R to Q B 4th
5. K Kt to K B 3rd	P to K 4th	27. R to Q Bsq	B to K 6th
6. K 3 to Q 3rd (a)	P to Q 3rd	28 R to Q B 2nd	K Kt to K B 3rd
7. P to K 5th	K B to K 2nd	29. P to K Kt 4th	Q R to Q R sq
8. P to Q B 4th	K Kt to Q 2nd		
9. Q Kt to Q B 3rd	P to Q B 3rd	30. P to R Kt 5th (h)	Kt takes K P
10. Q B to Q 2nd	Q B to Q 2nd	31. Kt takes Kt	R takes Kt
11. Q to R 2nd	Castles on K's side	32. P to R Kt 6th	P takes P
12. Castles on Q's	P takes Q P	33. P takes P	Kt to K R 3rd
13. Q B P takes P	P to Q R 3rd	34. B takes Q P	Kt to K B 4th
14. P to K R 3rd	P to Q Kt 4th	35. B takes P	Kt takes P
15. Q B to K Kt sq	P to K B 4th	36. Kt takes Kt	K R takes B
16. Q Kt to Q sq	Q to Q R 4th (c)	37. P to Q 6th	K R to Q 4th
17. Kt to Q Kt sq	K R (on K R) (d)	38. P to K Kt 4th	R takes Q P
18. P to Q R 3rd	Q to Q R 5th (e)	39. Kt to K B 4th	K R to Q 5th (ch)
19. Q B takes P	K Kt to K 4th	40. Kt to Q R 2nd	B to Q B 8th
20 P to K Kt 3rd	Q B to Q Kt 4th	41. Q R to Q B 4th	B to K Kt 4th
21. B takes B	P takes B	42. R to Q B 8th (ch)	K takes Kt
22. Q Kt to Q B 3rd	Q to Q R 3rd	43. R takes R (ch)	B to Q sq
		44. Kt to K 7th (ch)	

And in a few moves Black surrendered.

(a) Taking the offered Pawn would be a born infelicitous, as the student will soon discover by examining the consequences.

(b) This step was overlooked, and, if taken advantage of, would, we believe, have cost White the game.

(c) Very speculative. Black has a fine position, but not one that will permit him to carry the game by a coup de main

(d) The, which like many other of Black's moves in the present game, was played without proper deliberation, throws away a valuable Pawn.

(e) Much better to have moved his Queen to her Kt 3rd, instead of subjecting her to the danger of being hemmed in and captured here.

(f) Indispensable, as White then turned to play Kt to Q B 3rd, and then Kt to Q 2nd, winning the Queen

(g) To enable him to take the K Pawn, which it will be seen he could not do without loss, while his Royal lane was open.

(h) White, in his turn, plays a little inconsiderately here. He should have moved his K R to K 2nd, before advancing the Pawn

BETWEEN THE SAME STRENGTH AT THE SAME ODDS.

(Remove as before Black's K B Pawn from the board.)

WHITE ("Gamma.")	BLACK (Mr. S.)	WHITE ("Gamma.")	BLACK (Mr S.)
1. P to K 4th		13. P to K 5th	P takes K B P
2. P to Q 4th	Q Kt to Q B 3rd	14. Q B takes P	Q to her Kt 3rd (ch)
3. K Kt to Q B 3rd	P to K 4th		
4. K Kt to K B 3rd	P to Q 3rd	15. K Kt to K 2nd	Q takes Q Kt P
5. P to Q 5th	Q Kt to K 2nd	16. Q Kt to K Kt 3rd	K Kt to K 4th
6. P to Q B 4th	Q Kt to K Kt 3rd	17. Q R to Q Kt sq	Q to her 8th
7. Q Kt to Q B 3rd	B to K 3rd	18. Q R takes Q Kt	Q takes B
8. Q B to K 3rd	K Kt to B 3rd	19. Q takes B	P (c)
9. P to K R 3rd	P to Q B 3rd	20. Q R takes B	R takes Kt
10 Castles	Castles (a)	21. R takes R (ch)	R takes R
11. K Kt to K R 2nd	B to Q 2nd	22. Q takes R	And White resigned.

(a) With the exception of the Pawn, which he gave before beginning, Black has now no inferior by whatever—a circumstance that his adversary has not made the most of his opening

(b) Desperate, indeed, like his game at this juncture.

CHESS ENIGMAS.

No. 896.—By A. KEMPE, Esq.

White: K at K Rsq, Rs at Q 8th and Q Kt 5th, Bs at K R 2nd and Q R 4th, Kt at K 6th, Ps at K B 3rd and Q 2nd.

White: K at Q R 8th, Q at her 4th and Q R 5th, Kt at K 3rd, I at K B 4th, K at his 3rd, Q 2nd, and Q Kt 6th.
Black: K at Q 3rd, B at K B 2nd, P at K B 3rd, Q B 6th, and Q Kt 2nd

White to play, and mate in four moves.

EPITOME OF NEWS, FOREIGN AND DOMESTIC.

Sir Hamilton Seymour has been invited to become a candidate for the representation of Marylebone, vacant by the death of Lord Dudley Stuart.

M. de Persigny has received from the Sultan the order of the Grand Cross of Medjidé, first class.

Lord Brougham has arrived at his château at Cannes, in the south of France, where the Noble and Learned Lord will remain until the meeting of Parliament.

The Archbishop of Paris is about to proceed to Rome, where he is summoned by an autograph letter from the Pope.

The Earl of Carlisle will shortly deliver a lecture to the members of the Rotherham Mechanics' Institution on the "Poetry of Pope."

Lord Bloomfield, the British Ambassador to the Prussian Court, left Dover on Monday morning for Calais, en route to Berlin.

M. de Pulkammer, Chief President, and M. de Nordenflycht, Presidial Councillor of the Grand Duchy of Posen, have received, the one the Third Class of St. Stanislas, and the other the Second of St. Anne, from the Emperor of Russia.

The Duke of Genoa has been for the last fortnight suffering from bronchitis, but is now in a state of convalescence.

Mr. Martin's Working Men's College numbers already 114 students. Most of these attend two or three, and some as many as four or five classes.

Bossuc's coffin and tomb, which had long been lost, have just been discovered in the Cathedral of Meaux. The tomb was reinstated on the 15th inst., with a grand funeral service.

It is said that Mr. Baxter, M.P., will be unable to resume his official functions as patronage secretary, in consequence of the severe attack of an attract under which he is suffering.

The Emperor of Austria has laid an additional tax upon Lombardy, to the amount of 4½ kreutzers per florin of direct taxes (the florin is 40 kreutzers, and its value corresponds to 2s. 1d.)

Mr. Macready is announced to give a "Night with the English Poets," at the Mechanics' Institution in Manchester. The selections are to be taken from the works of Dryden, Pope, Milton, Wordsworth, and Shakspeare.

The Norwegian press abounds in articles in favour of the Allies in their struggle against the Czar for the independence of the North and of Europe.

No mail will be sent off to America on Saturday (to-day), owing to the Cunard steamer being taken up by the Government; but the next mails will be despatched by the United States steamer on Wednesday.

A misunderstanding has arisen between the United States Consul and the Paraguayan Government.

The magistrates of Kerry have agreed to call on Government for a reduction of the constabulary force to the standard which existed previous to the famine.

The Neapolitan Government has issued a circular to its functionaries, prohibiting the admission of any newspapers into the kingdom from the other Italian States.

The Paper-duty, in the year ending the 5th January last, was £1,057,637, against £947,905 the preceding year, which was an increase on 1853.

The Berlin police has succeeded in discovering a breach of confidence on the part of an *employé* of the Telegraph-office, which has led to the arrest of this person, and of another individual engaged in stock-broking speculations.

The proprietors of the Victoria Dock Company, have agreed to lease the works to the contractors, Messrs Peto, Brassey, and Co., for twenty-one years, the latter paying five per cent on the share capital, and dividing the profits subsequently after reimbursing themselves, losses and expenses incurred.

Eighty persons out of 218 lost their lives by the stranding of the emigrant ship *Johanna*, of Bremen, which was driven ashore off Neuharrumersyel on the 5th inst.

Mr. Parry has returned to Windsor, and has given an explanation of his cheque for the amount of the subscriptions collected. He wanted the money for an investment in an American railway.

The last report of the agricultural society at Clermont, strongly recommends the substitution of *chien-dent* (couch-grass) for malt in the making of beer.

Sir Charles Hotham has been paying a visit to Geelong, where he was entertained at a banquet and ball by 300 of the citizens, and suitable addresses presented him.

The steamer *Yankee Blade*, while on her passage from San Francisco to Panama with 800 passengers, recently, ran upon some rocks near Cape Corrientes, when fifty and sixty persons were lost, and the ship was a complete wreck.

The duty on newspapers and advertisements for the year ended the 5th January last amounted to £563,729, against £634,182 the preceding year. In 1852 the duty was £601,000.

Small silver mines have been discovered in the mountain Bernina, in the Canton of the Grisons, and a company has already started into existence and advanced funds for the requisite diggings.

A troop of bakers' assistants paraded Ramsgate a few days ago with the effigy of a respectable tradesman, a baker, whose offence consisted in supplying good bread 2d. per gallon cheaper than the usual price, which proceedings, although beneficial to the public, gave great offence to the trade.

A man of inventive genius, in Bordeaux, the streets of which are frightfully muddy, has organised a plan for letting out wooden shoes (sabots). For five centimes (½d.) a person having occasion to cross a street will be able to hire a pair of wooden shoes, and on arriving on the opposite pavement they will be taken from him by a little Savoyard in waiting.

In Glamorganshire there in an enclosed rabbit warren, of some 1600 acres, which produces nearly as many pounds annually. "One foreign customer has paid as much as £300 per annum for skins of one particular variety, for German fairs, whence they travel into Russia and the East.

Upwards of 12,000 inhabitants, out of a population of from 20 000 to 25,000 souls have abandoned Athens since the breaking out of the cholera

Upwards of 800 pitmen are now on strike at the Hetton Colliery.

The Corsican submarine telegraph now affords direct communication between Bastia, Turin, and Paris. The first telegraphic despatch from Bastia was received at Turin on the 13th

In the year ending the 5th of January last, the tax on dogs realised £161,814.

The Jesuits who were ordered to leave the Basque Provinces have at length consented to take their departure. They have accepted an asylum offered them by the Bishop of Bayonne, at Larressore, on the French frontier.

Last week a lecture on health and longevity was given in the Town hall, Wells, by Lord Auckland, Bishop of Bath and Wells, President of the Literary Institution.

The 4th of November, the fortieth anniversary of the happy union between Norway and Sweden, has this year been celebrated with enthusiasm all over Norway.

The gaol of Guernsey contains at the present moment only one prisoner, whose sentence will expire in the course of the current month. One of the smallest, with a thirty thousand population, can exhibit similar evidence of internal order!

Prince Ghika entered Jassy on the 10th, but neither the French, English, nor Greek Consuls were present to receive him

Upwards of 500,000 dollars have been collected in New York for the Patriotic Fund by a committee appointed for that purpose.

The lining with concrete the large basin of the Rond du Roi in the Bois de Boulogne having been completely terminated, water has been let in. The operation has succeeded, as not a drop of water escapes.

During the month of October fifty-two vessels were stranded on the coasts of the United Kingdom, twenty-one of which occurred in the heavy gale of the 31st and 1st inst. Twenty-three became total wrecks, the crews of five of which perished, besides ten persons variously drowned from the others.

The directors general of artillery and engineers in the Spanish army have determined to send several distinguished officers of those arms into the Crimea to study the military operations going on there.

The return of "conscience money," whilst Mr. Gladstone fills the Chancellor of the Exchequer has been unusually large. Some one sends news at the announcement the other day that he has returned six Mexican Bonds, each of £500, in further payment of a debt long due to the nation.

In consequence of the treaty concluded by France with the Belgian Government, to ensure the rights of literary property, the [illegible] about 1000 francs have been sent into Belgium by the French publishers, and deposited at the Belgian library.

The unhappy dispute between the master-shipbuilders of the Tyne and Wear and their workmen still continues, and the men remain out of the docks and building-yards. 100 or 200 sawyers have likewise been thrown out of employment.

THE BEST BED for a CHILD is one of the PATENT MELUSINE COTS, a bed long I best with mattresses and pillows, and which can vary in size from a cradle to a cot bed. The Melusine Cots, from Redmond Manufactory, 4, Pall-mall East.

BABIES' WHITE CASHMERE CLOAKS, handsomely trimmed with cloth, new pattern, Babies Hoods, half-mourning, Caps, and every description of Infants' Clothing, at very moderate prices. A superior assortment of Ladies' Dress and Mantle Trimmings, and every novelty in sewings and gimps. Patterns and Prices sent free. Miss Madeline Tussaud's Establishment, 74, Baker-street. Mrs. W. G. TAYLOR, late HALL & DAY.

MOURNING OUTFITS complete in every-thing necessary for the Trousseau, at one of the most moderate prices consistent with the India Voyage. THE ILLUSTRATED LONDON NEWS

No. 715.—VOL. XXV.] SATURDAY, DECEMBER 2, 1854. [WITH A SUPPLEMENT, SIXPENCE.

THE MEETING OF PARLIAMENT.

PARLIAMENT has been summoned to meet for the dispatch of business on the 12th instant—six or seven weeks before the customary time. The reasons for this step are alike evident and satisfactory. The war has grown to such formidable dimensions since the Prorogation of the Legislature that the Executive needs money to prosecute it with becoming vigour. To ask in such a case is to have. The flower of our youth and chivalry have given their lives to support the honour of our name. Some of the best and bravest blood of the British Islands has been shed in the struggle against Russian domination. We at home must prove ourselves worthy of our brothers in the Crimea. We must not be niggard of our treasures, or of any kind of sacrifice or exertion that may be necessary to secure a prompt and decisive victory. Whatever the Ministry have the boldness and the sagacity to ask—and in such a case as this the greater their boldness the greater will be their sagacity—the representatives of the people will be ready to grant. An increased Income and Property-tax—a loan of twenty or of fifty millions sterling—all will be conceded on the sole condition that the war shall be carried on in a manner becoming the dignity of Great Britain and the mighty interests which are involved in the struggle. The nation is on this point in advance of the Government, and always has been so. Herein lies our strength. In so critical a period of the national fortunes, it is of happy augury that it is not a rash and impulsive Executive, which has dragged a slow and reluctant people into a war, which it did not understand—or which, if understanding, it did not approve; but a generous, determined, far-seeing, and almost unanimous people, which has compelled a naturally reluctant Government to make itself the arbiter of Europe, and to confront in determined warfare, on the broad question of European safety, the most formidable and rapacious potentate of our time. Impartial men make it no ground of complaint that the Ministry were slow and cautious in the movements and negotiations which preceded the outbreak of hostilities. To have rushed into war without adequate naval and military preparation, without calculation of the probable policy of other States almost as powerful as our own, and without securing at least one ally, whose enduring friendship would be cheaply purchased at thrice the treasure which the war is likely to cost us, would have been imprudent, if not unpatriotic. The Ministry did not commit so unpardonable a mistake. Their forbearance placed the aggressor so thoroughly in the wrong, in the moral judgment of all Europe; it assured, for the cause of Great Britain and France, so entire and hearty a sympathy from the whole civilised world; and lifted the question so completely out of the lower regions of interested and selfish policy, into the high atmosphere of pure justice, that their reluctance and patience, instead of proving sources of weakness, became elements of power. But that stage of the question has fallen into the domain of history. It is out of the field of vision, and the world is too busy even to think about it. To-day, and its necessities, has superseded Yesterday, and its short-comings; and the Morrow is coming with sterner duties and augmented responsibilities. What the Ministry have to do, is to throw themselves unreservedly upon the people, and ask them to support by their contributions, direct or indirect, measures for carrying on the war with as much hearty energy as if the foe were in the Straits of Dover.

If the country ever imagined that the war would be a small one, the delusion has passed away. It has become a life and death struggle for the Czar; but, being so, it is also a life and death struggle for his opponents. Neither can yield an inch without peril and disgrace. The Autocrat knows all this, and takes his measures accordingly. It is for the Allies to imitate his example, and to gird up their loins to the work required of them, whatever may be its cost in men, in money, in tears, or in blood. And they will do so, and not allow heroic lives to have been offered in vain. It would be too much to say that the voice of faction is heard no more in our land; but it is not too much to say that treason and sedition are defunct, that disaffection scarcely exists, and that faction itself does not impugn the justice or necessity of the war, though it may criticise unfavourably the conduct of those who are charged with its management. Lord Derby and Mr. Disraeli would not make peace with the Czar, on any terms short of his con-

WRECK OF AN EGYPTIAN VESSEL OF WAR IN THE BLACK SEA.—(SEE NEXT PAGE.)

dign punishment. If these statesmen inveigh against Lord Aberdeen which probably they are bound to do, as leaders of her Majesty's Opposition—they are too patriotic to complain that he is too warlike. Their quarrel with him is that he is too peaceable.

Look where we will, it is evident that the war is a national movement; proving to the world that we are not a people of low-minded shopkeepers, having no thought except of the till; but a people in whom the heroic virtues still survive; and in whose hearts and arms are the sympathies and the energies that make and maintain the greatness of empires. Even if we inquire amongst the classes on whom the hardships of the war press most severely, we shall find that they object to laxity, and not to vigour; that they are jealous of the honour of the British name, and ready for greater sacrifices than any they have yet made in the struggle. There is not a British nobleman or noble matron—whose gallant sons have proved their manhood and their patriotism, and sealed both of them with their blood in the gory battles of the Crimea—who does not own that the war is just; and ask of the Government as the greatest and most urgent duty it can perform, to send out sufficient reinforcements to overmatch the sanguinary and remorseless Russians. There is not a man who gains his bread by his professional exertions, nor a labourer who earns it by the sweat of his brow, who does not glory in being the countryman of those who fought at the Alma, at Balaclava, and at Inkerman. There is scarcely a household that would not cheerfully give up its luxuries and superfluities, if not a portion of its necessary comforts, if it could thereby expedite the punishment of the Czar, and the termination of hostilities. If there be one such household, it must be sought among the drab-coloured friends of the aggressor, who hold their tongues on the brutal massacre of Sinope, but loudly express their horror that fourteen thousand Allies should kill or wound fifteen thousand Russians at Inkerman; among the people who pray for "peace in their time," even although their children and their children's children should have to pay the penalty of wars a thousand-fold more sanguinary. But the nation is made of nobler material. We may presume that the Government is fully aware how nobly it will be supported if it will raise itself to the height of the occasion.

Parliament will have but little other business before it, and may vote funds for the war and legalise the departure of the Militia to foreign duty, in the short period between its assembling and the New Year. But the advantages to be derived from its meeting will not be confined to these two objects, paramount as they are. In the great arena of Parliament, the voice of this free nation is heard to best advantage. The press speaks out boldly; but it is when the Ministers of the Crown, the hereditary legislators, and the representatives of the people, all declare themselves with authority and unanimity, that the spirit of the British nation is best seen and appreciated. Unanimity on minor details is not to be expected; but, on the great principle of the war, we may anticipate that no party manœuvre, or combination of party manœuvres, will impair the value and significancy of the vote of confidence, which the Ministry will ask. Were any party desirous, or strong enough, to outvote the Government, it would be that party which has disapproved of its real or apparent want of vigour. But the demand of men and money, to make which the Parliament has been thus early summoned, deprives Opposition of its only weapon of offence, and renders its policy identical with that of the Ministry. The Legislative and the Executive powers, acting in concord, and speaking each with the authority due to its high position, will exercise at this time a salutary influence on the policy of all Europe. The neutral, the undecided, or the hostile, will see that no hopes are to be formed from the weakness of Great Britain; that our free institutions, and the diversity of opinions which are the result, are no impediments, but aids, to our action as a great Power; and that the war and its prosecution do not rely upon the caprices of a few individuals, who may be in office to-day, and out of it to-morrow; but on the well-understood interest and enthusiastic decision of a whole nation, able and willing to pay the cost of everything which it undertakes, whether in peace or in war. Unity of will on the part of a despot such as the Czar, has, no doubt, many advantages; but unity of will on the part of a great and a free nation has advantages still greater. His serfs and slaves may fail the Czar when fortune goes against him; but a people true to themselves are never to be defeated.

LOSS OF EGYPTIAN VESSELS OF WAR IN THE BLACK SEA.

While the dwellers on the shores of the Atlantic are mourning the loss of the *Arctic*, that was so lately lost on the coast of Newfoundland, with such an awful sacrifice of life, those who live near the Black Sea have been equally shocked by two unhappy wrecks, just taken place not far from Constantinople.

The night of October 30th, the western coast of that sea was visited by one of the most terrific tempests on record. Many dreadful ship wrecks must have taken place; but none more awful than that of two Egyptian ships of war, returning from the Crimea.

The frigate *Bahiré* went on the breakers of Kara Bournon, at eight o'clock in the evening, only two leagues from the mouth of the Bosphorus. In one hour she went to pieces; and out of four hundred souls only a hundred and thirty succeeded in reaching the shore alive.

The other was a three-decker, called the *Mauhtahi Djehat*, and had the Egyptian Admiral on board, said to be Egypt's most skilful naval commander. She, too, has shared the same unhappy fate, being driven on the dangerous shoals of Euiada, midway between Constantinople and Varna. Out of 800 men composing the crew, it is painful to record that 768, including the Admiral, were lost.

In the accompanying Sketch, the *Mauhtahi Djehat* is represented on the craggy rocks of Euiada. Not a vestige of the ill-fated vessel remains to mark the spot where she perished.

The survivors of the *Bahiré* have been brought to Constantinople, where much kind attention has been shown to them.

A Bad Cross.—The Russian Major who, at the Battle of Inkerman, told his men to grant no quarter, and who was afterwards made prisoner, and recognised by an English officer, is stated, by the *Impartial*, of Smyrna, to be named Alexandre Angueliopoulo, of Greek origin, but born in Finland.

The four young Midshipmen—namely, Messrs. Hammond, Kind, Rowden, and Robinson—who, it will be remembered, were taken prisoners in the *Tiger* when that vessel was captured after going on shore near Odessa, have at length arrived in England.

Turkish Reinforcements.—The Porte is making the most strenuous exertions in order to send reinforcements to the Allies in the Crimea. Ten guns of the largest calibre are, on the average, sent off to them every day, with two hundred cartridges for each piece. The Sultan sent for the Seraskier lately, and laid the strictest commands on him to attend to the wants of the Allies. The Seraskier has sent to all the Pachas of the empire, ordering them to recruit without loss of time, and send all the disposable Nizams and Redifs to Constantinople, Varna, and Kustendjeh.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

Paris, Thursday.

The visit of Lord Palmerston has been the chief subject of interest of the moment here; and, as may be supposed, the theme of more speculation and supposition than we have time or space to chronicle, admitting it were worth while so to do. Doubtless Lord Palmerston's presence, especially at the present crisis, is of considerable significance, and interests of no small importance to both the English and French nations attach themselves to it; but rumour endeavours to define these in a manner which sometimes partakes as much of the absurd as of the important. The dinners and receptions offered to the Minister, have made a little break in the general abstinence from such events that the uncertain state of affairs abroad has produced.

On Monday the Emperor passed the troops in review, in the grand avenue of the Champs Elysées, accompanied by Lord Palmerston. The weather being favourable, though cold, the spectacle, which was numerously attended by both French and English, passed with considerable éclat. The idea of the receptions at Compiègne and Fontaine bleau seems to be definitively abandoned, and the Emperor and Empress are about to establish themselves for the winter, or at least the early part of it, in the Tuileries. The health of the Empress, which experienced such a marked improvement from her visit to the South, is again becoming a source of some uneasiness, and requires much and constant care and attention: the journey to Boulogne appears to have affected it unfavourably, as the change has only since then become visible.

The death of General de Lourmel, from the result of a wound received at the battle of Inkerman, is one of those that has the most painfully affected society here. General de Lourmel, who was Aide-de-Camp to the Emperor, was, at the time of the departure of the Prince Napoleon, suffering from ill-health, and was not designed to accompany the expedition. This so painfully affected him, that he ceased not to entreat the Emperor—personally, and through the influence of the Prince—to accord him the permission (which had at first been refused), until it was unwillingly accorded. The fatal result has occasioned his Majesty deep regret, as he entertained a strong personal regard as well as esteem for the General. This distinguished officer, besides his military talents, possessed a remarkable degree of enlightenment and intelligence on all matters of general interest. A pamphlet of his, on the subject of foundling children, contains much that is highly important and instructive on this question. General de Lourmel had barely reached the age of forty, and has left a widow. We believe he had no children.

The improvements in this city are daily receiving new extension. It is said that on the completion of the Boulevard Malesherbes, which is still in operation, a road is to continue the communication from it to Neuilly. The boulevard itself will probably extend across the Faubourg St. Honoré to the borders of the Seine, terminating at a new bridge to be called the Pont d'Alma. A street is projected from the Place de la Bourse to the Boulevard de Strasbourg; the Rue de Rivoli is to be yet further prolonged; and opposite the Hôtel de Ville is to be erected a second palace, in the same style, which is intended to lodge the various administrations that are attached to it.

The Queen Marie Christine has arrived, and is established at the Malmaison.

The Corps of the Cent Gardes have taken possession of their new quarters in the barracks arranged for them in the old Orangery of the Tuileries.

The works for the opening of the Great Industrial Exhibition continue to advance rapidly. The members of the commission have signified to the architects of the building that a large space must be devoted to the works of foreign artists—the German painters and sculptors, more especially. It appears that Ingres, in consideration of his age and infirmities, declines performing any new work for the Exhibition, but intends claiming the loan of nearly all the collection of his paintings from the different places and person s now in possession of them, for the purpose of exhibiting them here. The occasion of viewing these remarkable productions thus united, would doubtless be most attractive; but what is to be the result of such a precedent, supposing it to be admitted? The whole of the building will be insufficient to contain the pictures alone, if other artists claimed a similar privilege; and the galleries and private collections of Europe would, for the moment, be stripped of all the best specimens of modern art. It is said that the Director-General of the Imperial Museums strongly opposes this pretension, which will, doubtless, be disallowed.

A new Journal, for the purpose of combating the anti-clerical opinions of certain other organs of the press, is about to be established, under the editorship of four of the most energetic members of the Catholic party—MM. Louis Veuillot, of the *Univers*; Sainte Beuve, of the *Moniteur*; Granier de Cassagnac, of the *Constitutionnel*; and Barbey d'Aurevilly, of the *Pays*. The title of this paper is, we believe, to be the *Franc-Juge*. Four other new Journals—*La Gazette Parisienne*, *Le Dimanche*, *La Comédie*, and *L'Opéra* (the two last are united)—have, within the last few weeks, been established.

M. Barge, a sculptor of great talent, lately named Professor of Drawing to the Jardin des Plantes, has received an order from the Minister of State to execute four statues, representing L'Ordre, La Force, La Gloire, and La Paix, for the Palace of the Louvre.

Here is a little anecdote, which is not quite new, but which our readers may not have heard:—On the re-appearance of Mdlle. Cruvelli in the "Huguenots," which took place amid a frozen silence, the *Queen of Navarre* addressed her with the opening speech:—"Dis-moi le résultat de ton hardi voyage." The extraordinary *à propos* of the question was so ludicrous that the audience burst into peals of laughter, in which the prima donna, in no whit abashed, joined.

AMERICA.

The steam-ship *Arabia*, which left New York on the 15th ult., arrived at Liverpool on Sunday.

The refusal of the Emperor of the French to allow M. Soulé to pass through France created a great sensation at Washington. The Government are waiting further despatches, as at present advices the Government have no evidence that M. Soulé acted indiscreetly in France; but it is the general opinion that Louis Napoleon would not have adopted such a course without good cause. No immediate trouble is apprehended. The "Know-Nothings" take great interest in this affair, and say, "Send American gentlemen as Ambassadors."

Another dreadful calamity at sea is reported. The ship *New Era*, from Bremen, was wrecked near New York; two hundred and fifty passengers lost. The emigrant ships arriving from Europe are suffering severely with cholera.

Two American vessels have been seized at Cuba, under suspicion of filibustering.

The vote for the Governor of the United States was so close, that it was expected that the official canvass would be required to decide the momentous question. In the State election in Massachusetts, the "Know-Nothings" had been completely triumphant. The election of a United States senator from the member of that body was expected to be the result. Two candidates already in office had turned up as belonging to this party. The "Know-Nothings" had also held a great meeting in the Park, at New York, at which speeches were made and a committee appointed to investigate an alleged illegality in the return of votes. As a meeting in favour of the supporters of J. W. Barker, for the Mayoralty of New York, there was some hustling of an Irish target company, and one or two fights; one party stating that if the opposing candidate went to the City-hall on New-year's-day, he would have to walk over dead bodies. The "Soft Shells" had also had a most enthusiastic meeting, and expressed their determination to triumph over the "malign and dangerous influence of fanaticism, bigotry, and intolerance." A national convention of the "Know-Nothings" of Cincinnati was about to be held, for the purpose of nominating a candidate for the Presidency. Millard Fillmore, of New York, Sam Houston, of Texas, and Jacob Broome, of Pennsylvania, had been named.

THE SIEGE OF SEBASTOPOL.

The Russian despatches from Sebastopol, which come down no farther than the 12th of November, affirm that nothing of importance had happened from the 5th till that date. The *Egyptus* steamer, which left Constantinople on the 15th, brought no letters from Balaclava, the communication with the Crimea having been interrupted by storms. We have, therefore, no accounts from the Camp to later date than the 12th, at which period two French regiments were camped near Balaclava; where they proved a welcome addition to the Highlanders and Marines, to whom the safety of the place had been confided. In addition to the battery of five 8-inch mortars, established to the right of our position, the French were constructing a magnificent square redoubt, which, when completed, will mount fifteen guns. The French pickets now scour the valley of the Tchernaya, and venture even into the ruins of Inkerman. The Russians had withdrawn their camp to a considerable distance from the ground they occupied before the late battle—probably to conceal their future movements.

There had been a good deal of rain, which had rendered the roads almost impassable. The soldiers were much exposed, but they were consoling themselves with the reflection that the Russians were in a still more pitiable condition. Being upon higher ground than the Allies, they are more exposed to the merciless wind, and are, besides, almost to a man without tents or a covering of any kind. If the English commissariat experience difficulty in transporting supplies over the short distance which separates the divisional encampment from Balaclava, in what a position must the Russians be, who are dependent on the regular arrival of large convoys of provisions collected over the whole of the Crimea?

The *Moniteur* of Tuesday says that on the 13th the siege operations were still advancing. Although the weather had become bad, the health of the troops was good, and their spirit admirable. Reinforcements continued to arrive, and the vanguard of General Mayran's division, 1800 strong, had disembarked on the 13th.

As regards the Russian loss on the 5th, the *Moniteur* says it must have reached 16,000 men in killed and wounded. The Allies had buried 5000 Russians left dead on the field. English and Turkish reinforcements had arrived on the 6th to the number of several thousand men. The *Moniteur* points out that this intelligence confirms the accuracy of Lord Raglan's estimate of the enemy's loss; and adds that from another source it has learnt with certainty that there were 70,000 Russians engaged against the Allies on the 5th.

A letter from St. Petersburg states that, when the muster-roll of the Russian army at Sebastopol was called over on the 6th November, no less than 15,000 men were absent.

THE STORM OF THE 14TH NOVEMBER.

The steamer *Australia*, which left Constantinople on the 20th November, brings some particulars of the losses sustained in the storm which visited the Black Sea on the night of the 14th. The English were said to have lost thirty-two transports on the coast of the Crimea. The screw-steamer *Prince* and the *Sea Nymph* were reported as having foundered, with all on board. Three smaller English steamers were stranded; and, of the vessels of war, the *Sanspareil* was driven on shore, though she had her steam up. The *Britannia* had five feet water in her hold. The *Agamemnon* was driven on shore, but managed to get off; and the engines of the *Samson* were seriously damaged. The *Retribution* was also stranded, but got off by throwing her guns overboard. The *Terrible* escaped without damage. The French line-of-battle ship *Henri Quatre*, and the *Phlegon*, were lost off Eupatoria, and another French steamer was dismasted. In speaking of the storm, the *Moniteur* says:—"Fortunately the hurricane of the 14th did not extend beyond the Black Sea, so that the numerous vessels now on their voyage in the Mediterranean, with reinforcements and supplies for the army of the East, performed their passage with celerity."

So far as can be ascertained from the various scattered statements regarding the sailing of reinforcements for the Crimea, it appears that the Allied army in front of Sebastopol will amount to upwards of 100,000 men by the middle of this month.

FRENCH REINFORCEMENTS.

Of the four divisions which the Emperor is sending out to the East, the two first have nearly all embarked at Toulon, where ships of the line and steamers of large dimensions were prepared to receive them. The passage to the Crimea is one of from ten to fifteen days in this season. These 32,000 men can therefore arrive at Sebastopol towards the 10th of next month. The French troops also have not ceased to receive, almost daily, as reinforcements, detachments from Algeria and Gallipoli, without reckoning the men cured of wounds or illness who are sent from Constantinople to rejoin their corps.

The entire Baltic squadron, which was to winter at Cherbourg, is to proceed to Toulon, with the exception of the *Austerlitz*, which requires repairs. The new destination of the Baltic squadron has been officially announced to the Admirals and authorities of Cherbourg. These splendid vessels are to sail at a moment's notice for the Mediterranean on an important mission. On their return, some of them are to be converted into screw-ships for next year's operations in the Baltic.

The number of Sisters of Charity sent to the East to tend the sick and wounded of the French army amounts to 62. They are attached to the ambulances and hospitals. Some of them have to bear the hard life of the camp, without any other shelter than a tent. The Russian prisoners are attended by Polish Sisters of the same order. The Ottoman Government lately applied for a certain number to take charge of the Turkish hospital at Constantinople, where they are paid the greatest respect, and are perfectly independent.

THE WAR ON THE DANUBE.

The announcement that two divisions of French troops are about to embark for the Danubian Principalities, in addition to the two which have already embarked for the Crimea, will probably have the effect of making Austria take a more decided course than she has yet done. As to Omer Pacha, the utmost uncertainty prevails regarding his movements. A few days ago it was again stated that he was about to make a movement in Bessarabia, where the Russian army has been weakened by sending forces to the Crimea. It is now said that he is going into winter quarters, in consequence of orders from Constantinople; and that he has sent 10,000 of his soldiers to the Crimea. Should that be the case, we need not look for any movement on the Danube.

The complaints of Austrian intrigue and treachery to the Turkish cause continue. A letter from Bucharest states that Count Coronini lately presented a document to Omer Pacha, which proved to be a formal dismissal of Massar Pacha (known as Sir Stephen Lakeman), from his post as *Commandant de Place*. The order was dated a long time back, and had, no doubt, been obtained by Austrian influence. Omer Pacha instantly handed the letter back, and informed Count Coronini that he received no orders from foreign Generals, and, above all, not from a General that had never drawn his sword in defence of Turkey. The Austrian Commander took his leave in great wrath, and will, no doubt, make an angry report to Vienna. Massar Pacha offered to resign, but Omer Pacha refuses to accept his resignation, and there the matter stands. The Austrians at Bucharest boast that they will have Omer Pacha dismissed if he is not very careful.

A Bucharest correspondent of the *Bremden Blatt*, whose pen is evidently in the service of the Austrian Government, writes that it was the object of the English party to publish independent newspapers at Bucharest, Krajova, Buseo, and Braila. The Hospodar—who is now to Austria what he formerly was to Russia—refused to grant the privilege demanded, "until the new press laws should be published." The Austrian papers gave the preceding news under the heading of "An interdict laid on the English press in Wallachia." All this looks very unlike a cordial understanding between Austria and the Western Powers.

THE BALTIC FLEET.

Letters from Hamburg, in the *Belge Independance*, whose Russian bias is well known, state with no small degree of confidence that the merchants of the Allied Powers, navigating the Russian seas, have been chased by several of the enemy's war steamers, that three have been captured, and taken into the port of Riga, the entry to which, up to the 15th inst., was free from ice. The rumour has been repeated in other quarters; but it appears to be a mere invention, with no other foundation than the bare fact that since the larger ships of the fleet withdrew from the anchorage off Nargen, the communication between Sweden and Finland has been re-established as heretofore. It is also stated in a letter from Kiel, of the 23rd ult., that several of the Russian line-of-battle ships had put to sea, for the purpose of uniting with the squadron at Helsingfors, and that they had scarcely got out of harbour ere a heavy gale came on. The flag-ship lost her rudder, and three of the ships in company got on shore. Their critical situation being observed, steamers were sent to their assistance, suc-

ceded in towing them off, and conducted them back to port. Th ear is said to be highly incensed at the occurrence, and has remarked at he considered it an extraordinary circumstance that the ships of nland and France had for months past been navigated in the Baltic as without meeting with any casualties—whereas his own fleet, the ickers of which were more perfectly acquainted with the situation of e various shoals which exist, had, on merely being ordered to proceed Helsingfors, been scarcely out of harbour, placed in imminent danger e ships entrusted to their command.

AUSTRIA AND PRUSSIA.

The following despatch, addressed to Count Esterhazy, the Austrian bassador at Berlin, by Count Buol, on the 9th November, contains e latest declaration which Austria has made relative to the present ropean crisis, and the course which it proposes to take:—

The Cabinet of Berlin replied to our communication of the 23rd of last onth by a despatch, communicated to us by M. D'Arnim, of which a y is sacrifice to the past the divergencies of opinion which have for so g a time compromised the value and effect of the treaty of the 20th ril, and to take resolutions which actual circumstances may claim of m in the name of its participation in the alliance (offensive and de- ive) of the [illegible] Appl.

[illegible] of that dispos tion of Prussia that we recom- nded in the instructions to Baron Prokesch, and communicated in stance to the Cabinet of Berlin, to avoid as much as possible sterile cussions on the point of the obligations already contracted in virtue of treaty of the 20th April, at the same time, we proposed, in e points, the project of a federal decision, as it seemed to us, accor- ng to the urgent manner by the common interests of Germany in the al state of affairs. It is, therefore, with very great satisfaction that found, in the propositions made by the Cabinet of Berlin, in reply to our last communications, that the three points in question are oduced in their essential dispositions.

e are happy to see in the accordance an assurance of the direction ards the same end of the efforts by which the two German Powers y themselves to obtain the solution of the serious complications of moment. But the more value we attach to our accord with Prussia, the more we hasten to declare that the Prussian Cabinet will not insist upon con- ns and restrictions of pure form which would very probably vitiate hance of the speedy establishment of peace, and might even, in the se of events, compromise the most important interests of Austria and many.

e have not the slightest desire to enter into discussions of pure form the question is so serious. We therefore think it of very little con- ence to examine whether it is better to select, for the disposition to ken, the more simple form of a federal decision, or that Austria and ssia would first come to an agreement (*a preliminary Accord*) but reen themselves on the dispositions to be taken, and then submit them to the public.

Although the adoption of this last form does not appear necessary, nce by the 20th article of the treaty of the 20th April, as consequence of the accession of the Confede- n, has taken a greater extension, and has become, as regards its exe- n and a new eventual extension, the object of the decisions which ld require to take conformable to the federal constitution;

on the other hand, imperious considerations prevent us from nding, under any form whatsoever, contractual engagements binding ourselves in the sense of the additional dispositions proposed by ia.

ceding to the Prussian project, we ought to engage ourselves by a ll convention to address, conjointly with the great contending pur- a new invitation to the Cabinet of St. Petersburg to accept the bases ers; and it should only be the result of such a step on it should de- ine if Germany should bind herself or not (*obligerait ou non*) to d our position in the Principalities, and whether she would leave us full liberty of action towards Russia.

ther the conditions upon which it is wished to make depend (*dont on aire dépendre*) the promise of a common defence, nor the restric- ns which appear to be an intention to put upon our eventual reso- n appear to us sufficiently justified.

y should the [illegible] of the Confederation only be assured in the [illegible] Powers [illegible] reject the bases of peace? Supposing [illegible] accepts them, but the Western Powers refused to enter into [illegible] negotiations, and that the war continues, would it not be still our task to associate ourselves in the Principalities? And for what reason would we not, in that case, count upon the assistance of Germany?

make at once the concurrence of parties to the alliance depend upon events and the declarations of Russia and the interpretation given on by the Allies, would be to deprive beforehand the steps that ght be taken at St. Petersburg of a portion of their weight. Opinion is ly to be divided on the rights and obligations which result from ty of April; that it is to be feared that the adhesion of Prussia to ite new controversies, with the resistances of vague declarations, or ssible difficulties of different interpretations. We should therefore have otives in not formally engaging ourselves to take steps of this de- on in common, at least as long as all the German Governments do ish on one powerful body, capable of accepting all the ulterior uences of such steps.

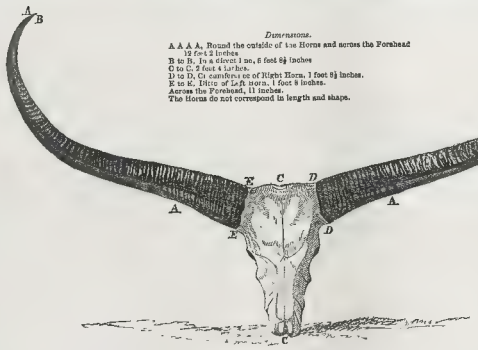
he Prussian Cabinet justly observes, the conduct of Russia will be exercise a very great influence on the measure in which we aim the assistance of our allies. Russia may adopt pacific rela- , and give guarantees against any attack on her part; she may e always (*éloigner de nous*) the danger with which we are menaced present attitude. But she will have the more motives for doing so, e inmate is the alliance of Germany. It is precisely in this re- t it appears necessary to us to extend the common assistance of ay to our position in the Principalities, without making it depend he acceptance or refusal of the bases of peace by Russia.

ally, the want of these restrictions appears to us to exist, as, ng to our proposals, [illegible] from the Powers [illegible] proposal according to circumstances [illegible] degree of danger that would ng upon the cause [illegible] would, always and should be given.

ever, although Russia [illegible] the manner in which we refused to ite the propositions [illegible] to her, as also in the impos- of return [illegible] own interests, to the principles on the basis of which [illegible] orically [illegible] by no means in the intention of ab- [illegible] Prussian despatch to exclude all circumstances which such a step might be taken with the chances of success, in accord with Prussia and the Germanic Confe- The disagreements of our opinion on such a subject [illegible] the [illegible] put [illegible] [illegible] [illegible]

MATACONG, ON THE WEST COAST OF AFRICA.—THE PIER, WAREHOUSES, ETC.

more than four years. With the exception of the proprietor (a British subject) not one European is in the establishment; and only one (a youth) among the agents he employs at the numerous factories, or minor establishments, in the several rivers of the neighbourhood. The principal shipwright is a brother of Caurabar Camker, the well-known Sherbro Chief. The Clerk and Superintendent of the Store-yard is a son of the Chief of Dubrica, in the Soombooya territory; and the sons of other Chiefs are also on the establishment—each department having several apprentices. Pending the erection of the buildings, during the time mentioned, trading has been carried on—the amount of exports and imports increasing, till the latter, in British manufactured goods alone, amount, in the present year, to £60,000. According to the printed list of entries and departures, as many as eighty vessels, under British, French, and American flags, anchored at the port during last year; and the scarcity of shipping, on account of the war, causes a deficiency, at the present time, of fourteen or sixteen ships to take away the native produce ready for shipment. All this has been effected within the period named, by the experience and foresight; the skill, energy, and enterprising spirit of a single individual—Mr. Nathaniel Isaacs, a merchant engaged for many years in the African trade, and who, having gained the confidence and respect of the several chiefs of the neighbouring territories, not only holds the island upon a secure tenure, but has had all the rights and privileges of a chieftain conferred upon him at a meeting of those chiefs, convened expressly for the purpose. Here, then, I was wholly unprepared, with many others, to witness, in so remote a spot, the celebration (for the first time) of her Majesty's birthday, on the 24th of May last, when a general holiday was given to the inhabitants. The *Fox*, cutter, belonging to the island, had arrived a few days before from Sierra Leone, with several gentlemen and ladies residents in that colony, and some officers from the garrison, to share in the festivities. At an early hour the militia assembled in front of the dwelling house; and, after going through different military evolutions, fired a *feu de joie*, and joined in three hearty cheers, responsive to the cry of 'Long Live Queen Victoria!" the band playing the national air. At half past eleven the little military body, with the band, and colours flying, marched down to the Upper-wharf, where they took up their position; and, at twelve precisely, a Royal salute of twenty-one guns was fired from the battery on the pier: on the cessation of which "God Save the Queen," "Rule Britannia," and a variety of lively airs, were played by the band; the militia again firing a *feu de joie*; whilst cheering, as from the whole impulse of every heart present, continued for some time; the Africans, in a sort of rampant exultation, hurrahing and throwing up their caps with all the fervent loyalty of an English mob. A sumptuous dinner was provided by our host for a larger number of guests than his hospitable table had for some time accommodated. The Queen's health, and other loyal toasts, were drunk with all honours. Dancing was kept up till a late hour, as well outside the dwelling as within: the Africans, in different parties, according to their tribes, indulging in their own peculiar dances and music. I have now only to add that, in quitting this charming spot, I cannot do otherwise than retain a gratifying recollection of the happy days I have spent on it.



Dimensions.

A A A A, Round the outside of the Horns and across the Forehead 12 feet 2 inches
B to B, In a direct line, 6 feet 8½ inches
C to C, 2 feet 4 inches.
D to D, Circumference of Right Horn, 1 foot 8½ inches.
E to E, Ditto of Left horn, 1 foot 8 inches.
Across the Forehead, 11 inches.
The Horns do not correspond in length and shape.

SKULL AND HORNS OF A WILD BUFFALO, SHOT IN CENTRAL ASSAM.

BUFFALO-SHOOTING IN ASSAM.

The Buffalo is found of majestic growth in a wild state in the numerous tree-jungles of Assam, and the killing of this fine animal is one of the favourite wild sports of the country. In a shooting party made for this purpose, in April, 1842, a remarkably fine Buffalo was shot by Lieutenant-Colonel Matthie, near Tezpore, in Central Assam. The skull and horns of this stately specimen of the ox tribe have lately been brought by Colonel Matthie from India, with the intention of presenting them to be added to the already fine collection of horns in the zoological collection of the British Museum. The dimensions of the horns and skull are annexed to the Illustration.

FORT FILLMORE.

A Correspondent, who writes from Fort Bliss, Texas, has favoured us with the accompanying View of Fort Fillmore, in New Mexico, one of the garrisons first built by the United States Government on the Rio Grande del Norte, after the treaty of Guadalupe Hidalgo, between Mexico and the United States. The situation of the Fort is exceedingly picturesque, and commands almost every variety of scenery. In front, and for miles north and south, the magnificent Rio Grande is seen wending its stately and troubled course through lofty, snow-capped mountains and fertile valleys. In the background are seen the great chains of the White and Sacramento Mountains; and, far to the south, is the great Guadalupe range. On the west of the Rio Grande, in full view of the fort, is the great Mesilla Valley, its prairies extending to the westward farther than the eye can reach; and, with its table and bottomlands, affording a pleasing contrast to the rough, huge mountains which on three sides surround it. All the mountains in the vicinity of Fort Fillmore are known to be exceedingly rich in iron, copper, silver, and gold ores. Silver mines are now worked.

The Mesilla Valley had been for some time disputed territory, when the question was settled by purchase by the United States Government; thus opening another beautiful region of country to American enterprise.

The climate of the Mesilla is unsurpassed; its soil is equal to that of any portion of the globe. Already are seen growing the grape, fig, peach, apricot, apple, and pear, and corn, wheat, oats, and barley; and all the tropical fruits will grow here as luxuriantly as in any latitude.

A few years hence will be seen an industrious and happy people enjoying this charming country, where now the Apache, Comanche, Navajo, Tongawas, and Lipan, are the chief proprietors.

Fort Fillmore has therefore become an important post, and will doubtless soon attract public attention, by reason of the varied information emanating from its vicinity, and the great private and public interests it will be called upon to protect.

FORT FILLMORE, NEW MEXICO.

THE BROMBOROUGH POOL CANDLE-WORKS.—FROM THE MERSEY.

PRICE'S PATENT CANDLE COMPANY—BROMBOROUGH POOL WORKS.

THERE is, probably, no branch of our domestic manufactures in which higher scientific progress has been made, of late years, than in the art of making candles. The application of new substances, and the various processes requisite for their development, have largely employed the resources of a new branch of chemistry since the year 1811, when it was founded by M. Chevreul. Hence arose the science of candle-making, the ingenuity and importance of which, apart from its great commercial extent, led to the appearance in the ILLUSTRATED LONDON NEWS, December 8, 1849, of a series of Engravings of the seat of this new art, "the Stearic Candle Manufacture," as carried on at Price's Candle Company's Works, Belmont, Vauxhall. In the accompanying account of the writer's visit to the factory, the several stages of the process are briefly explained; and the large growth of the subject in public interest, since the above date, has proved that we did not overrate its importance in thus fully illustrating the subject in our pages. The works at Belmont have since been greatly extended. At the Great Exhibition of 1851 the Company received a Prize Medal; and in the lecture delivered to the Society of Arts, by the managing director, Mr. G. F. Wilson, early in 1852, the history of the new manufacture was fully detailed, and its extent represented, in the fact of the works having employed in the previous winter above 900 hands, and made 100 tons—£7000 worth of candles weekly. The subject next presented a new phase of social interest. In this year the Company very properly took the educational, moral, and religious charge over the persons (and especially the young persons) in its employment, thus adding to the list of those employers who, without legal compulsion, have endeavoured to provide for the improvement of their work people. In an able paper in the *North British Review*, November, 1853, these operations are narrated; the contribution being properly entitled "Candle-making and Christianity," from its proving that advances towards the highest principles of Christian faith and love have been successfully made in this Surrey Factory. Meanwhile, the subject has of late acquired additional importance in a commercial point of view. The progress of improvement in the manufacture has constantly gone on: new English, French, and, latterly, even a highly-promising American process have been brought forward—only, however, to be superseded by a new development of the Company's processes. The Company now employ just 2000 persons; their capital is £700,000; called up £612,000. Their operations have been considerably affected by the war in which we are at this moment engaged: for example, the importation of palm-oil—the raw material of stearic candles—has increased about one-fourth of the whole quantity, which fourth is equal to one-eighth of the tallow brought to this country from Russia.

The works at Belmont having been extended as far as practicable, the Company looked out for "fresh fields" for their enterprise. Vauxhall is over-crowded with factories; the lofty chimney-stalks are thicker here than elsewhere in the suburbs; and the atmosphere is scarcely calculated to lighten labour; and to the moral training of the establishment, rather than to the healthful advantage of the site, must be referred the nimble hands and cheerful faces which may be seen in the workrooms of the establishment, as well as in its long, iron-roofed play-shed. Accordingly, in addition to the Company's factory at Belmont, extending over nearly two acres, with large branch works at Battersea, another factory has been started at Liverpool, the chief port of importation for palm-oil. Now a large portion of the custom of the firm being from Lancashire, Yorkshire, and the northern counties, a heavy amount of double carriage, of the raw material first, and then of the manufactured article, will be saved by this new factory; and, if anything were wanted to add to the interest of the subject, we might remind the reader that the trade in palm oil on the African coast is the chief economical antidote to the slave-trade at the present day, the beneficial working of which must have been felt by the President of Liberia, when he last week proposed to inspect the Belmont Factory; and we now purpose taking the reader to the extensive works near Liverpool.

The scene of these operations is Bromborough Pool, on the Mersey about four miles above Birkenhead. The principal works being, in great measure, self-contained, and depending on their own workshops for the trades they employ, the proximity of a great town is not essential. The Company were, therefore (except in the item of good water carriage), tolerably unfettered in choice of position. The price of land about Liverpool put a stop to any thought of settling there; some liberal offers came from the Wallasey neighbourhood; but the Company finally chose the pretty country place above named, and bought sixty acres of land. They were met, at first starting, by an act of great kindness and liberality on the part of Mr. C. K. Malawaring, the proprietor of the estate of which the above land formed a part.

They arranged for the purchase of a less quantity, of land than it afterwards appeared would be required; but Mr. Malawaring, on being made aware that if they were limited to this quantity, some of their plans for the improvement and comfort of their people might eventually be seriously interfered with, allowed another large field to be included in the purchase, at the price per acre originally agreed upon, notwithstanding the increase of value given in the meantime by the establishment of a large manufactory to all the property in its neighbourhood. Indeed, it was only his seeing in the *Quarterly Review* an article on these plans that induced him to alienate any portion of his land for manufacturing purposes; his first answer given to the Company's application, while absent in Italy, and before seeing that article, being a refusal to sell at any price, though he offered to let for a long term of years—an offer the Company, of course, could not accept, as it was out of the question to put so great a mass of property as they were about to erect upon anything but their own freehold land.

In preparing the ground, by cutting off a slice of rising ground, and with it raising the adjoining piece of rush land six feet, were obtained above four acres of level ground, well above the rise of the highest tides, affording facilities for landing and shipping goods. On this area was built the factory, a one storied building, with walls twenty feet high; roofed by Mr. John Walker, of London, with galvanised corru-

THE BROMBOROUGH POOL CANDLE-WORKS.—INTERIOR VIEW UNDER THREE SPANS OF ROOF.—FROM A PHOTOGRAPH.

gated iron, in spans of forty feet, covering three acres and three quarters.

The fourteen steam-boilers are fitted with self-feeding, smoke-consuming furnaces. The stoke-hole is nearly 300 feet by 80; adjoining one corner is the engine-house containing a pair of 20 horse horizontal, high-pressure, expansive, and condensing engines, from drawings by Mr. E. A. Cowper, who has since been appointed the Company's consulting engineer.

The machinery and apparatus have been arranged after the experience and on the scale of the Company's Belmont and Battersea Works combined into one manufactory. This increased extent of manufacturing power will lead to the reduction of prices, will meet the enormous demand which has sprung up from Australia, and will relieve us from any fear of the French interfering with our trade in the home or export markets, of which, at one time, there were symptoms.

The works include shops for the principal trades employed—engineers, smiths, copper-smiths, tinmen, coopers, carpenters, bricklayers, and weavers; and gas works. It seems rather absurd that candle-makers cannot light themselves; but, whatever gas may be in closed rooms for great open buildings, it is of course the cheapest and safest light.

The fresh-air open space and cottages give the factory at Rue-en-Head a great advantage over the parent works. The cottages will attach the people much more closely to the place. The little gardens are very popular; and, considering the short time of occupation and the nature of the soil, their appearance is generally very creditable.

One point connected with the new works, much to be regretted, is that their mode of construction, and the way in which the processes are worked, must prevent the admission of visitors.

CALENDAR FOR THE WEEK.

SUNDAY, Dec. 3.—Advent Sunday. Flaxman died, 1826.
MONDAY, 4. Cardinal Richelieu died, 1642.
TUESDAY, 5.—Mozart died, 1792.
WEDNESDAY, 6. St. Nicholas.
THURSDAY, 7.—Algernon Sidney beheaded, 1683.
FRIDAY, 8.—Con. B. V. Mary. Mary Queen of Scots born, 1542.
SATURDAY, 9.—Cowley Cibber died, 1752. Gay died, 1732. Milton b., 1608.

TO CORRESPONDENTS.

ALPHA.—A ticket to the library of the British Museum, permitting the party to make extracts from MSS., can be obtained on the recommendation, in writing, of any person of respectability known to the Chief Librarian, or of any literary, scientific, or official gentleman of character. No fee is required.

FOG—The *Kelso Archæological Journal*, and the *Ulster Journal of Archæology*, as well as the *Weekly Telegraph*, Dublin newspaper, contain papers connected with Irish families.

A. The second Grice—to be heraldically correct must be on the sinister side. If "the wing" be married with the proper lines or dots of Petre Sancta, the colour or tincture can be easily discovered.

ORLANDO.—The Arms of Graham, of Esk, Cumberland, are:—Or on a chief sa., three escallops of the field.

J. S. T., Sheffield—Lord Raglan was, previously to his elevation to the Peerage, Lord Fitzroy Somerset, G.C.B. His Lordship's Arms are:—Quarterly, France and England, within a bordure compony arg. and az. Crest: A portcullis or nailed sa., with chains pendent thereto, gold. Supporters: Dexter—A panther, arg. spotted of various colours, fire issuant from the mouth and ears ppr., gorged with a plain collar and chained or. Sinister—A wyvern, wings endorsed vert, holding in the mouth a sinister hand, couped at the wrist gu. Motto: "Butere vel mittere spernor."

AN OLD READER. See "Sidney's Three Colonies of Australia."

M. R. B., Isle of Man; E. M. M., M. W.; and J. G. M., Putney.—Declined.

W. M. T. (British Army in Turkey), is thanked: the Sketches of Bulgaria did not reach us in time to be available.

JUSTICE is not exempt.

F. M., Rudham.—Your coin is a penny of Edward the Confessor, 1042-1066, very common, worth about 3s.

J. M. L., Crick.—Declined.

R. C., Hartegate, and J. F. S., Accrington, are thanked; although we have not space for their communications.

G. B.—The *escorp*, or scarp, is the interior side of a ditch, or that next the fortress; the *counterscorp* is the exterior side, and faces the scarp. When it is strengthened by masonry, it is said to be revetted, and the brickwork is called the revetment. A redan is a fortified work of two faces forming an angle in front, employed to cover troops, or the entrance to a principal work. The curtain is the connecting line of rampart or parapet between two projecting works. *Gabions* are cylindrical baskets, open at both ends, used in field fortification; being planted on the ground and filled with earth, in the formation of a parapet. *Fascines* are large *fagots*, strongly bound at both ends, and in the middle, and used in raising batteries, lining up ditches, strengthening ramparts, &c. The *taffrail*, or the upper part of a ship's stern, which is usually ornamented. The Dutch call it *taffereel*, from *tafel*, a table. The *top-gallant mast* (pronounced *to-gallan'-mast*), is the third division of a mast; the second being next above the lower mast, being called the top mast. The *port*, or *larboard* side of a ship, is that to the left hand, looking forward; the *starboard* side is that to the right. We know of no work specially devoted to an explanation of terms in military and naval science.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, DECEMBER 2, 1854.

THE signal discomfiture which was inflicted upon the Russians at the glorious battle of Inkerman, seems to have had the effect of deterring Prince Menschikoff from further aggression. There was a report during the week that the garrison of Sebastopol had made a sortie, on the 13th of November, against the French, and that it had been repulsed, after a severe battle, with heavy loss on both sides. But Prince Menschikoff, in his various despatches up to the 19th, makes no allusion to any such event, and the report was generally treated as unfounded, even before letters from Balaclava of the 13th were delivered in London, which proved its falsehood beyond a doubt. We do not hear that the Russians have received any reinforcements since the battle of Inkerman, or that they are likely to receive any for several weeks. On the other hand, the armies of the Allies are daily augmented by arrivals from England, and from the French ports in the Mediterranean; and their camp at Balaclava has been transformed into a fortress, which will shortly rival Sebastopol itself. In their intrenchments they may not only defeat any attempts of the Russians to storm their position, but will be enabled to receive supplies of every kind in the greatest abundance. The Euxine, notwithstanding the severity of its tempests, being open to our navies, the liberality of Great Britain and France will provide every possible comfort for their heroic armies; and their sense of the urgency of the case will induce both Governments to pour in reinforcements. The Russians in Sebastopol are in a less favourable condition. While the severity of the winter will be as trying to their troops as to ours, the difficulty of procuring supplies overland from Odessa, via the Isthmus of Perekop, will be infinitely greater than those attending a sea voyage. Already the roads in the Crimea are stated to be almost impassable; and the division of General Dannenberg—the arrival of which inspirited Prince Menschikoff to make his fierce, and, as he hoped, his final onslaught at Inkerman—brought no commissariat along with them. If the Russians were placed on short allowance, before the 5th of November, they are likely to be reduced to still greater extremity, by the presence among them, of the still numerous though shattered remnant of Dannenberg's force. Desperation may thus compel them to make a renewed attack upon the Allied armies. If they fulfil any such intention, we may trust our heroic soldiers to add a fourth victory to the three great names of Alma, Balaclava, and Inkerman. Perhaps, however, the Allies may find it expedient to resume the offensive, in which case we may trust, not alone to the gallantry of the French and the English, but to the skill and daring of Lord Raglan and General Canrobert, to achieve a splendid, if not a decisive victory. At present, however, the general impression seems to be that little more will be done on either side until the spring. The Allied armies are taking measures to winter in the Crimea, and to re-open the campaign on a grander scale, with reinforcements that shall raise their numbers to an equality with those of the Russians. The memorable struggle on the heights of Inkerman proved one Frenchman or Briton to be as formidable in fight as four Russians, so that equality of numbers will be an inequality in courage, discipline, and every soldierly quality—and all to the disadvantage of the Russians. The Allies would, with such reinforcements, be enabled to do what might have been done before, if men could be as wise before as after the event—viz., to station a force at Perekop, to prevent the entrance of a single Russian or a single ounce of food into the Crimea, and another force to complete the investment of Sebastopol. With such a disposition of the Allied strength—and it is evident that France and Great Britain are able to accomplish far more than this—Prince Menschikoff would be speedily reduced to the alternative of extermination, or of unqualified surrender. The obvious danger of being caught in such a trap in the spring, will perhaps compel the Russians to make one or more attempts to dislodge the Allies during the winter. But the most recent letters from the Crimea state that the French and British armies have already been reinforced to such an extent as to be fully able to repel any attack which the Russians may make against them. The duty of the Governments of France and England is, therefore, to maintain those troops in the highest state of efficiency, and to keep increasing their numbers to the requisite amount, so that in the spring they may be able to wrest the Crimea from the Czar by one grand and decisive effort. They have already commenced their operations in this sense. Warm clothing for the troops has been despatched in large, and, it is to be supposed, in sufficient quantities; and wooden houses, in numbers adequate to lodge five-and-twenty thousand men, have already left, or will, in a few days, leave our shores. The French Government is acting with similar foresight—so that we may expect both armies will be well provided.

In the severe storms which commenced in the Euxine on the 11th, and continued with more or less violence until the 14th of November, we regret to learn that the British and French fleets both suffered severely. Besides a large number of transports, the British lost one magnificent steam-ship, the *Prince*, recently purchased at a large price, and which went down with all on board. The *Sea Nymph* shared the same fate. Several ships of war were seriously damaged. The *Retribution* only escaped foundering by sacrificing her guns. The French lost two war steam-ships of the first class, besides suffering other injury. For all this, the Czar will, doubtless, chant "Te Deums," and call upon his deluded people to return thanks to the Almighty for a visible interposition in favour of orthodox Russia, assailed by heterodox France and unfilial England. But our affliction, though severe, is not ruinous, and will not be exasperated by self-reproach, that the loss might have been avoided. Man cannot war against the elements; and British and French energy will make amends for the loss, and be thankful, great as it was, that it was no greater, and that it can be met with an unrepining spirit.

The Czar is rejoiced to find that he has some friends in England, and takes care to represent to his subjects that John Bright, the English Quaker (but un-English logician) speaks the mind of the British people, when he maintains in his letter to Mr. Watkin that Russia is right, and his own country wrong, in going to war in defence of the Sultan. John's letter has been reproduced *in extenso* in the *St. Petersburg Gazette*, of which the Czar is editor, and Count Nesselrode the sub-editor. We suppose neither the Czar nor the Count will tell the Russians, in their next week's paper, that John was burnt in effigy in the public thoroughfare of Manchester, amid the acclamations of the people; and that two "traitor loons," who had been vile enough to express the hope that the Czar might be successful, have been expelled from the Exchange-rooms of two of our cities, amid the indignation or contempt of their former associates. The Russian serfs may be deceived; but the Czar must know thoroughly well that John Bright spoke for John Bright alone—that he and his opinions are scouted by the British people—and that, in all probability, John Bright will never again have the honour of a seat in the British Legislature.

THE attempt of the Czar to mystify the German Powers, to afford a pretext to his friend the King of Prussia for embarrassing the action of Germany, and for retarding the ultimate adhesion of the Emperor Francis Joseph to the cause to which Austria stands pledged, is politic, and may not be altogether unsuccessful. It is intended for the latitude of Germany, and is based on a thorough knowledge of the Russian sympathies of the German Courts, and the solid inertia, as well as bewilderment, of the popular mind in all the States, major and minor, of the Germanic Confederation. But in France and Great Britain, the willingness which the Czar expresses to listen to negotiations on the basis of the "four points," is, and will continue to be, treated with contempt. The day of the four points is gone by; and, while admitting that, if interpreted without subterfuge or reservation, they may be good enough in their way, the Allies will listen to no terms of adjustment that do not comprise a fifth point, still more essential to the security of Europe. That point is the cession of the Crimea, and the consequent dismantlement and destruction of the fortress of Sebastopol. The Czar, while professing his desire for peace on the basis of the four points, will not, we may be assured, listen at present to any proposition on the basis of point the fifth. It will be the duty of the Allies to strengthen their powers of persuasion by the sword and the bayonet. A Sovereign whose Generals issue the inhuman order to give no quarter to the enemy, is not to be reasoned with. He makes himself a savage, and a king of savages, and must be met with the only argument that savages can understand.

As regards the approximation which appears to have been made towards a better understanding between Austria and Prussia, we must confess our inability to see in what manner Austria has merited the reproaches which certain parties and journals in this country are continually launching against her. It must be evident that Austria has a very difficult game to play; and that if she could be assured of the co-operation of Prussia, her policy towards Russia would be unsimplified that she could, without fear of invasion in her own territory, ally herself by deeds as well as by words with Great Britain and France. Austria has not moved fast enough to satisfy the Western Powers, or even to do justice to her own character; but it should not be forgotten by those who criticise her conduct that the united action of Germany, which she has so pertinaciously striven to accomplish, would reduce the Czar to extremity. Great as his power and resources may be, he could not, unless he were utterly mad, hope to carry on a successful war against the whole force of Germany, in addition to that of France and Great Britain. Although Austria has been timid, nothing has yet shown her to be dishonest. She is pledged to the policy of the Western Alliance, and will, perhaps, carry Prussia and the rest of Germany along with her. If she do, the war will be shortened, and deprived of no small portion of its bitterness; and Francis Joseph will be enabled to play in European politics, the high and dignified part which becomes his position and character, and the interests of his people.

But though the Allies may leave the Austro-Prussian negotiations to "drag their slow length along" at the pace which seems to suit the mental as well as the physical condition of the casuists of Central Europe, they are not relieved from the necessity of taking measures to ascertain whether those Austrian functionaries in the Danubian provinces, whose pro-Russian proceedings at Bucharest have lately scandalized the friends of Turkey, are acting with the authority or cognizance of the Emperor. If the world were to judge of Austria by the conduct of General Coronini, it would declare Austria to be in active alliance with the Czar. It is high time that the conduct of that officer should be disavowed, if the Emperor Francis Joseph desires to stand well with France and England. General Coronini not only treats the Turks with insolent contempt, but he acts as if he were determined to convert Moldavia and Wallachia into Austrian provinces—to goad the inhabitants into hostility by his oppression—and to make their hostility a pretext for annexation. When the Turkish army under Omer Pacha was about to march from Bucharest towards Bessarabia on the 11th of November, the Austrian General wrote a letter to Omer Pacha, prohibiting his march further than between two small villages on the line of the Sereth, not more than four miles apart, named Saverni and Matchiti. If this line of march had been followed by the Turkish Commander, the Turkish army would have been compelled to pass through a narrow gorge, where a very small force of Russian troops might have surprised and annihilated it. We believe that at this very time a large Russian force was established in the vicinity of these villages. It is probable, had the Turkish army marched as directed, that the Russians would have been duly apprised of the fact. We may easily anticipate what the catastrophe would have been. Happily, however, Omer Pacha was informed of the snare into which he might have fallen, and countermanded the march of his army. Surely the Allied Powers ought to insist upon an explanation from the Austrian Government, and the recall of General Coronini, if, in this and other instances, he has acted without instructions, and on his individual responsibility.

THE COURT.

The Queen and the Prince, with the Royal children, continue in the enjoyment of excellent health. Her Majesty has received her Ministers almost daily, and on Monday presided at a Privy Council, at which a proclamation was ordered to issue, summoning Parliament to meet for the despatch of business on Tuesday, the 12th of December.

On Friday, the 24th ult., Prince Albert went to Portsmouth, to witness the embarkation of the Grenadier Guards, about proceeding in the *Royal Albert* to the Crimea. In the same evening, Prince Ernest of Leiningen arrived on a visit to her Majesty.

On Saturday the Queen and the Prince, with Prince Ernest of Leiningen walked in the Home Park and slopes. In the evening the Duchess of Kent dined with the Queen. The Earl of Aberdeen had the honour of joining the Royal party.

On Sunday the Queen and Prince Albert, the four elder Royal children, and Prince Ernest of Leiningen, the ladies and gentlemen of the Court, and the domestic household, attended Divine service in the private chapel of the Castle. The Hon. and Very Rev. the Dean of Windsor officiated. The Earl of Aberdeen was also at the service.

On Monday the Queen held a Privy Council, at which most of the Ministers were present. Her Majesty gave audiences to the Earl of Aberdeen, Sir James Graham, and Sir George Grey. The Duke of Argyll and Sir George Grey remained on a visit to the Queen. In the morning her Majesty walked in the Home Park with the Prince of Wales, and the Prince Consort enjoyed the sport of shooting in the Royal preserves. In the evening the Royal dinner party included her Royal Highness the Duchess of Kent, his Serene Highness Prince Ernest of Leiningen, the Duke of Argyll, the Ladies Augusta and Frances Bruce, Lord and Lady Canterbury, Major-General the Hon. Charles and Mrs. Grey, and Sir George Grey.

On Tuesday, the Queen and Prince, accompanied by Prince Ernest of Leiningen, walked in the grounds adjoining the Castle.

On Wednesday the Queen walked in the Home-park, and visited her Royal Highness the Duchess of Kent, at Frogmore House. His Royal Highness Prince Albert went to London by a special train of the Great Western Railway, attended by Major-General the Hon. Charles Grey and Captain Du Plat, and returned to the Castle, at a quarter past three, from Buckingham Palace.

The Duke of Somerset is suffering from an attack of paralysis, with which his Grace was seized on Sunday last. The very unfavourable symptoms which prevailed at first, have given way to medical treatment, and his Grace is recovering from the shock, but the paralysis remains.

Frances Marchioness of Londonderry has left Holdernesse House for Wynyard Park. Lord Adolphus Vane Tempest, M.P., arrived at Constantinople on the 16th ult., with his detachment of the Scots Fusilier Guards, in the *Queen of the South, en route* for the seat of war. The Earl and Countess Vane are now staying at their seat, Machynlleth, Wales.

The Marquis and Marchioness of Normanby intend passing the winter at Florence. The noble Marquis is greatly improved in health. The Countess of Strathmore was staying with her relatives when seized with her fatal illness.

The Earl and Countess of Erroll have left Lady Agnes Duff's residence, in Eaton-place, for Leamington Spa. The wound in his Lordship's hand, which he met with at the battle of Alma, is going on satisfactorily.

LATEST INTELLIGENCE.

THE SIEGE OF SEBASTOPOL.

A despatch from Vienna states that winter has set in with considerable severity in Southern Russia, and that the troops are marching to their places of destination in the midst of ice. The couriers, who only took five days to go from Sebastopol to Moscow, are now so much delayed that it is probable that intelligence will arrive more rapidly by the Levant than by St. Petersburg. This accounts for the want of Russian despatches lately. A letter from Odessa of the 16th ult. states that the weather had become very boisterous—high wind, rain, and snow prevailing. There was no vessel of the enemy in sight. General Osten-Sacken is to replace General Dannenberg in the Crimea, with the most extensive powers. The reason assigned for this change is that General Dannenberg, in the affair of the 5th, did not completely execute the orders which he had received.

The *Semé* steam-frigate, which went to the Crimea to carry out 1200 soldiers accustomed to service in Algeria, has performed her mission promptly, and has returned to Toulon for other troops, having left Sebastopol on the 15th ult. Up to this time no important fact, beyond those already known, had occurred either before that place or in the neighbourhood. On her way back to France, the *Sané* met in the Dardanelles several vessels laden with troops proceeding to the Crimea. The reinforcements of every kind on board these vessels must have arrived at the present time, and others will follow without interruption.

A Queen's messenger, bearing despatches from Lord Raglan, arrived at Marseilles on Thursday afternoon, having come by the *Nil* steamer, which left Constantinople on the 20th ult. He left Marseilles, on his way to London, by the one p.m. train.

THE KING OF PRUSSIA'S SPEECH.

The King's Speech upon the Opening of the Prussian Chambers on Thursday contains the following passages:—

A bloody conflict has broken out between three powerful members of the family of European States.

Our fatherland is not yet affected; I have fresh occasion to hope that the less effect further understanding will soon perhaps be obtained.

Closely united with Austria and the rest of Germany, I shall continue to look upon it as my task to plead for peace, the recognition of the independence of foreign States, and moderation.

Should I subsequently be compelled to add force to this attitude, my faithful people will bear their inevitable burdens with resignation, and know how to meet such eventualities.

The army shall be made ready for war.

SPAIN.

MADRID Nov. 22.—The bureau of the Assembly is then constituted:—President, the Duke of Victory (Espartero). Vice-Presidents, Marshal O'Donnell, Lieut.-General Duke, M. Madoz, and the Marquis of Perales. Secretaries, Messrs. Fuentes, Calvo, the Marquis de la Vega, and Gonzales de la Vega.

THE WEST INDIA MAILS.

The steam-ship *Magdalena* arrived at Southampton on Friday morning, with the West Indian, Pacific, and Gulf of Mexico mails. Her dates are—Vera Cruz, Nov. 6th; Tampico, 2nd; Havannah, 6th; Jamaica, 10th; Barbadoes, 11th; St. Thomas's, 16th.

From Valparaiso we have accounts to the 14th of October. Business was brisk, important purchases having taken place for the interior.

In Peru, the Government forces having been taken by surprise, the President had fallen back on the capital with his army.

Some disturbances took place in Lima, the population shouting loudly for Castilla, the leader of the insurgents.

METROPOLITAN NEWS

RESULTS OF METEOROLOGICAL OBSERVATIONS,
TAKEN DURING THE WEEK ENDING THURSDAY, NOVEMBER 30

Month and Day.	Corrected Reading of Barometer at 32° Fah.	Temperature of the Air. Mean Temperature.	Mean Temperature of Evaporation.	Mean Temperature of Dew Point.	Degree of Humidity.	Direction of Wind.	Rain in Inches.

Note.—The + or — denotes below the average, and the sign + above the average.

The reading of the barometer increased from 29.16 inches at the beginning of the week, to 29.92 inches on the 27th; decreased to 29.81 inches by the 29th; increased to 29.51 inches by the 30th; and decreased to 29.43 inches by the end of the week. The mean for the week, at the height of 32 feet above the level of the sea, was 29.539 inches.

The mean temperature of the week was 36·9°; being 4·6° *below* the average of thirty-eight years.

The range of temperature during the week was 22·5°, being the difference between the highest reading of the thermometer 49·0° on the 29th, and the lowest, 26·5° on the 27th.

The mean daily range of temperature during the week was 11·4°.

Rain fell during the week to the depth of four-tenths of an inch.

The weather on the 26th, 28th, and the morning of the 30th, was fine, and the sky nearly free from cloud; the rest of the week was dull, and the sky overcast.

Fog was prevalent all day on the 27th. The low temperatures of this week were not experienced at stations near the river Thames, the waters of which were fully 7° warmer than the air.

JAMES GLAISHER.
Lewisham, December 1, 1854.

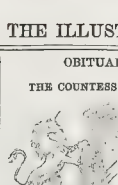
HEALTH OF LONDON.—During the week ending Saturday, Nov. 25, the births of 1693 children were registered within the metropolitan districts—819 males, and 874 females. The number of deaths was 1266—stoney, 618 males, and 644 females. The number of deaths, from the averages in the same interval from ten years, was 1.23 and, thus, 139 persons died last week above the estimated number—the mortality, therefore, is still high. There were eight deaths from cholera. The number of deaths this week was, however, less than in the previous week by 47. The mortality in children was nearly the same. 649 died—being more than 100 above the estimated number; 261 persons died at ages between fifteen and sixty, and 249 at ages exceeding sixty years. The diseases of the organs of respiration have suffered to an extent, rising from 262 to 301, exceeding the ordinary mortality attributed in great measure to the very cold weather, as shown in our Weather Table. The deaths from scarlatina rose to 113, being more than double its average. There were 29 deaths from small-pox, 33 from measles, 37 from hooping-cough, 51 from fever, 21 from diarrhœa, 144 from bronchitis, and 121 from consumption.

THE RETURNING OFFICER OF MARYLEBONE.—A meeting of Liberal electors, appointed for the three parishes composing the borough, was held at the Westminster Arms Tavern, George-street, Manchester-square, on Wednesday, for the purpose of uniting the Liberal party in the selection of a candidate. Various gentlemen expressed their preference for particular candidates, and the following names were submitted to the meeting in the course of the proceedings, viz., Sir Charles Napier, Messrs. William Conyngham, John Williams (late M.P. for Macclesfield), George Thompson, General Perronet Thompson, Messrs. Crawford, Frewpit (Grote, Prescott, and Co.), Lord Molgrave, Colonel Romilly, and Mr. Ricardo. Seven out of the eleven had, it was stated, given their consent to be put in nomination. After some discussion a resolution was carried, that the number of candidates be reduced to five, and that an aggregate meeting of the borough be convened at some large and central place, when the five gentlemen selected should be invited to attend and explain their political views. On this resolution being passed, the Pancras delegates, with the exception of two or three, left the meeting in a body, asserting that the Marylebone men wished to swamp them. The chairman then put the names to a show of hands, when Col. Romilly, Mr. Crawford, Sir C. Napier, Mr. Ricardo, and Mr. Prescott, were announced as the selected candidates. Mr. Kennett then moved that paid agents and canvassers be dispensed with, and that the expenses of the election be confined to the returning officer, the hire of rooms, and printing. The resolution was carried; and it was further resolved that the committee already selected to represent the three parishes be the committee to carry out the necessary arrangements.

LONDON ANTI-SLAVERY CONFERENCE.—A conference of the advocates of the total abolition of slavery, met at the London Tavern, on Wednesday; present, S. Gurney, Esq. (who presided), Col. P. Thompson, Messrs. Elihu Burritt, S. Stuge, S. Gurney, jun., George Thompson, a considerable number of the society of Friends, and several gentlemen from the West India colonies and the British ports commercially connected with them.

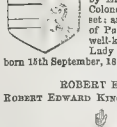
OBITUARY OF EMINENT PERSONS.

THE COUNTESS OF STRATHMORE AND KINGHORN.



THIS lamented lady died on the 3rd ult., at Florence, after a short illness, in the 28th year of her age. Lady Strathmore was eldest daughter of the present Viscount Barrington, by Jane-Elizabeth, his wife, daughter of Lord Ravensworth. Her marriage with the Earl of Strathmore and Kinghorn took place on the 30th April, 1850, but there was no issue of it.

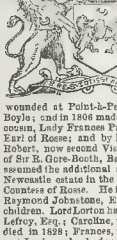
LADY EMILY PUSEY.



THE death of Lady Emily Pusey occurred on the 16th ult., at the family seat, Pusey, Berkshire.

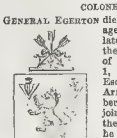
Her Ladyship was born 25th Oct., 1793, the second daughter of Henry-George, second Earl of Carnarvon, by Elizabeth Kitty, his wife, daughter and heir of Colonel John Dyke Acland, of Pixton, county Somerset; and married 4th October, 1822, Philip Pusey, Esq., of Pusey, late M.P. for Berks, elder brother of the well-known Dr. Pusey, of the University of Oxford. Lady Emily leaves a son, Sidney Edward Bouverie, born 16th September, 1839; and two daughters, Edith-Lucy and Clara.

ROBERT EDWARD, VISCOUNT LORTON.



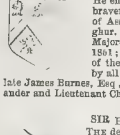
ROBERT EDWARD KING, Viscount Lorton, one of the Irish Representative Peers, a General in the Army, Lord-Lieutenant of the county of Roscommon, and Colonel of its Militia, died at his splendid seat of Rockingham, on the 20th ult., aged eighty-one. His Lordship—second son of Robert, second Earl of Kingston, by Caroline, his wife, only daughter of Richard Fitzgerald, Esq., of Mount Ophaley, co. Kildare—adopted the profession of arms, and served at the capture of Martinique, St. Lucie, and Guadaloupe—being wounded at Point-à-Petre. In 1800 he was created Baron Erris, of Boyle; and in 1806 made Viscount Lorton. He married, Dec. 9, 1795, his cousin, Lady Frances Parsons, daughter and heiress of Laurence, first Earl of Rosse; and by her (who died 7th Oct., 1841) had two sons—Robert, now second Viscount Lorton, who married, 1829, Anne, sister of Sir R. Gore-Booth, Bart., and has issue: and Laurence Harman, who assumed the additional surname of Parsons on succeeding to the great Newcastle estate in the county of Longford, from his grandmother, the Countess of Rosse. He is married to Mary, daughter of the late James Raymond Johnstone, Esq., of Alva, co. Clackmannan, and has several children. Lord Lorton has also four daughters—Jane, married to Anthony Lefroy, Esq.; Caroline, who married Sir Robert Gore-Booth, Bart., and died in 1828; Frances, who married Charles Leslie, and died in 1836; and Louisa, who died unmarried in 1891.

LIEUTENANT-GENERAL RICHARD EGERTON, C.B.
COLONEL OF THE 46TH REGIMENT.



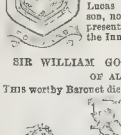
GENERAL EGERTON died on the 18th ult. at Eaton Banks, Cheshire, aged seventy-one. He was the youngest son of the late Philip Egerton, Esq., of Oulton; and brother of the late Rev. Sir Philip Egerton, Bart., of Egerton and Oulton. He married, December 1, 1814, Arabella, daughter of Henry Tomkinson, Esq., of Dorfold. General Egerton entered the Army as Ensign in the 29th Regiment, December 1, 1793; and, after some service in America, joined the forces in the Peninsula in 1809, being then Captain, 34th Regiment. Thenceforward he took part in many a brilliant achievement—at Busaco, Torres Vedras, Olivinza, Badajos, Albuera, Vittoria, the Pyrenees, Nivelle, Nives, Orthez, and Toulouse. At Albuera he was severely wounded.

LIEUTENANT-GENERAL RICHARD WHISH, H.E.I.C.S.



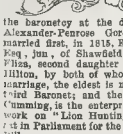
THIS gallant officer, who was Senior Colonel-Commandant of the H.E.I.C.'s Artillery on the Bombay Establishment, died at his residence, at Clifton, on the 10th ult., at the age of 69. He was the son of the Rev. Richard Whish, Rector of West Walton, and brother of the late general Sir W. S. Whish, K.C.B., and the Rev. Martin Whish, Prebendary of Salisbury. He entered the Indian army in 1802, and served with bravery at the capture of Ahmednugger, the battles of Assaye and Argaum, and the storming of Gawelghur. He rose to be a Lieut.-Colonel in 1819, a Major-General in 1838, and a Lieutenant-General in 1851; and, for a long period, commanded a division of the Bombay Army, where he was much esteemed by all ranks. He married Elizabeth, daughter of the late James Barnes, Esq., of Montrose, and sister of the late Sir Alexander and Lieutenant Charles Burnes, who fell at Cabool in 1841.

SIR HUGH STEWART, BART.



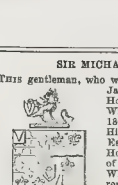
THE death of this gentleman, who, for years, represented the county of Tyrone in Parliament, occurred on the 19th ult., after an illness of a few days. The worthy Baronet was born 14th May, 1793, the eldest son of the Right Hon. John Stewart, M.P., an eminent lawyer, who was appointed Attorney-General for Ireland in 1798, and created a Baronet in 1803. Sir Hugh married, first, 19th Jan., 1826, Julia, daughter of the late Marcus M'Causland Gage, Esq., of Ballarena; and, secondly, 28th February, 1837, Elizabeth, daughter of the Rev. Henry Lucas St. George, of Dromore. His eldest son, now Sir John Stewart, third Baronet, is at present serving in the Crimea with his regiment, the Inniskilling Dragoons.

SIR WILLIAM GORDON GORDON CUMMING, BART.,
OF ALTYRE AND GORDONSTOWN.



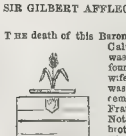
THIS worthy Baronet died at his seat, Altyre House, county Elgin, on the 22nd ult., in the male line, as chief of the name, the ancient family of Cumming; and inherited, through female descent, the estates of the Gordons of Gordonstown, premier Baronets of Scotland. He was also heir-general of the very old house of Penrose, of Penrose, in Cornwall, established there antecedently to the Conquest. Sir William was born 27th July, 1787, and succeeded to the baronetcy at the decease of his father, the first Baronet, Sir Alexander Penrose Gordon Cumming, 10th February, 1806. He married first, in 1815, Eliza-Maria, eldest daughter of John Campbell, Esq., jun., of Shawfield and Islay; and secondly, in 1846, Jane-Ellen, second daughter of William Mackintosh, Esq., of Geddes and Millton, by both of whom he leaves issue. Of the sons of the first marriage, the eldest is now Sir Alexander-Penrose Gordon Cumming, third Baronet; and the second, Captain Rosaleyn George Gordon Cumming, is the enterprising traveller, and the author of the popular work on "Lion Hunting." The late Sir William Gordon Cumming sat in Parliament for the Elgin boroughs, at the period of the Reform bill.

SIR MICHAEL H. HICKS-BEACH, BART.



THIS gentleman, who was elected M.P. for East Gloucestershire, in January last, after a severe contest with Mr. Holland, died on the 22nd ult., at his seat, Williamstrip-park. He was born 25th October, 1809, the eldest son of the late Michael Hicks-Beach, Esq., whose father, Michael Hicks, Esq., of Beverstone Castle (second son of Sir Howe Hicks, sixth Bart.), assumed the surname of Beach, having married the only daughter of William Beach, Esq., of Netherayon. The Baronetcy came to the gentleman, whose death we record, at the decease, in 1834, of his grandmother, Sir William Hicks, seventh Baronet. Sir Michael married 14th August, 1832, Harriet-Victoria, second daughter of the late John Stratton, Esq., of Farthinghoe Lodge, county Northampton, and leaves a son and heir, now Sir Michael Edward Hicks-Beach, ninth Bart., and several other children. The immediate founder of the Hicks family was Sir Baptist Hicks, silk merchant to the Court, who built Hicks' Hall, in 1612, and was created a Peer, as Viscount Campden, 4 Charles I.

SIR GILBERT AFFLECK, FIFTH BART., OF DALHAM HALL,
COUNTY SUFFOLK.



THE death of this Baronet occurred on the 18th ult., at his residence, Calverley Park, Tunbridge Wells. Sir Gilbert was eldest son of the late Rev Sir Edmund Affleck, fourth Baronet, of Dalham Hall, by Maria, his wife, daughter of Sir Elijah Impey, Knight. He was born 9th June, 1804, and married, 20th December, 1834, Severina-Frances, eldest daughter of Francis Ellis, Esq., of the Royal Crescent, Bath. Not leaving any issue, he is succeeded by his brother, now Sir Robert Affleck, sixth Baronet. The title was originally conferred on Sir Edmund Affleck, a gallant naval officer, in consideration of his conduct in the command of the Centre Division in the memorable victory obtained by Admiral Rodney in 1782. The family is of Scottish extraction, being descended from a younger son of the Auchinlecks of Auchinleck.

SIR ARTHUR BRINSLEY BROOKE, BART., M.P.,
OF COLE BROOKE, CO. FERMANAGH.

SIR ARTHUR BROOKE, who returned recently from Germany, whither he had gone for the benefit of his health, died on the 21st ult. For several years he had sat in Parliament for the county of Fermanagh, and always supported the Conservative party. Sir Arthur was third, but eldest surviving, son of the late Sir Henry Brooke, of Colebrooke, Bart., by Harriet Butler, his wife, granddaughter of Brinsley, first Viscount Lorneborough. His eldest brother, Francis Brooke, Lieutenant 7th Dragoons, fell at Waterloo. Sir Arthur was born in 1797; and married, in 1841, the Hon. Julia Henrietta Acton, Maid of Honour to the Queen, and youngest daughter of General Sir George Anson, G.B., by whom he leaves Sir Victor-Alexander Brooke, third Baronet, and other issue. The first of the Brookes who settled in Ireland was Sir Basil Brooke, of the time of Queen Elizabeth, who was appointed Governor of Donegal, and one of the Commissioners for the settlement of Ulster.

GENERAL HUNTER, C.B.

THIS distinguished Indian officer died on the 11th ult., after a few days illness, at the Bridge of Allan. General George Hunter, C.B., was in his sixty-ninth year. He entered the Army in 1801 and continued in active service till within the last three years. He saw much service, commanding in Scinde during the Afghan war, in which he took a distinguished part, and was publicly thanked by the Directors of the Hon. East India Company, in particular for the courage and discretion he displayed in quelling a dangerous mutiny. Sir Charles Napier entertained so high an opinion of his abilities, that when he last went to India he made it a condition that General Hunter should accompany him. This he did with all the ardour of youth, though in his sixty-third year. He returned about two years ago to spend the remainder of his life in his native land.—*Dundee Advertiser.*

WHAT ARE ZOUAVES?

In reply to this question a paragraph is going the round of the press which states that they are natives of the French provinces of Algiers, disciplined by French officers; and hold exactly the same relation to the French army that the Sepoys in India have to the regular British troops. Others speak of them as having been recruited from *Les Classes Dangereuses* of Paris, and propose that similar regiments should be formed out of our convicted poachers and ticket-of leave men.

A Paris correspondent of the *Times* in describing the review of the French Imperial Guard on Monday last, says:—

"I see many of your contemporaries are much puzzled as to what the Zouaves really are. According to some they are Arabs; while others contend that they are a mixture of all nationalities. The truth is, they are simply Frenchmen, picked principally from those who have served in Africa; and chosen for their courage, dariug, activity and powers of endurance. Most of them have been *Gamins de Paris*, and the metal still rings as true as it did in June, '48, when the gamins of the Garde Mobile saved the capital.

REPULSE OF THE RUSSIANS BY THE 2ND DIVISION.

THE annexed Engraving (from a Sketch taken by an eye-witness) gives a faithful representation of what might be seen in one part of the field about ten o'clock on the memorable 5th of November. On the hill-side, in the background, may be seen the remains of the ancient town of Balaclava, from which the battle has taken its name. A large body of Russians are ascending the heights, in close column—having been ordered, by the Imperial Aroudnes, to drive the Allies into the sea—and are met with a charge of the second Division, which fought so bravely, and suffered so severely, in that desperate engagement.

Prince Menschikoff, in his apologetic description of the battle, ascribes it in reples to the fact that the Russian Commanders were wounded; and that "the enemy's infantry occasioned great losses in horses, artillerymen, and infantry officers." A more just explanation would have been to confess that the wretched serfs, raised on black bread and grass, when the Czar sent their stomachs to stand against English and French soldiers, even when the former number more than four to one of the latter.

The regiments belonging to the Second Division, which took so prominent a part in that day's engagement, were the 30th, 41st, 47th, 49th, 55th and 95th. In these six regiments alone, 9 officers and 179 rank and file were killed; and 22 officers and 447 men were wounded. We have no means of ascertaining what loss the Second Division inflicted on the enemy, but there is no doubt that they performed their full share of the terrible work of that day.

The following description of one portion of the battle by an eye-witness gives some notion of the scene which must have presented itself to a spectator an hour or two before noon on the heights opposite Inkerman:—

The enemy were now completely out of the bush which had screened and sheltered them on their advance, and upon fair ground they stood no chance with our men. Our regiments halted, extended the line to the left, and commenced a tremendous file fire. The enemy, in disorder, hardly returned a shot, but stood their ground, and fell by hundreds and hundreds. Thrice they moved up stoidily to break our line on the left, and were met each time by terrible volleys of musketry, until they closed in, when our fellows charged and mastered them at the point of the bayonet. The fortune of the day still hung doubtful. The enemy were getting up all their strength for a final effort, when Canrobert came up with three regiments of Zouaves, five regiments of French infantry, and a strong force of artillery, and commenced a terrible attack on the enemy's right flank.

This occurred about eleven o'clock, and from that moment the Russian chance was hopeless. Yet, though under the French fire they were literally falling by battalions, they never showed the least sign of irresolution or disorder. On the contrary, they formed up in the most beautiful order, altered their front so as to meet the attack of the French, and, extending their line to the left, prepared to resume their attack upon the English. At that time, however, our men were well prepared, and, without any order or arrangement, flung themselves headlong upon the

ZOUAVES.

FRENCH INFANTRY OF THE LINE.

enemy, charging with the bayonet, which the enemy met for the first time. The Russians now boldly charged with the bayonet also, and for the space of five minutes the 30th, 41st, 49th, 88th, and six or seven Russian regiments were stabbing, beating, and firing at each other in the most fearful manner. At last the enemy gave way, and began retiring in good order across towards the Inkerman heights. Until I saw it, I never in my life could have believed that any troops in the world could have retired under such a murderous fire in such perfect order. The French and English, with a whole mass of artillery, followed close upon the retreating battalions, pouring in volley after volley of grapeshot, shell, and musketry. In fact it was a perfect carnage. Yet, in spite of this, the enemy kept their order, retreating almost at slow time, and every five or ten minutes halting and charging desperately up the hill at our men and the French. In these charges the Russians lost fearfully. We received them with volleys of musketry, and then dashed at them with the bayonet.

THE BATTLE OF INKERMAN.—REPULSE OF THE RUSSIANS.

THE "TRAFALGAR" AND "RETRIBUTION" AT THE SIEGE OF SEBASTOPOL: FROM A SKETCH BY LIEUTENANT MONTAGU O'REILLY

THE "RETRIBUTION" AND THE "TRAFALGAR" AT SEBASTOPOL.

During the attack of the Allied Fleets on Sebastopol, on the 17th October, the *Retribution* was lashed alongside the *Trafalgar*; at 3.40 p.m. a shell struck the mainmast of the steam frigate about twelve feet above the deck; the top part suddenly perforated the upper and main decks, and was secured in that position while the ships remained "under fire."

This scene was sketched by Lieutenant Montagu O'Reilly, on board H.M.S. *Retribution*, and is engraved upon the preceding page.

Masts shot away in battle generally fall over the side of a ship, but here we have an instance of a *lower mast* so suddenly snapped, that, before it had time to incline much, the incumbent weight of yards, sails, rigging, &c. cut it through two decks, where it lodged, after narrowly passing the boiler.

ANNIVERSARY OF THE POLISH INSURRECTION.

The Polish exiles in London solemnly celebrated the twenty-fourth anniversary of their national insurrection of 1830 on Wednesday last. In the morning they attended at the chapel, Sutton-street, Soho-square, a funeral service for their compatriots fallen in the cause of Poland. The service was performed by the Rev. Ernestus Podolski, who also preached a sermon suitable to the occasion; in which he deplored the recent loss sustained by Poland and her exiled sons in the death of their most generous friend and protector Lord Dudley Stuart. After this ceremony a public meeting, composed only of Poles, and convened by their committee, acting under the orders of his Highness Prince Czartoryski, was held at Sussex Chambers, Duke-street, St James's; Colonel Baron Wiercinski in the chair. Resolutions were passed protesting against the usurpation of their country by foreign Powers, expressing their anxious interest in the issue of the struggle in which the Western Powers are now engaged with the Czar, and their painful disappointment that no Polish Legion, to act in conjunction with the Allied Powers had yet been formed.

In the evening, the anniversary meeting commemorative of the Polish revolution of 1830, was held at St. Martin's Hall. The meeting was one of the most crowded ever held in the Hall; and a number much greater than that which obtained admittance was turned away from the door. The chair was taken by Sir Joshua Walmsley; supported by M. Kossuth, and other English and foreign friends of Polish nationality M. Ko such was loudly cheered on entering and leaving the room. The immense crowd and pressure caused some slight disturbance at the commencement of the proceedings; but order was soon restored, and the business proceeded with.

Mr. Shaen, the secretary, read letters from Signor Mazzini, General Peyronnet Thompson, Messrs. W. J. Fox and T. Duncombe, approving of the objects of the meeting, and apologising on various grounds for non attendance.

Sir Joshua Walmsley, after a few words of eulogium on the late Lord Dudley Stuart, the unwearied champion of Polish independence, said he had no doubt that the people of England were prepared to make the necessary sacrifices for the independence of both Poland and Hungary. He was fully persuaded that it was the interest of France and England to make common cause for Polish independence. The sooner they directed their efforts to the real issue, the sooner should they be able to check the game of aggression and tyranny, and ensure a permanent and honourable peace.

Mr. Shaen, the secretary, read the address of the Polish Committee. The substance of it was a recapitulation of the efforts of Poland to recover its freedom, and an assurance that the Poles were now ready to rise against Russia, if properly supported by France and England.

The following resolution, which was moved by Mr P. A Taylor, and seconded by Professor Newman, was carried unanimously:—

That this meeting, believing it essential to the freedom and peace of Europe that the encroachments of Russia should be unceasingly resisted, approves of the present war as a just and necessary one, and emphatically records its conviction that that object can only be achieved by the frank and unhesitating recognition by the Western Powers of Polish nationality, with out which the risk of disgrace in the conduct of the war is imminent, and its termination will be disastrous—immense treasures will have been squandered in vain, the unequalled heroism of our countrymen and our allies wasted, and their lives sacrificed not as martyrs to freedom, but as victims of a vicious diplomacy.

M. Kossuth now came forward to the front of the platform, and his appearance was the signal for loud and general cheering. After paying a graceful tribute to the memory of Lord Dudley Stuart, he held up the fate of Poland before England as a warning and a lesson. Referring to certain recent diplomatic movements which had been talked of with relation to the Polish question, he warned the Poles to be on their guard against any attempt to make use of them, as at the Vienna Congress, in 1815, when the name of the nation was used to secure certain concessions, while Poland itself was sacrificed to expediency. In reviewing the conduct of the war, he censured the course taken by the Allies as the one best calculated to give every advantage to the Czar, and to inflict the most terrible losses on France and England. Referring to the present position of the Allied army in front of Sebastopol, he said:—

At what price has this situation been purchased? Gentlemen, on the 5th of July, ten weeks before English embarked on that expedition, it advised as well as ill-prepared, I, in a speech, the contents of which would have been well for Great Britain to mind, spoke these words at Glasgow:—"Not one out of five of your brave sons will see Albion again." Of course I used the number figuratively, as indicative of great loss. Now, it is a sad tale: number your dead, your wounded, and your disabled—more than 20,000 out of 30,000 are already lost. My sad anticipations are literally fulfilled! And here at home—why, here the number of widows and orphans already for support in patriotic charity amounts to 11,000. Such is the position, gentlemen. Now, with that position thus analysed, I call on contemporary age, and on history, to say whether I was exaggerating or too harsh in saying that England's policy has been wrong, that it has been successful nowhere, but inefficient, unsuccessful, and disastrous everywhere. But you are told, for all consolation, that "no human foresight could have fully anticipated the extraordinary position which you had yourselves in." Now, as to this, I must say it is not true. Many a man must have anticipated that position. I, for one, have foretold it fact by fact, and word by word. And I certainly claim not the slightest credit for penetrancy in that account. I could say nothing mean sound do otherwise than know all that. And now I utter my disregarded words here from Britain, so I did in the Scottish Press say. "The words he spoke rest in the inspiration of a seer, or a picture drawn from history." Others, the *Times*, say, "No human foresight could have anticipated the extraordinary position in which long and finds herself." Extraordinary! Why, what is there extraordinary in the inexorable logic of consternation between cause and effect? Is it extraordinary that Sebastopol is found to be an intrenched camp with a numerous army in it? Is it extraordinary that the Czar is pouring whole fresh armies to its defence? The Czar has been left perfectly free, and with ample time to do it; may, in fact, he has been invited to do it by the Lord-Aberdeen treaty, negotiated under England's auspices.

Instead of being surprised at the Czar's having 100,000 Russians ready to defend Sebastopol, the only surprising thing was that he had not 200,000 men there, as he certainly would have had, but that he needed 300,000 men to watch Poland.

In the Crimea proud England and France attack him: he is content with opposing 100,000 men to them. On the Danube the flower of the Turkish army, elated by victory, defies and harasses him: he is content to oppose them with 80,000 men. But to Poland, where there is not one man in arms, but where the unquenchable fire of a heroic nation's hatred is smouldering, he sent an army of 300,000 men, to be prepared for emergencies (Cheers). Some may tell you that this is due chiefly to a precaution against Austria. But it is clear to demonstration that the Czar feels perfectly easy about the submissive obedience of his pro consul in Vienna (a laugh); or else he certainly would not have left the very existence of his 80,000 men on the other side of the Pruth at the mercy of his good friend the Hapsburg. Yes, it is the game of Poland you have to thank for the fact that your whole army in the Crimea, all heroes as they are, have not yet fallen victims to overpowering numbers.

As regards the future, he did not say that they would be unable to take Sebastopol. Leaders and men like those who were encamped there might do prodigies. Still, he contended, their position was far from satisfactory; and even if Sebastopol were taken, and the Russians driven out of the Crimea, that would give no security for the future. To make a radical cure of the Russian difficulty, they must go to the root of the evil. The real obstacle was Austria. Either England feared Austria too much, or loved her more than she ought. Their only safe course was to throw Au tria overboard, and then the way to a thorough settlement of the European crisis would be clear.

After an eloquent peroration on the importance of seizing the present favourable opportunity of striking at Russia's weak point, M. Kossuth resumed his seat, amid loud cheering; and the chairman declared the business of the meeting to have terminated.

LOOKING DEATH IN THE FACE.

BEFORE SEBASTOPOL, NOV. 4TH.

—Ay, in thy face, old fellow! Now's the time!
The Black Sea wind flaps the tent-roof; at night,
Going his rounds, sentinel like; nor wakes
These lads of mine, who take of sleep their fill,
As if they feared never to sleep again,
Instead of ——. Pitiless Crimean wind!
How many a bowling lullaby thou'lt raise
Next night, and all nights till the world shall end,
Over some sleepers here.

Some! *Who?* Dumb Fate
Whispers in no man's ear. Each in his heart
Believes "Not I not I."

But thou, grim Death!
I hear thee on the night-wind, dying abroad;
I feel thee now, squatted at our tent-door,
Pointing——

"Huzza!" Why howl so in your sleep,
Comrade? Did *you* see aught?

Well, let him dream!
Who knows; to-morrow, such a shout as that
He'd die with. A brave lad, and very like
His sister. * * *

So! Just two hours I have lain
Freezing. That pale white star, which came and looked
Through the tent-opening, has passed on to smile
Elsewhere; or lost herself i' the dark.—God knows!
Two hours nearer to dawn. The very time
When we light-headed and light-footed fools
Used to be jingling swords in waltz or reel,
And grinning in fair faces. How they'd start—
Those dainty red and white soft faces kind—
If they could look upon my visage now,
Or his— or his—or—some poor faces cold
We covered up last noon.

Ay, there it sits—
The laidly thing I felt at our tent-door
Two hours back. It has sat, and never stirred.
I cannot challenge it, or how it down,
Or close with it—breast to breast—like that young Russ
Whom I stabbed yesterday. (What eyes he had!
Great, clear blue eyes, and curling dark red hair;
A woman's picture hidden in his breast!
I do not like this fighting hand-to-hand!)
'Twill not be grappled with like flesh and blood.
This formless, voiceless, immaterial thing.
But I will meet it. Here I sit alone
Show me thy face, O Death!

There—there. I think
I do not tremble.

I am a young man:
Have done full many an ill deed—left undone
Many a good one; lived unto the flesh,
Not to the spirit. I would rather live
A few years more, and try if things might change;
Yet—yet—I think I do not tremble, Death;
And thy cold finger pointed at my brow
But calms the tumult; there.

God—oh, great God!
How small accounts Thou tak'st of this thin flame,
Which we call life! Thou send'st a moment's blast
Out of War's nostrils, and a thousand strong
Of these our puny lights are all blown out
For ever! Yet we shrink not;—we, such frail
Poor knaves, whom a spent ball can instant strike
Into e'ernity; we helpless fools,
That a boor's hand, opening the blood-gate's flow,
Shall in a minute into nothingness
Let out that something rare which can conceive
A universe and its God!

Free, open-eyed,
We rush like bridegrooms to Death's grisly arms:
Surely the very longing for that clasp
Proves us immortal!

Ay, immortal! 'Tis
Our immortality that teaches us to die.
Thou, War, art but God's ploughshare, which He drives
Over the barren fallow fields of earth,
Preparing for the harvest; rooting up
Grass, weeds, and flowers, which necessary fall,
That in the furrows the wise husbandmen
May drop world-seed.

So, let us yield our lives
As the flowers do—believing He'll not lose
One germ of his immortal. Nought of His,
Or Him, can perish; therefore, let us die.
I half remember many things like these
She says in her dear letters. So, let's die!
What, dawn? The faint hum in the trenches falls!
Is that a bell I'm the mist? My faith! they go
Early to litany in Sebastopol.
A gun! Lads, stand to your arms! The Russian's here!
Mary! Kind Heaven! I have looked Death in the face,
Help me to die!

D. M. M.

Narrow Escape of "Our Own Correspondent."—A great deal of mischief was done by the Russian ships in the harbour, which threw a perfect shower of eight and ten-inch shot and shell among our fellows. They continued this all the night after the battle, though their own troops were withdrawn, and the shell only fell among their own killed and wounded. Some of the narrow escapes of individuals seem almost miraculous. The Correspondent of the Illustrated London News had a most narrow one. Two round-shot passed through his tents and before he could leave it, they were followed by a large shell which burst *inside the tent*, within two feet of where he was standing. The tent was literally torn to ribbons by the explosion; yet strange to say, the representative of your pictorial contemporary was unhurt.—*Correspondent of the Morning Herald.*

The Bombardment of Sebastopol.—Some idea of the terrific reverberation from the opposing batteries at Sebastopol on the day of the opening of the bombardment, may be formed from the statement of the master of the *Glendaleagh*, in writing home from Eupatoria to the proprietors of that vessel. He observes:—"Although at the time thirty miles distant from the scene of the engagement, the ship was kept in a continual tremor by the unceasing cannonade at Sebastopol."

General Cathcart at Inkerman.—When, at the battle of Inkerman, General Rose quest sent to Sir George Cathcart to inquire whether he wanted reinforcements, the latter being at the moment hemmed in by an immense Russian force, is said to have replied, "Yes, but don't hurry yourself."

A letter from Riga, in the *Cassel Gazette*, states that maritime communications have been re-established between that port and St. Petersburg. There are to remain at Riga only the number of troops left there in ordinary times. The rest are to be directed towards Poland.

MUSIC.

The Bach Society.—"It is by performing all the oratorios of Handel," said an English musical historian, writing about twenty years ago, "and by introducing in an English dress the sublime works of Sebastian Bach, that the general taste for sacred music in this country would be purified and exalted." The first of these things has, in a great measure, been accomplished by the Sacred Harmonic Society; through whose labours, if not all, yet the greatest oratorios of Handel, in their entire state, are now known to, and enjoyed by, the thousands who frequent the magnificent performances at Exeter-hall. It certainly belonged to that society to introduce in like manner to the knowledge of the public the sacred works of the illustrious John Sebastian Bach, the only musician in the world who can be regarded as the compeer and the rival of Handel. In this country, it is true, Bach never fails to be mentioned whenever the names of the great masters of the art are enumerated; but Bach, after all, to our public and even to our professional amateurs of the art, is little more than a name. He is known as the author of the most masterly instrumental fugues that ever were penned; but of his sublime vocal music—his oratorios, motets, hymns, and other compositions of a sacred character—we have hitherto remained in almost total ignorance. The Sacred Harmonic Society, doubtless, have been deterred from bringing forward any of those works in an English dress by the extreme difficulty of the task. Such a reason ought not to have prevented them: on the contrary, it ought only to have stimulated them to exertion. What they have not had the courage to undertake, has not only been attempted, but accomplished, by a small body of professional musicians, actuated only by a love of their art, and veneration for the memory of one of its greatest ornaments. The Bach Society has existed for several years. It was projected, we believe, by Mr. Sterndale Bennett, who is its president; and its members are, like him, eminent in their profession, and ardent lovers of their art in its highest and purest forms. They have deeply and perseveringly studied the works of the great German master; they have, with the aid of able singers and instrumentalists, rehearsed them in private till they have, in a great measure, conquered the great difficulties they had to encounter, and it was not till they felt that they had so far succeeded, that they ventured to bring the result of their labours before the public. Their first public performance, last season, of Bach's masterpiece, the "Passion-Music," an oratorio on the subject of the Passion of Our Saviour, though imperfect in various respects, was yet sufficient to give an idea of the grandeur and beauty of the work, and to excite much attention and interest.

A second performance of the same oratorio was given at the Hanover-square Rooms, on Tuesday evening last; and such was the impression already created, that the announcement of this performance attracted a crowded audience, among whom were numbers of the most distinguished musicians and *dilettanti* now in London. This performance was not only on a larger scale, but more finished and correct than that of last year. It showed that the intermediate time had been passed, on the part of every one concerned, in earnest study and practice. It was under the direction of Mr. Sterndale Bennett. The solo singers were Miss Dolby, Madame Ferrari, Miss E. Williams, Mr. Allen, Mr. Ferrari, Mr. Walworth, and Mr. Bolton; and the organist was Mr. Hopkins. The choir and band instrumental orchestra, though not numerically strong enough to give the full effect to the sublime conceptions of the author, were composed of excellent performers, and surmounted the enormous difficulties of the score with gratifying firmness and precision. The work was produced (the original words being extremely well translated into English) according to the version adopted at Leipzig and Berlin by Mendelssohn, who judiciously made several omissions; the piece in its original form being very long, and encumbered by many narrative passages in recitative, which, however well declaimed, would now seem dry and tedious. Even thus abridged, the oratorio is still nearly as long as the "Messiah." The impression made on the audience by this sublime music was very great. The principal airs and choruses were warmly applauded, and several were encored with expressions of enthusiasm. The members of this excellent society must be gratified to find their zeal and perseverance thus appreciated by the public; and the lovers of music have reason to hope that ere long Bach will be recognised in England (as elsewhere) as one of the great masters of his art.

The new organ just erected in the church of St. Martin-in-the-fields, by Messrs. Rivington, of Greek-street, the eminent organ-builders, was used for the first time on Thursday last (St. Andrew's Day), on which occasion Mr. E. J. Hopkins acted as organist. Externally it is a noble-looking instrument and a great ornamental ornament to the church; and its musical qualities are not unworthy of its appearance. It is of great magnitude and power. The great organ, in compass from CC to G, contains 18 stops and 1264 pipes; the swell has 15 stops and 940 pipes; the choir-organ has 12 stops and 624 pipes; and the pedal organ, in compass from CCC to F, has nine stops and 330 pipes. The total number of pipes is 3168; and the stops embrace every variety and improvement in the most modern construction of the organ. The morning service of Thursday was preceded by an extended voluntary, well calculated to display the powers of the instrument. It consisted of an introductory movement, followed by an andante with a series of variations, in which many grand and beautiful effects were produced, without any departure from the grave and solid style which belongs to the music of the church. The various parts of the service were selected from our best ecclesiastical compositions: the "Preces" and Chant to the "Veni Creator" were by Tallis, the "Te Deum," "Jubilate," and Responses to the Commandments, by Nares; and the Anthem, by Dr. Croft. Throughout the whole of the music the effect produced by the organ was most satisfactory. In the full organ, when the whole thunder of the instrument were brought into action, the volume of tone was immense, but always mellow and grateful to the ear, while the varied play of the soft stops was often delicious. In short, this organ is a superb instrument, not excelled we have every reason to think, by that of any parish church in London.

Music in Holland.—The Low Countries, in the olden time the cradle of ecclesiastical harmony, are now doing much to revive their ancient musical fame. The Society for the Encouragement of Music in the Netherlands, which has existed about twenty-five years, has been gradually growing in magnitude and influence, and is now one of the most important musical institutions in Europe. It was founded by M. Verhulst, of Rotterdam, a distinguished amateur musician, who has been unremitting in his successful efforts to promote its welfare and progress. The ramifications of the society spread over the whole kingdom: its meetings being held not only at Rotterdam, but at other places, including Amsterdam, the capital. It may give an idea of the magnitude of the society to mention, that, at the recent anniversary festival, held at Rotterdam, the chorus and orchestra included a thousand performers, collected from all parts of Holland, who had been previously trained in their own respective towns, and afterwards attended numerous general rehearsals in Rotterdam under the direction of M. Verhulst, the conductor of the performances. M. Verhulst is a young musician of Rotterdam, who was a pupil of Mendelssohn, and has produced many important choral and instrumental compositions. Musicians and amateurs from all parts of Europe (England included) were invited to this festival, and received into private houses as guests, by the principal families of Rotterdam, who vied with each other in their hospitable attentions to the strangers. It must be specially mentioned, as a great feature in the character of this society, that it periodically publishes, at its own expense, the meritorious works of young Dutch composers, such works having been submitted to the examination, and having received the approbation, of some of the most eminent musical connected with the society, among whom are many eminent names belonging to every European State. In addition to this most liberal proceeding of Rotterdam, worthy of imitation by other musical institutions, the society likewise gives annual prizes for works of merit.

Sacred Harmonic Society, Exeter-hall.—The concerts for the ensuing season will commence on Friday, 8th December, when Handel's oratorio of "Deborah"—a work containing some of the great master's greatest choral inspirations—will be revived. Madame Clara Novello, Miss Dolby, and Herr Formès will make their first appearances in London this season on the occasion; and Mr. Costa resumes the post of conductor.

Newspaper Postage in India.—The Court of Directors has granted a uniform rate of one anna per sheet upon newspaper postage throughout India. Even as things now stand, the press in India will remain fettered, in comparison with the press in England. For one sheet of paper, weighing much less than one sheet of the *Times*, the people of India pay 1½d.; for the gigantic *Times* we only pay 1d. stamp. Were any one in Bombay or Calcutta to publish such a paper as the *Times*, it would cost for every number going through the post about 1s. 6d. or 2s. The new arrangement was to come into operation on the 1st of November.

THE THEATRES, &c.

HAYMARKET.—On Saturday Mr. Buckstone re-appeared at this theatre, and was enthusiastically received by a numerous audience. The part selected for the occasion was that of *Master Geoffrey Wedderburne*, in Stirling Coyne's interesting comedy of "Presented at Court." Mr Buckstone never played the character better. The phenomena of advancing lachrymose were never more precisely traced. It was, in its way, a "psychological curiosity." The drama itself was elegantly placed on the boards—scenery and costume perfect.——An excellent drama, by Mr Boyle Bernard, was produced at this house on the previous Thursday. The novelty is entitled "The Balance of Comfort," and is original in its idea and situations. Both are exceedingly ingenious, and the development of the former is managed with admirable skill. The plot, however, may be traced in a few words. *Mr. and Mrs Torrington* having been married, in the course of family arrangements, discover, when too late, that their dispositions are not suitable, and agree to a separation; the lady retiring to a suburban box, and the gentleman travelling all over the world in search of the excitement to which his youth had been a stranger. There is a philosophic basis in this distinction of character, which elevates at once the author and his drama in our esteem. After awhile, *Torrington* returns, and calls on his wife, well inclined as it soon appears to settle down in domestic comfort, but finds that in her house he can no longer claim the privileges of a husband, particularly as she had chosen to pass in the neighbourhood for a widow. Secretly, however, *Mrs Torrington* is as wasted of seclusion as her lord has become of wandering. She has married, and is surrounded by the attention of two suitors, one of whom applies to *Mr. Torrington*, as her brother, for his consent to their union. His jealousy is awakened, and he discerns that he still loves his wife; but his claims are not immediately admitted, and he consequently gets up a flirtation with another lady, which in turn excites Mrs. Torrington's jealousy, and reveals to her likewise "the inner life" of her affections. The catastrophe might here have immediately supervened with effect; but the author had resolved on a spice of melodrama, and introduces a needless and improbable duel to effect an apparent precipitation of events which were really hastening to a close without the intervention of any foreign element. The husband and wife were well played by Mr. Howe and Miss Reynolds, and the piece was deservedly successful. The dialogue was throughout carefully written, frequently witty, and always sensible. The drama has vitality.

LYCEUM.—This theatre re-opened on Monday, with the "Game of Speculation;" and a new piece called "A Comical Countess," adapted from a French comedietta, the title of which, "Une Soubrette de Qualité," expresses sufficiently well the spirit of the production. The heroine (Miss Talbot)—at the opening of the play the *Countess de L'Espublier*, but who had formerly been the waiting-maid to the aunt of the *Chevalier de Vilbrac* (Mr. C. Mathews), and cook to the nobleman whom she had married—displays in her altered state, many signs of her humble origin; but, being beautiful as well as rich, is still attractive as a widow, particularly to the *Baron de Berjonce* (Mr. William), who, to carry out his designs, plants upon her a footman, apparently recommended by the *Chevalier de Vilbrac*. This worthy, however, is really the Chevalier in disguise, who, in dread of the Bastille, has resorted to the *ruse*; having, as he thinks, accidentally struck in the eye *Madame de Parabère*, at an entertainment given by the Regent of Orleans, in which the lights had been suddenly extinguished. The lady whom he had been struck, however, was none other than the Comical Widow—who, by the way, was an early flame of the Chevalier, and soon penetrates his disguise. A scene of courtship ensues sufficiently salient and curious; but it is interrupted by the Baron, with whom a duel is consequently imminent. The Countess, in her turn, now resorts to disguise; enters, as *Madame de Parabère*, with two swords, and challenges, as a professed female duellist, the Chevalier to personal combat in the supposed blow on her visual organ; and finally prevails him into accepting it; but is soon disarmed. The Baron, perceiving his opponent's skill, would declare off, but, he ag compelled into apologetic conditions, the lady unmasks, and the Comical Countess weds the whimsical Chevalier. Mr. Mathews acted with his usual ease; but Miss Talbot, though a fine woman, is, verily, but a raw recruit—and, indeed, gives but small promise of becoming a good actress.

MR. ALBERT SMITH.—The Ascent of Mont Blanc is announced to re-open for the fourth season on Monday evening, with several fresh additions and attractions. Mr. Albert Smith always changes his route, so that his audience may not be wearied by going over the same ground twice on their way to Chamouni. The first year he conducted them through via Geneva; then by Paris and Strasburg; and this time he proceeds by way of Rotterdam, Holland, and the Rhine. The principal viewsare from the able hand of Mr. W. Beverley, and comprise—Amsterdam, on the Railway, looking towards the city of the old Scottish name; the Village of Broek; the High-street of Berne, with the Clock Tower; the Pass of the Gemmi; the Hut lately erected on the Grands Mulets; Lyons; and the Place de la Concorde, Paris. In addition to these, a Panorama of the whole popular "lions" of the Rhine, between Cologne and Bingen, by a Berlin artist, will be exhibited, and explained by Mr. Smith in a novel, running commentary on the scenery and tradition called "Up the Rhine." Two more songs—"Poste Restante" and "Murray's Handbook" will be introduced; with the always novel "Galignani's Messenger." We have no doubt that we shall encounter scenes of our old travelling acquaintances; indeed, we have heard that *Mr Pringle* will be on the Alps, having taken to photography; and the *Engineer* will be found on Lord the *Scone* steamer re-moved from the Lago Maggiore Lost. The gratifying recognition of Mr. Albert Smith's efforts to amuse and inform the public, by her Majesty, during the past season, will tend to keep the "Ascent of Mont Blanc" in undiminished position amongst the exhibitions of the metropolis; and it pre-eminently merits that distinction.

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—*Rectories*: The Rev. E. S. Barnes, to Corfe Castle, Dorsetshire; Rev. J. Bush, to Ousby in Cumberland; Rev. G. Goodman, to Southill, in next parish to Lend; Rev. W. Brooksbank, to Lamplugh, Cumberland. *Livings*: The Rev. J. Bell to Brace Meole, Salop; Rev. J. Palmer, to Bryngwyn, Herefordshire; Rev. J. H. Armstrong, to Bicknoller, near Taunton. *Vicarages*: The Rev. T. Cox, to Threapwood, near Whitchurch, Salop.

The Lord Chancellor has bestowed the vacant stall in Bristol Cathedral on the Rev. Edward Girdlestone, the Vicar of Deane in the county of Lancaster.

THE Rev. William Smith, M.A., of Lewes, Sussex has been appointed Professor of Natural History in Queen's College, Cork, vice the Rev. Wyville Thompson, M.A.

His Grace the Duke of Norfolk has given a considerable portion of land for the site of a new church about to be erected at Haddenham, near Glossop, Lancashire.

CONSECRATION OF TWO COLONIAL BISHOPS.—Thursday being St. Andrew's-day, the Rev. Dr. Barker, the Bishop-elect of Sydney, and the Rev. Dr. Vincent W. Ryan, the Bishop-elect of the Mauritius, were solemnly consecrated for the episcopate in the church of St. Mary, Lambeth, which is situated contiguous to the Archiepiscopal Palace, in the presence of a numerous attendance of clergy and other gentlemen.

CHARITABLE BEQUESTS.—To the St. Gregory's College, Downside, a Benedictine Institution for the education of Youth for the Catholic Church, a legacy of £1,000 is bequeathed by the late Miss Mary Ann Throckmorton, of Versailles. Also a sum of £600 (subject to a few expenses) is to be given to the Benedictine Female Convent of Saint-Cord, Warwickshire, formerly of Cambrays, France; and £1000 to the Catholic charitable institution, according to the discretion of her mother-in-law, the following charitable institutions are entitled to £1,000, are left by the will of the late Miss Eliza Shackell:—The Royal York Lying-in Hospital; The Church Missionary Society, £1,000; British and Foreign Bible Society, £500; London City Mission, £500; New Hospital, Gumee-street, Bristol, £500; Church Pastoral Aid Society, £500. Gonville and Caius College, Cambridge, £500. Bethnal Green Asylum, Park street, Bristol, £500; Industrial Home at Clifton, £400.——Miss Martha Danbeny, of Gloucester, has left to the Bristol Infirmary a legacy of £500.

WILLS.—The will of the Right Hon. Major-General Sir George Arthur, Bart., K.C.H., was sworn under £70,000 personalty; William Hicks, of Clapham and Mincing-lane, £60,000; George W. Barley, King William-street, tea-dealer, £14,000; Thomas Parker, surgeon, of Apsley, Guise, Bedford, £35,000; Thomas Smith, of Dorset-place, Brixton, £60,000; W. Forrest, of the Strand, curiosity dealer, £14,000. The will of Henry Wright, who died at Varna on the 15th of August last, whilst acting as Assistant Commissary in H.M.'s Field Train Department, has just been proved.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THERE was too much truth in our paragraph of last week about the state of Mr. Lockhart's health. On the very day on which our paper was published that contained the paragraph expressive of the fears of his friends, this great critic and biographer died, at his sixty-first year, at Abbotsford, in the house of his illustrious father-in-law, and attended by his only child. Of the three grandchildren of Sir Walter Scott, one died before manhood; a second, after running a fine constitution and depraving a clear intellect, died childless a few years ago; and the third (a daughter) is married to a successful barrister—is the mother of an only child—a girl—and with her husband is the possessor of the classic domain of Abbotsford. "I have heard great things," Byron writes to Sir Walter, "of Mrs. Lockhart's personal and mental charms, and much good of her lord: that you may live to see as many novel Scotts as there are Scott's novels is the very bad pun but sincere wish of yours ever most affectionately. Byron."

Though the deep-rooted desires of the great novelist and poet, and the expectations of his brilliant son-in-law and biographer for a long and fruitful lineage of the Scotts of Abbotsford, have not been realised, the race, we are happy to think, is not yet extinct; and future generations may hereafter look with interest on the descendants of one who has contributed so largely to the amusement and information of mankind.

The literary career of Lockhart dates from the year 1818, when he was introduced to his future father-in-law for the first time. He was then in his twenty-sixth year—fresh from a career of promise at Oxford, and full of what he had seen in Germany and heard the great Goethe say. Sir Walter (then only Mr.) Scott took to him at the first; but one with whom his early labours were still more identified, and with whose name his own will live hereafter, both for evil and for good, was John Wilson—some seven years older than himself—an Oxonian poet humourist, philosopher, and wit. They soon became intimate, and both found a ready outlet for their varied talents, their pleasantries and hostilities, in the columns of a magazine then newly started, and now known, wherever a Scotchman is known, by the title it still bears, of *Blackwood's Magazine*. It was in *Ebony* that the Tories of Edinburgh found a corrective for the Whig tyranny of the *Edinburgh Review*; and their twelve shots a year were, of course, annoying to a contemporary who could only defend himself (however ably) but once a quarter. Mr. Lockhart's contributions, though anonymous, were soon known to be his. He attacked with equal skill and daring, till the pungency of his satire became almost unbearable. His articles on the Cockney School of Poetry have not yet been forgiven by the survivors of that school; and the sons of poets, who still frequent the "farmy fields of Hampstead," yet burn with hereditary dislike of John Gibson Lockhart.

At this time he was good-naturedly described by the Ettrick Shepherd (one of a little, but choice fraternity that made the far-famed "Nocter Ambrosianæ") as a mischievous Oxford puppy, of whom he was terrified, dancing after the young ladies, and drawing caricatures of every one who came in contact with him. This love of drawing caricatures, we may here observe, he retained to the last; no one enjoying a number of *Punch* the day before publication, or the day after, more than John Lockhart.

In the second year of his introduction into life, he married Sophia Scott, the eldest daughter of the great novelist and poet, and the one of his children, who inherited most (and that in a great degree) of the many captivating qualities of her illustrious father. This new alliance drew, of course, fresh and more attractive fire on whatever he wrote or might be supposed to write. His novels, for by this time (if we are not mistaken) he had written at least three—viz., "Valerius," "Adam Blair," and "Reginald Dalton"—increased in sale as soon as his marriage to the daughter of the "Great Unknown" was made public.

He made his first appearance as an author, with his name to what he wrote, in the year 1823, when Blackwood published a quarto volume of "Translations from Ancient Spanish Ballads," which will entitles him to be ranked as a true poet. There were critics at the time who pertinaciously insisted that the ballads bore traces throughout of Sir Walter's marked and unmistakable assistance; but this was a cry raised by envy, and originating in the very excellence of the ballads; a cry to which every success'ul author—with able friends about him—must be more or less subjected. In Lockhart's case, a more unfounded untruth, connected with literature, has seldom been heard; but the very authors who gave rise to so unjust an assertion lived to be convinced of its injustice, and to talk of it as something meant only to annoy.

Mr. Lockhart's next great step in life was from Edinburgh to London. In 1825, Gifford, full of years and infirmities, retired from the editorship of the *Quarterly Review*. A new editor was of course required, and one of the Coleridge family (now Mr. Justice Coleridge) was tried, and soon retired. At this juncture, Mr. Murray, with his usual sagacity in fixing on the very best men, made an offer of the editorship to Mr. Lockhart. The offer was, we believe, made through Sir Walter Scott, and at once accepted. It was indeed a tempting offer to a young man:—political and literary position, much and increasing influence, and at least twelve hundred a year.

But before he became editor of the *Quarterly*, he had published a Life of Robert Burns—in every respect a manly and well-written work. The dedication to James Hogg and Allan Cunningham was deservedly looked upon, at the time, as an unmistakable proof that Lockhart was not seeking for authorship, as a court nobility; and that, in thus singling out the poet-shepherd and the poet-mason, he was ambitious of being considered nothing more than a distinguished member of the republic of letters.

Mr. Lockhart's connection with the *Quarterly* extended over a period of seventeen years: indeed, he may be said to have been connected with it to the last; for his sound advice was always, it is understood, sought, and always generously given. He was, in very many respects, admirably fitted for the duties of an editor. He was a versatile scholar, retaining his Greek and Latin studies to the last, and adding to his thorough knowledge of French and German an unusual intimacy with Spanish literature. His style was clear and copious; his judgment wonderfully sound; and his unwillingness to lend himself to the cabals of authors—generally most determined. He was apt to give, it is true, too courtly a turn to the class of publications selected for review; but this is a necessity sometimes forced upon an editor by his staff of reviewers, and in some degree arising from the very wants of a publication meant for selling, as well as leading.

Of Mr. Lockhart's own contributions to the *Quarterly*, the best that we can call to mind are those on Theodore Hook, and the poets Campbell and Southey. How pleasant his style in the "Theodore Hook"—how sagacious and penetrating his knowledge of man in the "Campbell" contribution—how bitter, how partially true, and how partially untrue, is he in his famous article on Southey. It is impossible to write about Southey, Campbell, and Hook, without drawing largely on Lockhart's three articles upon them.

But the book by which his name will live is his "Life of Sir Walter Scott," a work in English literature second only in importance to Boswell's "Life of Johnson." How truly, and therefore how admirably, has he set Scott before us! He has portrayed Scott's best-known associates, the two Ballantynes, Constable, Dan Terry, and Willie Laidlaw, with a Chaucer-like skill. You more than see them, you hear them. How admirable are his anecdotes! Would that we had anything only half as good about Byron as Lockhart's "Life of Scott." Moore was a miserable biographer, while Lockhart sketched like Hogarth or Wilkie.

Mr. Lockhart, it has been said, was not a man with many friends, and there is something of truth in the assertion. His nature, haughty and retiring, did not fit him for a large circle of friends; his position, high and influential, did not require that he should be too accessible. Yet, to those who knew him, he was a warm-hearted friend. No one took to him readily. The *fin*-like finger he extended to many a warm hand sent numbers away with a hard word of dislike about him. But, when once known—when you broke through the ice that chilled his nature—when you unwrapped that Spanish cloak which sat so gracefully upon him, he was cordial, companionable, clubbable, full of anecdote, full of humour, full of satire—his fine dark eyes revelling with delight at every fresh turn that his humour or his malice gave to the story he was telling.

Mr. Lockhart's last London residence was at No. 14, Abbey-road, St. John's-wood, whither he removed, in the early part of the present year, from that house in the Regent's-park which will hereafter most assuredly be pointed out in every book descriptive of celebrated London localities. He had newly returned from Italy—not full of hope or fears—for his now attenuated frame and once vigorous constitution foreboded both; but a few years "just to look about him and to die," were, he possibly thought, before him. But these were not allowed to him; and, on Friday last, John Gibson Lockhart was laid in Dryburgh Abbey, by the side of Sir Walter Scott; and thus an additional interest is attached to a spot already attractive to thousands of pilgrims.

The best portrait of Mr. Lockhart is that by Pickersgill, in Mr. Murray's collection. This fine portrait is now being engraved by Mr. Doo. There is another head of him, by Wilkin, well lithographed and like. The sketch in *Fraser's Magazine*, by Maclise, will always recall him most agreeably to his friends. (This portrait is engraved at page 564 of the present sheet.)

The dearth of books in the Crimea and at Constantinople has led to a volunteer supply from all sources—some noisily announced to the public, others liberally and most unostenta.ously given without any kind of public letter or announcement. Mr Arthur Smith (the brother of Albert Smith), whose business-like habits are well known, is conducting, without noise or puff of any kind, the shipment of a very large supply of varied and well-selected books. As he has the means of sending still more, and is never tired when engaged in a kind act, we may mention that his address is the Egyptian-hall, Piccadilly.

The curious oak carvings of the fifteenth century, and of Scottish workmanship, known as the Stirling Heads, which formerly ornamented the King's Chamber at Stirling, were, on Monday last, knocked down to the Marquis of Breadalbane, for 20 guineas each. The Board of Works had authorised their purchase, and its agents bade as far as 19 guineas each for them. The collection of tracts fulminated against the *Edinburgh Review* was secured, at the same sale (the late Lord Cockburn's), for the British Museum, at £63 8s. 6d.

CROSBY HALL ELOCUTION CLASS.—The third public entertainment of this class was given on Friday, 24th ult.; Mr. Leopold Smart, the teacher of the class, in the chair. The programme contained an admirable selection of scenes and recitations, in the delivery of which the pupils manifested great improvement. Some members of the Crosby Hall Glee Club sang a few glees. The Hall was crowded; and the whole entertainment was highly successful.

SOCIETY OF ARTS.—On Wednesday evening next Mr. T. J. Mechi, of Tiptree-hall celebrity, is to read his fourth Paper on British Agriculture before the Society of Arts. It is on these occasions that he produces the balance-sheet which has excited so much attention among agriculturists during the last few years.

OPENING OF SIR B. HALL'S NEW WELSH CHURCH, AT ABERCARN, IN THE PARISH OF MYNYDDYSLWYN.

ON Thursday last, the 16th ult., the Church just built in the mountains by Sir Benjamin Hall, on his estate at Abercarn, in South Wales, for the sole use of the native Cymri, was opened for Divine service. The new edifice stands high above the village of Abergwyddon, on a terrace cut on the side of the mountain backed by woods, and commanding a magnificent view. Notwithstanding its height, a commodious road has been made to the church door. The edifice is built of the fine stone of the locality, the style is the simple, solid architecture of the oldest ecclesiastic edifices in Wales, with a belfry, but no tower. The masonry is excellent; and the whole fabric has been executed by Welsh workmen, from the plans of Sir Benjamin Hall himself. The sculpture of the stone corbels and mullions of the windows is very fine, but devoid of all fantastic ornaments.

The interior has a well-proportioned roof, with solid cross-beams of oak intersecting each other. The seats are open; and the pulpit and communion rails and chair are of oak. The Commandments, Creed, and Lord's Prayer, in Welsh, are emblazoned in black letter on large slates, framed in oak, with a gilt moulding. There is a capacious gallery at the west end, in the front of which the Royal arms are painted. The Church is lighted by four lanterns, suspended from the centre of the roof by blue chains. The building is warmed by hot-water pipes, which run beneath the floor.

The whole proceedings were arranged with the greatest attention to the benefit of the Welsh people, by the establishment of a commodious Church, where they can be certain of regular services in their own language, which will be performed by a native minister (selected and maintained by Sir Benjamin Hall), and who will exclusively devote himself to his Cambrian flock.

The Right Hon. Baronet has long openly declared his opinion that the decline of the Church in Wales has been chiefly caused by the general preponderance of the non-Cymric churches of the Principality (ordained by pious Welshmen for the benefit of the aboriginals of the soil), for English or mixed services; and, in the exceptional cases, where there are entirely Welsh services, the frequent appointment of English ministers, not understanding a word of the language, and the character of the people, rendering them incapable of obtaining any spiritual influence; and to all these two reasons have caused the assertion of the native population from the ordinances of the Church, and the general prevalence of Dissent by the erection of dissenting chapels, with eloquent Welsh ministers, voluntarily supported by their native congregations, where the people naturally resort for religious instruction in their own tongue.

Sir Benjamin Hall had given explicit orders that everything on this occasion should be done consistently, not only with the rites of the Church (could it be possible), but certainly in opposition to the usages of his countrymen. With these instructions all the Welsh clergymen of the Church except the Bishop of Llandaff (Llandaff and Merthyr Dean, and those natives of the higher class residing in the district, who understood the language in which the services were performed, and who were deeply interested in the revival of the Church in Wales.

At eleven o'clock, Sir Benjamin and Lady Hall, of Llanover, followed by their Welsh servants, and accompanied by their own immediate party; and the Rev. Hugh Williams (the Welsh Chancellor of the diocese), with twenty native clergymen, walked from their mountain residence at Abercarn (the distance of a mile) to the new church; in front of which they received the Bishop of Llandaff, who had just arrived with the Rural Dean.

The native population (to the number of about a thousand, in their native costumes), with that intuitive propriety which characterises the Welsh people, had formed themselves in picturesque groups beneath and on each side of the Church, and very few persons availed themselves of the three doors which were opened for their admission before the entrance of Sir Benjamin and Lady Hall and Mrs. Hugh Williams, the wife of the Chancellor of the Diocese.

The services were entirely Welsh.

At the conclusion of the Morning Service, about 200 children of the Welsh Sunday-school were ranged on each side of the road, leading from the principal entrance, accompanied by the Welsh Master, who, though a Dissenter, gave the Bishop a cordial Welsh greeting as he passed.

The Bishop and clergy, with the other guests, numbering about thirty, were then conducted on foot by Sir Benjamin and Lady Hall to their house, to partake of an early dinner; whilst the Welsh choirs, farmers, tradesmen, and tenants, who had journeyed from a distance, took refreshment in a large room over the market-house.

After the three o'clock service, tea and coffee, fruit, &c., were prepared at Sir B. Hall's, for the refreshment of the guests; who afterwards again

NEW CHURCH, BUILT BY SIR BENJAMIN HALL, AT ABERCARN, SOUTH WALES.

repaired to the evening service, which concluded about ten o'clock. The three congregations were computed at 2000 persons. The various Welsh sermons delivered by the native ministers justified their claim to

WELSH PEASANT-WOMAN.

the high reputation for oratory ascribed by Giraldus Cambrensis to their ancestors of the twelfth century.

The sacred music of the Welsh is scarcely known beyond the boundaries of the thirteen counties, and even there is chiefly confined to the devotional use of congregations worshiping in their native language. Many of the tunes are traditionally believed to be of extreme antiquity, and their sublime and touching strains probably uttered the thanksgivings of the pious Cymri, in days long anterior to the Saxon mission of Augustine, when Brân the Blessed, and other contemporaries of the Apostles, first brought Christianity to our island, and founded the ancient British Church.

Sir Benjamin Hall has lent his private chapel for the use of the English residents, who have service performed in it every Monday for themselves by another clergyman.

THE FONT IN WHICH EDWARD THE CONFESSOR WAS BAPTISED.

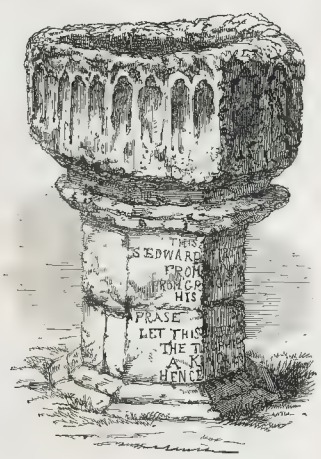
Edward the Confessor was born at Islip, about five miles from Oxford, in the year 1010. Islip, though now an unimportant village, was in early Saxon times a place of great note. Ethelred II., the father of Edward the Confessor, had a palace here; and the Chapter of Westminster, to whom the manor of Islip was granted by the Confessor, had, until very recent times, a country mansion at Islip. Traces of the palace of Ethelred existed up to the close of the seventeenth century, and are described by Dr. Plot. Wharton, in his "Specimen of a History of Oxfordshire" (1783) says:—"I have examined the spot. On the north-east part of Islip is a court called the Court-close, at some distance from the Chapel. In this close there are vestiges of a moat now almost entirely filled up, the proof of some large building; about sixty years ago many loads of lead were dug up within the area or compass of this moat in irregular masses as if melted. Here might have been the Palace."

At this period a building described as the Royal Chapel was then entire; and this chapel contained the Font in which the Confessor was baptised. It was taken from the chapel by Sir Henry Brown, in 1660, and was placed in the garden of the mansion-house at Riddington, near Woodstock. It subsequently came into the possession of Mr. Mostyn Brown, afterwards Lord Vaux; of whom it was purchased by the late Sir G. O. P. Turner, Bart., for £400, and sent to Langford, near Bicester, Oxfordshire, the residence of Mr. Paxton, elder brother of Sir Joseph. Some little time afterwards it was, at the earnest solicitation of Dr. Ireland (then Dean of Westminster), removed back to Islip, and stored in the garden till the death of Sir G. O. P. Turner; when it was again placed in the charge of Mr. Paxton, and it remained at Langford until the 15th of September last, when it was sold by auction, by direction of the late Baronet's trustees; and Mr. W. C. Turner, of Bicester, became the fortunate purchaser.

There can be no doubt of the veritable originality of this most interesting relic. Plot in his "Oxfordshire," "Hearne's Gloss.," and his "Preface to Curious Discourses" (1720), and Wood's Manuscripts in the Ashmolean Collection in the Museum, all bear testimony to this; and show that not merely historical facts, but the popular traditions of the country in their times, pointed unmistakeably to this piece of sculptured stone as the receptacle of the holy fluid used at the baptism of the Confessor 850 years ago. Hearne has recorded "that an old lady kept most to cram her turkeys in this font, but that the turkeys all died." On the pedestal on which the font stands is the following far more modern inscription:—

> This sacred Font Saint Edward first receivd
> From womb to grace; from grace to glory went
> His virtuous life. To this fayre isle bequeathd
> Prase, . . . And to us but lent
> Let this remaine—the trophies of his fame:
> A king baptised from hence a saint became.

There is also inscribed on the pedestal, "This Fonte came from the King's Chapel, at Islip."



THE FONT IN WHICH EDWARD THE CONFESSOR WAS BAPTISED, AT ISLIP.

The annexed Sketch of the Font was recently taken, and is a correct representation. The interior is circular, whereas the external shape is octagonal, with specimens of sculpture on each side in style differing one from the other. From this circumstance, some antiquaries have supposed that the Font is not so ancient as it professes to be; but by far the more numerous of those who have interested themselves on the subject are of opinion that the monks, from a feeling of veneration, made such external ornamental additions as the taste and style of their day suggested.

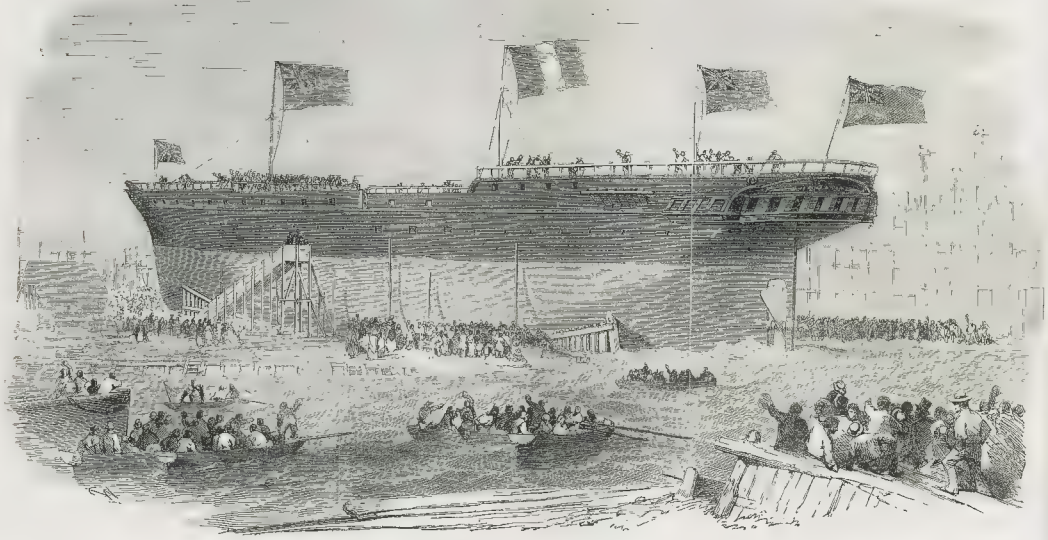
THE "VITTORIO EMANUELE."

This fine vessel, which was launched on the 21st ult., from the shipyard of Messrs. Mare and Co., of Blackwall, is an iron screw steamer of 1600 tons burthen, and 280-horse power (the engines making by G. Rennie and Co.), with accommodation for 250 passengers, 800 tons of merchandise, and 500 tons of coals. She is fitted with electric apparatus and all the improvements discovered to this time, and has five water-tight compartments.

This boat forms the first of a fleet of steamers, to be constructed for the Transatlantic Company of Genoa—a Company established under distinguished patronage, by Royal charter, and of which the King of Sardinia (whose name the vessel just launched bears) is himself a shareholder to a considerable amount. It is a commercial Company for establishing steam navigation for postal services and passengers and traffic communication between Genoa, France, Spain, and North and South America.

The capital of the Company consists of ten millions of francs, raised in shares, which have been disposed of on the Exchanges of Genoa, Turin, and London.

The *Vittorio Emanuele* has been constructed under the superintendence of Messrs Draper, Pietroni, and Co., of London, agents; and the ceremony of naming the vessel was performed by Miss Draper, in presence of the Marquis d'Azeglio, Envoy Extraordinary in London of the King of Sardinia; the Chevalier de Rollo, Managing Director of the Company, and various other distinguished persons.



LAUNCH OF THE "VITTORIO EMANUELE" IRON SCREW STEAMER, AT BLACKWALL.

PARIS FASHIONS FOR DECEMBER.

We have hitherto found considerable difficulty in giving the fashions for walking dresses at a moment when nobody in Paris thinks of any thing but ball and evening dresses for the season, which is just about to open. At a later period in the spring, when at Paris it will only be questions of walking dresses, London will require the details of balls for the high season. We have never seen richer or more splendid materials than are now worn. An evening dress often costs 300 or 400 francs for the stuff alone, besides trimming. The robes are enormously loaded with lace for walking dresses, more especially in the corsages and the sleeves; but for soirées, the skirt is completely covered either *en volants*, *en tabliers*, or *en quilles*, held in by bouquets of flowers. The robes are generally of large patterns, and have large stripes placed lengthwise; the ground is blue, chesnut, *reps* or *gros-de-tours*, with another stripe with satin rays in the middle of which is sometime seen a line of red and blue, which sets off this stripe; whilst the other is of a thick stuff without brilliancy. These patterns are varied *ad infinitum*; but that which we engrave is one most in use. We also notice those superb robes which are called *velours à pentes*. They have plain grounds, on which stand out, woven in the material, patterns in velvet, either in garlands, or sprinkled about the dress. This is the richest pattern which we have as yet noticed. Another robe worty of note is of plain ground, with flounces woven or shaded into the stuff. In sober and well-assorted shades this oddity is very remarkable.

Bonnets are made of satin, velvet, and of *velours épinglé*. Coloured *reps* sprinkled with little peas of black velvet, or embroidered with squares of jet, are also much worn for the crown of the bonnet: and the trimmings are very full about the cheeks. The bonnets are smaller than ever, hardly covering the back of the head, and leaving the upper part bare. This is a good fashion for the summer, but a very bad one for the winter. For ordinary headdresses, velvet bands passed over the plaits of the hair, without long ends, are much worn. In the evening, on this velvet are placed pins with different-coloured stones, according to the complexion of the lady. This simple fashion is more especially adopted by young persons.

THE ILLUSTRATIONS.

White striped velvet bonnets, trimmed with blonde; a folded plume; the upper part of the head ornamented with blue flowers.

Mantelet *en peau d'ognean* grey, with bands of black velvet, sleeves of *Marie Zibeline*; *Robe de velours à pentes*, blue ground, with black velvet flowers.

Boots with the toes of varnished leather, and the upper part of kid, buttoned over the instep.

PARIS FASHIONS FOR DECEMBER.

Bonnet *en gros de tour*, violet, with the under part white; mantelet of black velvet, trimmed with marten fur. *Robe de reps*, with large patterns in satin lines, colour on colour. Muslin sleeves, fastened at the wrists with a manchette turned back, and worked at the edge. The collar is disposed in the same way, and the shape of the body of the robe mounted very high and fastened exactly at the neck. The basques are still worn.

For gentlemen, the long frock-coat called *imperial* is abandoned, and its place supplied by a long silky and comfortable coat, which it is useless to describe, as it is brought from England. For ball and evening dresses you approach us as near as possible in the English *tenue*; avoiding, of course, all eccentricity.

ADELPHI THEATRE.

THE SLOW MAN.

We give an Illustration of the extraordinary scene in Mr. Mark Lemon's farce of "The Slow Man," in which the epic poet, who is the hero of the piece, is intruded upon by *Hector Rackett* and his friends of the fancy, with the pet-boxer, much to his personal disquiet, and altogether to the ruin of the great work which he had projected. The headlong revelry of the situation is novel in stage-incident; and, had it been sufficiently prepared for, would have created for the drama in which it was introduced a permanent reputation. As it is, it serves for a variety in stage-business, and presents an unusual group of characters. The suggestion might be profitably adopted, and carried out in a higher class of piece, as a melodramatic accessory, to lighten the burthen of more important business.

Writers of drama have too great a tendency to run into routine; and thus it happens that one production resembles another too closely. Combinations, like the present, drawn from real life, not only present novelty, but give vitality to situation. Mr. Lemon is, therefore, to be commended for the boldness which he has shown in the invention of the incident.

St. James's.—We are glad to see that an amateur performance of a superior description is advertised to take place at this theatre, on Monday, December 11, in aid of the Patriotic Fund. The pieces chosen for the occasion are the tragedy of "Macbeth" and the musical farce "The Waterman." In the former, Miss Glyn (who has kindly offered her services) will sustain the part of *Lady Macbeth*; and, being supported by a numerous and powerful company, we have every reason to believe that the entertainment will meet with that support which its benevolent object so well deserves. The orchestra will consist of members of the Amateur Musical Society, and be conducted by Mr. Henry Leslie. The chorus will be under the superintendence of Mr. Frank Mori.

SCENE FROM THE NEW FARCE OF "THE SLOW MAN," AT THE ADELPHI THEATRE.

NATIONAL SPORTS

Steeplechasing—although the Hoylake finish between Sailor and Needwood was a glorious glimpse of old days—has shown such a "strange alacrity in sinking" since the Switcher Chandler, and Proceed were in their prime—to say nothing of Grimaldi, Vivian, and Lottery, that is fast becoming extinct amongst us. It is still, however, as much beloved by Irishmen, as fakeracing and coursing are by English men and Scotchmen respectively. Hence all Dublin will, it is expected, run down nine miles by rail, next Monday, to see Mrs M'Donough ride Seamstress, the winner of the last Limerick steeplechase—a three-miles 100 sovs. a side match, over the Conly Castle course, against the Knight of Glynn, on his celebrated hunting mare, Victory. The lady is, we hear, to wear a scarlet habit, and "Jerry" hat on the occasion; and both parties are to ride on sight as the "Iron Duke." Mrs. M'M's fests in the Leicestershire country (where Sir Rich. Sutton has now a stud of seventy hunters) have shown her to be a worthy partner of the celebrated "Allan M'Donough," and it is quite expected that she will win Wolverhampton meeting comes off on the following day; and compre hends a match, two flat-races, a hurdle-race, and two steeplechases. Its Grand Annual has fifteen entries—including Bourton, Miss Mowbray British Yeoman, Kcsn, &c

Coursing meetings are rife during the week. The second edition of the Biggar One, whose late St. Leger running between Breastknot and Ratsplan was completely reversed in their £100 a side match at Alton, is fixed for Tuesday, &c, as is that at Deptford Inn, and the Southern (Cork) Kenilworth and Barton on Humber stakes for Tuesday and Wednesday; the Spelthorpe (Puppy) Cup (Middlesex), Ridgeway, and Mid Annandale, for Thursday and Friday; while Amphhill has its little tryst on the last named day. The death of Border Chief, in the train, on his return from his Newmarket victory, wherein he was for below par, is a great loss to Mr. Brown, whose 800 guineas Bellamira has not run since he broke two of his toes at Horsby Park last season. Backbolt was defeated at Alton, but he never was a quick dog, though a magnificent "finisher when he once "got to it."

As Messinger has completely confirmed his early superiority over Cole, we do not hear that any fresh match is on the *tapis*, though it is not improbable that another will be made between Canon and Corpe, who got quite waterlogged in their struggle at Oxford Beach. Seem to have all the boat-racing next week, and intends to recreat itself with some four-oar races on Monday, and some "scratch" four-oar races on Thursday.

In the way of sales there is nothing of immediate importance; but the clever little Cimicina, and some other blood stock are to be sold at Wolverhampton on Tuesday. Red Lion, Russborough, Chief Justice, and several of Mr. T. Dawson's brood mares are also in the market, as well as West Australian's brother, Marley Hill. The late Mr. Meiklam's stud of ten, including old Inheritress (who, albeit she won forty-two out of eighty-nine races while in Mr. Meiklam's hands, has been sadly unsuccessful in the stud hitherto), are to be sold at York on New-year's day. Daniel O'Rourke, retires with £5450, as his winnings, which include only one event beside the Derby. The present war prospects are very discouraging to the turf and speculation on the coming Derby are exceedingly languid. It is not a little singular that the best racer and soundest favourites—to wit, Greenuts Saufeins and St. Hubert—are cases of them "dark" horses, and the latter sprung from a sire, whose stock have run anything but well in their first season. Fitzroll is the sire of Mr. E. R. Clark next season; and we are told that Bartholomew has received a ridding retainer from Lord Derby, but we do not suppose that he will have the "first riding," unless Sim Templeman retires from the saddle. Frank Butler's re-appearance as Sir Tilbury Tickey at Astley's must doubtful, although he is at present in capital health, and able to hunt with the Cambridgeshire.

We hear of nothing new in the shape of sporting books, though it is rumoured that masters of hounds intend to get up a testimonial to Cecil for his recent work on hunting. Messrs. Fores have just published a beautiful picture, after Herring, sen., of Bay Middleton and Barbelle; the latter of whom bears no resemblance, in her general points, to either of her distinguished sons, Von Tromp and Flying Dutchman. We conclude that Melbourne and Phryne will be the next pair. Mr. Hall's Knight of St. George will be published by Baily Brothers in a few days Basham is on the back of the little bay, which is led by Mr. William Stebbings. The likenesses of the three are admirable; and, in fact, we have only one fault to find—viz., that the horse's ears are not screwed tight back, "as is his custom of an afternoon"

HARROW RACES.—THURSDAY.

Hurdle Race.—Hero, 1. Bullfinch, 2.
Annual steeplechase.—Janus, 1. Nom de Guerre, 2.

THE Earl of Ellesmere is about to send his capacious and swift-sailing yacht to the Crimea, filled with provisions and clothing for the army

THE WESTMINSTER PLAY to be performed by the Queen's Scholars this year will be the "Eunuchus," of Terence, on Thursday, Dec. 16; Monday, Dec. 18; and Thursday, Dec. 21.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The determination on the part of Government to call Parliament to gether in the present month, has had considerable influence upon the Consolmarket, especially as it has been announced that the Chancellor of the Exchequer contemplates a new loan of £10,000,000. Upon this point, however, opinions differ, although it is evident that our expenditure to carry on the war must be met, and that, too, on a gigantic scale. The mode of raising the above sum is variously stated. Some parties contend that there will be an additional issue of Five per Cent Stock; others, that several millions of Exchequer-bills will be added to the present Unfunded Debt, the future interest on which will be increased. As yet, however, everything is involved in uncertainty; but, for our parts, we still entertain some doubt whether the Chancellor will make a direct application to the Stock-Exchange.

The fall in Consols has not been heavy, and we may congratulate the public upon the great firmness that prices exhibit, in the fact of a protracted and most expensive struggle. Private purchases have been tolerably numerous, and the supply of Stock in the hands of the jobbers is by no means large. Business, on Monday, was very inactive, and prices were decidedly flat. Subsequently, however, the Three per Cents marked big to buy, the three per cents Reduced, to leave, and the New Three per Centuries strong and buoyant. In the Long Annuities, the New Stock was in demand, and the Old Stock, to sell. Bank Stock was steady, at 214 to 216. India Stock, 260 to 262. Exchequer Bills, 65s. to 68s. prem.; Exchequer Debentures, 98. On Tuesday bank stock was done at 214 to 216. The Imperial Three per Cents, for account, were done at 90½ to 90¾. Consols, 91¼ to 91¾. Consols for Account, 91¼ to 91¾. The New Three per Cents, 90 to 90¾. Long Annuities, 16 to 16 5-16. India Bonds, 1s. to 2s. dis. Exchequer Bills, 65s. to 68s. prem. Exchequer Bonds, 98 to 99. Exchequer Debentures, 98. The following were the transactions on Wednesday, as far as we have been able to collect them:—Bank Stock, 214 to 216. Three per Cents Reduced, 90¾. Three per Cent Consols, 91¼ to 91¾. Consols for Account, 91¼ to 91¾. New Three per Cents, 90¾ to 90¾. Long Annuities, 16 to 16 5-16. India Stock, 260 to 262. India Bonds, 1s. to 2s. dis. Exchequer Bills, 65s. to 68s. prem. Exchequer Bonds, 98 to 99. Exchequer Debentures, 98. On Thursday bank stock was done at 214 to 216. Consols, 91¼ to 91¾. Consols for Account, 91¼ to 91¾. The New Three per Cents, 90¾ to 90¾. Long Annuities, 16 to 16 5-16. India Stock, 260 to 262. India Bonds, 1s. to 2s. dis. Exchequer Bills, 65s. to 68s. prem. Exchequer Bonds, 98 to 99. Exchequer Debentures, 98. The transactions on Wednesday were limited, as follows:—Bank Stock, 214 to 216. Three per Cents Reduced, 90¾. Three per Cent Consols, 91¼ down to 91¼. Consols for Account, 91¼ to 91¾. New Three per Cents, 90¾ up to 90¾. Long Annuities, 16 to 16 5-16. India Stock, 260 to 262. India Bonds, 1s. to 2s. dis. Exchequer Bills, 65s. to 68s. prem. Exchequer Bonds, 98 to 99. Exchequer Debentures, 98. On Thursday the business rather more extensive, and the Three per Cent Reduced were sold to 90¾, and the New Three per Cents, to 90¾. The Three per Cent Consols left off at 91¼ both for money and time. Bank Stock was done at 214 to 216. Exchequer Bills, 3s. to 6s. dis. India Stock, 5s. to 7s. prem. India Stock, 260 to 262.

The Money Market has become firmer, and the rates of discount have advanced to 4½ per cent for first class paper of short date, and 5½ to 6 per cent for six months' bills. Money, on "call," is worth 4 per cent. The exports of bullion have been only £250,311, from New York. The demand for gold on Continental account has not been large.

The dealings in the Foreign House have been very moderate, yet we have to report a decline to notice in the quotations:—Danish Five per Cents have marked 101; Ecuador 3½; Granada One-and-a-Half per Cents, 15; Ditto, Deferred, 6½; Peruvian Four-and-a-Half per Cents, 68; Russian Four-and-a-Half per Cents, 87; Sardinian Five per Cents, 89½; Spanish Three per Cents, 37¼; Ditto, Deferred, 18¾; Passive, 4¾; Turkish Scrip, Six per Cent, 7½ to 8 discount; Venezuela, One per Cents, Deferred, 9¾; Dutch Two-and-a-Half per Cents, 60¾; Dutch Four per Cents, 96¾; Brazilian Five per Cents, 96; Mexican Three per Cents, 21¼; Portuguese Five per Cents, 45¾.

Joint Stock Bank Shares have met a very inactive demand, and prices have had a downward tendency. Chartered of India, Australia, and China, have realised 1¼; English, Scottish, and Australian Chartered, 13; London Chartered, 23¾; London Joint Stock, 23¾; London and Westminster, 40¾; Oriental, 28¾; Provincial of Ireland, 9¾; Union of Australia, 74; Union of London, 24 to 23. In Miscellaneous Securities, very little has been done. Australian Agricultural, 36. Australian Pacific Mail, 9¾; Canada Six per Cent Bonds, 109¾; Crystal Palace, 2¾; General Screw Steam-Shipping Company, 1¾; North British Australasian, 2¾; Peel River Land and Mineral, 2¾; Scottish Australian Investment, 1¾; South Australian Land, 3¾. Canal Shares have ruled dull, as follows:—Ashton and Oldham, 184; Birmingham, 95¾; Coventry, 209; Derby, 61; Grand Surrey, 48; Leicester, 59; Loughborough, 576; Neath, 190; Oxford, 170; Peak Forest, 88; Regent's, 18¾; Stafford and Worcester, 425; Stourbridge, 228; Worcester and Birmingham, 28. Waterworks Shares have realised—Grand Junction, 70; Kent, 81; New River, 85; Southwark and Vauxhall, 89¾; West Middlesex, 99; Ditto, New, 18. Insurance Companies have been tolerably firm:—Alliance, 10¾; Argus Life, 22; City of London, 24; Guardian, 2¾; Hope and Law, 2¾ 11s. dis.; General, 8¾; Globe, 128; Guardian, 5¾; Imperial Fire, 230; Ditto Life, 18¾; Indemnity Marine, 64; London, 99¾; Phœnix, 180 ex div.; Provident Life, 30¾; Rock Life, 7¾; United Kingdom, 4¾; Victoria Life, 9¾. Bridge Shares have sold: Hungerford at 19; Southwark, 9; Waterloo, 4¾; Ditto Old Annuities of £8, 29; Ditto, New, of £7, 28; Vauxhall, 22. London Dock Shares have produced 104¾; Ditto New, 99¾.

The total note circulation of the United Kingdom, in the four weeks ending on the 28th October, was £26 217,569—being an increase of £2 276,363 compared with the corresponding period in 1853.

As regards the Railway Share Market, we may observe that the transactions in it have been trifling, and the prices have tended downwards. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 19¾; Birmingham, Wolverhampton, and Stour Valley, 78; Caledonian, 86¾; Eastern Counties, 11; East Lancashire, 69; Edinburgh and Glasgow, 65¾; Great Northern, 98; Ditto, B Stock, 120; Great Western, 69¾; Ditto, Stour Valley, Stock, 67; Lancash re and Yorkshire, 70¾; London and Brighton, 105; London and North-Western, 98¾; Ditto, Eights, 10¾; London and South-Western, 79¾; Manchester, Sheffield, and Lincolnshire, 21; Midland, 67; North British, 31. Nor.h-Eastern, Berwick, 72¾; Ditto, York, 69¾; North Staffordshire, 12½; Scottish Central, 92; South Wales, 29; Vale of Neath, 17½.

LEASE HOLD AND FEUED RENTALS.—Manchester, Buxton, and Matlock, 2¾; South Staffordshire, 7¾; Wilts and Somerset, 91.

PREFERENCE SHARES.—Eastern Counties, New Six per Cent Stock, 14; East Lancashire, Six per Cent, Ex. Div., 11¾; Ditto, Five per Cent, 11¼; Ditto, Redeemable at par, 10¾; London and Brighton, 105; London and North-Western, 98¾; Ditto, Eights, 10¾; London and South-Western, 79¾; Manchester, Sheffield, and Lincolnshire, 21; Midland, 67; North British, 31. Nor.h-Eastern, Berwick, 72¾; Ditto, York, 69¾; North Staffordshire, 12½; Scottish Central, 92; South Wales, 29; Vale of Neath, 17½.

PREFERENCE SHARES.—Eastern Counties, New Six per Cent Stock, 14; East Lancashire, Six per Cent, Ex. Div., 11¾; Ditto, Five per Cent, 11¼; Ditto, Redeemable at par, 10¾; London and Brighton, 105; London and North-Western, 98¾; Ditto, Eights, 10¾; London and South-Western, 79¾; Manchester, Sheffield, and Lincolnshire, 21; Midland, 67; North British, 31. Nor.h-Eastern, Berwick, 72¾; Ditto, York, 69¾; North Staffordshire, 12½; Scottish Central, 92; South Wales, 29; Vale of Neath, 17½.

Numerous fluctuations have taken place in the value of national securities to-day, and several rather large sales of stock have taken place. The Three per Cents have marked 91¼ to 91¾. The Three per Cents have realised 90 to 90¾, and the same prices have ruled for the New Three per Cents. In Foreign Bonds and Railway Shares only a moderate business has been transacted.

THE MARKETS.

CORN EXCHANGE (Friday).—Very moderate supplies of English wheat have arrived this week, especially any by land carriage. Some samples to-day sold fully 1s. per qr. higher. The trade is dull, and were a fair request on Monday any further rise must be realised. The arrivals of foreign wheat into the port of London last week were 10,000 qrs., of which none by non-owner or [illegible]. There was very little business done in foreign wheat last week, which is dull and heavy, and low parcels of [illegible] sold at 1s. per qr. lower. The demand for [illegible] is moderate, and a decline of quite 6d. per qr. has taken place in the value of [illegible] flour common to good [illegible]

Arrivals of English wheat [illegible] qrs.; of barley, [illegible] qrs.; of oats, 2,100 qrs.; of beans, [illegible] qrs.; of peas, [illegible] qrs.; of flour, [illegible] sacks and [illegible] barrels.

English. Wheat [illegible] 74s to 78s; Suffolk, red, 72s to 74s; Ditto, white, 76s to 78s; Kingston and Ware, 74s to 78s; Chevalier, 78s to 80s; fine, 82s to 84s; malting, ditto, [illegible] 68s to 72s

Barley, 34s to 36s; Kingston and Ware, 34s to 36s; Chevalier, 36s to 38s; fine, 40s to 42s; distilling, ditto, 32s to 34s; grinding, ditto, 28s to 32s; rich beans, 42s to 43s; fine, 44s to 45s; Winchester, white, 42s to 43s; fine, 44s to 45s; Ditto, grey, 40s to 42s; Kingston and Ware, white, 42s to 43s; fine, 44s to 45s; Ditto, grey, 40s to 42s; Suffolk, 40s to 42s; fine, 44s to 45s; Lincolnshire, 38s to 40s; fine, 42s to 44s; Yorkshire, 38s to 40s; fine, 42s to 44s; Scotch, 38s to 40s; fine, 42s to 44s; Irish, 38s to 40s; fine, 42s to 44s; Foreign, 38s to 40s; fine, 42s to 44s; Egyptian, 38s to 40s; fine, 42s to 44s; Turkish, 38s to 40s; fine, 42s to 44s; Odessa, 38s to 40s; fine, 42s to 44s; Taganrog, 38s to 40s; fine, 42s to 44s; Marianopoli, 38s to 40s; fine, 42s to 44s; Salonica, 38s to 40s; fine, 42s to 44s; Smyrna, 38s to 40s; fine, 42s to 44s; Alexandria, 38s to 40s; fine, 42s to 44s; Egyptian, 38s to 40s; fine, 42s to 44s; Turkish, 38s to 40s; fine, 42s to 44s; Odessa, 38s to 40s; fine, 42s to 44s; Taganrog, 38s to 40s; fine, 42s to 44s; Marianopoli, 38s to 40s; fine, 42s to 44s; Salonica, 38s to 40s; fine, 42s to 44s; Smyrna, 38s to 40s; fine, 42s to 44s; Alexandria, 38s to 40s; fine, 42s to 44s.

Bread.—The prices of wheaten bread in the metropolis are from 10d. to 11d.; of household ditto, 8½d. to 9½d. per 4lb. loaf.

Imperial Weekly Average.—[illegible]

Tea.—The business doing in our market is but moderate, at last week's quotations. The total shipments from China to the 16th October were 38,300,000 lbs. against 2,300,000 lbs to the same date in 1853.

Coffee.—The demand for all kinds of sugar is in a sluggish state, and prices rule is favour of buyers. Alphabetical [illegible] 5d. to 5s. 6d.; Demerara, 5s. 6d. to 5s. 9d.; Bengal, 5s. 6d. to 5s. 9d.; Madras, 5s. 6d. to 5s. 9d.; Bombay, 5s. 6d. to 5s. 9d.; Manilla, 5s. 6d. to 5s. 9d.; Java, 5s. 6d. to 5s. 9d.; Siam, 5s. 6d. to 5s. 9d.; Penang, 5s. 6d. to 5s. 9d.; Singapore, 5s. 6d. to 5s. 9d.; Sydney, 5s. 6d. to 5s. 9d.; Port Phillip, 5s. 6d. to 5s. 9d.; Moreton Bay, 5s. 6d. to 5s. 9d.; Swan River, 5s. 6d. to 5s. 9d.; Adelaide, 5s. 6d. to 5s. 9d.; Western Australia, 5s. 6d. to 5s. 9d.; Van Diemen's Land, 5s. 6d. to 5s. 9d.; New Zealand, 5s. 6d. to 5s. 9d.; Fiji, 5s. 6d. to 5s. 9d.; Samoa, 5s. 6d. to 5s. 9d.; Tonga, 5s. 6d. to 5s. 9d.; Marquesas, 5s. 6d. to 5s. 9d.; Society Islands, 5s. 6d. to 5s. 9d.; Sandwich Islands, 5s. 6d. to 5s. 9d.; Galapagos, 5s. 6d. to 5s. 9d.; Peru, 5s. 6d. to 5s. 9d.; Chili, 5s. 6d. to 5s. 9d.; Mexico, 5s. 6d. to 5s. 9d.; Central America, 5s. 6d. to 5s. 9d.; Cuba, 5s. 6d. to 5s. 9d.; Jamaica, 5s. 6d. to 5s. 9d.; Haiti, 5s. 6d. to 5s. 9d.; Porto Rico, 5s. 6d. to 5s. 9d.; Trinidad, 5s. 6d. to 5s. 9d.; Barbadoes, 5s. 6d. to 5s. 9d.; Antigua, 5s. 6d. to 5s. 9d.; St. Kitts, 5s. 6d. to 5s. 9d.; Nevis, 5s. 6d. to 5s. 9d.; Montserrat, 5s. 6d. to 5s. 9d.; Dominica, 5s. 6d. to 5s. 9d.; Guadaloupe, 5s. 6d. to 5s. 9d.; Martinique, 5s. 6d. to 5s. 9d.; St. Lucia, 5s. 6d. to 5s. 9d.; St. Vincent, 5s. 6d. to 5s. 9d.; Grenada, 5s. 6d. to 5s. 9d.; Tobago, 5s. 6d. to 5s. 9d.; Curaçoa, 5s. 6d. to 5s. 9d.; Surinam, 5s. 6d. to 5s. 9d.; Demerara, 5s. 6d. to 5s. 9d.; Berbice, 5s. 6d. to 5s. 9d.; Essequibo, 5s. 6d. to 5s. 9d.; Trinidad, 5s. 6d. to 5s. 9d.; Barbadoes, 5s. 6d. to 5s. 9d.; Antigua, 5s. 6d. to 5s. 9d.; St. Kitts, 5s. 6d. to 5s. 9d.; Nevis, 5s. 6d. to 5s. 9d.; Montserrat, 5s. 6d. to 5s. 9d.; Dominica, 5s. 6d. to 5s. 9d.; Guadaloupe, 5s. 6d. to 5s. 9d.; Martinique, 5s. 6d. to 5s. 9d.; St. Lucia, 5s. 6d. to 5s. 9d.; St. Vincent, 5s. 6d. to 5s. 9d.; Grenada, 5s. 6d. to 5s. 9d.; Tobago, 5s. 6d. to 5s. 9d.; Curaçoa, 5s. 6d. to 5s. 9d.; Surinam, 5s. 6d. to 5s. 9d.; Demerara, 5s. 6d. to 5s. 9d.; Berbice, 5s. 6d. to 5s. 9d.; Essequibo, 5s. 6d. to 5s. 9d.

Tallow.—The business doing in our market is but moderate, at last week's quotations. The total shipments from China to the 16th October were 38,300,000 lbs. against 2,300,000 lbs to the same date in 1853.

Oils.—Linseed oil is in request, at 37s. 6d. to 38s. per cwt. Cocoa-nut oils move off steadily and the quotations are on upward tendency. No change is to mention.

Spirits.—Another Government contract being advertised, the rum market is steady, at full time values.—Proof Leewards, 1s. 8d. to 1s. 8d.; Ditto, 1s. 8d. to 1s. 8d. per gallon.

Oils.—Linseed oil is in request, at 37s. 6d. to 38s. per cwt. Cocoa-nut oils move off steadily and the quotations are on upward tendency. No change is to mention.

Spirits.—Another Government contract being advertised, the rum market is steady, at full time values.—Proof Leewards, 1s. 8d. to 1s. 8d.; Ditto, 1s. 8d. to 1s. 8d. per gallon.

Wool.—An unusually small amount of business has been doing in this market, and the quotations are not supported.

Potatoes.—The supplies are but moderate, and a steady business is doing, at from 8s. to 15s. per ton.

Coals (Friday). Carr's Hartley, 19s. 9d.; Trewbury, 19s.; Wylam, 20s.; Hetton, 20s.; Stewart's, 24s.; Whitwell, 22s.; Caradoc, 23s.; Hough Hall, 23s.; Tollen, 23s. 6d.; Wortley, 23s. 6d. per ton.

Hops (Friday).—We continue to have a steady demand for fine hops, at full prices. Low and middling qualities are a slow sale. This week's imports are—89 bales from Ostend, 80 from [illegible], 146 from Hamburg, 21 from Rotterdam, 1 from Antwerp. New Mid and East [illegible] pockets, £1 5 0s. to £21 0s.; Weald of Kent, £15 0s. to £16 10s.; Sussex, £14 0s. to £15 0s.; Farnham, £18 0s. to £19 0s.; Bavarian, £5 0s. to £6 0s.; Belgian, £3 0s. to £4 0s.; Hallertaus, £5 0s. to £6 0s.; Saxon, £4 0s. to £5 0s.; Wurtemburg, £4 0s. to £5 0s.; Alsace, £3 0s. to £4 0s.; Prussian, £3 0s. to £4 0s.; Russian, £3 0s. to £4 0s.; Polish, £3 0s. to £4 0s.; Austrian, £3 0s. to £4 0s.; Hungarian, £3 0s. to £4 0s.; Turkish, £3 0s. to £4 0s.; Egyptian, £3 0s. to £4 0s.; Persian, £3 0s. to £4 0s.; Chinese, £3 0s. to £4 0s.; Japanese, £3 0s. to £4 0s.; Indian, £3 0s. to £4 0s.; Australian, £3 0s. to £4 0s.; New Zealand, £3 0s. to £4 0s.; Van Diemen's Land, £3 0s. to £4 0s.; Swan River, £3 0s. to £4 0s.; Western Australia, £3 0s. to £4 0s.; Adelaide, £3 0s. to £4 0s.; Port Phillip, £3 0s. to £4 0s.; Moreton Bay, £3 0s. to £4 0s.; Sydney, £3 0s. to £4 0s.; Fiji, £3 0s. to £4 0s.; Samoa, £3 0s. to £4 0s.; Tonga, £3 0s. to £4 0s.; Marquesas, £3 0s. to £4 0s.; Society Islands, £3 0s. to £4 0s.; Sandwich Islands, £3 0s. to £4 0s.; Galapagos, £3 0s. to £4 0s.; Peru, £3 0s. to £4 0s.; Chili, £3 0s. to £4 0s.; Mexico, £3 0s. to £4 0s.; Central America, £3 0s. to £4 0s.; Cuba, £3 0s. to £4 0s.; Jamaica, £3 0s. to £4 0s.; Haiti, £3 0s. to £4 0s.; Porto Rico, £3 0s. to £4 0s.; Trinidad, £3 0s. to £4 0s.; Barbadoes, £3 0s. to £4 0s.; Antigua, £3 0s. to £4 0s.; St. Kitts, £3 0s. to £4 0s.; Nevis, £3 0s. to £4 0s.; Montserrat, £3 0s. to £4 0s.; Dominica, £3 0s. to £4 0s.; Guadaloupe, £3 0s. to £4 0s.; Martinique, £3 0s. to £4 0s.; St. Lucia, £3 0s. to £4 0s.; St. Vincent, £3 0s. to £4 0s.; Grenada, £3 0s. to £4 0s.; Tobago, £3 0s. to £4 0s.; Curaçoa, £3 0s. to £4 0s.; Surinam, £3 0s. to £4 0s.; Demerara, £3 0s. to £4 0s.; Berbice, £3 0s. to £4 0s.; Essequibo, £3 0s. to £4 0s.

Provisions.—The sales for Irish butter is in a sluggish state, and prices have a downward tendency. Fine fresh has sold at 96s. per cwt. In English, very little is doing. For weekly Dorset, 112s. per cwt. The bacon market is heavy, at a further decline of 2s. per cwt. Fine hams are in good request, at full prices, but other kinds are a slow sale.

Tallow.—The business doing in our market is but moderate, at last week's quotations. The total shipments from China to the 16th October were 38,300,000 lbs. against 2,300,000 lbs to the same date in 1853.

Coffee.—The transactions are very moderate, yet the quotations are supported. White Bengal, 1s. 6d. to 1s. 7½.; Mocha, 1s. 10d. to 1s. 6d. per cwt.

CATTLE SHOW.—Visitors should call at BLACK'S ELECTRO PLATE, CUTLERY, and IRON-MONGERY WAREHOUSE; where they may learn the Annual Cattle Show is held, to look at the lowest prices. Catalogues Gratis. Orders above £2 Carriage Free to any part of London.

THE LINCOLN SHOW. FIRST PRIZE.

ROOT-PULPING MACHINE, Invented and Patented by FREDERICK PHILLIPS, of the HALL FARM, Stradbroke, Suffolk.—The object of this machine is to produce a mere pulp, in mode of feeding fattening animals, by giving the roots and dry food in wet vegetable, instead of the old system, of giving them at one meal, with cold slops, roots, and at another with other substances or mealiness food. Their peculiar advantage is, that they so effectually pulp and mix the roots with the dry food, that the animal cannot pick them out from any dry meal, or chaff, they are mixed with. Animals by this mode improve fast, and at less expense, than by the old system of feeding. It is also an admirable method of keeping lean stock in health for the plough horses, as they may be made to eat with a relish, straw chaff, or any dry food, by mixing a portion of pulped roots with it. These Machines have been greatly simplified, improved, and reduced in price for the present season, and they were exhibited at the Lincoln Show. They will be exhibited at the coming Cattle Show of the Oxford Club, Oxford 23d.

BURTON and HARE'S IMPROVED IN-SOLE PROPELLER, supported by Steel Springs. These grand and much admired Carriages are furnished with all the modern improvements. Adult and Juvenile Pony Chairs upon the same principle. Burton and Hare, Manufacturers, 485, New Oxford-street. Dealers supplied.

BURTON'S PATENT PERAMBULATORS, by distinguished patronage, the flattering encomiums, and increasing demand are sufficient proofs of the utility and excellence of these fashionable, safe, and elegant carriages, for adults, children, and invalids. Proposal from behind by the slightest pressure. Illustrated Circulars, shipping orders. Office, 487, New Oxford-street.

AIDS for DEFECTIVE SIGHT.—Those who suffer from impaired vision or whose sight is becoming defective from constitution, decay, old age, or other causes, are invited to inspect particulars for its restoration by artificial means obtained by forwarding their address to Messrs. HORNE and THORNTHWAITE, Opticians, 123 and 125, Newgate-street.

NO CHARGE for DIES or STAMPING.—Coronets, crests, ciphers, addresses, &c., engraved on dies, stamped on paper or envelopes, free of charge, on orders amounting to 20s. per quire, on receipt of post-office order. Observe, SMITH, Sole Inventor of the Patent Adhesive Envelope, and Manufacturer of Initial Paper and Envelopes, 43, Basinghall-place, Gresham-street, London.

The GOVERNMENT TRAINING SCHOOL, at KNELLER-HALL.—AN EXAMINATION will commence at this School on the 4th of DECEMBER for the election of Queen's Scholars and Exhibitioners to be trained for the Government Service. Forms of application to be addressed to the Secretary, may be obtained from the Rev. F. Temple, Kneller-hall, Isleworth, Middlesex.

THE PERMANENT HAPPY EXISTENCE of the HUMAN RACE; or, the Commencement of the Millennium in this world. Governments, Religions, Classes, Souls, and Parties, in all countries, are invited to send DELEGATES to a MEETING to be held in the Metropolis of the British Empire, on MONDAY, the 11th of DECEMBER, in ST. MARTIN'S HALL, to hear explained "that Tidings of Great Joy to all Mankind," which were echoed by the Angels of God, at the birth of Jesus Christ; by which all Governments may make, with the aid of their respective religions, every man born, good, intelligent, wise, and safe, and permanently prosperous and happy. And, as in ordinary meetings, it is expected that the delegates so appointed to meet and send delegates to a meeting to be held in St. Martin's Hall, on Monday, the 11th of, 1855, at seven p.m., to have explained to them that they may explain to their constituents in London, and in the Provinces, the wonderful change in the condition of the human race without revolution or violence, to be effected in peace, with peace, wise foresight, and without injury to any one or any class in any country, but with high lasting benefit to all, and that they may then send delegates to those new conditions. Let all those who shall attend these two meetings, come in the spirit of pure charity for all men, and a right good-will to all and henceforth, regardless of their class, creed, country, or colour. This will be the last general survey in these present age but the whole will be concluded with "Truth, without a mystery, and Science, without a veil." And the glory of the Revelation of mankind to a new phase in their condition will be a tune to the God of the Universe, and to mankind, and things in regular progress for the welfare good and happiness of mankind.

London, 25th November, 1854. ROBERT OWEN

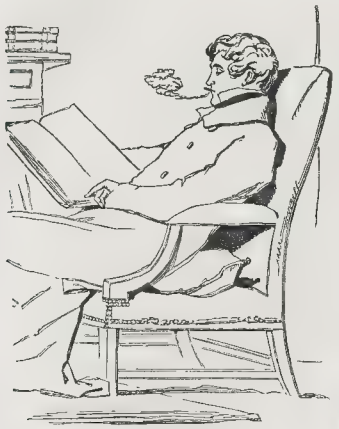
These stoves—so justly celebrated for preserving their powers

J. G. LOCKHART, ESQ.

John Gibson Lockhart, a famed critic and writer himself, and still more famed from his connection with the greatest of all Scotland's authors, was the son of a clergyman in Glasgow. He received his edu-



THE LATE MR. J. G. LOCKHART.

cation at Glasgow College, and at Baliol College, Oxford. He chose the law for his profession, and was called to the Scotch bar: his success, however, as an advocate was very moderate, and he soon resigned forensic pursuits for those of literature. There he speedily attained a very high position. He was a popular contributor to *Blackwood's Magazine*, and wrote, in that journal, "Peter's Letters to his Kinsfolk." Lockhart owed his introduction to Sir Walter Scott, in 1818, to the poet Hogg. The intimacy resulted in the union of Lockhart with Sir Walter's daughter, Charlotte Sophia. The late surviving issue of this marriage, and the sole descendant of the author of "Waverley," is the present Mrs Hope, the wife of James Robert Hope, Esq., Q.C., D.C.L., now the possessor of Abbotsford. Through Sir Walter Scott's influence Mr. Lockhart became, in 1825, the editor of the *Quarterly Review*. Apart from his contributions to magazines and reviews, Mr. Lockhart was the author of some singular novels, and some excellent biographies. His chief works of fiction were, "Valerius: a Roman Story;" "Reginald Dalton;" and the remarkable and startling tale, entitled "Adam Blair." Mr. Lockhart possessed a good family estate; and he was Auditor of the Duchy of Cornwall. Mr. Lockhart died on the 25th ult.

A character of Mr. Lockhart, as a critic, a novelist, and a poet, will be found in our column of "Town and Table Talk" of this week.

Vacant Seats in the House of Commons.—There are now no less than eight in the House of Commons vacant. Abingdon was vacated by Lord Norreys's succession to the peerage; Marylebone, by Lord Dudley Stuart's death; Bedford, by the decease of Mr. H. Stuart; Coventry, by that of Mr. Geach; East Gloucestershire, by Sir Michael Hicks Beach's death; Fermanagh, by that of Sir Arthur Brooke; Antrim, by Colonel Pakenham's death, at Inkerman; and Ayr, by that of Colonel Hunter Blair, also killed at Inkerman.

THE LATE VISCOUNT CHEWTON.

By the death at Alma, of Viscount Chewton, the Army and the country have been deprived of the services of a most promising young officer. He died from wounds received on the heights of Alma whilst gallantly leading on his company of the Scots Fusilier Guards, and his gallant spirit was not yielded until he had received no less than thirteen. His right leg was broken by shots from the Minié rifle.

The deceased officer, William Frederick, Viscount Chewton, was born June 29, 1816; being the eldest son of William, present Earl Waldegrave—a distinguished naval officer—by Elizabeth, eldest daughter of Samuel Whitbread, Esq., by Lady Elizabeth Grey. He entered the Army in July, 1841, as an Ensign in the Line; and, in the August of 1847, he obtained his company. During the insurrection in Canada he served with the militia, and aided materially in putting the malcontents down. He subsequently proceeded to India, and served with the 53rd Foot, on the banks of the Sutlej. He particularly distinguished himself at Sobraon, for which he received a medal. Lord Chewton married, in 1850, Fanny, only daughter of the late Capt Bastard, R.N., of Shurpham, Devon, by whom he leaves issue three children, the last posthumous. Lord Chewton

THE LATE VISCOUNT CHEWTON, FROM A DAGUERREOTYPE BY THE BROTHERS MAYER.

was removed from the Crimea to Scutari, where, after a brief suffering, he expired. His remains were interred in the English Cemetery at Constantinople.

Literature for the Army in the Crimea.—It having appeared from several letters sent home by the officers and soldiers of the army now in the Crimea, that any periodicals or books, more especially of the lighter class of literature, would be most acceptable, several gentlemen have subscribed a number of magazines and volumes to form the nucleus of a cargo, to be forthwith dispatched to the East. It is presumed that there are few families who will not cheerfully contribute those odd volumes which at present may be found lying about every house, perused and no longer valued here, but which would be gladly received by our gallant defenders. All contributions will be received and very carefully collected and packed, if forwarded to Mr. Arthur Smith, Egyptian-hall, Piccadilly; and Mr. James L. O'Beirne, Secretary to the General Screw Steam Company, has kindly undertaken to send on these parcels, free of any charge, to their destination.

THE LATE PROFESSOR EDWARD FORBES, F.R.S.

In the Illustrated London News of last week we recorded the severe loss which the scientific world has just sustained in the death of Professor Edward Forbes, at the early age of thirty-nine, just as he

THE LATE PROFESSOR EDWARD FORBES, FROM A DAGUERREOTYPE BY CLAUDET.

had attained the distinguished position of Regius Professor of Natural History in the University of Edinburgh. "His friends," says the *Scotsman*, "indeed, know well how irreparable is their loss. But it is more difficult to estimate the loss to science caused by the removal of one who, following, like his predecessors Walker and Jameson, in the footsteps of Linnæus, gave promise of raising the science of Natural History to a height nowhere yet attained."

Edward Forbes was born in 1815, in the Isle of Man. He was heard to say, that his love of natural history dated from his earliest childhood: it was inherited all his own, for no individual of his family, or even acquaintanceship, had the slightest taste for scientific studies. His first printed guide or text-book was one of the driest, "Turton's Translation of the Systema Naturæ;" and by the time he was seven years of age he had collected a small museum of his own. Next, though in very early life, came the perusal of Buckland's "Reliquiæ Diluvianæ," Parkinson's "Organic Remains," and Conibeare's "Geology of England"—rather hard reading that last for a boy, and probably rather wrestled with than understood. These books, however, when he was not more than twelve years old, inspired him with a warm and abiding love of geology. At this period also he compiled a Manual of British Natural History in all its departments—a youthful labour, which he afterwards found serviceable up almost to his close of life."

FRENCH TROOPS LANDING AT CAPE CHERSONESE.

FRENCH TROOPS LANDING AT CAPE CHERSONESE.

THE place which our French allies have chosen as a landing-place for their troops and supplies, if not so well sheltered as Balaclava, has the advantage of being much more spacious, and of being not so easily molested by the enemy, owing to the absence of hills in the immediate neighbourhood. In the event of any attack by the Russians, the warships in the bay would also be able to give effectual assistance to the troops on shore.

In his sketch of the landing of the French troops, our artist gives a pretty good impression of the bustle attendant upon that part of the business of war. The projecting jetty is crowded with warlike implements recently landed from the transports, of which a large number are lying at anchor. A file of military waggons is passing to the camp, some of them drawn by six or eight horses, with mounted drivers. A glimpse into the Intendant's tent in the foreground shows several persons busily engaged writing out reports to be forwarded to head-quarters.

Mr. Scott, in his recent travels in the Crimea, describes the ancient city of Chersonesus, which was founded by the Greeks 600 years before Christ, as having been built "on the smaller peninsula, washed on the west by the waters of the Black Sea, and on the east by one arm of a double bay." This must have been the very spot which the French have pitched upon as their point of disembarkation.

The town called "New Chersonesus," which was founded after the destruction of the ancient Greek city, and which rose to considerable wealth and power as a republic, was built on a promontory to the west of Quarantine Harbour, about a mile and a half from Sebastopol. The ruins of this town still remain; but they have been sadly demolished by the subjects of Nicholas, who do not seem to have very refined tastes. "One cannot walk amidst the ruins of Chersonesus," says Mr. Scott, "free from profound regret and indignation that so many beautiful relics, which even the Tartar had spared, should have been utterly destroyed by the barbarism of the Russian soldiers. Much of this appears to have been done from sheer wantonness, and subsequent to the period at which the Government had given orders to preserve what then remained.

It was in the town of Chersonesus that the Grand Duke Vladimir of Russia was baptised and received into the Greek Church, A.D. 988, so that the Muscovites have had a very old connection with the Crimea. In a recent address to the patriotic and religious feelings of the Russian population in that quarter, the weak in faith are asked if the Crimea is not the cradle of their Christianity?—if the light of the orthodox faith did not radiate from thence over the plains of Russia? "Can they deem it possible that the double cross will here pale before the crescent of Mohammed? Does the Church pray in vain for victory and for her right pious Emperor and his Christ-loving warriors? Do the martyrs who left their bones there stand round the throne of the Almighty and throw down their crowns of thorns before Him in vain? Can the sainted Grand Duke Vladimir forget how much he owes to this country (he was baptised there), and leave you a helpless prey to the degenerate heretical intruders of the West?" And this is wound up with an exhortation to all loyal Russians to be more zealous in providing provisions and means of transport for the army, and then they will soon attain to rest and repose.

STREET IN BALACLAVA.—(SEE NEXT PAGE.)

A STREET IN BALACLAVA.

The little town of Balaclava, which the Russians have been making various attempts to regain, with the view of thereby cutting off our supplies, has been more than usually busy during the last two or three weeks, some ding to all accounts. In addition to the constant arrival of vessels with ammunition, provisions, and stores of every description, a number of transports with reinforcements must have recently reached it, and indeed the harbour of Balaclava, where they have been to await daily looked for. The accompanying Sketch gives a view of one of the streets of the Tartar town along which a party of Dragoons are passing, on their way to the English Camp; while a couple of dromedaries, and two or three natives in the Tartar costume, give an Oriental aspect to the scene.

A recent letter from the Crimea gives the following description of a street in Balaclava:—

The street fronting the harbour of Balaclava is as busy a scene as can be imagined. The murmur of the various different languages—the boats loaded with ammunition and stores—the hundreds of arabas drawn by camels and oxen wending their slow way to the trenches—the gallopping to and fro of officers at orderlies, and too often, I'm the slow tread of ox-carts bearing to the hospital another sick or wounded comrade—form a striking spectacle. As one passes along the high road out of Balaclava, leading the Marines in their strong position on the hill to the right, and the sailors of the *Vesuvius* busy in forming an invenced battery on the heights to the left, we observe a sure indication that the hills are growing cold, and fuel on these wide bare hills and valleys scarce, in the sight of soldiers busily employed in removing the fittings of some of the detached houses in order to get at the beams for firewood. Very different indeed are those weather-beaten and travel-stained warriors look to what they did on parade at home. Al, the pomp and circumstance of war has been shorn away, and they have now to fight for it really. Red certainly does not stand the work of the pattle as well as the blue coats and loose trousers of our sailors. A new suit of clothing to every man would be a boon indeed, and many are the inquiries for the hundreds of tons of fleecy hosiery reported to be on its way. Still, though diarrhœa is prevalent in both armies, there are few fatal cases; but there is a good deal of typhus among the Turks, especially among the 10,000 brought in our steamers from Batoum. It is scarcely fair to judge them after a long sea-voyage, but their present discipline and appearance does not say much for the army of Asia. Balaclava is further defended by the whole of the Bays and Brigade, under Sir Colin Campbell, and a large body of Turks. The 93rd are encamped on a hill side, about a mile out. Their gallant conduct on the 25th, when, perhaps for the first time recorded, infantry received cavalry in line, has been highly eulogised in his general order by Lord Raglan. The *Niger*'s guns, and the greater part of her crew, are with the 93rd, and they, assisted by certain sailors from the Turks, are entirely employed in throwing up what will be a very strong position. The only point from whence it can possibly be commanded is one of the three ridges seized by the Turks; but it is not thought that the enemy have with them guns of sufficient calibre.

THE BREVET.

(From Tuesday Night's *Gazette*.)

WAR-OFFICE, Nov. 28.

The undermentioned officers, who were placed upon retired full pay [illegible] Her Majesty's Royal warrant of the 6th of October, 1854, to [illegible] rank, in order to place them in as [illegible] position as those who may prospectively obtain retirement [illegible] the provisions of the said warrant, the rank in both cases being [illegible]:—

TO BE COLONELS IN THE ARMY.—Lieutenant-Colonel Henry Le Blanc James Lewis [illegible] Charles Warrington, Edward Pole Crawfield Bewsher [illegible] Hunter, Joseph Kelsall, William Ross, Edward T. Troutbeck, John [illegible] George Mary Hardy, Peter John Grubbe, William Barney, Gerald Hochfort, Philip Bainbridge Wilkinson, Richard Westmore, Robert Paterson, John Pow, C.B., Edward James [illegible] Hall, Edward William Hoey, C.B., Alexander Shannon, Robert Lennox [illegible] Hamilton, Joseph Shewbridge, Daniel Fraser, Charles Hagremore Pote, Henry Edmund [illegible] Hudson Hoole.

TO BE LIEUTENANT-COLONELS IN THE ARMY.—Majors Geo. Xedaile Brigston William [illegible] Edward Gorin Stephen Noel [illegible] Richard Hendcote, Peter Sutherland, John Rosamy, John Thomas Romaine, James Thomas Moore, Ambrose Lopp, John Clarke, James [illegible] Robert Browne, Rowland Tarrant, James Jackson, Alexander Sharrock William [illegible] Hutton Hamilton, William Wadeson, Martin Cross Lynch, Edward Boyle, Joseph Smith Cowan Stephenson, William Dempster, Charles Rayner Newman, Charles [illegible] John Grey, Archibald Campbell, Henry Dillon, Charles Donald [illegible] Alexander Anderson, Richard Bender, William Atkin, Abraham Sykes, [illegible] Ware, John Norman, Angus William Mackay, John Sol ce, William Farmer, Daniel [illegible] Henry Alexander Kerr, William Stokes, William Newbonne, Henry Francis Stokes, Charles Hay [illegible] James Eagle Challoner, Charles Barnes.

TO BE MAJORS IN THE ARMY.—Captains Sir William Wynn, Marcus Loole, George St [illegible] Richard Wilbraham Bootle, Thomas Lister Colclough, Archibald Blundell, William [illegible] Sir Thomas D'Arcy, Robert Gray, Josiah George Hart, William Kelly, Joseph [illegible] Augustus Frederick Fellowes, Richard Woods, Daniel Hall Pearson, Thomas [illegible] Thomas Fenwick Agnew, Brooke Pigott, Bailie Gordon, Richard [illegible] Francis Lowndes, John Adrian Lennox, John St Digant Hoe, Adam Von Beverhout, John [illegible] Charles Robert Shepherd, Robert Stuart Ridge Jun Harvey, John Campbell [illegible] Henry Abbott, Robert Graham, John Bockett Bender Monnatieres [illegible] Lovell, George Gabb Kaye, George Browning Williams, John Shaw, William [illegible] Thompson, John M'Quahlin David Cooper, William Armstrong Rogers, [illegible] Knox, Robert Thomas Hamilton, William M'Donald, Patrick Dunn. The commissions to bear date 9th Nov. 1854.

NOVEMBER 2.

The undermentioned officers having comp eted three years' actual service as Regimental Lieutenants-Colonel, or in other appointments equivalent to those situations, to be presented to the rank of Colonel in the Army in accordance with the provisions of her Majesty's Royal Warrant of the 6th October, 1854.

TO BE COLONELS IN THE ARMY.—Lieutenants-Colonel Edward Rowley Hill, George William Rose, Bruce, Sir George Shewell, Edward Pole, Archer Shee, Frederick Hill Maberly, C.B., Robert Wilson, Arthur Johnson Lawrence, Hon. George Cadogan, John Hennage Gubbins, William Hawkins Ive, Francis Charles Charles-Fr Arnold, Henry Darrell, Fred an Maxwell, Alexander Nelson Hood, David Russell, Richard William Henry, Horatio Charles Ross, Samuel Reynolds Hughes Henry George Carey, Charles Burney, John Rose, Robert Mowell, R. C. Miles Hillman, Spencer Jerrard, Edward Thornton, Henry Lee [illegible] Lindsay, William Augustus C. Weld Forester, Edward Cosslett, Frederick Rudolph Bake, C. Cooke Yarborough, C.B., William Henry Charles Wellesley, Henry Edward Doherty, C.B., Alexander Halliday Ferguson, William Henry Lane, Thomas James Galloway, William Jones, C.B., James Campbell, Alexander Stewart, Lewis Lee Reid, Hon. Keith Stewart Mackay, Charles Trevor Clive, William Gunyon Brooke, Henry Jones, Michael William Friend, John Maxwell Fenwick, Colin Henry Wm. Stisted, Thomas James Adair, Philip Monnoch Nixon Guy, George Hudson, Charles Gunning Wood, Thos. Phillip Anthony Vigors, Thomas John Moore, William O'Grady Haly, John Enoch, William Henry Vicars, William Montgomery, James Fraser, Henry Richmond Jones, Henry Sowerby Smith, Charles Rogers, George Augustus Wellington Hamilton, Alexander Stirling, Alexander Fife Cumming, to bear date the 24th Nov., 1854.

ROYAL ARTILLERY.

TO BE MAJOR-GENERALS IN THE ARMY.—Lieutenant-General Sir Henry Ballyngale Ross, K.C.B. and Colonel Hon. Charles Gardner, K.C.B., R.C.H.

TO BE LIEUTENANT-GENERALS IN THE ARMY.—Majors General Frederick Campbell George Tucker, C.B., Peter Mc.gregor Walker, Richard Jones, John Mitchell, C.B.

TO BE MAJOR-GENERALS IN THE ARMY.—Lieutenant-Colonels William Rose Ingilby, Thomas Cubitt Wright, Henry Percy Robert William Shirley, William Frederick Williams, C.B., Archibald Maclaine, George James Henry Pelliser, Robert Longmore Garstin, John Alexander Wilson, Richard Goodwin Bevan Wilson, Burke Coppinger, Robert Burn, Richard Beaumont Barnesby, John Longueford Griffin, William Howe Rumsin, Thomas Ascott Lethbridge Hamilton, Lorrod Ivey, Henry Brandreth, William Henry Dunlop, Henry Moss Trevor de Desbrisay, Charles Smith Symonds, William Wallace D'Arley, Edmund Read Wilmot, John Upton, William Henry Goldfinch.

ROYAL ENGINEERS.

TO BE COLONELS IN THE ARMY.—Lieutenants-Colonel Charles Wright, Tracie Wright Pearson, Thomas Ogle Arnold, Joseph Julius Pettiber, Henry Wareham, Frederick Henry Baddeley, Edward Vicars, Thomas Budgen, Henry Powell Wynd, John Hamilton, Alfred A. Cuch.

The Commissions to bear date the 16th November, 1854.

RUSSIAN GENERALS KILLED AND WOUNDED.—From the silence generally maintained in Russian reports as to the nominal casualties, it is difficult to ascertain the names of killed and wounded officers even of high rank. Nevertheless, the following list, carefully and successfully noted down, since the campaign on the Danube, from Russian and other trustworthy reports, may be regarded as approximating to correctness:—Prince Paskiewitch, wounded at Silistria and invalided; Lieutenant-General Schuler, died of wounds at Silistria; Lieutenant-General Selwan, killed at Silistria; Lieutenant-General Dreshern, died at Jassy; Lieutenant-General Chrulew, wounded at Giurgevo; Lieutenant-General Sobolew, wounded at Giurgevo, killed Nov. [illegible]; Lieutenant-General Lüders, wounded at Silistria; Admiral Nachimoff, killed at Sebastopol; Admiral Kornileff, wounded at Sebastopol; Admiral Istomine, killed at Sebastopol; Major-General Kiriakoff, wounded at Silistria; Major-General Schilder, wounded at Silistria; Major-General Schilder, killed at Silistria; Major-General Kozlowski, killed at Silistria; Major-General Dubourg, wounded at Silistria; Major-General Bakanoff, wounded at Giurgevo; Major-General Lüders, wounded on the Danube; Major-General Saturin, wounded on the Danube; Major-General Todleben, wounded on the Danube; Major-General Chelaschi, wounded at Calafatia; Major-General Velitzki, wounded on the 5th of Nov.; Major-General Uchtomsky, wounded on the 5th of Nov.; Major-General Prince Menschikoff, wounded on the 5th of Nov. (not the General-in-Chief). Here, then, is a list of twenty-five Generals and Admirals who have been put hors de combat and strong grounds exist for believing that four or five others have been omitted in the divers reports furnished to the journals of Petersburg.

THE LATE PROFESSOR EDWARD FORBES, F.R.S.

(Continued from page 564.)

When very young, Mr. Forbes commenced his studies as an artist, and attended for six months the studio of the late Mr. Sarc, in London; and in his travels and natural history studies in after life, Forbes felt the advantage of this short training. His love, however, of natural history led him to the medical profession; and, in 1830 he commenced his career as a student at the University of Edinburgh; there he studied with great zeal and success, but never presented himself for his degree. At the age of eighteen, Edward Forbes made a spirited excursion, in company with a fellow-student, to Norway; and spent several weeks in collecting specimens and observations, and revisiting the glaciers. Forbes had previously made a voyage in the Mediterranean, and visited the coast of Algiers; and one of his earliest published papers was "On the Land and Fresh-water Mollusca of Algiers and Bougia." During this time he was active in the pursuit of natural history, and he published several papers giving the result of his observations. Among these were his "Notes of a Natural History tour in Norway," "On the Comparative Elevation of Testacea in the Alps," and "Malacologia Monensis—a Catalogue of the Molluscs inhabiting the Isle of Man and the neighbouring Sea."

Whilst a student in Edinburgh Mr. Forbes may be said to have invented the art of dredging; for till his time it had scarcely been regarded as part of the serious work of the naturalist. His numerous papers at this time "On the Structure and Forms of the Marine Invertebrata" attested the value of the dredge (hitherto only employed by fishermen to procure shell-fish), and with it he may be said to have opened a new field of research, of quite a new branch of science. It was, afterwards, with this instrument, in the Ægean Sea, that he made the important observations by which he was enabled to point out the great law, that, as there were zones of animal and vegetable life at the bottom of the sea, so there were zones of animal and vegetable life in depth on the sides of the valleys of the ocean. His dredging excursions are frequently recorded in the *Magazine of Zoology and Botany*; and, through his influence, Dredging Committees have been appointed by the British Association, whose labours have greatly contributed to enlarge our knowledge of the inhabitants of the British seas. One of the earliest, and most important, of his systematic works, was the result of his dredging labours, in a "History of British Starfishes," published in 1841, illustrated with vignettes and tail-pieces from the author's own pencil.

In 1841 he was attached, as naturalist, to H.M. surveying ship *Beacon*. He had, in consequence of this, an opportunity of examining some of the most interesting and least-known parts of Asia Minor, in company with the Rev. E. T. Daniell and Lieutenant Spratt. Mr. Daniell died of sickness brought on by the climate. Mr. Forbes, on his return to England, published, jointly with Mr. Spratt, an account of the Expedition. The scientific results were also made known in a "Report on the Mollusca and Radiata of the Ægean Sea," &c., presented to the British Association, at Cork, in 1843. Mr. Forbes's appointment to the Chair of Botany in King's College, London, took place during his absence in the East. "Those who attended his class will ever remember the charm he threw around the study of Vegetable Structures, and the delightful hours they spent in his company during the periodical excursions, which he made a point of taking with his pupils, in the neighbourhood of London. Nor were these excursions attended by pupils alone. Many are the distinguished men of science in London who sought this opportunity of availing themselves of his great practical knowledge in every department of natural history."—*Athenæum*.

Not long after entering on the duties of the Professorship, he was chosen to be Secretary and Curator to the Geological Society of London. He, too, he was enabled to apply to geological research that peculiar knowledge of the sources of animal and vegetable life by means of the use of the dredge, which to use his own words, "is an instrument as valuable to a naturalist as a thermometer to a natural philosopher." Professor Forbes also contributed greatly to the value of the Geological Society's Museum in the arrangement of its fossils. He had been elected a Fellow of the Linnean Society, on his return from the Ægean, in 1843; and in 1845 he was elected a Fellow of the Royal Society, and became ere long a member of the Council. He also received from the Government School of Mines in connection with the Ordnance Geological Survey under the direction of Sir Henry de la Beche, Professor Forbes resigned the Curatorship of the Geological Society, and accepted the appointment of Paleontologist to that institution; and on its location in Jermyn-street, he was appointed its Professor of Natural History. He gave frequent lectures there, arranged and displayed the valuable collection of fossils, and he published a splendidly illustrated series of monographs of the new species. He also carried hard at intervals the different parts of England, Wales, and Ireland with his geological hammer; and it was during a campaign in the Isle of Wight that he made that shrewd discovery in the character of the Eocene beds, which has made it necessary to alter the tertiary classification of last family. About this time he also wrote, in conjunction with Mr. Handley, a comprehensive and beautifully-illustrated history of "British Molluscs."

Not long after Professor Forbes's connexion with the Museum of Practical Geology, he published, in the first volume of the Memoirs of the Geological Survey of Great Britain, "one of the most remarkable contributions to the science of geology in this country. This paper, which may be regarded as a work on the subject, is entitled 'On the Connexion between the Distribution of the existing Fauna and Flora of the British Isles and the Geological Changes which have affected their Area.' In this work, the happy combination of great botanical and zoological knowledge is made to bear on some of the most interesting inquiries with regard to the age and relationship of the rocks of Great Britain. From this time the *Transactions of the Geological Survey* and the *Journal of the Geological Society* were enriched with Professor Forbes's papers, all displaying accurate and extensive observation, combined with profound and original thought. His papers and works on Zoology and Geology, in the "Bibliography," published by the Ray Society, amount to eighty-nine; this number not comprising his numerous "Botanical Papers," or those published since 1850. He was likewise a most valuable contributor to Johnston's "Physical Atlas." The Geological and Paleontological Map of the British Isles was constructed by him; and a World Map of the highest interest, embodying all the previous results of the most original researches, entitled "Distribution of Marine Life, illustrated chiefly by Fishes, Mollusca, and Radiata, showing also the limits of the Homoiozoic Belts."

In 1852 Professor Forbes was elected to the President's chair at the Geological meeting which had been filled by Professor Sedgwick, Sir Roderick I. Murchison, and Sir Charles Lyell, who bore willing testimony to the genius of their useful success r. At the meeting of the British Association at Liverpool, in September last, he filled the President's chair in the Natural History Section. "It was in that distinguished and honourable post (says the *Literary Gazette*) that his admiring geological colleagues, Lyell, Murchison, Sedgwick, Owen, Greenough, Portlock, Smith, Egerton, Ramsay, Jukes, Phillips, and others, saw him for the last time." On the death of Professor Jameson, the Regius Professorship of Natural History in the University of Edinburgh, Edward Forbes was elected to succeed him. He lived to complete but one course of his lectures. Up to the time of his illness he was diligently engaged in organising his plans as Professor at the Museum. He had resolved to make himself generally useful to the public; the last work his pen was employed in being the revisal of his elaborate Paper on the Geological and Paleontological Map of Britain, for the new edition of Johnston's Physical Atlas.

Whilst thus engaged, a chronic disease, contracted by Professor Forbes when in the East, re-excited and rendered violent by a severe cold caught last autumn, burst forth with uncontrollable fury, and in ten days proved the immediate cause of his premature death. He was buried on Tuesday week, in the Dean Cemetery, at Edinburgh (the Town-council and Professors of the University and students following his remains to the grave.

Professor Forbes was pre-eminently a naturalist. His attention had never been exclusively directed to any one of the natural sciences. He was equally a botanist, a zoologist, and a geologist, from first to last. With a remarkable eye and tact for the combination of species, and the allocation of natural groups, he combined the utmost delicacy in the perception of organic and comical relations. He possessed that rare quality so remarkable in the great masters of natural history, Linnæus and Cuvier, the power of unveiling himself of the genius of his brethren—not, as is too often the case, by appropriating their exquisite, but by associating them voluntarily in the common labour. Entirely destitute of jealousy in scientific matters, he rather erred in overrating than in underrating the services of his friends. He was, consequently, as much beloved and confided in by his seniors in science as by the youngest naturalists of his acquaintance.

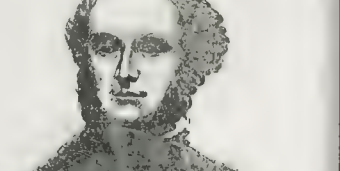
We have already enumerated a sufficient number of Professor Forbes's works to show the amount of severe scientific toil which their production demanded. Meanwhile he found time for literary occupations of a lighter class. He contributed several valuable papers to the *Literary Gazette* and *Athenæum*. He wrote also for the first number of the New Series of the *Westminster Review* a sparkling article on "Shell-fishes their Ways and Works." From the latter journal we learn that, at the time of his death, Professor Forbes was engaged on several works. The one which he early announced, under the title of "Rambles of a Naturalist," he still intended to complete. Another, the "Zoo gey of the European Seas," is nearly all printed. He was also preparing for publication the results of his researches in the Ægean. We should add that he had already been announced to edit a new series of the *Edinburgh New Philosophical Journal*, formerly Professor Jameson's.

The brilliant paper in the last *Quarterly Review* upon "Silaria" was one of the latest productions of Professor Forbes's pen. How eloquent is this closing passage, and how expressive of his noble nature:—

Men whose work, both of head and hand, is done mainly under the broad sky, and along the craggy sides of mountains, heedless of weather and toil, are not likely to use mincing forms of speech, or mollify their sentiments when engaged in discussions, though all the time mildness and mercy are at the foundations of their thoughts. Better and truer men, whether in field or council, there are not living than the two famous zoologists, the nature of whose difference we have endeavoured to expound. They have worked long and well in co-operation, heart and hand united; and though the fortune of scientific warfare has led in the end to the crossing of their pens, the names of Sedgwick and Murchison will go down to posterity side by side, and bracketed together in the glorious list of benefactors of mankind through the advancement of science.

WYNDHAM GOOLD, ESQ., M.P. FOR THE COUNTY OF LIMERICK.

The death of the member for Limerick occurred, in London, on the 27th ult. He was on the eve of taking his departure for Malta and the East, when he was attacked by sudden indisposition, which proved fatal after a brief struggle.



THE LATE WYNDHAM GOOLD, ESQ., M.P.

Mr. Goold was the youngest son of the late Thomas Goold, Esq., of Dublin, many years Serjeant-at-law, and afterwards Master in Chancery, by Elizabeth, daughter of the Rev. Brinsley Nixon, Rector of Painstown, in the county Meath; was born at Dublin in 1815; was educated at Westminster; and in 1831 entered Trinity College, Dublin, as a fellow-commoner, and was a distinguished student, obtaining nearly every classical and several science honours during his course. In 1834 he took his degree of A.B., went abroad, and spent rather more than a year at Rome and Naples, and in travelling in Germany. On his return, in 1835, he entered as a student at Gray's Inn, was called to the Irish Bar in 1837, and joined the Munster circuit (of which his father had, for many years previous to his appointment as Master, been the leader); and in 1843 he was appointed Crown prosecutor for the city of Limerick, by Mr Attorney-General Blackburn, now Chief Justice of Ireland.

Upon the death of his father, in 1846, and the outbreak of the famine, Mr. Goold retired from the Bar, the state of the country requiring his entire attention to the landed property bequeathed him, and which he was still further called upon to exercise, by the melancholy demise, in 1848, of his eldest brother, the High Sheriff of the county Limerick.

Mr Goold was appointed a magistrate for the county of Limerick in 1848; and on the vacancy, in December, 1850, occasioned in the representation of the county by the death of Samuel Dickson, Esq., was invited to become a candidate for the representation; and was opposed by Captain Samuel Auchmuty Dick-on, nephew of the late member, and Mr. Michael Ryan, as candidate of the Tenant League. The election was under the old registration, and, after a sharp contest of four days, Mr. Goold was returned, December 14, by a majority of forty: the numbers being Goold, 238; Dickson, 199; Ryan, 138.

At the opening of Parliament, February 4th, 1851, the hon. member took his seat, and made his first speech in the House, in the debate on the Ecclesiastical Titles Bill, March 21st, in which he opposed the measure; arguing that, as to what seemed the main cause of complaint against it—the want of courtesy in his Bull—we had set the bad example, by refusing, unless by stealth, all political relations with Rome; and so, though we acknowledged the Sultan, and even paid tribute to Juggernaut, we ignored the Pope's existence. He admitted that the Pope had made the effort to put his church on a footing of equality with the Church of England, but denied that this constituted any political aggression. Even in its dwarfed proportions, he viewed the bill before the House as the perversion of the principles of civil and religious liberty, as calculated to hamper, irritate, and annoy the Roman Catholics of these countries; and holding, that, if passed, it would be a humiliating record of a period of unslighted excitement, he supported the amendment of the noble Lord the member for Arundel. The hon. member spoke with ease, was heard with attention, and on taking his seat, was loudly cheered; and has since several times addressed the House.

The family of the Goolds were originally from Devonshire, and were amongst the first settled under Strongbow, from whom, in return for their services, they received at that time an extensive grant of land in the county Cork, marked on ancient maps as "Goold's County."

Mr. Goold's father sat in the Irish Parliament for the borough of Kilbeggan, in Westmeath; was the associate and friend of Edmund Burke, Henry Grattan, Curran, and the almost unequalled brilliant circle of wits and orators, of whom the Right Hon. Lord Plunkett, late Lord Chancellor, now alone survives. In that Parliament, Mr. Thomas Goold was one of the most able opponents of the Legislative Union, which he resisted both in Parliament and out of doors, by speech and pen, to the last. Afterwards, he was one of the first to advocate the Repeal of Roman Catholic disabilities—a course which, in those days, was a complete bar to professional promotion; his knowledge of law, however, carried him over every difficulty. He was held the best read and soundest common law lawyer of the day; and having, before his call to the bar, squandered a fortune, he realised a much larger one by his profession, which he mostly invested in lands in the county Limerick.

Mr. Goold was brother of the Rev. Frederick Goold, Curate of Bradfield, Bury St. Edmunds, and brother-in-law of the present Earl of Dunraven, and of Sir Robert Gore Booth, Bart., M.P. for Sligo in politics Mr. Goold was a decided Liberal, and supported the present Administration.

The accompanying Portrait is from a Daguerréotype by Claudet.

The regiments of Russian Riflemen, which are about to be formed from the serfs belonging to the Imperial family, are to retain their ordinary costume, and are to be armed with the bowling-pieces which they have hitherto used.

THE PAST AND THE FUTURE OF THE SIEGE.

From Mr. Oxley's well timed publication, entitled, "Remarkable Sieges, from that of Constantinople, 1453, to that of Sebastopol, 1854; with Observations on Fortification and Siege Operations," which has just appeared, we extract one or two passages touching the rationale of a siege works, which will be read with interest at the present moment. In the chapter devoted to "Wellington's Sieges in the Peninsular War," are some observations upon the exceptional character of the modes operandi adopted on those occasions—a matter, perhaps, not much at present understood and which has certainly been often condemned by most of the best foreign strategists. After remarking that the occasions upon the segment into which Vauban's scientific rules had failed in recent years, especially with British commanders, the author says:—

Our favourite system has been that of making a breach from distant batteries, and then rushing to the assault, undaunted by the fire of the besieged; trusting for the result to the valour, determination, and power of endurance of the troops engaged. Many successes which have crowned these dashing exploits adorn many a page of history; but whilst neither those successes, nor the honour due to them, are disputed, it is proper to bear in mind the peculiar circumstances under which they occurred, before accepting them as precedents. Sir John Jones (in his "Journal of Sieges") devotes a note of a dozen pages to this point, besides frequently referring to it in other places. He states that "the extreme hazard and little eligibility of such hasty proceedings are less apparent to British officers than to those of other nations; but a strict investigation will shew that in their operations, wherever a distant and hasty attack has succeeded, it has been against places ill-constructed and weakly garrisoned, or else improperly defended, or basely surrendered." One simple but important circumstance now noticed by the able authority is, that the only conquests made by us in the last century, where fortified towns have been attacked, have been colonial; and that of the places attacked—as Cape Breton, with its capital Louisbourg, in 1758; the Isle of Belleisle, with the Castle of Palais, in 1761; and the Island of Cuba, with its chief city the Havannah, in 1762 the fortifications, though not ill-planned, were unquestionably defective, and the garrisons not such when compared with European fortresses, constructed or improved upon the modern system. The case of Belleisle, which Sir John (after Mr. Duncan and Lieutenant Grenfell) describes, occurred since the time he wrote, may also be included in the same category, where a fierce attack by storming has been successfully carried out.

The same system of attack commented upon in the above remarks, was that adopted by Wellington in his splendid but dearly-bought conquests in Spain; and these, perhaps, are the only circumstances in the whole military career, the merit of which has been criticised, and still is continued, with any show of reason. General Foy condemns the mode of these attacks in the most unqualified manner, denouncing them, in high technical and unphilosophical; and charges them as proofs of want of military acquirements in the General, and of want of professional knowledge in the Engineers. Sir John Jones, in some "Preliminary Observations," inserted in the second edition of his "Sieges," comes to the defence of the great British Commander, though in a manner to show that the peculiar strategy of the latter on these occasions was matter of necessity rather than choice. In reading the passage, one is certainly struck with astonishment, almost bordering upon incredulity, that up to the period in question—only forty years ago—the military establishments of the country were so incomplete as not to boast of a corps of Sappers and Miners for use in all naval operations. Yet, in this dilemma stood Wellington throughout the Peninsular campaign, or at least until the very close of it; the siege of St. Sebastian being the first occasion on which the skilled aid in question was included within the resources at his command.

We have no room for the extract from Sir John Jones. Mr. Ottley, however, proceeds as follows:—

The general impression with the public and with most writers upon this subject is, that Wellington was induced to this irregular and violent mode of attack simply with a view to save time, having decided for the moment where, and from the apprehension of the allied troops being relieved by a sally, or force of the enemy, not taken speedily. These are suggested as which open very important considerations, public, in issue the rules merit of the regular and irregular mode of attack, even in respects this question of time. Upon examination, the best authorities, backed by a formidable majority of examples, favour the claims of the regular and comparatively blameless mode of siege. From the authority on the subject, it may be sufficient to quote again Sir John Jones, who, in one of his notes, says:—"Viewing the reduction of Badajos, Ciudad Rodrigo, and Saint Sebastian, abstractedly as martial achievement, they must be admired as daring efforts of prowess and talent to rise superior to circumstances, applauded as brilliant instances of courage triumphing over art and crowned around deeds of arms, rules honourable to the army and to the national character. Lest, however, the éclat of these hardy deeds should per.suade a mode of attack adopted through necessity, it may be well that the sieges of Gibraltar, several of Gibraltar, several of Speaker Cornwallis, Lord Heathfield, Lord Rodney, and Lord Howe, with the siege of Sebastian being the first occasion on which the skilled aid in question was included within the resources at his command.

BOUVERIE (Captain Henry Montolieu), of the 1st Battalion Coldstream Guards, was the only son of the late Lieut.-General Sir Henry Frederick Bouverie, G.C.B., G.C.M.G., and cousin of the Earl of Radnor. He had scarcely completed his twenty-fourth year.

BUTLER (Captain Henry Thomas), Deputy-Assistant-Adjutant-General, was the elder brother of the hero of Silistria," Captain Charles George Butler, and son of the Hon. Major General Henry Edward Butler, Lieutenant-Governor of the Royal Hospital, Chelsea, and Colonel of the 57th Regiment, and grandson of the late Archbishop of Cashel, and brother of the present Lord Dunboyne. He was born in 1812, and married, in 1850, Jane-Elizabeth, eldest daughter of the late Captain Fraser.

CLUTTERBUCK (Ensign James Hulton), 63rd Regiment, was killed, whilst carrying the colours at the battle of Inkerman. He was eldest surviving son of Robert Clutterbuck, Esq., of Watford-house, Herts, and had not completed his twentieth year.

CONOLLY (Captain Arthur Wellesley), of the 30th Regiment, was son of the late Colonel Conolly, of Castletown, county Kildare, M.P., who succeeded to the estates of the Right Honourable Thomas Conolly, grandson of Speaker Conolly, viewed by many as the founder of the Castletown family. He married Miss Elizabeth Wesley, daughter of John Wesley, Esq., of Whaley Abbey, county Wicklow. He married, 30th January, 1851, Augusta Frederica Anne, daughter of the Right Hon. John Wilson Patterson, and left a son, born two years after.

DISBROWE (Captain Edward A.), of the Coldstream Guards died from a gunshot wound through the lungs at the battle of Inkerman, in the twenty-first year of his age. He was son of the late Sir Edward Crom well Disbrowe, G.C.H., of Walton hall, county Derby, by Anne, his wife, eldest daughter of the late Hon. Robert Kennedy.

DOWLING (Lieutenant William Henry), of the 20th Regiment, who was killed whilst most gallantly leading his company, was third son of the late Captain Joseph Dowling, R.M., St. Sauveur's.

ELIOT (Captain the Hon. Granville Charles Cornwallis), of the 1st Battalion Coldstream Guards, fell on the memorable field of Inkerman, in the twenty-sixth year of his age, honoured and lamented by all who knew him. Captain Granville Eliot was second son of his Excellency the Earl of St. Germans, Lord-Lieutenant of Ireland, by his Countess, Jemima, daughter of Charles, 1st Marquis Cornwallis, who was son and heir of the celebrated General of that name. Previously to his departure for the East, Captain Eliot acted as one of the Viscegal Aide-de-Camps and assistant Private Secretary to his father, and it was upon the news came that the gallant son of the Lord Lieutenant had fallen in the fierce and heroic struggle From more than one source did the young soldier derive his martial spirit. Descended in a direct line from the great Marquis Cornwallis, he rejoiced, among his collateral ancestors, the celebrated Duke of Ormonde, and the chivalrous Earl of Peterborough. The aristocracy of these realms, ever true to itself, and ever to emost in war as in peace, is full reserved at Inkerman. Several of some of our noblest families have fallen, and the long held commissions in the Coldstream Guards. Captain Mackinnon's grandfather was wounded at the famous siege of Gibraltar; his grandmother, Major-General Mackinnon, fell gloriously at the storming of Ciudad Rodrigo; and his uncle, Colonel Daniel Mackinnon, was wounded at Waterloo. The Mackinnons are an old and warlike Scottish race, deriving their descent from Finlon, the youngest son of Alpin, King of Scotland. In 1631, Lachlan Mackinnon, of Strathordil, Isle of Skye, was made a Knight Banneret by Charles II. on the field of Worcester. Captain Mackinnon married Charlotte Lavinia, daughter of Sir Dudley Hill, and leaves issue.

MALCOLM (Lieutenant Leonard Neill), 3rd Battalion Rifle Brigade, was killed at Inkerman, his youthful soldier, aged only nineteen, was second son of John Malcolm, Esq., of Lamcraig, Kent, by Isabella Harriet his wife, second daughter of the Hon. John Wingfield Strutt, Lord; and grandson of the late Neill Malcolm, Esq., of Poltalloch, county Argyll, by Mary-Anne his wife, daughter and heir of David Orme, Esq., M.D., of Lamorbey.

NEVILLE (Captain the Hon. Henry Aldworth), of the 3rd Battalion Grenadier Guards, was third son of the present Lord Braybrooke, was killed at the head of his Germans, and first cousin of Captain Granville Eliot. A descendant of the illustrious house of Neville, this young officer has met a soldier's grave, worthy of the great name he bore. One of his uncles, Captain the Hon. Henry Neville, of the Dragoons died in Spain, immediately after the battle of Talavera, in which he had been engaged.

NEWMAN (Captain Sir Robert Lydstone William), Bart., of the 3rd Battalion, Grenadier Guards, fell in the memorable and heroic resistance of the Duke of Cambridge's Brigade to an overwhelming Russian force. When at length the Guards were driven back from their redoubts, Sir Robert Newman and Mr. Greville, both wounded, were unable to retire with their regiments. Within a few minutes, the Guards retook the position, and the bodies of the two officers were found pile ed with innumerable bayonet wounds. Sir Robert Newman, aged thirty-two, was son and heir of the late Sir Robert William Newman, Bart., the representative of a very ancient Dorsetshi family; and succeeded at his father's death, in 1848, to the title, as well as the beautiful seat of Mamhead, in Devon.

FAKENHAM (Lieutenant-Colonel Edward William), of the 3rd Battalion Grenadier Guards, slain at Inkerman, was eldest son and heir of the late Lieutenant-General the Hon. Sir Hercules Robert Pakenham, a gallant soldier in the Peninsular war, and brother of the still more distinguished Sir Edward Michael Pakenham, G.C.B., who fell in action before New Orleans. He was also nephew of the late Duchess of Wellington. The Earl of Longford, who is a Captain in the 2nd Life Guards, is first cousin of the deceased officer; and Captain Arthur Conolly, who was also killed at Inkerman, was nearly related to him. In 1852 Lieutenant-Colonel Fakenham was elected knight of the shire for Antrim, and generally supported the Conservative party in Parliament. By his untimely death a vacancy is created in the representation of that county. Colonel Fakenham was just thirty-five years of age.

RAMSDEN (Captain Frederick Henry), of the Coldstream Guards, was killed on the 5th November, in the battle of Inkerman. He was eldest son of Captain Henry James Ramsden; nephew, maternally, of the present Earl of Ellenborough; and grandson of the late John Ramsden, fourth Bart. of Byrom, county York, by Louisa Susan, his wife, youngest daughter and co-heir of Charles Abbot, first Lord Colchester. His great-uncle, Sir John Ramsden, Knight of Byrom, fought gallantly, under the Royal banner in the great civil war. Captain Ramsden, whose death we record, was aged twenty-four.

SEYMOUR (Lieutenant-Colonel Charles Francis), of the Scots Fusilier Guards, Adjutant-General to the South Division, was the eldest son of the late Sir Horace B. Seymour, and grandson of Admiral Lord Hugh Seymour. Sir Horace served with distinction in the cavalry in the Peninsular War, and was Aide-de-Camp to the Marquis of Anglesey at Waterloo, where he was wounded, and had three horses killed under him. He was subsequently Equerry to William IV. His son entered the Guards in 1833. In the year 1846 and 1847 he served in the first Sikh War as principal Aide-de-Camp to the Commander of the Forces, General Sir George Berkeley. In 1852, on hostilities again breaking out, he accompanied Sir George Catheart to the same colony, as his military secretary; and in both wars displayed courage and intelligence which procured him the regard of the officers with whom he served. On returning to England in August last, at the close of the war in Africa Colonel Seymour's health had suffered so severely, that care and rest were recommended in his case; but he determined to accompany his old friend Sir George Catheart to the Crimea, and as Adjutant General of the Fourth Division in the operations in September and October, showed his usual ardour. His body was found on that of his General, after the battle of Inkerman; and he is described, although previously wounded, to have disma.nted to assist Sir George Cathcart when the latter fell, and to have been bayoneted by the Russians when attempting to raise him. Both fell an honoured grave. Lord Raglan, in a letter to the Duke of Newcastle, writes:—"Colonel Seymour, the officer in whom Sir George Catheart most confided, and who was one of the most promising young men in the army, fell by his side."

THOROLD (Lieutenant Henry), of the 33rd Regiment, was eldest son of Henry Thorold, Esq., of Oakwell, in the county of Lincoln. He had only attained his nineteenth year.

(To be continued.)

OBITUARY OF OFFICERS WHO FELL AT THE BATTLE OF INKERMAN.

AILLIX (Captain William Kent), on the Staff of the Second Division, was the second son of Charles Aillix, Esq., of Willoughby Hall, county Lincoln, by Mary-Elizabeth, his wife, second daughter of William Hammond, Esq., of St. Albans Court, Kent. The family of Aillix was founded by Dr. Peter Aillix, of Alençon, head of the Protestant Church in France, who emigrated on the Revocation of the Edict of Nantes, and became Treasurer of Salisbury Cathedral. His son, the Very Rev. Peter Aillix, Dean, who married Miss Elizabeth Wager, niece and coheiress of Admiral Sir Charles Wager, First Lord of the Admiralty, temp. George I., was great-great-grandfather of the gallant officer who fell at Inkerman.

BARKER (Lieutenant Frederick Grete), of the 68th Regiment, was second son of George Barker, Esq., of Sandlake, Berks.

BLAIR (Lieutenant-Colonel James Hunter), of the 1st Battalion of the Scots Fusilier Guards, entered that regiment in 1835 and became Lieutenant-Colonel in 1848. He was eldest son and heir-apparent of the present Sir David Hunter Blair, Bart., of Blairquhan, in Ayrshire, and derived descent, maternally, from the noble Houses of Tweeddale, El bank, and Cromarty. He was M.P. for Ayrshire, and one of the equerries of Lord Derby's Government. He had completed his thirty-seventh year.

BOUVERIE (Captain Henry Montolieu), of the 1st Battalion Coldstream Guards, was the only son of the late Lieut.-General Sir Henry Frederick Bouverie, G.C.B., G.C.M.G., and cousin of the Earl of Radnor. He had scarcely completed his twenty-fourth year.

BUTLER (Captain Henry Thomas), Deputy-Assistant-Adjutant-General, was the elder brother of the hero of Silistria," Captain Charles George Butler, and son of the Hon. Major General Henry Edward Butler, Lieutenant-Governor of the Royal Hospital, Chelsea, and Colonel of the 57th Regiment, and grandson of the late Archbishop of Cashel, and brother of the present Lord Dunboyne. He was born in 1812, and married, in 1850, Jane-Elizabeth, eldest daughter of the late Captain Fraser.

CLUTTERBUCK (Ensign James Hulton), 63rd Regiment, was killed, whilst carrying the colours at the battle of Inkerman. He was eldest surviving son of Robert Clutterbuck, Esq., of Watford-house, Herts, and had not completed his twentieth year.

CONOLLY (Captain Arthur Wellesley), of the 30th Regiment, was son of the late Colonel Conolly, of Castletown, county Kildare, M.P., who succeeded to the estates of the Right Honourable Thomas Conolly, grandson of Speaker Conolly, viewed by many as the founder of the Castletown family. He married Miss Elizabeth Wesley, daughter of John Wesley, Esq., of Whaley Abbey, county Wicklow. He married, 30th January, 1851, Augusta Frederica Anne, daughter of the Right Hon. John Wilson Patterson, and left a son, born two years after.

DISBROWE (Captain Edward A.), of the Coldstream Guards died from a gunshot wound through the lungs at the battle of Inkerman, in the twenty-first year of his age. He was son of the late Sir Edward Cromwell Disbrowe, G.C.H., of Walton hall, county Derby, by Anne, his wife, eldest daughter of the late Hon. Robert Kennedy.

DOWLING (Lieutenant William Henry), of the 20th Regiment, who was killed whilst most gallantly leading his company, was third son of the late Captain Joseph Dowling, R.M., St. Sauveur's.

ELIOT (Captain the Hon. Granville Charles Cornwallis), of the 1st Battalion Coldstream Guards, fell on the memorable field of Inkerman, in the twenty-sixth year of his age, honoured and lamented by all who knew him. Captain Granville Eliot was second son of his Excellency the Earl of St. Germans, Lord-Lieutenant of Ireland, by his Countess, Jemima, daughter of Charles, 1st Marquis Cornwallis, who was son and heir of the celebrated General of that name. THE FRENCH EMPEROR ON THE BATTLE OF INKERMAN.

The *Moniteur* of Sunday publishes the following letter from the Emperor to General Canrobert:—

Palace of St. Cloud, Nov. 24.

General,—Your report respecting the victory of Inkerman has excited deep emotion in my mind. Express, in my name, to the army my entire satisfaction with the courage it has displayed, with its energy in supporting fatigues and privations, and its warm cordiality towards our allies. Thank the Generals, the officers, and the soldiers for their gallant conduct. Tell them that I warmly participate with their misfortunes and the cruel losses they have experienced, and that my cousin and colonius shall be directed to the task of softening the bitterness of that grief. The glorious victory of the 5th, so dearly bought for, is a contest that the routed army of the enemy would not so easily have repaired its losses, and that Sebastopol would soon have fallen under our attacks; but the unexpected reinforce d has come to the enemy. Its presence has arrested the Russian army have, for the moment, arrested the course of our success. I approve of the resistance you made to the imminence of the troops who left to their position the sensible circumstances which would have involved too great a loss.

The English and French Governments direct their serious attention to the allied army in the Euxine. Already steam-boats are traversing the seas with considerable reinforcements. The increase of assistance will double your forces, and enable you to assume the offensive. A powerful diversion will also take place in the Baltic. I receive this assurance that from day to day in foreign countries public opinion becomes more and more favourable to us. In Europe should have seen without a murmur the long and painful struggle, dispayed by with so much energy, it is because it knows that we are only fighting for its independence. If France has resumed the position to which she was entitled, it is victory has also restored her upon our flag, to it—I declare it with pride—to the patriotism and to the unanimity of the army that I owe it.

I send my aide-de-camp, General De Montebello, one of my aides-de-camp, to convey to the army the rewards which it has so well merited.

In the meantime, General, I pray God to have you in His holy keeping.

NAPOLEON.

THE RUSSIAN ARMY ON THE 4TH NOVEMBER.—As I returned from Mauchava this evening I could see the Russians busily engaged in "hutting" themselves for the winter in one of the redoubts. They had erected posts were just lighting fires to cook the night. A solitary horseman, with the last rays of sunset glittering on his brass helmet, was perched on the only redoubt in our possess on, watching the movements of the enemy. Two saddled horses were picketed close by on their knees, while their horses browsed the scanty herbage on the second redoubt, at the distance of about 500 yards from our Dragoon camp. Now hundred yards in their rear were bodies of cavalry of twenty or thirty men each. A stronger body was stationed in loose order some four or five hundred yards further back. Six *pelotons* of infantry came behind the latter, and the rear of the Russians. Behind each *peloton* were six strong columns of cavalry *en echiquer* in reserve, and behind the intervals six batalions of grey-coated infantry, the ground consisting of stony rock, barren and desolate day and night, it is said, and occasionally they give us an alert by pushing on the valley. On looking more closely into their position, through the glass, it could be seen that they had fortified the high table land on their right, with an earthwork of quadrilateral form, in which I counted sixteen guns. It was the cross fire from the field guns, which had been brought to bear on their position, which did so much damage to the cavalry affair of the 25th October. In their rear is the gorge of the Black River, closed up by towering rocks and barren mountain precipices. On their left there is a succession of high ground, consisting of stony (so to speak) flat table land, each higher than the other, and at length attaining an elevation of 1900 feet. The little village of Kamara, perched on the side of one of these peaks, commands a view of our position, and is no doubt the headquarters of the Russian army in the valleys. The Russian troops are stationed all along these heights, and they have even posted their lines to the sea on the very high peaks of mountain chain to the south of our Marine camp. As their army in the valley is connected with their army in rebustopol by the valley and by the Inkerman road, it may be considered impregnable. They have drawn a *cordon militaire* round our position on the land side, and that we are besieged in our camp; having, however, our excellent friend, the sea, open on the west.—*Letter from the Camp of, Nov. 4.*

MISS NIGHTINGALE AND HER COLLEAGUES.—The Protestant sisters, with their female nurse, and hospital nurses, by the *Vectis*, arrived here on the 4th, after a very stormy passage. They were accompanied by Mr. and Mrs. Bracebridge, and Miss Nightingale, who will be missing at their post, already endeared to many by her arduous and charitable duties in the British hospitals at Scutari. There are altogether sixty one in number, and are composed of eight Protestant sisters (a few more than the rest being professional nurses. They have already got quarters at the hospital at Scutari, and may be seen there distinguishing their truly honourable and harassing duties, each wearing an apron and band, with "Scutari Hospital" embroidered upon it. I am happy to say that, since the Protestant Sisters have arrived, things have been getting very much into order. They may be said to have arrived here just in time to wait upon the sufferers brought in from the Crimea, and who were wounded in the battle of Inkerman. They arrived on the 4th at Constantinople, and the victory of the Allied arms was gained on the 5th. We may thank the Government for the prompt energy displayed in sending out the Sisters, who proved to be a real godsend. They are already attending upon the wounded who were brought down from Balaclava.—*Letter from Constantinople.*

THE NORTHERN COAST OF THE CRIMEA.

SKETCHED BY LIEUT. MONTAGU O'REILLY, R.N.

THE panoramic View which we engrave of the Coast of the Crimea, from Kupatoria to the mouth of the Alma, embraces not only the whole extent of the march of the Allied Army from the point of disembarkation to the scene of battle, but a few miles north from Lake Kimi-shli in the neighbourhood of which the English troops bivouacked so uncomfortably the first night after they landed. The town of Eupatoria presents an imposing appearance as seen from the sea. The Quarantine Station, the Military Commandants' palace, the Governor's palace, and the Barracks, and a number of Greek and Russian churches, stand out so prominently, and stretch along the shore at such a distance from each other, as to make the town seem much larger than it is in reality. As a great portion of the wheat raised in the Crimea is shipped from this port, and also large quantities of salt from saline lakes in the vicinity, this will account for the long line of store-houses which are seen along the coast to the south of Eupatoria. Where the store-houses terminate a crowd of windmills is seen, sufficiently numerous, one would think, to grind corn enough for a far larger population than that at Eupatoria.

The coast, along which the British troops are seen marching southwards, becomes gradually much bolder, and a range of hills is seen in the distance. Behind the Alma—the craggy banks of which are discovered here and there at the extreme right of the Panorama—the hills rise to a considerable height, and the most memorable hat is-field the mountain chain continues without interruption to Sebastopol, and onward to Balaklava.

THE BATTLE-EVE IN THE RUSSIAN CAMP.

A correspondent of *La Presse* communicates the following curious information respecting the proceedings in Sebastopol and the Russian camp, from the arrival of the reinforcements under General Dannenberg till the battle of Inkerman:—

The new reinforcements which have come to the assistance of the Russians had been already announced to the Commander-in-Chief from Perekop. It was known that this army, commanded by General Dannenberg—the most able, the most esteemed, of all the Russian Generals—and by the two Archdukes Michael and Nicholas, was composed of the Tenth, Eleventh, and Twelfth Divisions. Each of these corps consists of sixteen battalions of infantry, of artillery, the calculation of which, and of a force of cavalry, the number of which is not accurately known. Altogether 30,000 men have arrived at Sebastopol, post haste, having left their baggage in hand at Nicolaieff.

Having reached a forest, two leagues to the north-east of Sebastopol, the army halted, and the two Archdukes put themselves in communication with Prince Menschikoff, who paid them a visit. A council of war was held on the 3rd, at which the two Archdukes, Prince Menschikoff, and General Gortschakoff, were the only persons present. It was decided at the council that an attack should be made upon the Allied forces two days afterwards. The army was to advance towards Inkerman, to take possession of the fortified works which crown the heights and surround the plain of Inkerman. After having accomplished this, the army was to attack the eastern side of the French works towards Balaclava. At the same time a vigorous sortie was to be made to keep these operations. The point chosen was a space between the Fort Quarantine and the Southern Fort. A portion of the garrison of the city and of the Southern Fort was to attack and destroy the first and second French batteries, which are causing considerable damage in the town.

Matters being thus arranged, Prince Menschikoff reserved to himself the command of the town and the direction of the columns which were to make the sortie. The army and the reinforcements which had arrived were passed under the command of General Gortschakoff. The details of operation was to reserve also grands of troops from the garrison of Sebastopol. The Archdukes were placed on the staff. Measures were media ely taken to ensure the due execution of these plans.

On the 4th a solemn benediction took place. A solemn service was held at all solemnity by Bishops who had come with the Archdukes. At the end of the mass the troops were assembled, and one of the Archdukes addressed them. I should have been incapable as the Archduke was about to be communicate, had I not received them from a Russian officer, at present a prisoner at Balaclava; and if they had not been confirmed by special investigations which I made for the purpose of ascertaining their truth. The Bishop began by reminding the soldiers of their duty to the Czar and their country, and drew their attention to the two Archdukes who had come to share their dangers. He then spoke of their enemies, and gave an explanation of the battle of Alma calculated to flatter the self love and to elevate the courage of the Imperial army. The English came under the special notice of the Bishop. He said they were poor soldiers destitute of all energy, and hostile to the cause of God. His allusions to the French were a mere echo of the proclamation of the Czar at Moscow, in the year 1812. The most remarkable point, however, was the strange conclusion of the address:—"If you are conquerors," cried the Bishop, "great joy is in preparation for you. We know, from unimpeachable sources, that these English heretics have in their camp an enormous sum, which God will give into your hands. The sum amounts to thirty million roubles. The Emperor makes you a present of the third part of this enormous sum. The second third is reserved for the purpose of the rebuilding of Sebastopol, which you are on the point of relieving. The remainder will be divided amongst the Princes and officers who will throw down the commanders in the battle. Every one of you soldiers will receive 500 roubles. To the wounded the Emperor promises a month's pay and rations. As to those of you chosen by God to die, your superior will personally provide you to dispose of your share in the booty by will. Whatever may be the wishes of anyone of you, they will be respected sacredly." The speech was terminated by an appeal to the zeal of arms of the soldiers of Russia. A distribution of medals and coronets followed.

The officer who has given me these curious details is a person of high family, with a spice of Voltairianism in his composition; but he assures me that the scene was almost sublime. It was calculated to make a great impression on the soldiers, on whom the recollection of the battle of Alma had operated most prejudicially. Whatever may have been the cause, whether it were the exhortation of the Bishops, the presence of the Princes, greed for gold, or any other reason, there is no doubt that the Russians fought most admirably on the morrow.

WANT OF ORGANISATION AT CONSTANTINOPLE.—What is mos wanted here is a centralised, empowered, and competent direction for the affairs of the British army in general at Constantinople. A number of different departments, such as the superintendence of the transport service, the postal service, different departments of the hospitals service, with the purveyorship, medical department, and others, all seem to work very well separately, owing to the truly laudable zeal and activity displayed by the gentlemen at the head of these several departments; but something more than this is necessary in order to bring these several departments to act in unison and with a perfect general effect. For instance, the transport and landing of the troops in the Crimea, owing to misunderstandings between the Post-office authorities and the superintendent of the transport service, have suffered on several occasions; yet it cannot be said that any direct fault is to be attached to either one party or the other. The mail has more than once been landed too late for the French postal steamer; and the sick and wounded, who are highly prejudicial to the interests of the public in general, must continue to occur, unless a general and superior direction organ see the whole system of the British army carried out in detail. Then there is the difficulty of the language, and you have to make your inquiries through the medium of dragomen. It is therefore but just to allow that the establishment of a hospital calculated to supply the wants of Englishmen and suit requisites, indeed, a difficult task. At present every thing is going on satisfactorily at Scutari, and I have not heard any complaints made of overcrowding the transports that have come with the wounded from the Crimea.—*Letter from Constantinople, Nov. 13.*

A RUSSIAN AGENT.—The Russian General Count Orloff stopped at the Hotel de Geneve, Annecy, on the 16th ult., on his way from Switzerland, and left the next morning for Turin, passing through Albertville. The visit of the Czar's Aide de Camp to Switzerland and Italy, at the present moment, when all the Russian nobility have orders to return to their own country, gives rise to many conjectures. When Count Orloff was sent on a mission to Vienna and Berlin, the Prussian and German journals stated that he possessed the entire confidence of his master. Having failed in that mission, the Count has either fallen into disgrace, or is going to Italy on some new diplomatic intrigue.

CHESS

TO CORRESPONDENTS.

T. J. of Hesworth, S. E., and Others.—We repeat that Problem No. 537 is perfectly correct. If Black adopt the line of defence suggested, the solution is effected thus:—

1.	K to K 7th	
2. B to Q B 4th (ch)	K to K 5th (best)	3. B to Q 3rd. P moves
		4. B to Q 2 5th—Mate

LION Richmond.—Hardly decipherable and quite impracticable.

CHESSICUS, RUSH.—What is your 3 action of No. 537. You omitted to forward it.

S. F., of Brompton.—I Provoking, all of them. Thought not quite so far out mark. 2. The other Problem, by a Cambridge G aduate, cannot be solved in the way you propose, if Black for his first move, play K to Q Kt 3rd.

W. C. C.—A Pawn, if taken in passing must be so taken at the moment; it cannot be captured after one has removed from the board.

B. L. C.—When a player announces "out of his Pawns to the 5th square, he may claim for it any piece he pleases, no matter whether he have the piece on the board or not.

H. F. J.—Yes. S. Le ca.

Y. H. Yarmouth.—There are some Chess-book for beginners, and study that a year or two. We cannot afford either time or space to answer such frivolous questions.

IVAN M., of Utrecht.—Your solution is the true one.

O. D. L., Islington.—You have not looked very far back. See the notice to E. H., in our last Number.

H. E. N.—Under such circumstances the game must be drawn. Black is perfectly right in refusing to play any other move.

E. H. New-ch.—The key-move of Problem 536 is 1. Kt to Q 4th.

ISLINGTON.—You appear to have hit upon the key-move in Problem No 561, but not to know how to describe them. See our Rules.

SOLUTIONS OF PROBLEM No. 560, by Ivan M of Utrecht, Jobson, T. W., N., S. S., Peter, Fred., T. of Derby, W. de L., A. M., Fakenham, French Student, F. W. &c., are correct.

SOLUTION OF PROBLEM No 563, by Derwent, L. L., L. A. M., Fakenham, are correct.

SOLUTIONS OF ENIGMAS, by Derwent, F. R. of Norwich, are correct. All others are wrong

SOLUTION OF PROBLEM No. 561.

WHITE.	BLACK.	WHITE.	BLACK.
1. R to Q 8th	R takes R, or (a)	2. Mates.	
2. Q to K 6th	Anything		

(a) 1.	Q takes Kt	2. Mates.
2. R to Q 5th (double ch)	K to K 6th	

SOLUTION OF PROBLEM No. 562.

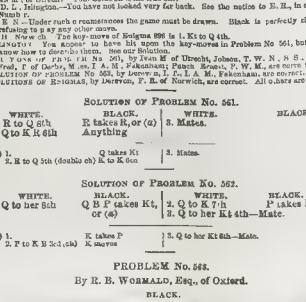
WHITE.	BLACK.	WHITE.	BLACK.
1. Q to her 5th	Q B P takes Kt, or (a)	2. Q to K 7th	P takes Kt
		2. Q to her Kt 4th—Mate.	

(a) 1.	K takes P	2. Q to her Kt 6th—Mate.
2. P to K B 3rd (ch)	K moves	

PROBLEM No. 565.

By R. B. WORMALD, Esq., of Oxford.

BLACK.



WHITE.

White to play, and give mate in three moves.

CHESS IN THE PROVINCES.

In the two following Games Mr. STAUNTON gave the odds of the Pawn and two moves to the Rev. T. GORDON ("Gamma"), of the Edinburgh Chess club.

(Remove Black's K B Pawn from the board.)

WHITE ("Gamma.")	BLACK (Mr. S.)	WHITE ("Gamma.")	BLACK (Mr. S.)
1. P to K 4th		18. K to K sq	B takes Kt
2. P to Q 4th	Q Kt to Q B 3rd	19. P takes B	Q to K 6th (c)
3. P to Q 5 h	Q Kt to K 4th	20. Q to Q B 2nd (*f*)	Q to K R 3rd
4. P to K 5 4th	Q Kt to K B 2nd	21. Q to K 4th	Q R to Q B sq
5. K Kt to K B 3rd	P to Q 3rd	22. Q R to B sq	P to R 4th
6. P to K 5 5th	Kt to K B 3rd	23. Kt to Q 4th	Q to K Kt 3rd
7. B to Q 3rd	P to Q B 3rd	24. Kt to K B 5th	P to K R 4th
8. P to Q B 4th	P to K Kt 3rd	25. Q to Q Kt sq (g)	Kt to Q 6 q
9. Q Kt to Q B 3rd	K Kt P takes P	26. Q to Q sq	Kt to Q Kt 2nd
10. K P takes P	P to K Kt sq (a)	27. P to Q B 3th	P to K R 5th
11. Q to K 2nd	K Kt to K Kt 5th	28. P takes Q P (h)	R to Q sq
12. B to K B 4th	P to K Kt 2nd	29. B takes K R P	Kt takes Q P
13. P to Q B P (b)	P takes P	30. B takes R	Kt takes R
14. Q R to Q sq	Q to Q R 4th (c)	31. B to Q B 7th	Kt to K Kt 6th (ch) (i)
15. Castles (d)	Q B takes P		
16. R takes B	Q takes B	32. K to Kt sq	Kt takes R
17. B to K Kt 3rd	Q to Q B 4th (ch)	33. Q to Q 8th (ch)	—and wins

(a) A very unusual mode of defending the Pawn and two moves attack. It forms, indeed, a curious attack, but leaves the Black awkwardly posted for a long time.

(b) To prevent the adversary from Castling.

(c) Threatening to win the K Pawn, and preparing also to Castle, or at least remove his King into safer quarters.

(d) Handsome in appearance, but perhaps in reality the best and safest step he could have taken.

(e) Leaving the Queen. He should rather have played K Pawn to K 4th, to enable him, if possible, to Castle.

(*f*) Black at least move threw the attack once more into his opponent's hands, who now maintains it with spirit and beauty to the end.

(g) An ingenious flank movement, and very difficult to meet.

(h) Well played.

(i) By playing Q to K B 3rd he might still have made some fight; but White, with careful play, must ultimately have won the day.

BETWEEN THE SAME ANTAGONISTS.

(Remove, as before, Black's K B Pawn from the board.)

WHITE ("Gamma.")	BLACK (Mr. S.)	WHITE ("Gamma.")	BLACK (Mr. S.)
1. P to K 4th		8. P to Q B 3rd	Kt to Q B 3rd
2. P to Q 4th	P to K 3rd	9. Kt to K Kt 5th	
3. B to Q 3rd	Q to K 2nd	(a)	P takes P
4. P to K B 4th	P to Q 4th	10. P takes P	Q Kt takes
5. P to K 5th	K Kt to K 2nd	11. B takes P (ch)	P takes B
6. K Kt to K B 3rd	P to K Kt 3rd	12. Q takes Kt	Kt to K B 4th
7. Castles on the K side	P to Q B 4th	13. K to Q sq (b)	Q to Q 6th (ch)
		14. K to K sq	Kt mates

(a) Black has already a safe, well-opened game, and this unfortunate move enables him to improve his advantage greatly.

(b) A grave oversight. White's game, however, at this point was not to be recovered.

CHESS ENIGMAS.

No. 900.—By J. B., of Bridport.

White: K at Q B 3rd, K at K B 6th, Bs at Q 5th and 6th.
Black: K at K 4th; Ps at K R 2nd, Q 2nd, and Q Kt 3rd.
White to play, and mate in four moves.

No. 901.—By G. M'A., Aberdeenshire.

White: K at Q K 8th, Q at Q B 2nd, B at Q B sq., Kt at K 5th; Ps at K 4th, Q B 3rd, and Q 4th.
Black: K at his 2nd, P at Q K 4th.
White playing first, to mate in three moves.

WELLINGTON TESTIMONIAL.—The governors have accepted the free offer of Mr. R. Gibson, of twelve acres of land near Wokingham, as the site on which to erect the Wellington Colleges, with liberty to take 100 additional acres, at the price of £10 per acre. The professors of the Military College of Sandhurst will thus have easy access to the new establishment, the distance between them being about two miles. Out of £110,000 subscribed, £100,000 has been actually received. Of this sum £80,000 has been lent on mortgage at 4 per cent, leaving £25,000 for the purchase of land, and the erection of a suitable building, which, it is hoped, will be ready for the reception of pupils in eighteen months from this time.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Sir Hamilton Seymour has courteously declined the invitation of the Marylebone electors to bring him forward to fill the vacancy caused in the representation of that borough by the death of Lord Dudley Stuart.

The *St. Petersburg Journal* of the 19th November contains a translation—or extract—of Mr. Bright's letter to Mr. WATKIN, which has given great satisfaction at St. Petersburg.

The day on which the engagement at Balaclava took place is St. Cristin's Day, the anniversary of the memorable battle of Agincourt.

The French Government has just sent off from Marseilles 60,000 pairs of gaiters, hand with fur, for the army of the East.

Writs have issued from the Hanaper Office for electing a temporal Peer of Ireland, in the room of the late Baron Dunally.

A Congress of several Governments of Germany, and particularly Austria, Prussia, and Bavaria, is now assembled at Vienna, to consult on the means of creating a uniform gold coinage for all the States of the German Confederation.

Sir Edmund Head, the new Governor of Canada, arrived at Quebec on the 18th ult. Lord Elgin was to leave in a few days, for England.

The *Giornale di Roma*, in enumerating the prelates that have been arriving at Rome for some time past, mentions Monsignor Razzolini, Roman Catholic Bishop of Hong-Kong.

In consequence of the difficulty in obtaining rye, the contractors have been released from their engagements, and the Russian prisoners in Plymouth are to be supplied with wheaten bread.

The biscuit-making establishment of Messrs. Packham and Co., at Eu, has in course of execution an order from the Government for 9600 chests of biscuits, weighing together 500,000 kilogrammes.

A soirée, "in commemoration of Poland's struggle for independence in 1830, from under Russian oppression," was held in the library of the Manchester Athenæum on Wednesday.

The Turkish Government has arranged for the free export of grain from the Danubian Provinces in the spring.

The Committee of Privy Council on Education have refused to countenance the employment of the pupil teachers under their control in school-rooms not having boarded floors.

The King of Prussia has presented Herr Bernhardt, a Bavarian portrait-painter, with the Order of the Red Eagle.

The new battery in front of the Mersey, north-west of the Huskisson Dock, Liverpool, from the design of Captain Westmacott, is ready for the reception of guns and ordnance-stores.

The French Government has decided that a railway shall be formed between Calais and Boulogne-sur-Mer, and surveys for it are immediately to be commenced.

Extraordinary as it may appear in these railway times, a new canal is about to be cut in the heart of the manufacturing districts. The object is to unite Oldham with Manchester by canal.

The Minister of Marine at Turin has informed the Chamber of Commerce at Genoa that the waters of Sardinia are infested by three bands of pirates, under the command of three chiefs, named Moro, Nicolaira, and Carajut.

On Sunday evening last an extensive cotton-mill, belonging to Mr. Thomas Bromfield, at Middleton, in Lancashire, forty yards long by twenty-six wide, and four stories and two attics in height, was totally destroyed by fire, with all its contents.

Several ladies of high rank in Madrid are endeavouring to get up a society for preventing cruelty to animals, and even, it is said, to preach a crusade against bull-fights.

The Right Hon. W. G. Hayter has returned from the Continent, and resumed his official duties at the Treasury.

The voters of New Orleans had decided, by a majority of five thousand, in favour of granting licenses to sell ardent spirits.

The *Chevalier* steamer, employed in the West Highland trade, was cast away upon a well-known conspicuous rock in the Sound of Jura, at an early hour on Friday morning, the 24th ult.

The individuals compromised in the attempt to land at Spezia have been sentenced. The ringleader, Giacomo Ricci, is banished for four years, and the other men for three years.

Advices from Port-au-Prince mention that the Government had concluded a treaty with the French Consul-General for the debt due from Hayti to France.

The Commissioners of Inland Revenue have determined in all cases where parties have been assessed for dogs, and have neglected to pay the tax, to cause the defaulters to be committed to prison.

Queen Christina passed, on the 20th instant, through Turbes, on her way to Dax, whence her Majesty was to proceed by the railroad to Paris.

A private in the 93rd Highlanders, writing to his father, in Caithness, informed him that the sheet of paper forming his letter had cost him 8s.

M. Ivanhoff, former Secretary of the Russian Embassy, whose presence was only tolerated in Paris, has received orders to quit France. A similar order has been given to all the Russians, even the servants of that nation, still residing in France.

A treaty for the reciprocal extradition of criminals is spoken of as likely to be concluded between Great Britain and Prussia, similar to that which has lately been concluded between Prussia and the United States of North America.

On Saturday, the ex-Sheriff of Newcastle, Mr. John Gibson, committed suicide by cutting his throat. The unfortunate gentleman had been ailing for several months, and latterly he had suffered great mental despondency.

Mr. Gordon, the newly-appointed Minister to Switzerland, has left town for Berne, to assume his diplomatic duties.
